Protecting America's Vanishing Animals.

The question of the preservation of such characteristic animals of the United States as are now in danger of extinction is one which has attracted widespread attention among naturalists and students during the past few years, but it was not until its last session that Congress decided that the problem was one of National importance. In January, 1902, however, a resolution was passed instructing the Secretary of the Interior and the Secretary of Agriculture to investigate the matter and report upon the desirability of Government interposition in the case of the buffalo. As the result, just before the close of the Fifty-seventh Congress, Secretary Hitchcock submitted a report in which he not only furnished the figures in regard to the number of buffalo still in existence, but presented a definite plan for their future protection.

"In my judgment," he said, "steps should be taken by the United States for the preservation from extinction of the buffalo or American bison, and with that end in view I have submitted to Congress an estimate of $30,000 for the purchase of buffalo and the corralling of them in the Yellowstone National Park. With these animals in a national reservation, under Government supervision, it is believed that a herd of pure-blooded American bison may be domesticated, which will increase in numbers, and the herds now running wild in the Park may be also benefited by the introduction therein of new blood."

The table submitted by the Secretary of the Interior was as follows:

STATISTICS OF AMERICAN BUFFALO.

Location.	Running Wild. Pure Bloods.	In Captivity. Pure Bloods.	In Captivity. Hybrids.	Location.	Running Wild. Pure Bloods.	In Captivity. Pure Bloods.	In Captivity. Hybrids.

Nebraska	....	2	....	In United States			1,143
Nevada	....	1	....	In the world			1,949
New Hampshire	....	110	....				

The report was referred to the Committee on Agriculture and Forestry and will probably be sent to Congress during the next session, after which, if the suggestion regarding the buffalo is adopted, those who are interested in the preservation of America's vanishing fauna will submit similar resolutions for the better protection of the grizzly bear, beaver, elk, moose, mountain sheep and goat, and other contemporaneous animals that will soon become as extinct as the mammoth if something is not done to check their destruction.

Mineral Production of the United States.

In 1901, for the second time, the total value of the mineral products of the country exceeded $1,000,000,000, the exact amount being $1,086,529,521. As heretofore iron and coal were the most important of our mineral products, the greater part of the iron ore of the country continues to come from the Lake Superior region, which, in 1901, produced 74 per cent of the total quantity mined. The table below gives the production of the more important minerals for 1901.

The production of aluminum in 1901 amounted to 7,150,000 pounds, the Pittsburg Reduction Company being the sole producer.

Of bauxite there was 18,905 long tons produced, Georgia yielding the greater bulk of the production. It is used mainly for the manufacture of aluminum.

Platinum to the amount of 1,408 ounces was produced, in connection with which there was obtained 253 ounces of iridium, a metal closely allied with platinum in its properties.

The production of quicksilver amounted to 29,727 flasks of 76½ pounds, valued at 1,382,305, an increase of $79,719 over 1900.

The only nickel and cobalt produced during the year were by-products from the smelting of lead ores at the mines at La Motte, Nev., and amounted to only 6,700 pounds of nickel and 13,360 pounds of cobalt oxide, leaving the country largely dependent upon imports for its supply.

Antimony, used principally for making alloys, is produced in this country to the amount of only a few hundred tons.

But 319 tons of bismuth were mined in this country in 1901, Colorado supplying the entire output.

For a number of years the United States has been dependent upon foreign countries for its tungsten ores. Recent discoveries have shown, however, that they can be produced here in quantities sufficient to more than supply the home demand.

Minerals containing titanium are found widely distributed and in such large quantities as to make titanium a relatively abundant element. The recent discovery of large deposits of rutile in Virginia has brought to the attention of the ceramic and steel industries the commercial possibilities of this ore of titanium, which has hitherto been little used in this country. It is useful in ceramics and the manufacture of steel. Under favorable conditions a market for the American product will undoubtedly develop, but it is doubtful if the demand, for the uses now known, will be very great.

Of asphaltum and bituminous rock the product in 1901 was 63,134 short tons, valued at $555,335.

In the production of stone, which is given in the table, are included granite, limestone, slate and marble. Every state in the Union, with the exception of Louisiana and Mississippi, produces more or less stone.

In the year 1901 the production of Portland cement amounted to 4,229,205 barrels, 50 per cent over that of the previous year, valued at $12,532,360. Of natural rock cement there was produced 7,084,823 barrels, valued at $3,056,278, and of 272,680 barrels, value $198,151.

The production of precious stones in the United States is very limited, but of semi-precious stones a considerable quantity is found. The figures of value for 1901 are as follows: Diamond, $100; sapphire, $90,000; ruby, $500; beryl, $5,000; emerald, $1,000; tourmaline, $15,000; peridot, $500; crystal quartz, $10,000; smoky quartz, $1,000; rose quartz, $150; gold quartz, $2,000; rutilated quartz, $50; tourmalinated quartz, $1,000; amethyst, $500; agate, $1,000; moss agate, $500; chrysoprase, $1,500; silicified wood, $7,000; garnet, $100; rhodolite, $21,000; garnet, $1,000; Amazon stone, $200; turquoise, $118,000; utahlite, $250; chlorastrolite, $3,000; nesolite, $1,000; pyrite, $3,000; malachite, $100; rutile, $2,000; cattlinite, $2,000; fossil coral, $100; arrowpoints, $500. Total, $289,050.

The talc and soapstone produced in 1901 amounted to $28,643 short tons, valued at $424,888.

The abrasive materials found in this country include oilstones, whetstones, grindstones, pulpstones, buhrstones, millstones, pumice, infusorial earth, tripoli, crystalline quartz, garnet, corundum, emery and carborundum. The amount of these materials used is greater than ever before, and while the production of some of them is on the decline, that of others is increasing. Their value in 1901 was $1,194,772.

Progress in the development of the phosphate rock industry showed considerable improvement in 1901. The total produced was 1,483,723 long tons, having a value of $5,316,403.

Greensand marl is found most extensively in New Jersey, although a small portion comes from Virginia. The total estimated production for the year was 99,880, of a value of $124,880.

The production of sulphur during the year was 7,690 short tons, valued at $223,430, which was derived from Nevada, Idaho, Utah and Louisiana, in the order of importance of their output.

The prosperous trade of the year 1901 stimulated the production of pyrite to the largest quantity yet recorded, amounting to 234,825 long tons, valued at $1,024,449.

Gypsum was produced to the amount of 659,659 short tons, the value being $1,577,493.

Borax is mainly derived from the colemite deposits of California, and the output in 1901 was 17,887 short tons of crude and 5,344 tons of refined, with a total value of $1,012,118.

Mica has been found in many of the States, but in only a few so as to be of any commercial value. There was put out during the year 360,060 pounds of sheet, valued at $98,859, and 2,171 tons of scrap, worth $19,719.

Fluorspar is also widely distributed throughout the country, but the same conditions obtain as with mica. The quantity obtained in 1901 was 19,586 short tons, valued at $113,803.

The production of asbestos in the United States during 1901 was confined to the mountains at Sall Mountain, white County, Ga., with a little from Riverside County, Mass. It amounted to 747 short tons, valued at $13,498.

The production of Crystalline graphite during the year was 3,967,612 pounds, valued at $135,914.

The aggregate production of natural mineral paints for the year was 107,960 short tons, having a value of $4,509,962.

Barytes is found in many places, and the output for the year was 49,070 tons, valued at $157,844.

The greater part of our fuller's earth comes from the vicinity of Quincy, Fla., and the total production was 14,112 short tons, the valuation being $96,835.

The production of flint in 1901 amounted to 34,420 short tons, valued at $149,297.

Of feldspar there was a production of 34,741 short tons, the value being $220,422.

Of chromite we produced 368 long tons, valued at $5,790.

An increased demand for monazite was apparent during the year 1901, and there was produced 748,736 pounds, valued at $59,262.

The production of magnesite is confined to California, and amounted in 1901 to 13,172 short tons, valued at $43,057.

Of mineral springs there were 659 reported in 1901, with an output of 55,771,185 gallons, valued at $7,586,902.

The United States produces only about 13 per cent of the manganese ores consumed in this country. The production by States in 1901 was as follows: Alabama, 17 long tons, value $1,111; Arkansas, 91, $657; California, 610, $3,610; Georgia, 4,074, $24,674; Missouri, 28, $280; Tennessee, 400, $3,287; Utah, 2,500, $31,250; Virginia, 4,275, $52,853; totals, 11,995, $116,722.

The following tables give the production of minerals in detail. Owing to the general strike in the coal regions of Pennsylvania, the production of coal for 1902 will undoubtedly fall considerably short of that for 1901, but will probably come back to a normal basis during the next year. The product of natural gas is decreasing, owing to natural causes, and scientists say it is only a question of time when the deposits will be exhausted, and we shall obtain no more gas from this source. Large sums of money have been expended in developing the sources of this supply, but they have been returned, with liberal interest to the exploiters, so that there will be no real loss to complain of. The same has been said of petroleum, but new fields seem to be made apparent as the old decrease in production, so that there is no immediate prospect of a substantial decrease in this supply. It will be noted that the only States in the Union having no mineral resources are Louisiana and Mississippi, although there are several which have nothing of the sort except building stone.

Distribution of Coal in the United States.

Coal is found in commercial quantities in twenty-seven of the States and Territories of the United States and in Alaska. The following table, which shows the areas of coal-bearing formations in the several States and the rank of the coal-producing States in area and production, was prepared by Charles Willard Hayes and published by the United States Geological Survey:

RANK OF COAL FIELDS AND COAL-PRODUCING STATES IN AREA AND PRODUCTION.

Coal Fields and State or Territory.	Area of Coal Bearing Formations. Sq. Miles.	Probably Per cent. Productive.	Rank of Field and State in Area.	1900. Production.	1900. Average Price Per Ton.	1900. Per cent. of Total Production.	1900. Rank in Production.

*In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under an act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

†Exclusive of gold, silver, currency certificates, and Treasury notes of 1890 held in the Treasurer's cash, and including bonds issued to the several Pacific railroads not yet redeemed.

COIN AND PAPER CURRENCY IN CIRCULATION NOVEMBER 1, 1902.

	General stock of money in the United States.	†Held in Treas. as assets of the Government.	Money in circulation.	
			Dec. 1, 1901.	Dec. 1, 1902.
Gold coin (including bullion in Treasury)	$1,230,672,772	$263,542,933	$632,001,746	$631,410,968
*Gold certificates	.....	.....	282,298,349	345,952,024
Standard silver dollars	545,527,822	4,840,226	73,210,737	78,700,912
*Silver certificates	.....	.....	447,852,192	463,304,840
Subsidiary silver	98,809,323	6,909,608	84,176,421	93,082,868
Treasury notes of 1890	25,790,000	47,722	40,012,622	24,922,515
United States notes	346,681,016	3,041,934	339,841,095	343,788,541
National Bank notes	380,476,334	13,468,852	351,363,074	371,552,495
Total	$2,627,963,267	$291,851,275	$2,250,256,230	$2,352,710,158

Population of the United States, November 1, 1902, estimated at 79,572,000; circulation per capita, $29.36.

*For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government.

†This statement of money held in the Treasury as assets of the Government does not include deposits of public money in National Bank Depositories, to the credit of the Treasurer of the United States, and amounting to $139,487,590.17. For a full statement of assets see Public Debt Statement.

Coin and Paper Circulation of the United States, 1860 to 1902.

(From the report of the Secretary of the Treasury.)

Note.—Specie payments were suspended from January 1, 1862, to January 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about $25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1875, inclusive. In 1876 subsidiary silver again came into use, and is included in this statement, beginning with that year. The coinage of standard silver dollars began in 1878, under the act of February 28, 1878. Specie payments were resumed January 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date. For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government. This table represents the circulation of the United States as shown by the revised statements of the Treasury Department for June 30 of each of the years specified.

Year.	Coin, including bullion in Treasury.	United States notes and bank notes.	Total money	Coin, bullion and paper money in Treasury, as assets.	Circulation.	Population.	Circulation per capita.

Incidental Coinage at the Philadelphia Mint.

During the fiscal year of 1901 the mint at Philadelphia coined, in addition to the domestic coinage, 225,000 gold pieces of the value of $349,014.42 for the Government of Costa Rica. Besides this coinage, which was done under contract, the Philadelphia mint produced 1,041 medals of gold, silver and bronze, for various purposes. A number of these were school medals, some were single medals awarded for particular deeds, while the greater part were medals authorized by the Government for presentation in the various departments of Life Saving, the Army and the Navy. The profit on the medals and proof coins amounted to $1,626.34.

Internal Revenue Collectors.

The following list of internal revenue collectors and the districts to which they have been assigned was prepared for The American Almanac by the Collector of Internal Revenue:

District.	Name of Collector	Address.	District.	Name of Collector	Address.
Alabama	Jos. O. Thompson	Birmingham.	Montana	E. H. Callister	Salt Lake City, Ut'h
Arkansas	F. W. Tucker	Little Rock.	Nebraska	E. B. Stephenson.	Omaha.
1st California	J. C. Lynch	San Francisco.	New Hampshire	J. A. Wood	Portsmouth.
4th California	H. C. Bell	Sacramento.	1st New Jersey	Isaac Moffett	Camden.
Colorado	F. W. Howbert	Denver.	5th New Jersey	H. C. H. Herold.	Newark.
Connecticut	W. F. Kinney	Hartford.	New Mexico	A. L. Morrison	Santa Fe.
Dakota	H. Ellerman	Aberdeen, South (North and South)	1st New York	E. B. Jordan	Brooklyn.
Florida	J. E. Lee	Jacksonville.	2d New York	C. H. Treat	New York, N. Y.
Georgia	H. A. Rucker	Atlanta.	3d New York	F. Eidman	New York, N. Y.
Hawaii	R. H. Chamberlin	Honolulu.	14th New York	J. G. Ward	Albany.
1st Illinois	H. L. Hertz	Chicago.	21st New York	C. C. Cole	Syracuse.
5th Illinois	P. G. Rennick	Peoria.	28th New York	A. D. Sanders	Rochester.
8th Illinois	I. R. Mills	Springfield.	4th North Carolina	E. C. Duncan	Raleigh.
13th Illinois	W. H. Powell	East St. Louis.	5th North Carolina	H. S. Harkins	Asheville.
6th Indiana	A. E. Nowlin	Lawrenceburg.	1st Ohio	B. Bettmann	Cincinnati.
7th Indiana	J. R. Bonnell	Terre Haute.	10th Ohio	G. P. Waldorf	Toledo.
3d Iowa	J. U. Sammis	Dubuque.	11th Ohio	J. C. Entrekin	Chillicothe.
4th Iowa	H. O. Weaver	Burlington.	18th Ohio	F. McCord	Cleveland.
Kansas	J. M. Simpson	Leavenworth.	Oregon	D. M. Dunne	Portland.
2d Kentucky	E. T. Franks	Owensboro.	1st Pennsylvania	William McCoach.	Philadelphia.
5th Kentucky	J. A. Craft	Louisville.	9th Pennsylvania	H. L. Hershey	Lancaster.
6th Kentucky	G. W. Lieberth	Covington.	12th Pennsylvania	T. F. Penman	Scranton.
7th Kentucky	S. J. Roberts	Lexington.	23d Pennsylvania	D. B. Heiner	Pittsburg.
8th Kentucky	James Denton	Danville.	South Carolina	M. J. Jenkins	Columbia.
Louisiana	William E. Howell	New Orleans.	2d Tennessee	A. J. Tyler	Bristol.
Maryland	P. L. Goldsborough	Baltimore.	5th Tennesee	J. E. McCall	Nashville.
3d Massachusetts	J. D. Gill	Boston.	36 Texas	Webster Flanagan	Austin.
1st Michigan	Charles Wright	Detroit.	4th Texas	P. B. Hunt	Dallas.
4th Michigan	S. M. Lemon	Grand Rapids.	2d Virginia	Asa Rogers	Richmond.
Minnesota	F. Von Baumbach.	St. Paul.	6th Virginia	Park Agnew	Alexandria.
1st Missouri	Ben Westhus	St. Louis.	West Virginia	T. E. Davis	Parkerburg.
6th Missouri	F. D. Roberts	Kansas City.	1st Wisconsin	Henry Fink	Milwaukee.
			2d Wisconsin	J. G. Monahan	Madison.

Pension Bureau Statistics.

As a result of the various wars in which it has been engaged, the United States Government has at the present time a list of nearly one million persons to whom it pays annual pensions. This army of pensioners includes survivors of all the wars excepting the War of the Revolution, soldiers and sailors who are in receipt of service pensions granted for service rendered prior to 1858, together with the widows of soldiers and sailors, for whom provision is made under certain conditions. The exact number is 966,446, of which number 4,635 reside outside of the United States. The total expenditure in pensions during the fiscal year ended June 30, 1902, was $137,449,742.17. Since the pension system was established it has cost the Government a total of $2,992,569,019.27, exclusive of the cost of establishing Soldiers' Homes. The Bureau employs a force of 1,741 employés, which, with the employés of the agencies, 432 in number, makes a total of 2,173. The total cost of administration for the year 1901-1902 was $3,358,525.12. More than one-half of the pensions paid are $10 per year or less; the average value of all the pensions allowed is $132.23. The number of applications for pensions examined during the year was 188,217.

THE BUREAU OF PENSIONS.

The fiscal year ending June 30, 1902, shows the following gain in the number of persons listed on the pension roll:

By act of the Bureau	43,661
By special act of Congress	291
	43,952

The removals from the roll were for the following causes:

By death	37,145
By remarriage	969
By legal limitation	1,369
By failure to claim	1,635
Other causes	1,123
	42,241

THE PENSION ROLLS.

The number of pensioners upon the rolls July 1, 1902, and for the four preceding years, respectively, is as follows:

Wars.	1902.	1901.	1900.	1899.	1898.
War, Revolutionary—					
Widows	4	4	4	4	5
Daughters	4	5	7	7	7
War 1812—					
Survivors	1	1	1	1	3
Widows	1,317	1,527	1,742	1,998	2,407
Indian wars—					
Survivors	903	1,086	1,370	1,656	2,019
Widows	3,320	3,479	3,739	3,999	4,067
Mexican war—					
Survivors	6,528	7,568	8,332	9,204	10,012
Widows	8,017	8,109	8,151	8,175	8,143
Service after March 4, 1861—					
General laws—					
Army invalids	277,965	293,186	305,980	316,834	327,080
Army widows	87,046	86,544	88,463	90,597	92,545
Navy invalids	4,360	4,449	4,622	4,721	4,833
Navy widows	2,293	2,293	2,314	2,293	2,309
Army nurses	634	650	646	653	655
Act June 27, 1890—					
Army invalids	426,188	422,481	415,265	405,987	399,366

Patent Office Statistics.

THE ANNUAL REPORT.

The receipts of the Patent Office during the year ending December 31, 1901, amounted to $1,449,398.16; the expenditures were $1,297,385.64, leaving a surplus of $152,012.52.

Summarized, the Patent Office business was as follows:

No. of applications for patents for inventions.	43,973	No. of patents issued, including designs.....	27,292
No. of applications for patents for designs..	2,361	No. of patents reissued.....	81
No. of applications for reissues of patents..	115	Total	27,373
No. of caveats filed	1,842	No. of trade-marks registered.....	1,928
No. of applications for registration of trade-marks	2,410	No. of labels registered.....	878
No. of applications for registration of labels..	1,064	No. of prints registered.....	159
No. of applications for registration of prints.	233	Total	2,965
No. of disclaimers filed.....	4	No. of patents expired during the year.....	19,147
No. of appeals on the merits.....	910	No. of patents withheld for non-payment of final fees	4,111
Total No. of applications, etc., requiring investigation and action.....	52,912	No. of applications allowed awaiting final fees	8,369

Both in the matter of patents issued and in trade marks registered the number during 1901 represented the largest annual issue in the history of the office.

In proportion to population more patents were issued to citizens of Connecticut than to those of any other State—1 to every 1,198. Next in order are the following: District of Columbia, 1 to every 1,296; Massachusetts, 1 to every 1,472; New Jersey, 1 to every 1,572; Rhode Island, 1 to every 1,581; Colorado, 1 to every 1,718; New York, 1 to every 1,773; California, 1 to every 1,959; Illinois, 1 to every 1,984; Pennsylvania, 1 to every 2,221; Ohio, 1 to every 2,417; Washington, 1 to every 3,012; Michigan, 1 to every 3,198; Delaware, 1 to every 3,298; Oregon, 1 to every 3,308; New Hampshire, 1 to every 3,776; Indiana, 1 to every 3,812; Missouri, 1 to every 3,840; Wisconsin, 1 to every 3,903; Iowa, 1 to every 3,908; Maryland, 1 to every 4,013; Montana, 1 to every 4,055; Minnesota, 1 to every 4,199; Maine, 1 to every 4,480; Vermont, 1 to every 4,707; Utah, 1 to every 5,031; Nebraska, 1 to every 5,151; Idaho, 1 to every 5,578; Kansas, 1 to every 5,905; Nevada, 1 to every 6,047; Arizona Territory, 1 to every 6,470; Wyoming, 1 to every 6,609; North Dakota, 1 to every 7,092; West Virginia, 1 to every 8,125; Oklahoma Territory, 1 to every 8,298; New Mexico Territory, 1 to every 8,491; Texas, 1 to every 8,993; South Dakota, 1 to every 9,338; Virginia, 1 to every 9,657; Kentucky, 1 to every 9,849; Florida, 1 to every 9,972; Tennessee, 1 to every 10,415. The fewest patents granted in proportion to the number of inhabitants were in the following States and Territories: Alaska Territory, 1 to every 31,796; South Carolina, 1 to every 28,517; Alabama, 1 to every 22,300; North Carolina, 1 to every 18,386; Mississippi, 1 to every 18,038; Indian Territory, 1 to every 17,820; Georgia, 1 to every 14,874.

As to foreign patents 1,045 were granted to residents of Germany; 986 to those of England; 374 to those of Canada; 306 to those of France; 156 to those of Austria-Hungary; 56 to those of Switzerland; 55 to those of Scotland; 54 to those of Belgium; 53 to those of Sweden; 37 to those of Italy; 35 to those of Victoria; 30 to those of Denmark; 29 to those of Russia; Ireland and New Zealand, 25 each; New South Wales and Norway, 20 each; 19 to those of Netherlands; 11 to those of Mexico; 9 to those of South African Republic; 8 to those of South Australia; Argentina and Queensland, 5 each; Cuba and India, 4 each; Colombia, Egypt, Roumania and Western Australia, 3 each; Cape Colony and China, 2 each, and Algeria, Bermuda, Brazil, Jamaica, Japan, Java, Jersey, Peru, San Salvador, South Africa, Spain, Turkey and Turkey in Asia, 1 each.

PATENTS ISSUED TO CITIZENS OF THE UNITED STATES, EACH CENSUS YEAR, 1840-1900.

Forestry.

By Act of March 2, 1891, the President is authorized to make public forest reservations by setting aside public timbered lands. Under this law there are now fifty-four forest reserves created by Presidential proclamation. These reserves are located in Alaska, Arizona, California, Colorado, Idaho, Montana, Washington, Nebraska, New Mexico, Oklahoma, Oregon, South Dakota, Utah and Wyoming, and, according to the report of the Commissioner of the General Land Office for the fiscal year 1902, now aggregate 60,175,765 acres. These reservations show an increase over those reported in 1901, of 13,765,556 acres. The total acreage of the States within which these reservations are located, and the total estimated area of forest reservations are as follows:

States and Territories.	Estimated area of forest reserves.	Area of State or Territory.	States and Territories.	Estimated area of forest reserves.	Area of State or Territory.
	Acres.	Acres.		Acres.	Acres.
Alaska	4,909,880	383,645,440	New Mexico	3,258,080	78,519,680
Arizona	6,740,410	72,876,800	Oklahoma	57,120	24,933,120
California	8,784,009	101,269,120	Oregon	4,596,760	61,976,320
Colorado	3,113,180	66,540,160	South Dakota	1,177,120	49,651,200
Idaho	4,147,200	53,649,920	Utah	1,029,760	54,353,920
Montana	7,427,320	94,119,040	Washington	7,036,000	45,167,360
Nebraska	208,902	49,619,840	Wyoming	7,690,024	62,641,920

The Pennsylvania Legislature during the year passed an act raising the division of forestry of the State's agricultural department to the position of a department of forestry. The department consists of a Commissioner of Forestry and four others, who constitute the State Forest Reservation Commission, and are empowered to buy lands for the State forest preserve and to control the same. During the year a number of additions were made to the State forest preserves by purchase, and they now contain about 400,000 acres.

Forest improvement and extension is being taken up in a practical manner by the State of Connecticut. The Legislature has passed an act authorizing the appointment of a State Forester by the Board of Control of the Connecticut Agricultural Experiment Station. This act, entitled "An act concerning the reforestation of barren lands," also provides for the purchase of lands suitable for the growth of oak, pine, or chestnut timber, such land to be used as a State park. The annual appropriation for this purpose is small, but the move is one that will greatly increase interest in the forest conditions of the State.

In Indiana a State Board of Forestry was created by an act of the Legislature. In Michigan at the last session of the Legislature a tract of about 70,000 acres was set apart for a State forest reserve, and the State Forest Commission is exerting itself to greatly increase this area. The State university, too, has established a course of instruction in forestry.

The campaign to preserve the redwood forests of the Big Basin, in the Santa Cruz Mountains of California, has met with success. The Legislature of that State in March, 1901, appropriated $250,000 for their purchase. This act not only did a great service to the cause of forestry in the United States, but also gave the State a superb park.

The Minnesota Legislature enacted a law that sets aside as a part of the State forest reserves all lands unfit for agricultural purposes that reverted to the State through delinquent taxes prior to 1891.

Thorough preparations are being made to establish an effective forest service in the Philippine Islands. According to the report of the Taft Philippine Commission the public forests of the Philippines cover about 40,000,000 acres—nearly as great an area as the combined national forest reserves in this country. They contain over 385 species of trees, many of which produce valuable gums, rubber, gutta-percha, drugs, or essential oils. Among them are seventeen distinct dyewoods.

Arbor Day was proposed by Hon. J. Sterling Morton, ex-Secretary of Agriculture, and was first observed in Nebraska, where it was officially recognized in 1872. It was first associated with school-ground planting in Cincinnati, in 1882, in connection with a meeting of the American Forestry Association. Since then it has been best known by its observance in the schools. All the States have followed the example of Nebraska in establishing Arbor Day, and the movement has now spread into many foreign countries. Great Britain, France, Spain, Japan, and New Zealand all celebrate their Arbor Days.

On July 1, 1901, the Division of Forestry became a bureau, and the first report under the organization was issued in December, 1902. The work of the Bureau of Forestry is organized along four lines: Forest management, forest investigation, records and tree planting. During the first year field work engaged 162 men and was carried on in 42 States and Territories. In 1898 the Division of Forestry offered to give assistance and advice to forest owners desirous of introducing conservative management, and during the fiscal year ending June 30, 1902, 37 applications were received by the Bureau, asking advice for the management of nearly 2,000,000 acres of forest land.

Several of the more important problems partly solved by the Bureau during the past year consisted of the management of a Southern Appalachian forest, with particular attention to fire protection; management in connection with coal mining of a tract of mixed softwoods and hardwoods; management of tracts of longleaf pine in South Carolina, with a view to protect the forests from fire, lumbering and turpentine orcharding; management of a tract of fine hardwoods at Grand Island, Mich., and the management of a tract of second growth hardwoods near Arden, N. Y. All of these were worked with a view to increasing the commercial value of the forests. The Bureau also did considerable work toward providing plans for the preservation of national forest reserves, under the control of the Department of the Interior.

During the last fiscal year the Bureau created the first reserves for forest planting on Government lands in a region that is now unproductive of timber. Measures were successfully initiated for the control by means of planted forests, of the shifting sand dunes on both the Atlantic and Pacific coasts. Co-operative tree planting was encouraged, and much advice given private owners. As a result of the Bureau's work, thriving tree plantations now exist in the Dakotas, Nebraska, Kansas and Oklahoma, which will assure the farmers of those regions cheap fuel and fencing. In New England particular attention was given to the possibility of planting cheap land with white pine. So encouraging was the outcome of the Bureau's examination of this question that many owners of denuded lands are restocking them with white pine. Altogether, tree planting plans were made for 172 localities in 29 States and Territories.

Investigations were carried on regarding commercial trees in several States, and in the industrial rela-

Digitized by Google

tions of the forests to the people. In co-operation with the Bureau of Chemistry investigations were undertaken of native tan extracts and their comparative values in tanning, of Philippine gum products and possibly additions to the present list of native woods suitable for the production of paper pulp. A Co-operative study of insects which injure forests was begun with the Division of Entomology. Successful efforts were made to discover a less injurious method of turpentine orcharding than that hitherto employed, and the Bureau predicted a general introduction of an improved method which will be of notable value in maintaining the source of the turpentine industry.

The Secretary of Agriculture, in his report for the year ending June 30, 1902, made an earnest plea for the proposed Appalachian Forest Preserve. He stated that the water power, at an aggregate annual value of $20,000,000, is being gradually destroyed through increasing irregularity in the flow; that the soils washed down from the mountain slopes are rendering annually less navigable the Ohio, Tennessee and Mississippi and other rivers. These are the results of the deforestation of these mountain slopes. He stated that the rate of land erosion on these slopes from which the forest cover has been removed is as great now in a single year as during ten centuries when covered with primeval forests.

The National and State Forestry Associations are as follows:

NATIONAL ORGANIZATIONS.

American Forestry Association.—President, Hon. James Wilson, Secretary of Agriculture; Secretary (corresponding), F. H. Newell, United States Geological Survey, Washington, D. C.

Society of American Foresters.—President, Gifford Pinchot, Washington, D. C.; Secretary, George B. Sudworth, Washington, D. C.

STATE ORGANIZATIONS.

Name of Organization.	Secretary.	Post Office.

Franklin Forestry Society	W. G. Bowers	Chambersburg, Pa.
Utah Forestry Association	A. C. Nelson	Salt Lake City.
Washington Forestry Association	Albert Bryan	

United States Postal Statistics.

THE DEPARTMENT REPORT.

(Prepared from the latest reports of the Postmaster-General and from special information supplied by the Department.)

At the close of the fiscal year 1902 there were 1,350 lines of travelling post offices, covering 178,796 miles in length. The number of clerks employed was 9,731, annual travel by them in cars 221,589,999 miles. To accomplish this, 3,785 cars and apartments were used on the steam roads, beside 24 cars on the electric lines under the supervision of the Railway Mail Service, and 83 apartments on steamboats. It is estimated that these clerks handled 15,062,830,640 pieces of ordinary mail and 24,174,174 packages and cases of registered mail. The errors by clerks in handling the mail as reported indicate but 1 error made for every 11,502 pieces correctly distributed.

There were 286 casualties to mail cars last year, in which either mail or clerks were injured. Nine clerks were killed and 88 seriously and 302 slightly injured.

The postal receipts from the principal post offices in the country for the fiscal year ended June 30, 1902, were as follows:

Office.	Amount.	Office.	Amount.	Office.	Amount.
New York, N. Y.	$11,670,877.10	St. Paul, Minn.	$626,545 30	Syracuse, N. Y.	$314,071.03

Of the whole number of post offices at the close of the fiscal year, June 30, 1902, 4,731 were Presidential, showing an increase over the previous year of 206; 71,193 were fourth-class, showing a decrease of 1,286, due to the extension of rural free delivery.

In the year 1790 there were 75 post offices in operation. At that time the population of the thirteen States which then constituted the Union was, in round numbers, 3,930,000 people, served by 75 post offices, an average of 1 office to 52,400 people. Since that time the offices have been multiplied over 1,000 times, while the population has multiplied over 20 times.

STATEMENT OF RECEIPTS, EXPENDITURES AND MILEAGE—1875 TO 1902.

Year ending June 30.	Receipts and Expenditures: Post-offices.	Extent of post-routes.	Revenue of the Department.	Expenditure of the Department.	Mileage: Railroads upon which mail was carried.	Annual transportation of mail by railroads.	Annual cost railroad transportation.	Annual cost railroad mail service.

Digitized by Google

*There were 91,212 acres resurveyed in Cheyenne and Cherry counties, Neb., not counted in this column.

†This estimate is of a very general nature and affords no index to the disposal volume of land remaining, nor the amount available for agricultural purposes. It includes Indian and other public reservations, unsurveyed private land claims, as well as surveyed private land claims in the districts of Arizona, California, Colorado and New Mexico; the sixteenth and thirty-sixth sections reserved for common schools; unsurveyed lands embraced in railroad, swamp lands and other grants; the great mountain areas; the areas of unsurveyed rivers and lakes, and large areas wholly unproductive and unavailable for ordinary purposes.

The American Indian.

The annual reports of the agents of the United States Bureau of Indian Affairs in 1901 showed that the Indian population, exclusive of Alaska, was 269,388, distributed in the several States as follows:

Arizona	41,139	Kansas	1,211	New York	5,232	Utah	2,026
California	15,371	Michigan	6,355	North Carolina	1,455	Washington	9,960
Colorado	941	Minnesota	8,136	North Dakota	8,201	Wisconsin	10,383
Florida	358	Montana	10,367	Oklahoma	13,672	Wyoming	1,626
Idaho	3,508	Nebraska	3,871	Oregon	3,871	Miscellaneous	1,528
Indian Territory	86,039	Nevada	5,216	South Dakota	19,109		
Iowa	378	New Mexico	9,264	Texas	470	Total	269,388

The expenditures of the United States on account of the Indians in the fiscal year ended June 30, 1902, was $10,049,584. The expenditures from 1789 to 1902, inclusive, have been $389,282,360.

The five civilized tribes, Indians and colored—Cherokees, 31,000; Chickasaws, 6,000; Choctaws, 16,000; Creeks, 10,000; Seminoles, 2,757; total, 65,757; total colored Indian citizens and claimants, 18,750; grand total	84,507
Pueblos of New Mexico	7,985
Six Nations, Saint Regis, and other Indians of New York	5,232
Eastern Cherokees of North Carolina	1,395

INDIAN AGENCIES AND SCHOOLS.

The following table contains a list of the Indian agencies and schools, with the names and addresses of the agent or superintendent in charge:

Agency or School.	State or Territory.	Character of Station.	Agent or Superintendent.	Address.
Absentee Shawnee	Okla.	Training school	F. A. Thackeray	Shawnee, Okla.
Albuquerque	N. Mex.	Training school	Ralph P. Collins	Albuquerque, N. M.
Blackfeet	Mont.	Agency	James A. Monteath	Browning, Mont.
Carlisle	Pa.	Training school	Lt.-Col. R. H. Pratt, U. S. A.	Carlisle, Pa.
Carson	Nev.	Training school	James K. Allen	Carson City, Nev.
Chamberlain	S. D.	Training school	John Flinn	Chamberlain, S. D.
Cherokee	N. C.	School agency	Henry W. Spray	Cherokee, N. C.
Cheyenne and Arapahoe	S. D.	Agency	Maj. G. W. H. Stouch, U. S. A.	Darlington, Okla.
Cheyenne River	S. D.	Agency	Ira A. Hatch	Cheyenne, S. D.
Chilocco	Okla.	Training school	G. W. Goodman	Chilocco, Okla.
Colorado River	Ariz.	Agency	Jesse C Moore	Parker, Ariz.
Colville	Wash.	Agency	Albert M. Anderson	Miles, Wash.
Crow	Mont.	Agency	J. E. Edwards	Crow Agency, Mont.
Crowcreek	S. D.	Agency	H. D. Chamberlain	Crowcreek, S. D.
Devil's Lake	N. D.	Agency	Fred. O. Getchell	Fort Totten, N. D.
Flathead	Mont.	Agency	W. H. Smead	Jocko, Mont.
Fort Apache	Ariz.	Agency	C. W. Crouse	White River, Ariz.
Fort Belknap	Mont.	Agency	M. L. Bridgeman	Harlem, Mont.
Fort Berthold	N. D.	Agency	Thomas Richards	Ellsworth, N. D.
Fort Bidwell	Cal.	Training school	Horton H. Miller	Fort Bidwell, Cal.
Fort Hall	Idaho	Agency	A. F. Caldwell	Rossfork, Idaho.
Fort Lapwai	Idaho	Training school	Frank D. Voorhies	Lapwai, Idaho.
Fort Lewis	Col.	Training school	Thomas H. Breen	Breen, Col.
Fort Mohave	Ariz.	Training school	John J. McKoin	Mohave City, Ariz.
Fort Peck	Mont.	Agency	C. R. A. Scobey	Poplar, Mont.
Fort Shaw	Mont.	Training school	F. C. Campbell	Sun River, Mont.
Fort Totten	N. D.	Training school	Charles L. Davis	Fort Totten, N. D.
Fort Yuma	Ariz.	Training school	John S. Spear	Yuma, Ariz.
Genoa	Neb.	Training school	William H. Winslow	Genoa, Neb.
Grand Junction	Col.	Training school	T. G. Lemmon	Grand Junction, Col.
Grande Ronde	Ore.	School agency	Dr. Andrew Kershaw	Grande Ronde, Ore.
Green Bay	Wis.	Agency	D. H. George	Keshena, W. s.
Greenville	Cal.	Training school	Charles E. Shell	Greenville, Cal.
Harkell Institute	Kan.	Training school	H. B. Pears	Lawrence, Kan.
Hoopa Valley	Cal.	School agency	Frank Kyselka	Hooper, Cal.
Jicarilla	N. Mex.	Agency	N. S. Walpole	Dulce, N. M.
Kiowa	Okla.	Agency	Colonel J. F. Randlett	Anadarko, Okla.
Klamath	Ore.	Agency	O. C. Applegate	Klamath Agency, Ore.
La Pointe	Wis.	Agency	S. W. Campbell	Ashland, Wis.
Leech Lake	Minn.	Agency	Captain W. A. Mercer	Onigum, Minn.
Lemhi	Idaho	Agency	E. M. Yearlan	Lemhi Agency, Idaho.
Lower Brule	S. D.	Agency	R. H. Somers	Lower Brule, S. D.
Mescalero	N. Mex.	School agency	James A. Carroll	Mescalero, N. M.
Mission Tule River	Cal.	Agency	Lucius A. Wright	San Jacinto, Cal.
Moqui	Ariz.	Training school	C. E. Burton	Keams Canon, Ariz.
Morris	Minn.	Training school	J. B. Brown	Morris, Minn.
Mt. Pleasant	Mich.	Training school	E. C. Nardin	Mt. Pleasant, Mich.
Nevada	Nev.	School agency	F. B. Spriggs	Wadsworth, Nev.
Omaha and Winnebago	Neb.	Agency	C. P. Mathewson	Winnebago, Neb.
Oneida	Wis.	Training school	Joseph C. Hart	Oneida, Wis.
Osage	Okla.	Agency	O. A. Mitscher	Pawhuska, Okla.
Pawnee	Okla.	School agency	George L. Harvey	Pawnee, Okla.
Perris	Cal.	Training school	Harwood Hall	Perris, Cal.
Phoenix	Ariz.	Training school	S. M. McCowan	Phoenix, Ariz.
Pierre	S. D.	Training school	W. H. Cox	Pierre, S. D.
Pima	Ariz.	Agency	Elwood Hadley	Sacaton, Ariz.
Pine Ridge	S. D.	Agency	J. R. Brennan	Pine Ridge, S. D.
Pipestone	Minn.	Training school	D. S. Harris	Pipestone, Minn.
Ponca, Otoe and Oakland	Okla.	Agency	John Jensen	White Eagle, Okla.
Pottawatomie & Gt. Nemaha	Kan.	Agency	W. R. Honnell	Nadlau, Kan.
Puyallup	Wash.	School agency	Frank Terry	Tacoma, Wash.
Quapaw	Ind. T.	School agency	H. B. Durant	Wyandotte, Ind. T.
Rapid City	S. D.	Training school	S. B. Davis	Rapid City, S. D.
Rice Station	Ariz.	Training school	R. A. Cochran	Talklai, Ariz.
Riggs's Institute	S. D.	Training school	C. F. Pierce	Flandreau, S. D.
Rosebud	S. D.	Agency	C. E. McChesney	Rosebud, S. D.
Round Valley	Cal.	School agency	H. F. Liston	Covelo, Cal.
Sac and Fox	Iowa	Agency	W. G. Malin	Toledo, Iowa.
Sac and Fox	Okla.	Agency	Lee Patrick	Sac and Fox Agency, Okla.
Salem	Ore.	Training school	T. W. Potter	Chemawa, Ore.
Santa Fe	N. Mex.	Training school	C. J. Crandall	Santa Fe, N. M.
Santee	Neb.	Agency	H. C. Baird	Santee Agency, Neb.
Seger	Okla.	Training school	J. H. Segar	Colony, Okla.
Shebit	Utah	Training school	Laura B. Work	St. George, Utah.
Shoshone	Wyo.	Agency	H. G. Nickerson	Shoshone Agency, Wyo.

INDIAN AGENCIES AND SCHOOLS.—Continued.

Agency or School.	State or Territory.	Character of Station.	Agent or Superintendent.	Address.
Siletz	Ore.	School agency	D. D. McArthur	Siletz, Ore.
Sisseton	S. D.	School agency	E. T. McArthur	Sisseton Agency, S. D.
Southern Ute	Col.	Agency	J. O. Smith	Ignacio, Col.
Standing Rock	N. D.	Agency	G. H. Bingenheimer	Fort Yates, N. D.
Tomah	Wis.	Training school	L. M. Compton	Tomah, Wis.
Tongue River	Mont.	Agency	J. C. Clifford	Lamedeer, Mont.
Truxton Canon	Ariz.	Training school	J. S. Perkins	Truxton, Ariz.
Tulalip	Wash.	School agency	Dr. C. M. Buchanan	Tulalip, Wash.
Uintah and Ouray	Utah	Agency	H. P. Myton	White Rocks, Utah.
Umatilla	Ore.	Agency	Charles Wilkins	Pendleton, Ore.
Union	Ind. T.	Agency	J. B. Schoenfelt	Muskogee, Ind. T.
Vermillion Lake	Minn.	Training school	O. H. Gates	Towes, Minn.
Warm Spring	Ore.	School agency	J. E. Kirk	Warm Spring, Ore.
Western Navajo	Ariz.	Training school	M. J. Needham	Algert, Ariz.
Western Shoshone	Nev.	School agency	Calvin Ashbury	Owykee, Nev.
White Earth	Minn.	Agency	Simon Michelet	White Earth, Minn.
Wittenberg	Wis.	Training school	Axel Jacobson	Wittenberg, Wis.
Yakima	Wash.	Agency	Jerry Lynch	Fort Simcoe, Wash.
Yankton	S. D.	Agency	James Staley	Greenwood, S. D.

THE INDIAN QUESTION.

The Indian question has always been one of great difficulty to the Government. They are a little understood people, and the efforts to govern them from Washington have often been futile and mistaken. The Commissioner of Indian affairs has at last discovered, what every man who has been among them has known for years, that the indiscriminate issue of rations has been an effectual barrier to civilization; that the periodical distribution of large sums of money was demoralizing in the extreme, and that the general leasing of allotments, instead of benefiting the Indians, as originally intended, has only contributed to their demoralization. The present Indian educational system, taken as a whole, is not calculated to produce the results so earnestly claimed for it and so hopefully anticipated when it was begun. In the last twenty years fully $45,000,000 has been spent by the Government alone for the education of Indians, and it is a liberal estimate to put the number of those so educated at 20,000. His education having cost him nothing, he does not appreciate it. He does not know how to value it and in consequence, on his return to the ignorance and bigotry of his tribe, he almost invariably relapses into barbarism. The Commissioner contends, and with reason, that it is time to make a move toward terminating the guardianship which has so long been exercised over the Indian and putting him upon an equal footing with the white man, so far as his relations with the Government are concerned. The function of the State is to see that the Indian has the opportunity of self-support, and that he is afforded the same protection of his person and property that is given to others. That being done, he should be thrown upon his resources. It then becomes entirely at his own option whether he will become a useful member of the community or not. Whatever the condition of the Indian, he should be removed from a state of dependence to one of independence. The way to do this is to take away those things that encourage him to lead an idle life, and, after giving him a fair start, leave him to take care of himself.

The Department in June last issued an order to the great Sioux agencies directing the agents to erase from the ration roll all those Indians who had become self-supporting, and, further, to issue rations to other Indians only in accord with their actual needs, and to inaugurate, whenever possible, the policy of giving rations only in return for labor performed, either for themselves or for the benefit of the tribe. At first the order caused considerable dissatisfaction among those affected, as was natural, but it was well received by the majority of Indians.

Statistical information indicates that the present system of industrial education, supplemented by a common school curriculum, is making steady inroads upon the inherited tendencies of these people. The Indian school system, which is a simple one, has prepared and will continue to prepare the Indian youths of our land for the duties and responsibilities of American citizenship.

There were fifty-seven Indian agencies in 1893, which were increased the next year to fifty-eight, dropping the succeeding year to fifty-seven again, since which time there has been no increase in the number allowed by Congress. In 1896 the number was fifty-seven, and for each of the succeeding years, including 1900, there were fifty-six. A material reduction was made in 1901, and a further one of four for 1902, leaving at present forty-nine agencies appropriated for.

The ultimate result of all Indian educational processes should be the preparation of the younger elements of the tribes for the duties and responsibilities of American citizenship. By education they should be made superior to their fellows in the tribes who have not taken advantage of the opportunities presented by the Government. The results of the experiments so far made show that the average Indian girl or boy is doing as well in his environment as the same type of the American. The danger attending the education of the Indian lies in the Government's holding out places of profit in political life to those who graduate from the schools. But the general public is not justly called upon to support either Indians or whites under such circumstances. The schools, therefore, seek persistently to teach them to earn wages for themselves independently; to seek outside opportunities for work, and not wait for gifts of life to be handed to them unsought or not labored for. That they have been successful in this is shown by the fact that hundreds of Indians have left the reservations and are mingling with the whites in the eager struggle for existence.

The National Home for Disabled Volunteer Soldiers.

The National Home for Disabled Volunteer Soldiers is established for the care of volunteer soldiers who became permanently disabled while in the service of the United States. The branches are located as follows: Central Branch, Dayton, Montgomery County, Ohio; Northwestern Branch, Milwaukee, Wis.; Eastern Branch, Togus, Me.; Southern Branch, Hampton, Va.; Western Branch, Leavenworth, Kan.; Pacific Branch, Santa Monica, Cal.; Marion Branch, Marion, Ind.; Danville Branch, Danville, Ill.; Mountain Branch, Johnson City, Tenn.; Sanitarium, Hot Springs, South Dakota, for which appropriations were made at the last session of Congress.

State homes are at Youngville, Cal.; Monte Vista, Col.; Noroton Heights, Conn.; Boise, Idaho; Quincy, Ill.; Lafayette, Ind.; Marshalltown, Ia.; Fort Dodge, Kan.; Chelsea, Mass.; Grand Rapids, Mich.; Minnehaha, Minn.; St. James, Mo.; Columbia Falls, Mont.; Grand Island, Neb.; Milford, Neb.; Kearny, N. J.; Vineland, N. J.; Bath, N. Y.; Oxford, N. Y.; Lisbon, N. D.; Sandusky, Ohio; Roseburg, Ore.; Erie, Pa.; Bristol, R. I.; Hot Springs, S. D.; Bennington, Vt.; Orting, Wash.; Waupaca, Wis.; Cheyenne, Wyo. The United States gives to each State maintaining a home for disabled soldiers and sailors $100 a year for each soldier and sailor cared for in a home.

The managers of the National Home for Disabled Volunteer Soldiers are the President of the United States, the Chief Justice and the Secretary of War, ex-officio; General Martin T. McMahon, President, New York City; General Alfred L. Pearson, Pittsburg, Pa., Colonel John L. Mitchell, Milwaukee, Wis., Vice-Presidents; Colonel George W. Steele, Marion, Ind., Secretary; Colonel E. F. Brown, New York City, Inspector-General; General Charles M. Anderson, Greenville, Ohio; Colonel Sidney G. Cooke, Herington, Kan.; General Thomas J. Henderson, Princeton, Ill.; General J. Marshall Brown, Portland, Me.; Major William H. Bonsall, Los Angeles, Cal.; Captain Henry Palmer, Omaha, Neb.; Colonel Walter P. Brown, Jonesboro, Tenn.

Labor Legislation.

Revised by G. WALLACE W. HANGER.
Chief Clerk United States Department of Labor.

Boycotting is prohibited by law in Colorado, Illinois and Wisconsin.

Blacklisting is prohibited by law in Alabama, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Minnesota, Missouri, Montana, Nevada, North Dakota, Oklahoma, Texas, Utah, Virginia, Washington and Wisconsin.

Laws which may be construed as prohibiting boycotting exist in Alabama, Connecticut, Florida, Georgia, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New York, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Vermont and Wisconsin.

Laws which may be construed as prohibiting blacklisting exist in Georgia, Michigan, New Hampshire, New York, Oklahoma, Oregon, Rhode Island and South Dakota.

In California, Colorado, Connecticut, Idaho, Indiana, Massachusetts, Minnesota, Missouri, New Jersey, New York, Ohio, Pennsylvania and Wisconsin it is unlawful for an employer to exact an agreement either written or verbal from an employe not to join or become a member of any labor organization as a condition of employment.

Arkansas—Eight hours constitute a day's labor on public roads, highways and bridges.

California—Unless otherwise expressly stipulated by the parties to a contract eight hours constitute a days labor. On any public works of or work done for the State or any political sub-division thereof eight hours constitute a day's work for all laborers, workmen and mechanics. A stipulation that neither of the above-mentioned classes shall be required or permitted to work more than eight hours a day must be contained in every contract to which the State or any of its political sub-divisions is a party. Twelve hours constitute a day's work for drivers, conductors and gripmen of street cars. Employment for more than nine hours in any one day is forbidden for those under eighteen years of age, except when it is necessary to make repairs to prevent the interruption of the ordinary running of machinery, or when a different apportionment of the hours of labor is made for the purpose of making a shorter day's work for one day in the week. In no case must the hours of labor for such persons exceed fifty-four in one week. This does not apply to those engaged in vinicultural or horticultural pursuits or in domestic or household occupations.

Colorado—For all workmen employed by the State or any sub-division thereof eight hours constitute a day's work.

Connecticut—Unless otherwise agreed eight hours constitute a lawful day's work.

District of Columbia—For all laborers or mechanics employed by or in behalf of the District eight hours is a day's work.

Idaho—On all State, county and municipal work eight hours constitute a day.

Illinois—Except on farms and when otherwise agreed eight hours is a day's work in all mechanical employments. This does not apply to service by the day, week or month.

Indiana—For all classes of mechanics, workingmen and laborers, except those engaged in agriculture or domestic labor eight hours constitute a day's work. Overwork by agreement and for extra pay is permitted. More than eight hours a day work is absolutely prohibited for persons under fourteen years of age.

Kansas—For all laborers, mechanics or other persons employed by the State or any political sub-division thereof eight hours constitute a day's work.

Maryland—No mechanic or laborer employed by or on behalf of the city of Baltimore shall be required to work more than eight hours a day, except employes of the Fire Department, Bay View Asylum or the city jail.

Massachusetts—For all laborers, workmen and mechanics employed by or in behalf of any city or town in the commonwealth eight hours shall constitute a day's work. Employment of minors under eighteen and women in mercantile establishments for more than fifty-eight hours in any one week is prohibited, but this does not apply in the month of December of each year to persons employed in shops for the sale of goods at retail.

Minnesota—Laborers, workmen and mechanics on public works are restricted to eight hours' labor on any calendar day.

Missouri—A legal day's work consists of eight hours. This, however, may be modified by agreement, and does not apply to those engaged in agriculture.

Montana—A legal day's work consists of eight hours for persons engaged to operate or handle any first-motion or direct-acting hoisting engine or any geared or indirect-acting hoisting engine at any mine employing fifteen or more men underground, when the duties of firemen are performed by the person so engaged, also for any engineer operating a stationary engine developing fifty or more horse power when such engineer has charge or control of a boiler or boilers in addition to his other duties. The law applies only to such steam plants as are in continuous operation or are operated twenty or more hours in each twenty-four, and does not apply to persons running any engine more than eight hours in each twenty-four for the purpose of relieving another employe in case of sickness or other unforeseen cause.

Nebraska—For all classes of mechanics, servants and laborers, except such as are engaged in farm or domestic labor, eight hours constitute a day's work.

New Jersey—On any day when a municipal or general election is held eight hours constitute a day's work.

New Mexico—Eight hours constitute a day's labor on the public highways.

New York—For all classes of employes, except in farm or domestic work, eight hours constitute a day, except on work for or by the State or a municipal corporation. Overwork for extra pay is permitted. The law applies to those employed by or for the State or a municipality, and every contract to which either of these are a party must contain a stipulation that no workman, laborer or mechanic shall be permitted or required to work more than eight hours in any one day, except in cases of extraordinary emergency.

Ohio—In all engagements to labor in any mechanical, manufacturing or mining business, unless otherwise expressly stipulated, eight hours constitute a day's work, except in case of conductors, engineers, firemen and trainmen of railroads, where it is ten. The service of all laborers, workmen and mechanics employed upon any public work of or work done for the State or for any political sub-division thereof is restricted to eight hours a day.

Pennsylvania—In all cases of service by the day, unless there is an agreement to the contrary, eight hours shall constitute a day's work. In cases of farm work and labor in factories, laundries, renovating establishments and street railways this does not apply. In penitentiaries and public reformatory institutions, also all public works, eight hours constitute a day's work.

Tennessee—Upon the highways eight hours is a day's work, whether by convicts or free-road hands.

Utah—On all public works and in all underground mines or workings, smelters and all other institutions for the refining or reducing of ores eight hours is a day's work.

Washington—On all public works eight hours make a day, except that in cases of emergency overtime may be worked for extra pay.

West Virginia—In the case of all laborers, workmen and mechanics employed by or for the State eight hours constitute a day's work.

Wisconsin—Where there is no agreement to the contrary a day's work shall consist of eight hours in all engagements to labor in any manufacturing or mechanical business. In the above lines no woman can be employed over eight hours a day. No person under the age of sixteen can be employed more than ten hours a day.

Wyoming—In all mines and public works eight hours constitute a day's work.

United States—All laborers, workmen and mechanics employed by or on behalf of the national government are required to work but eight hours a day.

Legislation by Fifty-seventh Congress.

FIRST SESSION.

The legislation adopted by the Fifty-seventh Congress, during the session which ended July 1, 1902, was more important in character than has been enacted during a similar period in many years. The aftermath of the Spanish-American war was naturally responsible for many of the important measures passed, and the commercial interests of the country were contributory causes to the character of many other laws that were added to the National statute books. In both foreign and domestic measures the session was notable.

Isthmian Canal Measure.—The French Isthmian Canal Company, which controls the canal route across the Isthmus at Panama, offered to sell all its rights and titles to the United States for the sum of $40,000,000, and Congress passed a law authorizing the President to purchase these rights, etc., if the company should be able to produce a clear title to its property. If this condition is complied with the President is then authorized to obtain from the Republic of Colombia perpetual control of a strip of territory six miles wide extending from the Caribbean Sea to the Pacific Ocean whereon to construct the Panama Canal, and, if that territory is not sufficient for all requirements, the President is authorized to secure as much additional territory as may be needed. On the other hand, if the Panama Canal Company is unable to comply with every requirement regarding title, etc., the President is instructed to acquire as much territory as may be needed from Nicaragua and Costa Rica in order that he may proceed with the construction of the Nicaragua Canal, and Congress appropriated, in addition to the $40,000,000 for the purchase of the Panama route, $10,000,000, to be expended in survey and constructive work. In the event of the selection of the Panama route there is available for construction $135,000,000 more, but if the Nicaragua route should finally be selected the law appropriates $180,000,000 additional; the total sum appropriated for the Panama route being $185,000,000; for the Nicaragua route, $230,000,000. The money for the enterprise is to be raised by popular loan, for which purpose the United States Treasury is to issue bonds of small denominations to the amount of $130,000,000 at 2 per cent.

Philippine Legislation.—A law of utmost importance to the Philippines was that providing tariff regulations for the island. This law provides that while the tariff laws enacted by the Philippine Commission are to remain effective, a reduction of 25 per cent is allowed on all imports from the islands to the United States which are the product of the Philippines, and foreign vessels may trade among the Philippine ports. All duties and taxes to be collected under the act are to be held as a separate fund to be paid into the Philippine Islands treasury to be applied to the welfare of the islands.

Chinese Exclusion Indefinitely Extended.—The Chinese Exclusion Act in its original shape will remain in force for an indefinite period. The time limit for that act was about to expire, but the demand from the Pacific Coast for its extension was so general that Congress was obliged to retain it on the statutes. The exclusion laws are also to apply to the new possessions of the United States, with the exception of the territory of Hawaii, and every Chinese laborer now in those islands, except such as have complied with the law, must obtain a certificate of residence within a year, or submit to deportation to China.

National Irrigation Law.—Congress, in compliance with the suggestions of the President and others interested in the development of the western States and Territories, passed a law authorizing the Department of the Interior to set aside moneys realized from the sale of public lands in those States and Territories for a reclamation fund to be used in irrigating arid and semi-arid lands in order that they may be opened up for settlement. The law applies to the States and Territories of Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Utah, Washington and Wyoming. Settlers are to occupy such land when irrigated, but the title to the irrigation works and reservoirs is to remain with the Government until Congress directs otherwise.

War Taxes Repealed.—The War Revenue Repeal Bill disposed of all taxes imposed on commerce on account of the Spanish-American war, with the exception of mixed flour duties and the import tax on tea of 10 per cent. The latter expired January 1, 1903.

Oleomargarine Taxes Increased.—The revenue taxes on substitutes for butter were increased by an act approved May 9. Any person who now sells oleomargarine or similar imitations of butter is held to be a manufacturer of it, and wholesale dealers must pay a revenue tax of $200; retail dealers, $6 per year. Wholesale dealers in adulterated butter are compelled to pay a tax of $480; retailers, $48, and a stamp tax of 10 cents per pound is also imposed on all such butter.

Barracks at Manila.—The need for suitable army barracks in Manila was recognized by Congress and $3,000,000 was appropriated to build habitable quarters for American troops stationed there.

New Buildings for West Point.—Congress appropriated $5,000,000 for the new buildings at West Point, which were declared to be badly needed. These buildings are to be of most modern construction and will supersede the antiquated structures now at the Point. The latter will probably be removed, though several buildings of special historical interest may be preserved.

Naval Increase.—The effort to keep this country in effective fighting trim was supported by the Naval Appropriation bill, which provided for additional cruisers and battleships. One battleship is to be constructed in one of the United States Navy Yards instead of by private contract.

For Forts and Batteries.—The Fortifications bill provides for an expenditure of $2,000,000 for new gun batteries; $1,237,000 for rapid fire guns; $334,733 for large guns, and $90,058 for artillery practice.

Postal Improvements.—The Post Office bill appropriated $500,000 for pneumatic tubes for transportation of postal matter, and $7,529,400 for the extension of the rural free delivery service. Of this sum $7,000,000 will be paid to carriers and the balance will be paid to clerks and special agents called into service by reason of the extension of the free delivery. The pay of such carriers is not to exceed $600 per year.

The President's Message.

President Roosevelt delivered his second message to the Fifty-seventh Congress on December 2. An abstract follows:

We still continue in a period of unbounded prosperity. This prosperity is not the creature of law, but undoubtedly the laws under which we work have been instrumental in creating the conditions which made it possible, and by unwise legislation it would be easy enough to destroy it.

As a people we have played a large part in the world, and we are bent upon making our future even larger than the past. In particular, the events of the last four years have definitely decided that, for woe or for weal, our place must be great among the nations. We may either fail greatly or succeed greatly; but we cannot avoid the endeavor from which either great failure or great success must come.

We do not shrink from the struggle before us. There are many problems for us to face at the outset of the twentieth century—grave problems abroad and still graver at home; but we know that we can solve them and will solve them.

No country has ever occupied a higher plane of material well-being than ours at the present moment. Never before has material well-being been so widely diffused among our people. Great fortunes have been accumulated, and yet in the aggregate these fortunes are small, indeed, when compared to the wealth of the people as a whole. There are more deposits in the savings banks, more owners of farms, more well-paid wage workers in this country now than ever before in our history.

Of course, when the conditions have favored the growth of so much that was good, they have also favored somewhat the growth of what was evil. It is eminently necessary that we should endeavor to cut out this evil, but let us keep a due sense of proportion, let us not in fixing our gaze upon the lesser evil forget the greater good. The evils are real and some of them are menacing, but they are the outgrowth, not of misery or decadence, but of the progress of our gigantic industrial development. This industrial development must not be checked, but side by side with it should go such progressive regulation as will diminish the evils. We should fail in our duty if we did not try to remedy the evils, but we shall succeed only if we proceed patiently, with practical common sense as well as resolution, separating the good from the bad and holding on to the former while endeavoring to get rid of the latter.

The Regulation of Trusts.—In my message to the present Congress at its first session I discussed at length the question of the regulation of those big corporations commonly doing an inter-State business, often with some tendency to monopoly, which are popularly known as trusts. The experience of the past year has emphasized, in my opinion, the desirability of the steps I then proposed.

Corporations, and especially combinations of corporations, should be managed under public regulation. Experience has shown that under our system of government the necessary supervision cannot be obtained by State action. It must, therefore, be achieved by National action. Our aim is not to do away with corporations; on the contrary, these big aggregations are an inevitable development of modern industrialism, and the effort to destroy them would be futile unless accomplished in ways that would work the utmost mischief to the entire body politic. We can do nothing of good in the way of regulating and supervising these corporations until we fix clearly in our minds that we are not attacking the corporations, but endeavoring to do away with any evil in them. We draw the line against misconduct, not against wealth. The capitalist who, alone or in conjunction with his fellows, performs some great industrial feat, by which he wins money, is a well-doer, not a wrongdoer, provided only he works in proper and legitimate lines. We wish to favor such a man when he does well. Publicity can do no harm to the honest corporation, and we need not be overtender about sparing the dishonest corporation.

In curbing and regulating the combinations of capital which are or may become injurious to the public we must be careful not to stop the great enterprises which have legitimately reduced the cost of production, not to abandon the place which our country has won in the leadership of the international industrial world, not to strike down wealth with the result of closing factories and mines, of turning the wage-worker idle in the streets and leaving the farmer without a market for what he grows. Insistence upon the impossible means delay in achieving the possible, exactly as, on the other hand, the stubborn defense alike of what is good and what is bad in the existing system, the resolute effort to obstruct any attempt at betterment, betrays blindness to the historic truth that wise evolution is the sure safeguard against revolution.

The Powers of Congress.—No more important subject can come before the Congress than this of the regulation of inter-state business. This country cannot afford to sit supine on the plea that under our system of Government we are helpless in the presence of the new conditions, and unable to grapple with them or to cut out whatever of evil has arisen in connection with them. The power of the Congress to regulate inter-state commerce is an absolute and unqualified grant, and without limitations other than those prescribed by the Constitution. The Congress has Constitutional authority to make all laws necessary and proper for executing this power, and I am satisfied that this power has not been exhausted by any legislation now on the statute books. It is evident, therefore, that evils restrictive of commercial freedom and entailing restraint upon National commerce fall within the regulative power of the Congress, and that a wise and reasonable law would be a necessary and proper exercise of Congressional authority to the end that such evils should be eradicated.

I believe that monopolies, unjust discriminations, which prevent or cripple competition, fraudulent overcapitalization, and other evils in trust organizations and practices which injuriously affect inter-state trade can be prevented under the power of the Congress to "regulate commerce with foreign nations and among the several States" through regulations and requirements operating directly upon such commerce, the instrumentalities thereof, and those engaged therein.

I earnestly recommend this subject to the consideration of the Congress with a view to the passage of a law reasonable in its provisions and effective in its operations, upon which the questions can be finally adjudicated that now raise doubts as to the necessity of constitutional amendment. If it prove impossible to accomplish the purposes above set forth by such a law, then, assuredly, we should not shrink from amending the Constitution so as to secure beyond peradventure the power sought.

The Congress has not heretofore made any appropriation for the better enforcement of the anti-trust law as it now stands. Very much has been done by the Department of Justice in securing the enforcement of this law, but much more could be done if Congress would make a special appropriation for this purpose, to be expended under the direction of the Attorney-General.

One proposition advocated has been the reduction of the tariff as a means of reaching the evils of the trusts which fall within the category I have described. Not merely would this be wholly ineffective, but the diversion of our efforts in such a direction would mean the abandonment of an intelligent attempt to do away with these evils. Many of the largest corporations, many of those which should certainly be included in any proper scheme of regulation, would not be affected in the slightest degree by a change in the tariff, save as such change interfered with the general prosperity of the country. to remove the tariff as a punitive measure directed against trusts would inevitably result in ruin to the weaker competitors who are struggling against them.

Revision of the Tariff.—Stability of economic policy must always be the prime economic need of this country. This stability should not be fossilization. The country has acquiesced in the wisdom of the protective tariff principle. It is exceedingly undesirable that this system should be destroyed or that there should be violent and radical changes therein. Our past experience shows that great prosperity in this country has always come under a protective tariff, and that the country cannot prosper under fitful tariff changes at short intervals. Moreover, if the tariff laws as a whole work well, and if business has prospered under them and is prospering, it is better to endure for a time slight inconveniences and inequalities in some schedules than to upset business by too quick and too radical changes. It is most earnestly to be wished that we could treat the tariff from the standpoint solely of our business needs. It is, perhaps, too much to hope that partisanship may be entirely excluded from consideration of the subject, but at least it can be made secondary to the business interests of the country—that is, to the interests of our people as a whole. Unquestionably, these business interests will best be served if together with fixity of principle as regards the tariff we combine a system which will permit us from time to time to make the necessary reapplication of the principle to the shifting National needs.

One way in which the readjustment sought can be reached is by reciprocity treaties. It is greatly to be desired that such treaties may be adopted. They can be used to widen our markets and to give a greater field for the activities of our producers on the one hand, and on the other hand to secure in practical shape the lowering of duties when they are no longer needed for protection among our own people, or when the minimum of damage done may be disregarded for the sake of the maximum of good accomplished. If it prove impossible to ratify the pending treaties, and if there seem to be no warrant for the endeavor to execute others, or to amend the pending treaties so that they can be ratified, then the same end—to secure reciprocity—should be met by direct legislation. Wherever the tariff conditions are such that a needed change cannot with advantage be made by the application of the reciprocity idea, then it can be made outright by a lowering of duties on a given product. The unhurried and unbiased report of a tariff commission would show what changes should be made in the various schedules and how far these changes could go without also changing the great prosperity which this country is now enjoying, or upsetting its fixed economic policy.

The cases in which the tariff can produce a monopoly are so few as to constitute an inconsiderable factor in the question; but of course if in any case it be found that a given rate of duty does promote a monopoly which works ill, no protectionist would object to such reduction of the duty as would equalize competition.

In my judgment the tariff on anthracite coal should be removed, and anthracite put actually where it now is nominally, on the free list. This would have no effect at all save in crises; but in crises it might be of service to the people.

Financial Legislation.—Interest rates are a potent factor in business activity, and in order that these rates may be equalized to meet the varying needs of the seasons and of widely separated communities, and to prevent the recurrence of financial stringencies which injuriously affect legitimate business, it is necessary that there should be an element of elasticity in our monetary system. Banks are the natural servants of commerce, and upon them should be placed, as far as practicable, the burden of furnishing and maintaining a circulation adequate to supply the needs of our diversified industries and of our domestic and foreign commerce, and the issue of this should be so regulated that a sufficient supply should be always available for the business interests of the country.

Digitized by Google

It would be both unwise and unnecessary at this time to attempt to reconstruct our financial system, which has been the growth of a century, but some additional legislation is, I think, desirable. It is suggested that all future legislation on the subject should be with the view of encouraging the use of such instrumentalities as will automatically supply every legitimate demand of productive industries and of commerce, not only in the amount, but in the character of circulation, and of making all kinds of money interchangeable, and, at the will of the holder, convertible into the established gold standard.

Labor and Capital.—This is an era of federation and combination. Exactly as business men find they must often work through corporations, and as it is a constant tendency of these corporations to grow larger, so it is often necessary for laboring men to work in federations, and these have become important factors of modern industrial life. Both kinds of federation, capitalistic and labor, can do much good, and as a necessary corollary they can both do evil. Each must refrain from arbitrary or tryannous interference with the rights of others. Organized capital and organized labor alike should remember that in the long run the interest of each must be brought into harmony with the interest of the general public, and the conduct of each must conform to the fundamental rules of obedience to the law, of individual freedom and of justice and fair dealing toward all. It is of the highest importance that employer and employe alike should endeavor to appreciate each the viewpoint of the other and the sure disaster that will come upon both in the long run if either grows to take as habitual an attitude of sour hostility and distrust toward the other. Few people deserve better of the country than those representatives both of capital and labor—and there are many such—who work continually to bring about a good understanding of this kind, based upon wisdom and upon broad and kindly sympathy between employers and employed. Above all, we need to remember that any kind of class animosity in the political world is, if possible, even more wicked, even more destructive to national welfare, than sectional, race or religious animosity. We can get good government only upon condition that we keep true to the principles upon which this nation was founded, and judge each man not as a part of a class, but upon his individual merits.

It is earnestly hoped that a Secretary of Commerce may be created, with a seat in the Cabinet. The rapid multiplication of questions affecting labor and capital, the growth and complexity of the organizations through which both labor and capital now find expression, the steady tendency toward the employment of capital in huge corporations, and the wonderful strides of this country toward leadership in the international business world justify an urgent demand for the creation of such a position. Substantially all the leading commercial bodies in this country have united in requesting its creation. The creation of such a department would in itself be an advance toward dealing with and exercising supervision over the whole subject of the great corporations doing an interstate business, and with this end in view the Congress should endow the department with large powers, which could be increased as experience might show the need.

Reciprocity with Cuba.—I hope soon to submit to the Senate a reciprocity treaty with Cuba. On May 20 last the United States kept its promise to the island by formally vacating Cuban soil and turning Cuba over to those whom her own people had chosen as the first officials of the new Republic.

Cuba lies at our doors, and whatever affects her for good or for ill affects us also. So much have our people felt this that in the Platt amendment we definitely took the ground that Cuba must hereafter have closer political relations with us than with any other power. Thus in a sense Cuba has become a part of our international political system. This makes it necessary that in return she should be given some of the benefits of becoming part of our economic system.

A convention with Great Britain has been concluded, which will be at once laid before the Senate for ratification, providing for reciprocal trade arrangements between the United States and Newfoundland on substantially the lines of the convention formerly negotiated by the Secretary of State, Mr. Blaine.

The formation of the international tribunal which sits at The Hague is an event of good omen from which great consequences for the welfare of all mankind may flow. It is far better, where possible, to invoke such a permanent tribunal than to create special arbitrators for a given purpose.

It is a matter of sincere congratulation to our country that the United States and Mexico should have been the first to use the good offices of The Hague court.

I commend to the favorable consideration of the Congress the Hawaiian fire claims, which were the subject of careful investigation during the last session.

The Isthmian Canal.—The Congress has wisely provided that we shall build at once an isthmian canal, if possible at Panama. The Attorney-General reports that we can undoubtedly acquire good title from the French Panama Canal Company. Negotiations are now pending with Colombia to secure her assent to our building the canal. This canal will be one of the greatest engineering feats of the twentieth century; a greater engineering feat than has yet been accomplished during the history of mankind. The work should be carried out as a continuing policy without regard to change of administration; and it should be begun under circumstances which will make it a matter of pride for all administrations to continue the policy.

During the Fall of 1901 a communication was addressed to the Secretary of State asking whether permission would be granted by the President to a corporation to lay a cable from a point on the California coast to the Philippine Islands by way of Hawaii. A statement of conditions or terms upon which such corporation would undertake to lay and operate a cable was volunteered.

In consequence of this solicitation of the cable company certain conditions were formulated, upon which the President was willing to allow access to certain soundings and to consent to the landing and laying of the cable, subject to any alterations or additions thereto imposed by the Congress.

Among the conditions is one reserving the power of the Congress to modify or repeal any or all of them.

Of Porto Rico it is only necessary to say that the prosperity of the island and the wisdom with which it has been governed have been such as to make it serve as an example of all that is best in insular administration.

Policy of Irrigation.—It is to be hoped that the Congress will make liberal appropriations for the continuance of the service already established and for its further extension.

Legislation should be provided for the protection of the game, and the wild creatures generally, on the forest reserves.

In the Philippines.—On July 4 last, on the one hundred and twenty-sixth anniversary of the Declaration of our Independence, peace and amnesty were promulgated in the Philippine Islands. Some trouble has since from time to time threatened with the Mohammedan Moros, but with the late insurrectionary Filipinos the war has entirely ceased. Civil government has now been introduced. Not only does each Filipino enjoy such rights to life, liberty, and the pursuit of happiness as he has never before known during the recorded history of the islands, but the people, taken as a whole, now enjoy a measure of self-government greater than that granted to any other Orientals by any foreign power and greater than that enjoyed by any other Orientals under their own governments, save the Japanese alone. No policy ever entered into by the American people has vindicated itself in more signal manner than the policy of holding the Philippines. Taking the work of the army and the civil authorities together, it may be questioned whether anywhere else in modern times the world has seen a better example of real constructive statesmanship than our people have given in the Philippine Islands. High praise should also be given those Filipinos, in the aggregate very numerous, who have accepted the new conditions and joined with our representatives to work with hearty good will for the welfare of the islands.

Needs of the Army and Navy.—The army has been reduced to the minimum allowed by law. It is very small for the size of the nation, and most certainly should be kept at the highest point of efficiency.

For the first time in our history naval manoeuvres on a large scale are being held under the immediate command of the Admiral of the navy. Constantly increasing attention is being paid to the gunnery of the navy, but it is yet far from what it should be. I earnestly urge that the increase asked for by the Secretary of the Navy in the appropriation for improving the marksmanship be granted.

Affairs of Alaska.—I especially urge upon the Congress the need of wise legislation for Alaska. It is not to our credit as a nation that Alaska, which has been ours for thirty-five years, should still have as poor a system of laws as is the case. No country has a more valuable possession—in mineral wealth, in fisheries, furs, forests, and also in land available for certain kinds of farming and stock growing. It is a territory of great size and varied resources, well fitted to support a large permanent population. Alaska needs a good land law and such provision for homesteads and pre-emptions as will encourage permanent settlement.

Stocks, Produce and Commodities.

PRICES OF STOCKS.

The new home of the New York Stock Exchange in Wall and Broad streets will be one of the finest buildings in the financial section of the city. It is being erected at the cost of about $1,500,000, and in its construction a number of difficult engineering problems are being solved, to be of use in the construction of other buildings in that part of town.

The structure is four stories high, built largely of white marble, and architecturally beautiful outside and in. The main entrance is on Broad street, from which the board room and all the rooms more commonly used will be reached.

The building is to be lighted by electricity, generated by the Exchange's own plant, and a complete system of refrigeration, for keeping the interior air at an even temperature in Summer, will be installed.

During the work on the new building the Exchange has met in the Produce Exchange Building.

Prices of seats in the Stock Exchange took an upward tendency during 1902. The highest amount ever given for a seat on 'Change was $80,000, paid on December 26, 1901. Between September, 1901, and May, 1902, the prices have ranged as follows: September 12, $62,000; September 20, $65,000; December 5, $71,000; December 22, $75,000; December 26, $80,000; February 14, 1902, $70,000; March 2, $60,000; April 30, $70,000. The original cost of a seat was $400. The initiation fee on the Exchange is $1,000.

In 1902 the Listing Committee of the Stock Exchange admitted to the list the 4 per cent certificates of rente of the Imperial Russian Government, taking in this way the first step toward establishing a foreign bond department. The issue is 2,310,000,000 roubles, equivalent to $1,188,495,000. The Listing Committee ruled that for the purpose of dealing in these bonds two roubles should be considered the equivalent of one dollar.

The following table, showing the highest and lowest prices of active stocks for the year ending December 1, 1902, was compiled for The American Almanac by the Wall Street Journal.

THE WORLD'S WHEAT CALENDAR.

With Amount of Wheat Harvested Per Month Throughout the Year.

The harvest of the wheat crop of the world is going on constantly.

It changes its location with the changing seasons. The following presents briefly its course of travel, with approximately the total amount of wheat, in bushels, produced by the countries named, based on returns for 1901:

May—Morocco, ——; Algiers, 25,000,000; Tunis, 6,400,000; Tripoli, ——; Central Asia, 9,645,000; China, ——; Japan, 20,000,000; Texas, 6,062,021.

June—California, 34,743,111; Spain, 108,000,000; Portugal, 8,000,000; Italy, 147,560,000; Greece, 3,000,000; Oregon, 17,158,065; Alabama, 1,155,256; Georgia, 3,042,167; Kansas, 99,079,304; Colorado, 7,531,756; Missouri, 31,137,097.

July—France, 304,210,000; Austria-Hungary, 184,216,000; Roumania, 72,386,000; Southern Russia, 401,722,000; Nebraska, 42,006,885; Minnesota, 80,102,627; New England, 209,889; Upper Canada, 22,194,000.

August—England and Ireland, 55,581,000; Belgium, 12,920,000; German, 91,817,000; Holland, 4,300,000; Denmark, 3,000,000; Poland, 14,409,000. Manitoba, 52,094,000; Lower Canada, 16,000,000; British Columbia, ——.

September—Scotland, ——; Sweden, 4,310,000; Norway, 300,000.

October—Northern Russia (the whole European Russian crop is given with Southern Russia); Siberia, 16,504,000.

November—Peru, ——; Southern Africa, 2,000,000.

December—Burmah, ——; New Zealand, 6,733,000; Chile, 9,000,000.

January—Australia, 56,610,000; Argentina, 74,753,000.

February—India, 245,751,000.

March—Upper Egypt (the whole Egyptian crop is given under Lower Egypt).

April—Lower Egypt, 12,000,000; Mexico, 9,000,000; Turkey, 22,000,000; Persia, 15,200,000; Asia Minor, 30,000,000.

Cotton.

By GEORGE W. AVERY.

The cotton plant had been found growing in a wild state by the first settlers of the southwestern portion of this country, but 1621 is generally regarded as the first year of cotton culture in the United States. Its cultivation was for a long time limited to small patches for domestic uses. In 1733 cotton seed was brought into Carolina, and in 1734 cotton was planted in Georgia from seed sent to the trustees from England. About 1770 Southern planters began turning their attention to the cultivation of cotton as a staple crop. In 1775 the first manufactory for cotton was established in Philadelphia. It also manufactured goods from flax and wool. In 1787 the first regular cotton factory in the United States was built at Beverly, Mass. The Legislature made a grant of $500 to assist the new enterprise. The year 1793 was made memorable by Eli Whitney's invention of the saw-gin. In 1795 the second cotton mill in the United States was erected in Rhode Island. From that time the business increased, having its centre in New England, and within the past few years the South has entered largely into manufacturing, many mills having been built in the various States, most of which are now in successful operation.

THE COTTON SUPPLY.

CROPS OF THE UNITED STATES FOR THIRTY-SEVEN YEARS.

Wool.

The only States which show any considerable actual increase in the number of sheep since 1901 are Montana and Wyoming. In the former the increase is 555,000 and in the latter 1,036,000. The number of sheep east of the Mississippi continues to steadily decline. Most of the territorial States have reached the limit of their production. The situation offers little encouragement that we are likely to have a domestic supply of wool equal to the domestic requirements.

The Beet Sugar Industry.

Some idea of the extent of the beet sugar industry in the United States may be gained by a study of the following tables, which give the locations of the factories and the capacity of each, in tons. With the extension of irrigation in the West hitherto unproductive land will very likely be used almost entirely for the cultivation of sugar beets and within a few years the number of factories in this country will be doubled. The beet sugar industry had its origin in the Western States and its development has been largely in that section. Sugar beets can be grown in almost any sort of soil, except where the subsoil is hard. The cost of production is from $30 to $40 an acre, and the beets should sell at about $4 a ton at the factories.

POPULATION TABLE NO. 3—FOREIGN-BORN POPULATION BY STATES, TERRITORIES, AND COUNTRIES OF BIRTH.

The following table shows the number of foreign-born persons in the United States, by States and Territories and country of birth. This is one of the most interesting tables in the vital statistics department of the census. It shows at a glance the countries from which the largest number of immigrants to this country come, and the sections of the United States to which they go. It will be noticed that the men from the countries where skilled labor is common, or where farming is an important occupation, seek the States of smaller cities, or agricultural sections, while those from the south of Europe seem to center in the greater cities.

States and Territories.	Austria.	Bohemia.	Canada.	Denmark	England.	France.	Germany.	Holland.	Hungary	Ireland.

POPULATION TABLE NO. 7—CENTRE OF POPULATION FROM 1790-1900.

Census Year.	North Latitude.	West Longitude.	Approximate Location.	Movement in Miles.
1790	39° 16.5′	76° 11.2′	23 miles east of Baltimore, Md.	—
1800	39° 16.1′	77° 56.5′	18 miles west of Baltimore, Md.	41
1810	39° 11.5′	77° 37.2′	40 miles southwest by west of Washington, D. C.	36
1820	39° 5.7′	78° 33.0′	16 miles north of Woodstock, Va.	50
1830	38° 57.9′	79° 16.9′	19 miles west southwest of Moorefield, W. Va.	39
1840	39° 2.0′	80° 18.0′	16 miles south of Clarksburg, W. Va.	55
1850	38° 50.0′	81° 19.0′	23 miles southeast of Parkersburg, W. Va.	55
1860	39° 0.4′	82° 48.8′	20 miles south of Chillicothe, Ohio	81
1870	39° 12.0′	83° 35.7′	48 miles east by north of Cincinnati, Ohio.	42
1880	39° 4.1′	84° 39.7′	8 miles west by south of Cincinnati, Ohio.	58
1890	39° 11.9′	85° 32.9′	20 miles east of Columbus, Ind.	48
1900	39° 9.6′	85° 48.9′	6 miles southeast of Columbus, Ind.	14

RELATIONS OF OCCUPATIONS TO DEATH.

The data available for studying the influence of occupation upon the death rate in various localities or from different causes consist of the returns made by the census enumerators, showing the occupations of the living population, and the registration record of deaths which show, to a certain extent, the occupations of decedents. They are not fully comparable, because the enumerators made their returns of occupations in accordance with definite instructions concerning the manner of stating occupations, while the physicians or others reporting deaths in the registration areas stated occupations according to their individual understanding, and entirely without uniformity.

In many cases the physicians failed to consider certain occupations which the Census Bureau had specifically selected. It was a matter of individual judgment, largely, and often the opinions of several physicians in the same locality differed materially. Another cause which made it difficult to arrive at a definite enumeration was the large per cent of deaths recorded where the men had no stated occupation, though were, at the time of their death, engaged in some particular work. In many cases they were probably included under the occupation in which they were last engaged.

The following table shows the population, deaths and death rates during the census year, by occupations, in comparison with 1890:

*The Delaware peach crop is apparently diminishing. The production of peaches as given is only 2.1 per cent of the production in 1890, and the number of trees is 46 per cent less than twelve years ago. This would make it appear that farmers are gradually going out of the peach-raising business and devoting their energies to apples, cherries and pears, all of which show a decided increase in trees and production during the same period.

(a) No statistics. (b) Production 112,726 bushels orchard fruits; total valuation, $96,764. (c) Returns from 45 farms show production of 1,000 bushels orchard fruits; valuation, $773. (d) 33 acres are devoted to orchard fruits, and the total value of production is $897.

Permanent Census Bureau.

The United States Census Bureau is now established as a permanent adjunct to the Government machinery and in future it will be possible for citizens to keep posted at all times on all matters pertaining to the material welfare of the country. The office is under the control of a permanent chief who is not dependent upon political influence for the retention of his position, and is not removable except for cause, and it is now probable that the office will become in fact what it ought to be, one of the most valuable parts of the Government machinery.

Under constitutional provisions a census of the entire country is required to be taken every decade. In the early years of the Government a census was construed to mean an enumeration of the population, and in the beginning the work of gathering such statistics was a simple matter, but as the country grew in population and area it was found that the field of statistics also expanded and it was deemed desirable to gather information bearing upon the social and financial condition of the people. Year after year the census enumeration enlarged its scope until the taking of a census became a formidable enterprise. But though the work increased and its value was appreciated, the facilities for gathering such information were not commensurate. Temporary quarters for the census work were opened in Washington, temporary officials were appointed, temporary forces of clerks, enumerators and tabulators were hired, and as soon as their labors were completed they were dismissed from office and the entire clerical force of the office was disbanded and scattered. Thus it was necessary for the new census officials, every ten years, to recruit an army of inexperienced men for census work, with the result that in many instances the labors of enumerators and tabulators in certain departments of the work were so badly performed as to be absolutely worthless, and thus the Government has not only been compelled to pay large sums of money to no purpose, but the country has been deprived of valuable information which it desired to obtain.

The need of a permanent system for the compilation of the census was first urged upon the country by General Francis A. Walker, director of the Ninth and Tenth Censuses, in 1888. General Walker pointed out the difficulties under which the bureau labored and showed by logical argument the impossibility of obtaining satisfactory results from a corps of men who were not only engaged without special reference to their fitness for the work, but half of whom might be found to be incompetent when it was too late to change the staff. The subject was then agitated in Congress and throughout the country, and, finally, in 1902, fourteen years after General Walker first suggested the idea, Congress established the Census Office as a permanent institution and department of the Government with Census Commissioner W. R. Merriam in charge of its administration.

The good effects of the change will be apparent within a year or two, when the Census Bureau will issue its special reports based upon the census of 1900, and in the future the department will be served by such skilled specialists in enumeration and tabulation in the various branches of statistical work that their services will in time become indispensable and they will improve so much upon the present system that the census to be taken in 1910 will be the most thorough and valuable ever collected in any country of the world.

It is suggested that statistics concerning manufactures and agriculture be collected and published every five years, instead of every ten years, as now, in order that a more close and accurate record of fluctuations in conditions affecting these branches of business may be kept, and thus a more accurate idea may be obtained of the commercial and industrial enterprises of this country. All European countries keep close watch upon the statistics affecting their interests, but while, as a rule, such information is for Government officials only, the United States Census Statistics will be open and free to all.

The establishment of a permanent census bureau would facilitate the publication of census reports and make them much more valuable. As it is at present, several important reports of the census of 1900 are not yet ready for publication, and some are not expected until the latter part of 1903. For example, the report on prison statistics will not be given to the public until late in 1903.

The material for that portion of the census work which deals with the defective and criminal classes was collected by the census agents at the same time that other information was gathered, but while the data have been in the hands of the bureau since 1900, their publication has been delayed until, as is now admitted by the census officials, it will be many months before it can be completed. In preparing the tables in regard to the prisons and prisoners in the United States for The American Almanac, the latest available material was that of the Census of 1890, and as this information was too antiquated to be of value, it was necessary to send to the wardens of all the various prisons in the United States in order to collect the facts that are presented in the penal tables that appear upon another page of this book. While the criminal statistics given in The American Almanac, therefore, may not be so far-reaching or complete as those that have been collected by the Census Bureau, the fact that they are the first to be published since the Census of 1890, and that they are of later date than those which are to be published next year by the United States Government makes them of the utmost value to those who are interested in the study of the defective or criminal classes.

Manufactures.—Table No. 1.

The tables which follow give the number of manufacturing establishments, the capital invested, the number of salaried persons and wage earners, in the United States, as given by the census for 1900. The Census act requires that the manufacturing schedules shall contain an inquiry as to the "amount of capital invested," but does not define what shall be construed as capital. It is difficult to define the word "capital" so that the thing measured shall be a tangible, restricted and uniform thing. Superintendent Walker, of the Census Bureau, realized at the time of the Tenth Census that it was impossible to measure statistically the amount of capital invested in the manufacturing enterprises of the country, and he recommended that these statistics should be omitted altogether.

The form of inquiry used in the Census of 1890 attempted to meet the criticism by formulating a drag-net inquiry to cover all kinds of capital either directly or indirectly employed in manufactures, whether it be fixed or floating, owned or borrowed, real or personal. In 1900, after careful consideration, it was agreed that practically the same form of inquiry should be used, as it was conceded that the duplications which resulted from this method could not be eliminated anyhow.

The statistics of capital invested show totals which are comparable with those of other censuses, and are valuable for this reason, if for no other. The investments outside of manufacturing proper, the value of land, either owned or rented, the ownership of good will, trade marks and patents, are to be included in capital. In connection with these statistics, those of the salaried employes and the wage earners have a more important significance than if either were taken separately, for they show approximately the per cent of the invested capital for each employe, and give an idea of the economic position of the workers. Officers of corporations, though receiving salaries, are not included in these tables, having been put in a separate class by the Census Bureau:

States and Territories.	Year	No. of Establishments.	Capital.	Salaried Persons.		Wage Earners.						Total.	
						Men.		Women.		Children under 16.

The tables below give the product of manufactures of the more important commodities made in the United States. Some of them are classed with manufactures, although they might come into the category of hand trades, as distinguished by the census. Among these come awnings and tents, book binding and blank book making and articles into the construction of which hand labor has a large part. In compiling statistics of these trades none were canvassed which were not carried on in shops of some sort, the existence of which was considered a guide for the enumerator in determining where he was expected to obtain a schedule. The establishment of this rule arbitrarily threw out of the census returns the statistics for a large body of artisans who work at their homes or without a shop.

Manufactures Table No. 2.

MANUFACTURED PRODUCTS OF TOBACCO.

The value of cigars and cigarettes was 56.6 per cent of the total value of all tobacco manufactures in 1900 in this country; chewing and smoking tobacco and snuff, 36.7 per cent, and tobacco, stemmed and re-handled, 6.7 per cent. The total production for the year was 868,163,275 pounds, an increase of 77.8 per cent over 1890. The cultivation of tobacco on a large scale is confined to a few States, Kentucky, North Carolina, Virginia, Ohio and Tennessee being the largest producers in the order named. It is estimated that the United States grows yearly one-half the world's supply of tobacco. The following table gives the number of factories and the value of the manufactured product in each State.

States.	Tobacco, Cigars and Cigarettes.	
	No. of Factor's.	Value of Products.
Alabama	26	$278,044

Higher Education in Great Britain and Ireland.

Higher education is provided in Great Britain and Ireland by universities and detached colleges, and professional education by special schools of medicine attached to the principal hospitals, and by schools of law and theology.

During the last few years there has been a number of changes in methods pursued by the larger universities, especially in the way of offering new degrees.

In 1891 the University of Oxford instituted the degrees of Bachelor of Letters and Bachelor of Science, which were intended to promote and recognize the value of study and research. The requirements for these degrees are a course of special study or research and a residence of two years. Recently, as a result of this move, a doctorate in letters and in science was created.

Cambridge has also made plans for the admission of persons as advanced students, the degree of B. A. being obtainable by those who have shown a residence of six terms and have obeyed the regulations as to examinations.

The University of London, which was sanctioned in 1900, embraces the following schools: University College and Kings College, ten medical schools and six theological colleges, the Royal College of Science, the Southeastern Agricultural College, the City and Guilds' Institute, the London College of Economics, the Royal Holloway College and Bedford College. The senate of the University is empowered to add to these any public institution, within prescribed limits. A faculty of law is in the process of being organized.

Victoria University now accepts a certificate from many secondary schools in Lancashire and Yorkshire in lieu of matriculation tests. Birmingham University, to which Andrew Carnegie has recently given

Digitized by Google

$250,000, has at the donor's suggestion, embodied some of the salient features of American university methods.

The Scottish universities have made some rather important changes in their methods recently. The course for the M. A. degree has been made less rigid and more varied by the permission of a choice of subjects within definite limits, and graduation with honors has been encouraged.

The existing provision for higher education in Ireland comprises the University of Dublin and the Royal University, an examining body to which are affiliated the three Queen's Colleges. Until 1850 the University of Dublin was the only body in Ireland authorized to confer degrees.

Cost of Higher Education in Various Countries.

The figures given in the tables of the cost of higher education in various countries are from the report of the Commissioner of Education, and are intended to give an idea of the approximate amounts paid for higher education in the principal countries of the world. Educational systems differ greatly in different countries and it is possible to make fair comparisons of cost only where it is possible to make fair comparisons of the systems employed. In Germany a great deal of such work as is done in higher educational institutions in this country is carried on in the secondary schools, or gymnasia.

In a number of countries which might have place in these tables, it was impossible to obtain data, according to the Commissioner's report, and no safe figures can be given. In other cases, census figures had to be used, though dating back several years previous to the time of the report. The data for Greece was obtained shortly after the war with Turkey, and are much lower than might be expected.

Countries.	Expenditure for higher education.	Per capita. (cents).	Countries.	Expenditure for higher education.	Per capita. (cents).	Countries.	Expenditure for higher education.	Per capita. (cents).
Algeria	$128,535	2.9	Germany	$7,450,360	14.3	Portugal	$253,268	5.0
Argentine	250,000	6.0	Great Britain and Ireland	8,353,655	21.7	Roumania	426,324	7.3
Australia	614,140	15.2	Greece	103,636	4.3	Russia (and Siberia)	4,740,709	3.7
Austria	2,692,370	11.3	Hungary	1,240,246	7.1	Servia	63,690	2.8
Belgium	748,267	11.4	Italy	2,198,833	7.0	Spain	487,892	2.5
Bulgaria	75,498	2.3	Liberia	102,434	1.8	Sweden	653,209	18.0
Canada	1,014,254	19.5	Netherlands	767,229	15.3	Switzerland	672,505	21.8
Denmark	299,686	13.7	Norway	166,717	8.3	*United States	20,836,488	3.3
France	4,391,012	11.4						

*The cost of higher education in the United States can be approximated only, as the expenses are met by so many different methods. For the same reason only an approximation of the per capita cost can be given. The Government expended $985,009 toward higher education in 1900.

State School Officers.

(Corrected to date by the United States Bureau of Education.)

Name.	Address.	Official designation.
H. C. Gunnels	Montgomery, Ala	State superintendent of education.
Sheldon Jackson	Sitka, Alaska	General agent of education.
Robert L. Long	Phoenix, Ariz	Territorial superintendent of public instruction.
J. J. Doyne	Little Rock, Ark	State superintendent of public instruction.
Thomas J. Kirk	Sacramento, Cal	Do.
Mrs. Helen L. Grenfell	Denver, Colo	Do.
Charles D. Hine	Hartford, Conn	Secretary of State Board of Education.
P. B. Norman, Jr.	Dovel, Del	Do.
A. T. Stuart	Washington, D. C	Superintendent of district schools.
W. N. Sheats	Tallahassee, Fla	State superintendent of public instruction.
Gustavus R. Glenn	Atlanta, Ga	State school commissioner.
Miss Permeal French	Boise, Idaho	State superintendent of public instruction.
Alfred Bayliss	Springfield, Ill	Do.
John D. Benedict	Muscogee, Ind. T	Territorial superintendent of schools.
Frank L. Jones	Indianapolis, Ind	State superintendent of public instruction.
R. C. Barrett	Des Moines, Iowa	Do.
Frank Nelson	Topeka, Kans	Do.
H. V. McChesney	Frankfort, Ky	Do.
J. V. Calhoun	Baton Rouge, La	State superintendent of public education.
W. W. Stetson	Augusta, Me	State superintendent of public schools.
M. Bates Stephens	Baltimore, Md	State superintendent of public instruction.
Frank A. Hill	Boston, Mass	Secretary of State Board of Education.
Delos Fall	Lansing, Mich	State superintendent of public instruction.
J. W. Olsen	St. Paul, Minn	Do.
Henry L. Whitfield	Jackson, Miss	State superintendent of public education.
W. T. Carrington	Jefferson City, Mo	State superintendent of public schools.
W. W. Welch	Helena, Mont	State superintendent of public instruction.
W. K. Fowler	Lincoln, Neb	Do.
Orvis Ring	Carson, Nev	Do.
Channing Folsom	Concord, N. H	Do.
Chas. J. Baxter	Trenton, N. J	Do.
J. Franco Chavez	Santa Fe, N. M	Territorial superintendent of schools.
Charles R. Skinner	Albany, N. Y	State superintendent of public instruction.
J. Y. Joyner	Raleigh, N. C	Do.
J. M. Devine	Bismarck, N. D	Do.
Lewis D. Bonebrake	Columbus, O	State commissioner of common schools.
L. W. Baxter	Guthrie, Okla	Territorial superintendent of public instruction.
J. H. Ackerman	Salem, Ore	State superintendent of public instruction.
Nathan C. Schaeffer	Harrisburg, Pa	Do.
Thomas B. Stockwell	Providence, R. I	Commissioner of public schools.
John J. McMahan	Columbia, S. C	State superintendent of education.
E. E. Collins	Pierre, S. D	State superintendent of public instruction.
Morgan C. Fitzpatrick	Nashville, Tenn	Do.
Arthur Lefevre	Austin, Tex	Do.
A. C. Nelson	Salt Lake City, Utah	Do.
Walter E. Ranger	Montpelier, Vt	State superintendent of education.
Joseph W. Southall	Richmond, Va	State superintendent of public instruction.
R. B. Bryan	Olympia, Wash	Do.
Thomas C. Miller	Charleston, W. Va	State superintendent of free schools.
L. D. Harvey	Madison, Wis	State superintendent of public schools.
Thomas T. Tynan	Cheyenne, Wyo	State superintendent of public instruction.

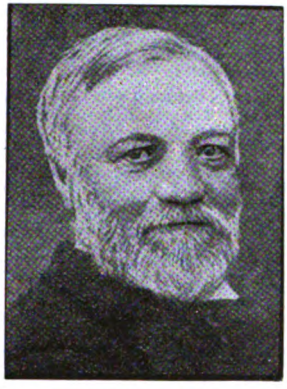
Educational Benefactions in 1902.

The most important gift of the past year for educational purposes, not alone as regards the amount of money involved, which was the greatest ever yet given to that end, but in regard to its far-reaching purpose, was that of Cecil Rhodes. By his will, after the payment of certain large bequests, he left the residue of his estate, which has been esti mated at not less than $50,000,000, for the betterment of Oxford Uni versity, England. But the unique feature of this was his purposed es tablishment of scholarships of $1,500 each, which were to be awarded to residents of various countries, to enable youths to be selected by certain specified author ties, to enjoy the advantages of a course at this old English place of learning. Among these he settled that two were to be awarded to each State of our Union. This bequest has called forth many and varied opinions. Some maintain that Amer ican youths can obtain all the educa tion necessary for them at our own colleges and universities, while others, notably instructors in our colleges, claim that a course at Ox ford would be of great benefit to the fortunate young men selected, giving them a broader outlook and widening their mental processes by intercourse with the ripe scholarship of the Old World masters. What the final outcome will be is yet un settled. At a representation meet ing of all the German university duelling clubs it was recently de cided that the members of these as sociations would have nothing to do with the Rhodes scholarships. This means that German students will be averse to accepting the proffered benefits, and other nations may fol low their example. Thus it seems more than probable that Mr. Rhodes's dream of extending the ideas of British civilization will prove to be beyond realization.



For many years the name of Hearst has been associated in the mind of the people with large en terprises and public-spirited projects. But in nothing is it more likely to be held in permanent recollection than in connection with Mrs. Phoebe Hearst's magnificent donations to the University of California. This institution, started in 1853 as a

Mrs. Phoebe Hearst.

Mrs. Leland Stanford.

Congregational school, and soon abandoned, was revived under an act of Congress in 1862, and in 1863 was chartered and received an en dowment from the State as an un sectarian institution. When Mrs. Hearst decided to erect a college building in memory of her husband, the late Senator Hearst, the archi tectural problem was one that de manded attention. After consulta tion with various authorities she decided upon a plan which it was hoped would bring the best archi tectural skill of the world to its solution. It did so, and the result was eminently satisfactory. A scheme of competition was devised, comprising a first and open contest, in which $15,000 was distributed in prizes. The open competition at tracted 98 competitors. By succes sive winnowings the number was finally reduced to 11, 6 Americans, 3 French, 1 Dutch and 1 Swiss. These had six months in which to prepare designs for the second com petition. This was decided at San Francisco, and the design of M. Bernard, of Paris, was unanimously chosen as the best. He received a prize of $10,000. The other prize winners were Howells, Stokes & Hombortle, of New York, $4,000; Desprasdelles & Codman, of Boston, $3,000; Howard & Cauldwell, of New York, $2,000; Lord, Hewlett & Hill, of New York, $1,000. The cornerstone of the building was laid November 19, 1902, by Mrs. Hearst acting in her official capacity as one of the Regents of the Univer sity. She was accompanied by her son, Congressman William Randolph Hearst, of New York, and Benjamin Ide Wheeler, president of the uni versity. The students were there in hundreds, for they are not only proud of the university, but regard Mrs. Hearst with much affection. The women students call her "The Fairy Godmother," so often has she held out a helping hand to the institu tion. The building is to be dedicated to the use of the College of Mines, and will be built of the strongest and cleanest stone to be found in the California hills. When com pleted it will be not only the larg est, but the most completely equipped building devoted exclusively to the study of mining engineering in the world. The purpose to which the building is to be devoted was well stated in Mrs. Hearst's words on this occasion, when she said: "This cornerstone is laid in honor of an earnest student of mineralogy, a practical miner, a man who measured men by their truth, and methods by their honesty. It is our sincere hope that the government work of the Hearst Mining Building will add to the world's scientific and practical knowledge, and that students may be here inspired to realize the highest ideals of labor." Mrs. Hearst's interest in education is not confined to this single institution. The Boys' Home Kindergarten in San Francisco, and the Phoebe Hearst School for

Girls in Washington are among her beneficiaries. She has contributed liberally to the work of the University of Pennsylvania, and she built and helps to maintain the Hearst Free Libraries at Aanaconda, Mont., and at Leadville, S. D.

Another California woman who has shown great liberality toward educational purposes is Mrs. Leland Stanford. All the world knows of the great university founded in memory of her son, Leland Stanford, Jr., who died in 1884 at the age of sixteen, the most richly endowed educational institution in the world. The founder, her husband, the late Senator Stanford, expressed the purpose of the institution in these words: "I would have this institution help to fit men and women for usefulness in this life by increasing their individual power of production, and by making them good companions for themselves and others." Since Senator Stanford's death Mrs. Stanford's sole aim in life has been to increase the usefulness of this institution. She has given to it nearly her entire private fortune, and a little over a year ago transferred to it property valued at from $28,000,000 to $30,000,000, the largest endowment ever given up to that time by one individual for educational purposes.

As is well known, Mr. J. D. Rockefeller is a liberal helper in the cause of education. He has given some $10,000,000 or $12,000,000 to the University of Chicago, besides several hundred thousand dollars to other institutions. Among his principal gifts in 1902 were $250,000 to Cornell University, $200,000 to Oberlin College, $150,000 to Newton Theological Seminary, $100,000 to Rochester University, and $25,000 to Bucknell University.

Andrew Carnegie has given some $70,000,000 for the cause of education, including, of course, his gifts for libraries, which is a favorite method of his for reaching the people with educational facilities. Up to May 1, 1902, a list of his gifts, as revised by himself, shows that Canada had received $876,500, Cuba $252,000, England $670,000, Ireland $65,500, Scotland $13,078,750, and the United States $52,270,173. Mr. Carnegie's largest donations were $10,000,000 to found a fund in Scotland providing a college education for those who wish it but lack the money, $10,000,000 for the establishment of a national university at Washington, $5,200,000 for libraries in New York City, $7,250,000 to the Carnegie Institute at Pittsburg, Pa., $4,000,000 to the Pittsburg pension fund, and $1,000,000 to the St. Louis library.

In addition to the great benefactions of these generous givers, small sums given by people unknown to the public at large make a great aggregate. The following table shows the amount given in 1902 for this cause. But there are some noteworthy gifts not included in the table, among which the following were the more important: American residents of Montreal gave $9,000 to McGill University to found a political science fellowship in honor of President McKinley; Oberlin College raised $300,000, thereby securing the conditional gift made by J. D. Rockefeller; Notre Dame (Ind.) University received a valuable collection of books and paintings from Mgr. Sloan; the Philadelphia Academy of Fine Arts received a bequest of $500,000 from Mrs. Priscilla P. Casson; the descendants of Peter Cooper gave to the Cooper Union $300,000, and Andrew Carnegie gave a like sum; Mr. Carnegie also gave to the Carnegie Institution $10,000,000 in bonds; General Horace Carpenter gave Columbia College $100,000 toward a chair of Chinese literature, in addition to a like sum which he had already given for the same purpose, and a high Chinese official gave 6,000 rare books for the same purpose. J. D. Rockefeller, having offered Harvard $1,000,000, on condition that friends of the university raised $500,000, Mrs. C. P. Huntington gave $250,000 toward the sum; Mrs. Lulu Carrier left $50,000 to Columbia and $100,000 to Yale, to become available at the death of another legatee; Andrew Carnegie gave the Stevens Institute of Technology $100,000; Adolph Lewisohn gave $75,000, and Nathaniel Myers $5,000 to the Hebrew Technical School for Girls in New York; an anonymous gift of $250,000 was made to the Cooper Union Institute; the gift of $150,000 by the late William Lampson, of Rochester, to Yale, is to be used for a new building; George Smith, of St. Louis, left Harvard $450,000; George L. Littlefield bequeathed to Brown University $500,000; the money necessary to make J. D. Rockefeller's gift to Barnard College operative was raised, with an additional $50,000, to which Mr. Rockefeller added a like sum, making the total amount $500,000; Newton Theological Seminary of Boston raised $300,000; a rich American woman in Paris gave to Chicago University $200,000 to establish a French school of pedagogy; Mrs. Ann Eliza Walsh, of Brooklyn, gave $450,000 for the education of candidates for the Roman Catholic priesthood; Mrs. Jane L. Stanford transferred by deed to Stanford University $30,000,000 in bonds, stocks and real estate. The settlement of the Fayerweather will fight distributes money as follows: Yale, $300,000; Bowdoin, Dartmouth, Williams, Amherst, Wesleyan, Rochester, University of Virginia, Hampton, Maryville, Marietta, $100,000 each; Columbia, Cornell, $200,000 each; Union Theological Seminary, Hamilton, Lafayette, Adelbert, Wabash Park, $50,000 each. Besides these direct bequests each of these colleges is to receive $150,000 each from the residuary estate after all the other legacies are paid. About $1,225,000 will also be distributed among some thirty other educational institutions, mostly women's colleges.

CONSOLIDATION OF THE COUNTRY SCHOOL.

There has been a great deal of discussion for some years as to the advantages to be derived from the consolidation of country schools. Under the present conditions it is necessary for the farmer to move to the city to secure for his children the advantages of a graded school, for it is impossible for two or three teachers in a rural district to carry on a proper graded system. It is thought that the consolidation of rural schools will solve the problem. This plan contemplates the disorganization of small districts and uniting them into one strong, well graded school.

Consolidation is proving a success in, notably, Ohio, Indiana, Iowa, Minnesota, Nebraska and Kansas. In several of these States plans have been adopted for providing transportation for the children who live too far to walk to the central school, and the system of wagons provided has been found to exercise a strong influence over the children, inspiring them with better ideas of their relations toward each other and their schools, and bridging the gap between school and home.

It is pointed out that the economic waste of the "little red schoolhouse" even in thickly-settled districts, is much greater than the taxpayers have ever been told. In Wisconsin, in 1901, there were 316,833 pupils enrolled in the rural schools, and the average daily attendance was only 179,913, or 56.7 per cent. Wisconsin has found that the centralization of the schools has saved money for the State. In Ohio the schools of thirty-three townships are now fully centralized, and there is partial consolidation in 150 others. In Indiana 2,599 children are now transported regularly to and from school. Michigan permits only the centralization of country high schools, while Iowa, Kansas, Nebraska, Minnesota and the two Dakotas have established systems more or less advanced. In New England the centralization of the rural schools has been going on for the past 50 years, and the transportation plan has been carried on successfully. In the South, Georgia, North Carolina, Florida and Tennessee have shown themselves in favor of some plan to reduce the number of schools and the expenses attending rural instruction.

The International Court of Arbitration.

The International Court of Arbitration is a permanent court which is supposed to be ready at any time to consider and arbitrate any international disputes which may be brought to its attention by the nations in interest. Fifteen nations, including all the great maritime powers, are parties to the treaty, the only countries not represented being Bulgaria, Montenegro, Persia, Siam and Switzerland.

The organization of this permanent court was provided for by the International Arbitration Treaty which was adopted by the Universal Peace Conference in 1899. The leading and more important provisions were as follows:

Article 2.—In case of serious disagreement or conflict, before an appeal to arms, the Signatory Powers agree to have recourse, as far as circumstances allow, to the good offices of mediation of one or more friendly powers.

Article 3.—With a view to obviating, as far as possible, recourse to force in the relations between States, the Signatory Powers agree to use their best efforts to insure the pacific settlement of international differences.

Article 6.—Good offices and mediation, either at the request of the parties at variance, or on the initiative of Powers strangers to the dispute, have exclusively the character of advice and never have binding force.

Article 7.—The acceptance of mediation cannot, unless there be an agreement to the contrary, have the effect of interrupting, delaying, or hindering mobilization or other measures of preparation for war.

If mediation occurs after the commencement of hostilities it causes no interruption to the military operations in progress, unless there be an agreement to the contrary.

Article 15.—International arbitration has for its object the settlement of differences between States by judges of their own choice, and on the basis of respect for law.

Article 20.—With the object of facilitating an immediate recourse to arbitration for international differences, which it has not been possible to settle by diplomacy, the Signatory Powers undertake to organize a permanent Court of Arbitration, accessible at all times and operating, unless otherwise stipulated by the parties, in accordance with the Rules of Procedure inserted in the present Convention.

Article 21.—The Permanent Court shall be competent for all arbitration cases, unless the parties agree to institute a special Tribunal.

Article 22.—An International Bureau, established at The Hague, serves as record office for the Court.

This bureau is the channel for communications relative to the meetings of the Court.

It has the custody of the archives and conducts all the administrative business.

The Signatory Powers undertake to communicate to the International Bureau at The Hague a duly certified copy of any conditions of arbitration arrived at between them, and of any award concerning them delivered by special Tribunals.

They undertake also to communicate to the bureau the laws, regulations, and documents eventually showing the execution of the awards given by the Court.

Article 23.—Within the three months following its ratification of the present act, each Signatory Power shall select four persons at the most, of known competency in questions of international law, of the highest moral reputation, and disposed to accept the duties of arbitrators.

The persons thus selected shall be inscribed as members of the Court in a list which shall be notified by the bureau to all the Signatory Powers.

Any alteration in the list of arbitrators is brought by the bureau to the knowledge of the Signatory Powers.

Two or more Powers may agree on the selection in common of one or more members.

The same person can be selected by different Powers.

The members of the Court are appointed for a term of six years. Their appointments can be renewed.

In case of the death or retirement of a member of the Court, his place shall be filled in accordance with the method of his appointment.

Article 24.—When the Signatory Powers desire to have recourse to the Permanent Court for the settlement of a difference that has arisen between them, the arbitrators called upon to form the competent Tribunal to decide this difference must be chosen from the general list of members of the Court.

Failing the direct agreement of the parties on the composition of the Arbitration Tribunal, the following course shall be pursued:

Each party appoints two arbitrators, and these together choose an umpire.

If the votes are equal, the choice of the umpire is intrusted to a third Power, selected by the parties by common accord.

If an agreement is not arrived at on this subject, each party selects a different Power, and the choice of the umpire is made in concert by the Powers thus selected.

The Tribunal being thus composed, the parties notify to the bureau their determination to have recourse to the Court and the names of the arbitrators.

The Tribunal of Arbitration assembles on the date fixed by the parties.

The members of the Court, in the discharge of their duties and out of their own country, enjoy diplomatic privileges and immunities.

Article 25.—The Tribunal of Arbitration has its ordinary seat at The Hague.

Except in cases of necessity, the place of session can only be altered by the Tribunal with the assent of the parties.

Article 26.—The International Bureau at The Hague is authorized to place its premises and its staff at the disposal of the Signatory Powers for the operations of any special board of arbitration.

The jurisdiction of the Permanent Court may, within the conditions laid down in the regulations, be extended to disputes between non-Signatory Powers, or between Signatory Powers and non-Signatory Powers, if the parties are agreed on recourse to this Tribunal.

Article 27.—The Signatory Powers consider it their duty, if a serious dispute threatens to break out between two or more of them, to remind these latter that the Permanent Court is open to them.

Consequently, they declare that the fact of reminding the conflicting parties of the provisions of the present Convention, and the advice given to them, in the highest interests of peace, to have recourse to the Permanent Court, can only be regarded as friendly actions.

Article 28.—A Permanent Administrative Council, composed of the diplomatic representatives of the Signatory Powers accredited to The Hague and of the Netherlands Minister of Foreign Affairs, who will act as president, shall be instituted in this town as soon as possible after the ratification of the present act by at least nine Powers.

This Council will be charged with the establishment and organization of the International Bureau, which will be under its direction and control.

It will notify to the Powers the constitution of the Court and will provide for its installation.

It will settle its rules of procedure and all other necessary regulations.

It will decide all questions of administration which may arise with regard to the operations of the Court.

It will have entire control over the appointment, suspension or dismissal of the officials and employes of the bureau.

It will fix the payments and salaries, and control the general expenditure.

At meetings duly summoned the presence of five members is sufficient to render valid the decisions of the Council. The decisions are taken by a majority of votes.

The Council communicates to the Signatory Powers without delay the regulations adopted by it. It furnishes them with an annual report on the labors of the Court, the working of the administration, and the expenses.

Article 29.—The expenses of the Bureau shall be borne by the Signatory Powers in the proportion fixed for the International Bureau of the Universal Postal Union.

Article 30.—With a view to encouraging the development of arbitration the Signatory Powers have agreed on the following rules, which shall be applic-

Digitized by Google

able to arbitral procedure, unless other rules have been agreed on by the parties.

Article 31.—The Powers who have recourse to arbitration sign a special act ("Compromise"), in which the subject of the difference is clearly defined, as well as the extent of the arbitrators' powers. This act implies the undertaking of the parties to submit loyally to the award.

Article 32.—The duties of Arbitrator may be conferred on one arbitrator alone or on several arbitrators selected by the parties as they please, or chosen by them from the members of the Permanent Court of Arbitration established by the present act.

Failing the constitution of the Tribunal by direct agreement between the parties, the following course shall be pursued:

Each party appoints two arbitrators, and these latter together choose an umpire.

In case of equal voting, the choice of the umpire is intrusted to a third Power, selected by the parties by common accord.

If no agreement is arrived at on this subject, each party selects a different Power, and the choice of the umpire is made in concert by the Powers thus selected.

Article 33.—When a Sovereign or the Chief of a State is chosen as arbitrator, the arbitral procedure is settled by him.

Administrative Council.—The Administrative Council of the Permanent Court of Arbitration is composed of the Minister of Foreign Affairs of the Netherlands, and such diplomatic representatives as the ratifying Powers may have stationed at The Hague, Mr. R. Melvil, Baron von Layden, Judge of the District Court of Utrecht, and a member of the First Chamber of the States-General is Secretary-General of the Council.

List of Members of the Permanent Hague Court.—The following roster of the Permanent Court of Arbitration was furnished for The American Almanac for 1903 by the Department of State:

Austria-Hungary.—Count Frederic Schonborn, doctor of law; Count Albert Apponyi, member of the Chamber of Maynoles; Henry Lammasch, doctor of law.

Belgium.—M. Breamaert, Minister of State; Baron Lambremont, Minister of State; Chevalier Descamps, Senator.

Bulgaria.—Stoyan Doueff, doctor of law; Dimitri Stancioff, doctor of law.

Denmark.—Professor H. Malzen, doctor of law.

France.—Leon Bourgeoise, President of the Chamber of Deputies; M. De Laboulaya, ex-Ambassador; Baron d'Estournelles de Constant, Minister Plenipotentiary; Louis Renanet, Minister Plenipotentiary.

Germany.—M. Bulguer, doctor of law; M. de Frantzius, counsellor; M. De Martitz, doctor of law; M. De Bar, doctor of law.

Great Britain.—Sir Edwan Baldwin Malet, ex-Ambassador; Sir Edward Fry, doctor of law; Professor John Westlake, doctor of law.

Greece.—Denys Stephanos, Deputy; George Streit, professor of law; Michel Kakdgy, professor of law.

Italy.—Count Constantin Negra, doctor of law; Commander Jean Baptiste Pagano Guanaschelli, doctor of law; Count Tornielli-Brusati di Vergani, doctor of law; Chevalier Joseph Zanardelli, doctor of law.

Japan.—I. Molond, Envoy Extraordinary; Henry Willard Denicon, counsel of the Minister of Foreign Affairs at Tokio.

Mexico.—Manuel de Aspiroz, doctor of law; Jose M. Gambon, doctor of law; Genan Raigosa, doctor of law; Alfred Charen, doctor of law.

Netherlands.—T. M. C. Auer, doctor of law; F. B. Connick Liefsting, doctor of law; Joukheer A. F. de Savonini Lohman, doctor of law; Joukheer G. L. M. H. Ruys de Bearmbrouck, doctor of law.

Portugal.—Count de Macedo, Peer of the Realm; Antonio Emilio Comica de so Broudai, President of the High Court of Justice; Luiz Frederico de Blvas Gorne da Costa, Peer of the Realm.

Roumania.—Theodore Rossetti, Senator; Jean Kalinderl, doctor of law; Eugene Statenco, President of the Senate; Jean N. Lahovari, ex-deputy.

Russia.—M. V. Monravien, Minister of Justice; C. P. Pobedonostzui, Procurer-General; E. V. Frisch, President of the Department of Legislature; M. De Martens, privy counsellor.

Servia.—George Pavlovildt, ex-Minister; Gl'cha Geschitch, ex-Minister; Dr. Milovan Milovanovitch, Minister of Agriculture; Dr. Milenki Vemitch, ex-Minister.

Siam.—Frederick W. Holls, doctor of law.

Spain.—Duc de Telman, ex-Minister of Foreign Affairs; Rominuela F. Villaverde, Marquis de Pozo Roblo, ex-President of the Chamber of Deputies; Bienvenido Oliver, Director-General of the Minister of Justice; Manuel Torres Campos, professor of law.

Sweden and Norway.—S. R. D. K. d'Olivicrona, doctor of law; M. G. Gram, ex-Minister of State of Norway.

Switzerland.—Charles Lardy, doctor of law; Charles Hilly, doctor of law; Emile Rott, doctor of law.

United States.—Hon. Melville W. Fuller, Chief Justice of the Supreme Court; Hon. John W. Griggs, ex-Attorney-General; Hon. George Gray, Judge of the Circuit Court; Hon. Oscar L. Straus, ex-Minister to Turkey.

ADJUSTING "THE PIOUS FUND" DISPUTE.

The first cause heard before the International Court of Arbitration, established as an outcome of The Hague Convention resulted in a decision for the United States, one of the parties thereto, the other being the sister republic of Mexico. It was given by unanimous vote of the five arbitrators selected under the rules of the Court. Of these the two selected by the United States were Sir Edward Fry, an English judge, and Professor M. F. de Martens, a famous Russian jurisconsult. Those named by Mexico were Signor Pagana Guinas, of Italy, and Mr. Savornin Loman, formerly Dutch Minister of Justice. The fifth arbitrator, selected disinterestedly in accordance with the principles of The Hague Convention, was H. Matzen, a Danish lawyer of eminence, and one of the representatives of Denmark in the permanent organization of the International Court of Arbitration. He occupied the position of umpire in this case and officiated as president of the special tribunal.

The matter at issue was the adjustment of certain contentions concerning what is known as "The Pious Fund of the Californias." The origin of the dispute dates back to fifty-five years ago, and the United States Government was involved in it as representing the Catholic Church in California in its claim against the Government of Mexico on account of the Pious Fund. This fund was a gift made by certain persons in Spain, in 1697, to support Roman Catholic missions among the Indians of California, which was at that time a part of Mexico. After the expulsion of the Jesuits from Mexico and California by the Spanish Crown in 1767, the property and funds of the order, including this Pious Fund, which the Jesuits held in trust, were under control of the Spanish Government until Mexico achieved independence, when the fund was taken over by the new government, and administered for the maintenance of missions. When Upper California was ceded to the United States in 1848, Mexico ceased paying to the Catholic Church in that territory its share of the income from the fund. The prelates of the Catholic Church in California sued for their share of the interest before a mixed commission appointed in accordance with a convention agreed to on July 4, 1868. As a result of the hearing then given it was decided by Sir Edward Thornton, the umpire, that the interest of the fund should be equally divided between the church in California and the church in Mexico, and that the Government of Mexico should annually set aside half of the annual interest, amounting to $43,080.99, which, accumulating until 1869, amounted to $904,700.79, which was paid in full. No further payments were ever made, and in 1897 Mr. Powell Clayton, the United States Minister, pressed the Mexican Government vigorously for upward of $1,000,000 due the Catholic Church in California, but Mexico repudiated the indebtedness. The matter then came before the Pan-American Congress, which recommended settlement by arbitration, and the two governments decided to refer the case to The Hague tribunal. The protocol of the agreement was signed at Washington on May 22, 1902, and the special tribunal was promptly constituted, holding its sessions at The Hague, where it was formally welcomed by Queen Wilhelmina. The decision was rendered on Tuesday, October 14, 1902, after able presentation of the case on both sides, and it was received by all the eminent counsel engaged as the result of a careful and impartial hearing. The award made in connection with the decision provides that the Government of Mexico shall pay to the United States Government $1,420,682.67, constituting the arrears of payments due on account of the Pious Fund, and that the same government shall pay annually and forever, on and after February 2, 1903, the sum of $43,059.99 as the share of the Catholic Church of California in the income of that fund.

International Conference of American States.

The second International Conference of American States was held in the City of Mexico, October 22, 1901, to January 22, 1902. As a result of its sittings, twenty-three instruments were drawn up to be submitted to the various countries represented. Six of these were "conventions," one relative to the exchange of official, scientific, literary and industrial publications; one on literary and artistic copyrights; one for the formation of codes on public and private international law; one on the practice of learned professions; one relative to the rights of aliens, and one, which was signed only by Argentine Republic, Bolivia, Colombia, Ecuador, Paraguay, Peru and Uraguay, for the convening of a geographical congress at Rio Janeiro.

Four "treaties" were arranged: One on patents of inventions, industrial drawings and models and trade marks; one for the extradition of criminals and for protection against anarchism; one for the arbitration of pecuniary claims, and one on compulsory arbitration, which was signed only by Argentine Republic, Bolivia, Dominican Republic, Guatemala, Salvador, Paraguay, Peru and Uruguay.

One "protocol" of adherence to the conventions of The Hague, was signed by Guatemala, Mexico, Haiti, Peru, the United States of America, Uruguay, Argentine Republic, Costa Rica, Honduras, Nicaragua, Paraguay, Bolivia, Dominican Republic and Salvador.

Eight "resolutions" were agreed upon: One on the Pan-American Railway; one on the holding of a customs congress; one on sources of production and statistics; one on measures tending to facilitate international commerce; one for the reorganization of the International Bureau of the American Republics; one concerning international sanitary police; one on future American conferences, and one relative to the meeting of a congress for the study of the production and consumption of coffee.

Three "recommendations" were adopted: One on the establishment of a Pan-American bank; one on the creation of an international archaeological commission, and one for the adoption of measures relating to the Philadelphia Commercial Museum.

One "proposition" was made for the obtaining of a subscription of 210,000 francs for a complete edition of the dictionary of construction of the Spanish language by Don Rufino Cuervo.

With practically no exceptions but those noted, all these instruments were adopted by the various countries represented in the conference.

Import Duties.

EUROPEAN COUNTRIES.

The following statement shows the rates of duties levied by the several European countries on imported agricultureal products:

Articles.	AUSTRIA-HUNGARY.	Duty.
Flour, per brl		$1 61
Wheat, per bu		19.5
Corn, per bu		06.1
Oats, per bu		05.1
Rye, per bu		18 3
Barley, per bu		07.8
Meats of all kinds, per 100 lbs		1 30
Lard, per 100 lbs		3 45
American pork prohibited.		
	FRANCE.	
Flour, per brl		$1 88
Wheat, per bu		36.8
Oats, per bu		08.4
Rye, per bu		14.7
Barley, per bu		12.5
Corn, per bu		14.7
	GERMANY.	
Wheat, per bu, with countries having special commercial treaties		$ 22.7
Wheat, per bu, other countries		32.3
Flour, per brl., with countries having special commercial treaties		1 54
Flour, per brl., other countries		2 22
Oats, per bu		9.7
Rye, per bu		21.2
Barley, per bu		10.6
Corn, per bu		9.7
Butter, per 100 lbs		1 80
Meat, per 100 lbs		1 62
Pork, per 100 lbs		1 62
Live Hogs, per head		1 19
	GREECE.	
Wheat, per bu., with countries having commercial treaties with Greece		$ 16.8
	ITALY.	
Flour, per brl		$1 97.3
Wheat, per bu		36.8
Corn, per bu		05.6

Rye, per bu		20
Barley, per bu		17.1
Meats, salted and smoked, per lb		02.1
Lard, per lb		⅞
American pork prohibited.		
Abated duty on flour and provisions November 19, 1901.		

Articles.	NORWAY.	Duty.
Flour, wheat, per brl		$ 47.5
Wheat, per bu		4.0 to 6.7
Corn, per bu		5.0
Oats, per bu		Free to 2.8
Rye, per bu		5.0
Barley, per bu		1.2 to 4.3
	PORTUGAL.	
Flour, per brl		$2 02
Wheat, per bu		58.7
Corn, per bu		49.3
Oats, per bu		25.8
Rye, per bu		43 8
*Lard, per lb		05
*Prohibited except under certain conditions and restrictions. Where importation is allowed it is at the rate given.		
	RUSSIA.	
Flour, per brl		$ 83.8
	SPAIN.	
Flour, wheat, per brl		$2 26
Flour, other, per brl		1 24.2
Wheat, per bu		42
Corn, per bu		21.5
Oats, per bu		12.3
Rye, per bu		21.5
Pork, lard, bacon and ham, per lb		04.3
Salted and dried meats, per lb		01
	SWEDEN.	
Flour, per brl		$1 40
Wheat, per bu		25.5
Corn, per bu		23.1
Oats, per bu		Free
Rye, per bu		23
Barley, per bu		20
Lard, per lb		02.2
Bacon, smoked, per lb		03.4
	TURKEY AND BULGARIA.	
The tariff rate in Turkey and Bulgaria is 8 per cent ad valorem. American pork prohibited.		
Switzerland abolished its import duties on corn and oats May 20, 1893.		

CANADA.

The import duties in Canada for the articles herewith appended are as follows:

	Cents.
Apples, including duty on barrel, per brl	40
Beans, per bu	15
Buckwheat, per bu	10
Butter, per lb	4
Barley, per cent ad valorem	30½
Cheese, per lb	3
Corn, per bu	7½
Corn meal, per brl	25
Eggs, per doz	3
Hops, per lb	6
Malt, per bu	15
Oats, per bu	10

	Cents.
Oatmeal, per cent ad valorem	20½
Potatoes, per bu	15
Rye, per bu	10
Rye flour, per brl	50
Wheat, per bu	12
Wheat Flour, per brl	60
Meats when in barrel, the barrel free, per lb	2
Meats, fresh, per lb	3
Lard and similar substances, oottolene, etc., per lb.	2
Live hogs, per lb	1½
Tallow, per cent ad valorem	20½

Civil Lists of European Rulers.

AUSTRIA-HUNGARY.—Emperor Franz Josef I. has a civil list of 18,600,000 crowns ($3,750,000), one-half of which is paid to him as Emperor of Austria out of the revenues of Austria, the other half as King of Hungary out of Hungarian revenues.

BADEN.—The civil list and appanager is 1,855,699 marks ($369,000).

BAVARIA.—The sum of 5,403,160 marks ($1,242,726) is appropriated to meet the requirements of the civil list of the King, which includes liberal allowances to other members of the royal family.

BELGIUM.—King Leopold's civil list is 3,500,000 francs ($665,000).

DENMARK.—The civil list of the King is 500,000 rigsdalers (2-crown piece, $240,000), and in addition the heir apparent has an allowance of 60,000 rigsdalers ($28,800).

FRANCE.—The President of France receives 600,000 francs, with an additional allowance of 600,000 francs for expenses ($228,000).

GERMANY.—Wilhelm II., as German Emperor and King of Prussia, receives 15,719,296 marks ($3,143,859). As the representative of the reigning house, he is in possession of a vast amount of property, great landed estates in various parts of the country, the revenue from which is largely used in defraying the expenses of the court and providing for the members of the royal family. The Royal Crown treasure, founded by King Friedrich Wilhelm III., and now consisting of a capital of more than six million marks, is at his disposal, as is also the family Fideikommiss, which was also founded by Fredrich Wilhelm, for the benefit of princes to be born afterward, and the House Fideikommiss of the Hohenzollern family. As the result, it is impossible even to approximate his income from all sources.

GREAT BRITAIN.—In Great Britain the provision for the support of the royal household is made after the commencement of each reign. On July 2, 1901, therefore, the civil list of the King was fixed at £470,000 ($2,284,200), which was divided as follows: In the privy purse of the King and Queen, £110,000; for salaries of the royal household and retirement allowances, £125,800; for household expenses, £193,000; for works, £20,000; for alms, £13,000; unappropriated, £8,000. The list also provides for the support of the various members of the royal family, the annuities being: Prince of Wales, £20,000; Princess of Wales, £10,000; Duke of Connaught, £25,000; Duke of Cambridge, £12,000; Princess Christian of Schleswig-Holstein, £6,000; Duchess of Argyll, £6,000; Princess Beatrice of Battenburg, £6,000; Duchess of Albany, £6,000; Grand Duchess of Mecklenburg-Strelitz, £3,000. The heir apparent also derives a large income from the revenues of the Duchy of Cornwall.

GREECE.—By the act of the National Assembly of 1863 the civil list was established at 1,125,000 drachmai, an amount to which the Governments of Great Britain, France and Russia have each added £4,000, making the total income of the King of Greece £52,000, or about $260,000. Since the attainment of the majority of the heir apparent, in 1866, the Government has given him a separate allowance of 200,000 drachmai ($37,000).

ITALY.—The civil list is 15,050,000 lire ($2,859,500), but out of this an allowance of 400,000 lire ($76,000) is paid to the children of the late Duke of Aosta and an equal amount to the Duke of Genoa.

LIPPE.—The reigning house is supported by the revenues arising from the Domanium, farms, forests, etc., which constitute the indivisible and inalienable estate of the ruling Prince.

MONTENEGRO.—The reigning Prince receives an income of 100,000 florins ($46,000), while 25,000 and 12,000 florins go to the two elder Princes, respectively.

NETHERLANDS (THE).—The civil list is 600,000 guilders ($246,000), in addition to the allowance of 50,000 guilders ($20,500) for the maintenance of the royal household.

OLDENBURG.—The revenue of the Grand Duke is derived from the civil list, 400,000 marks ($80,000); the Crown lands, about 225,000 marks ($45,000), and the private estates of the family.

PORTUGAL.—The combined grants to the members of the royal family aggregate 525,000 milreis ($567,000). Of this sum the King receives 365,000 milreis ($394,200), the Queen consort 60,000 milreis ($64,800).

ROUMANIA.—The King receives an annual allowance of 1,185,185 lei ($201,482) in addition to the revenue from certain Crown lands. The grant to the heir apparent is 300,000 lei ($51,000).

RUSSIA.—There is no civil list, but the Czar is in possession of the enormous revenues which are derived from the crown domains, which include more than a million square acres of cultivated lands and improved forests, as well as several of the mines in Siberia.

SAXE-COBURG AND GOTHA.—The Duke receives about 100,000 marks ($20,000) out of the income of the Gotha domains and one-half the excess of revenue over expenditures from Coburg.

SAXE-MEININGEN.—The civil list consists of 394,286 marks ($78,858). The Duke also receives one-half the excess of revenue over expenditure, about 135,000 marks.

SAXE-WEIMAR.—The civil list is 960,000 marks ($192,000).

SAXONY.—The King has a civil list of 3,142,300 marks ($628,460), in addition to the 650,039 marks ($130,008) appanages of the princes and princesses.

SCHWARZBURG-RUDOLSTADT.—Civil list 297,012 marks ($59,402).

SCHWARZBURG-SONDERSHAUSEN.—Civil list 500,000 marks ($100,000).

SERVIA.—The civil list is 1,200,000 deneirs ($204,000).

SPAIN.—The total amount of the civil list and allowances paid to members of the royal family, including relatives of the late King, is 9,500,000 pesetas ($1,765,000), of which the present King receives 7,000,000 pesetas ($1,430,000).

SWEDEN AND NORWAY.—The King has an annuity of 300,000 kroners ($75,000), and in addition there is a civil list of 1,321,000 kroners ($330,250) for the maintenance of the royal family.

TURKEY.—As the income of the Sultan is largely derived from the revenues of Crown domains, it is impossible to do more than attempt to approximate the amount, which is variously estimated at from $5,000,000 to $10,000,000.

WURTEMBERG.—The civil list of the King is 2,017,189 marks ($403,438), in addition to the 100,579 marks granted other members of the royal family.

Bureau of the American Republics.

The Bureau of the American Republics was organized as a result of the first International Conference of the American Republics, held April 14, 1890, and has for its objects the dissemination of knowledge regarding each Republic represented in the bureau. Especial attention is paid to information along industrial and commercial lines, with the view of increasing general interest in the Republics and in bringing about better relations among them.

In March, 1902, a reorganization of the bureau took place at a meeting held in Washington, and several resolutions as to its policy were adopted. Hereafter the bureau shall be under the control of a Governing Board, composed of the diplomatic representatives of all the governments of the Republics, accredited by the Government of the United States, and of the Secretary of State of the United States, who is chairman of the Governing Board. Applicants for membership to the bureau must pass an examination provided by a committee from the Board. It was agreed to continue the publication of the Monthly Bulletin, and decided that as soon as the advertising contracts now existing have expired, that the publication of advertisements in the Bulletin shall cease. As a division of the bureau, a Latin-American library, to be known as "The Columbus Memorial Library," was established.

The report of the Director of the Bureau, W. W. Rockhill, for the fiscal year ending June 1, 1901, showed the receipts to have been $58,122.30, and the total expenditure $54,921.47, leaving a balance of $3,200.83. Besides the Bulletin, a number of other books were published.

Meaning of abbreviations: V., Voluntary; Co., Compulsory; C., Conscription; I. L., Irregular Levies.

NOTES.—*Estimated. †Including India. ‡Conscription system not yet in operation. ‖Montenegro has no regular standing army, but all inhabitants, not physically unfit for service, are compelled to train as soldiers and are liable to call in case of necessity. §The Shah has decreed that the army shall be raised by conscription, but this decree has never been enforced. [1]Based on budget estimate. [2]Battalions. [3]Companies. [4]The army has no unity, and there is little discipline. The weapons in use are obsolete. [5]Brigade. [6]Column. [7]Divided as follows: Regular army, 359,994; irregular army, 604,419; Indian army, 214,729; colonial forces, 97,306. [8]Every able-bodied male inhabitant liable. [9]Divided between various branches of the service, as the active army, the reserve, the territorial army and the territorial reserve. [10]The army is in an extremely crude condition, and the main dependence of the nation is placed upon its more modern marine infantry. [11]Batteries. [12]Squadrons.

Naval Force of the World.

The following table shows, approximately, the naval force of the principal nations of the world. It is not entirely complete, data to make it so not being attainable, but is sufficiently so to give a just estimate of the comparative strength of the principal powers. In addition to those governments shown in the table, Belgium, Bulgaria, Ecuador, Egypt, Haiti, Mexico, Morocco, Persia, Peru, Roumania, Santo Domingo, Sarawak, Siam, Uruguay and Venezuela have each from one to half a dozen boats of small size and little efficiency, hardly worthy of being dignified with the name of navy.

Nation and Class of Vessels.	Number.	Aggregate displacement on water line.	Aggregate cost.	Aggregate coal supply, tons.	Aggregate complement.
Argentine Republic, armored ships, under 10,000 tons	11	48,351	$10,301,700	5,210	2,795

Turkey.—Minister of Marine, Hassan Pacha; Commander of Mediterranean Squadron, Vice-Admiral Hassan Ramy Pacha.

Uruguay.—Minister of War and Marine, General Pedro Callorda.

Venezuela.—Minister of War and Marine, General Ramon Guerra.

International Congress of Americanists.

The thirteenth International Congress of Americanists was held at the American Museum of Natural History, New York City, October 20-25, 1902. The gathering was composed of noted anthropologists and antiquarians and was thoroughly international.

The sessions occupied all of five days, and there were read and discussed a number of papers bearing upon subjects regarding the antiquity of man in America, and others pertaining to the early colonies, in which the Toscanelli correspondence had an important part. This latter consists of letters and charts dealing with the route to the Indies by way of the west, and is supposed to have been sent by its author, a Florentine astronomer, to Christopher Columbus.

Although organized for the express purpose of studying prehistoric North and South America, this was the first time that the Congress had met in the United States. At the conclusion of the sessions the delegates were taken on an excursion to Philadelphia, Washington, Pittsburg, Cincinnati and Chicago. At Washington they were received and entertained by a special committee and were presented to President Roosevelt.

The President of the Congress was Morris K. Jesup, President of the American Museum of Natural History, and the honorary president was the Duke of Loubat, correspondent of the Institute of France. Among the delegates were Professor Leon Lejeal of the chair of American Antiquities, College of Paris; Professor Edward Seler of the University of Berlin; Professor Karl Von den Steinen of the Berlin Ethnographical Museum; Professor Hjalmar Stolpe of Sweden, Professor Juan B. Ambrosetti of the Argentine Republic, Dr. Alfredo Chavero of Mexico, A. P. Maudslay of England, Dr. Pittier de Pabrega, director of the Geographical Institute of Costa Rica, and Dr. de la Rosa, of Peru. The delegation from the United States included Professor W. H. Holmes, Professor W. J. McGee, Dr. M. H. Saville, F. W. Putnam, Miss Alice Fletcher, Mrs Zelia Nuttall and others.

In all ninety-six papers were presented for the consideration of the Congress, all of them dealing with matters of American anthropological and antique history.

Changing the Presbyterian Creed.

Presbyterianism yielded, during the year 1902, to pressure from within the body of the church which demanded certain changes in the creed of the denomination. The sentiment in favor of revision had been growing for years, and the fact was more and more recognized that dogma is the creation of human minds, based, of course, upon interpretation of inspired teachings, and yet, because it is human, a matter which may be in some respects erroneous. That which men have formulated they may revise, and this was practically the ground upon which the Presbyterian General Assembly, gathered in New York City during the month of May, 1902, stood in discussing and acting upon the question of revising the Westminster Confession of Faith, which constitutes the body of doctrine held by the Presbyterian Church. The discussion was long, earnest and scholarly, developing nothing of the spirit of controversy, although there was a sustained measuring of strength between the conservative and the progressive elements in the Assembly. The former yielded without sacrifice of principle, the latter triumphing by means of calm logic and the application of recognized rules of interpretation to every point at issue. The result was the unanimous adoption of eleven overtures, each embodying a change in the Confession, to be submitted during the year 1903 to all the Presbyteries throughout the country for their approval or disapproval. A two-thirds vote in each presbytery, and favorable action by two-thirds of all the presbyteries, will be necessary in order to make effective the proposed modification of an instrument which has stood as the creed of Presbyterianism since it was adopted by the General Synod at Westminster in 1729. The number of presbyteries in the country is 232, and it will therefore require the approving vote of 155 of them to secure the revision. The most important changes are indicated in the following declaratory statement, formulated for general information, and adopted unanimously by the Assembly:

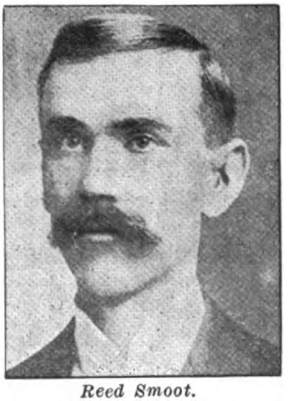
"While the ordination vow of ministers, ruling elders and deacons, as set forth in the Form of Government, requires the reception and adoption of the Confession of Faith only as containing the System of Doctrine as taught in the Holy Scriptures, nevertheless, seeing that the desire has been formally expressed for a disavowal by the Church of certain inferences drawn from statements in the Confession of Faith, and also for a declaration of certain aspects of revealed truth which appear at the present time to call for more explicit statement, therefore the Presbyterian Church in the United States of America does authoritatively declare as follows:

"First—With reference to Chapter III. of the Confession of Faith: That concerning those who are saved in Christ, the doctrine of God's eternal decree is held in harmony with the doctrine of His love for all mankind, His gift of His Son to be the propitiation for the sins of the whole world, and His readiness to bestow His saving grace on all who seek it. That concerning those who perish, the doctrine of God's eternal decree is held in harmony with the doctrine that God desires not the death of any sinner, but has provided in Christ a salvation sufficient for all, adapted to all and freely offered in the Gospel to all; that men are fully responsible for their treatment of God's gracious offer; that His decree hinders no man from accepting that offer, and that no man is condemned except on the ground of his sin.

"Second—With reference to Chapter X., Section 3, of the Confession of Faith, that it is not to be regarded as teaching that any who die in infancy are lost. We believe that all dying in infancy are included in the election of grace, and are regenerated and saved by Christ through the Spirit, who works when and where and how He pleases."

Ministers Protest Against a Mormon Senator.

Ministers of Christian churches generally, and more especially ministers of churches in Utah, were much exercised over the nomination and probable election of Reed Smoot to the United States Senate from Utah. Mr. Smoot is an Apostle of the Mormon Church, and it is for this reason that the "Gentile" clergymen are raising objections to his becoming a member of the National Congress.



Reed Smoot.

Mr. Smoot's choice by the Legislature was assured when the returns of the November election were in. The Legislature was overwhelmingly Republican, even strong Democratic counties returning Republican Legislators, due, it was claimed, to the direct influence of the heads of the Mormon Church.

The Ministerial Alliance of Salt Lake City adopted resolutions at a meeting held November 24, strongly opposing the election of Mr. Smoot. A copy of these resolutions was sent to every ministerial alliance of the United States, to every Congressman and every Senator, and to all others prominent in political life in the country. The resolutions were in part as follows:

"We protest against the endeavor to elect Apostle Smoot to the United States Senate as an endeavor to force upon the citizens of Utah a union of the Church and the State.

"The election of a man who holds the highest office save one in the gift of the Mormon Church to the highest office save one in the gift of the people of Utah or the United States, would be a menace."

In case of failure to prevent the election of this candidate, the ministers of Utah, it is said, have made the statement that the same methods will be used in preventing Mr. Smoot being seated in the Senate as were adopted in the case of Brigham H. Roberts, in 1900, when the voters of the country responded so strongly to the call which the Christian Church made through the New York Journal that Congress was compelled to heed the protest against the attempt of Mormonism to gain an accredited position in the Government of the United States by refusing to permit Mr. Roberts to take his seat.

The New Catholic Archbishop of New York.

Most Rev. John M. Farley, the new Archbishop of New York, is the fourth prelate in order since the creation of the arch-diocese in 1850. Archbishop Farley was born in Ireland April 20, 1842. Receiving his education at St. Marcartan's College, Ireland; St. John's College, Fordham, N. Y.; St. Joseph's Seminary, Troy, N. Y., and the American College at Rome, he was ordained to the priesthood in Rome on June 11, 1870. His first charge was St. Peter's Church, New Brighton, Staten Island. In 1872 he was appointed private secretary to Archbishop McCloskey. The Pope, in 1884, gave him the honorary position of private chamberlain, with the title of Monsignor. He was made vicar-general of the archdiocese of New York in 1891, and became one of the Pope's domestic prelates the following year. In 1895 he was made prothonotary apostolic, and on December 21, in the same year, he was consecrated Titular Bishop of Zeugma, becoming also Auxiliary Bishop of New York. From 1884 until his appointment as Archbishop he was rector of St. Gabriel's Church, in East Thirty-seventh street.

Greek Orthodox Mission in America.

A Greek Orthodox missionary diocese is about to be established in New York City, with the seat of the Bishop at Yonkers. Members of the Russian branch of the Greek Church who have been dissatisfied with that affiliation were instrumental in suggesting to the Patriarch of Constantinople the need of a mission in the Eastern part of the United States for their people, and it was due to their suggestion that Bishop Seraphim came to America the early part of December, to take the first steps toward establishing the diocese. The plans include, it is said, the erection of a cathedral at Yonkers.

Coffee Statistics.

COMPILED BY COFFEE EXCHANGE OF THE CITY OF NEW YORK—1882-1902.

(Furnished by S. MATHERSON, JR., & CO., Importers.)

The coffee tree originated in Abyssinia and derives its name from the city of Kuffa. It was introduced into Europe in 1573, and although it did not at first meet with much favor, it soon was largely consumed. Its growth was started in Martinique in 1723. Its cultivation spread to other islands of the West Indies, and then to Brazil, whence now comes the greater part of the coffee consumed in this country.

Naturalists reduce the trees which produce the numerous varieties to three great types, which can be easily recognized by those who are conversant with the cultivation of coffee. The plants from Arabia have not many leaves and are slender in appearance, as it is natural they should be, as they are grown in the desert, but they have a great vitality, which condenses and gives to the beans a perfume which has not been equalled as yet by any artificial method of cultivation.

The second type, the "African" coffee, is distinguished by its different appearance, due to the marshy plains from which it comes. Its leaves are broad and abundant, and the planter is recompensed by the weight, though not by the quality, of the product, because African coffee yields a liquor of poor quality.

Finally, the third type, which may be of great importance in the future, is the coffee discovered some years ago in Brazil, and which was called Maragojipe. It is distinguished by the abundant crop which it produces, besides which the bean is very much larger and has a surface of a silklike and polished appearance, with excellent aromatic qualities. It is produced advantageously in high plains, and the planters consider its results so favorable that many have destroyed their magnificent coffee trees of the old type and replaced them by the Maragojipe. The principal coffee-producing countries are now Mexico, Costa Rica, Salvador, Guatemala, Honduras, Nicaragua, Bolivia, Brazil, Colombia, Ecuador, Paraguay, Peru, Venezuela, the West Indies, Asia, Oceanica, Polynesia and Australia.

The Theatrical Season, 1901-1902.

By AUGUSTUS P. DUNLOP.

No country in the world has ever had a more profitable theatrical season than vouchsafed the United States from the Autumn of 1900 to 1901. Rolling in national prosperity, the playhouses from the Atlantic to the Pacific, from the big lakes to the Gulf, have been points of unusual and absorbing interest to all classes of our people, and, of course, at no point has the output of plays, or the income from theatrical amusements been greater than in New York.

Lavishness, backed by the opulence of the metropolis was its chief note, but there was splendid progress in scenic and mechanical devices and a richness of splendor in stage furnishing, in accuracy and brilliancy of costume, all on an infinitely more luxurious scale than was ever before attempted, either here or anywhere else.

It may be called a season of profligacy in expenditure, but the enormous profits will emphasize it for having placed theatrical business on a solid financial foundation. It has lured capital into theatrical sources hitherto thought reckless, and the result will add eight new and gorgeous playhouses in Greater New York alone.

RECORD OF NEW PLAYS, SEASON 1901-1902.

1901.

Aug. 19—"The Mormon Wife," Fourteenth Street Theatre.
Aug. 26—"The Royal Rival," Criterion.

SOME NOTABLE EVENTS OF THE AMERICAN STAGE DURING THE NINETEENTH CENTURY.

1800—A series of dramatic performances given by Coree, who owned the City Tavern, New York, began at his Mount Vernon Garden, corner of Broadway and Leonard street.

1804—Grove Theatre, at Bedlow street, New York, opened.

1806—Vauxhall Gardens, New York, opened. Miss Arnold, the actress, who married David Poe, father of Edgar Allan Poe, made her debut.

1810—George Frederick Cook, first visit to the United States, appeared at Park Theatre November 21, as Richard III.

1812—Mrs. Gilbert (Agnes Holman) first actress to command $200 a night. New Olympic Theatre opened.

1814—Anthony Street Theatre (Broadway) opened.

1818—James William Wallack, Sr., first visit to United States, appeared as Macbeth.

1820—Edward Kean American debut.

1821—Junius Brutus Booth appeared for the first time here July 13.

1824—Harry Wallack and elder Jefferson in repertoire at Chatham Garden Theatre, New York.

1826—General Sanford built Lafayette Theatre, where Cooper saw "The Spy," and his wife, an actress, introduced the ballet into America.
First Italian opera at Park Theatre, New York.
Old Bowery Theatre built; first called New York Theatre. Edwin Forrest scored his first success here this year.
Macready's first appearance in America; role Virginius.
James K. Hackett's initial performance anywhere in the role of Falstaff.

1828—Bowery Theatre burned, but rebuilt in 90 days. Niblo's Garden and theatre opened.

1830—Charles Kean's first appearance in America at Park Theatre, New York.

1833—Passage of an Author's Dramatic Copyright Protection Act.
Charles Kemble and his daughter Fanny Anne Kemble made debut; he as Hamlet, she as Bianca in "Fazio."
First theatre in the United States erected especially for opera opened in New York; was a quick failure.

1834—Debut of Miss Priscilla Cooper, who married the son of President Taylor and thus became mistress of the White House.

1835—Charlotte Cushman made first appearance on any stage, Tremont Theatre, Boston.

1836—Ellen Tree made American debut.

1839—William H. Burton performed at Niblo's.

1843—Charles Walcott's debut at Olympic Theatre, New York.

1846—Laura Keene opened at the Winter Garden as Rosalind in "As You Like It."

1847—Lester Wallack's debut at the Second Bowery Theatre as Charles Surface in "School for Scandal."

1849—Joseph Jefferson's debut at the New National Theatre, New York (aged 20).
Edwin's Booth's debut in Boston.
Forrest-Macready riots, New York; soldiers kill 22, wound 36.

1850—John Brougham's debut.
E. A. Sothern, under stage name of "Douglas Stewart," appeared at Barnum's Museum.

1852—Great dramatic festival, Castle Garden, in commemoration of supposed centenary of introduction of drama in America, September 6.

1853—Lawrence Barrett (Larry Branigan) appeared for the first time, Detroit.

1854—Academy of Music, East Fourteenth street, New York, built.

1855—Mme. Rachel's American debut.

1856—Miss Adelaide Phillips made her debut as Azucena in "Il Trovatore," Academy of Music, New York.

1858—Mlle. Piccolomini first appeared on American stage, Academy of Music, New York.

1859—Mlle. Adelina Patti made her first appearance as a dramatic vocalist, Academy of Music, New York, November 24.

1863—Minnie Madden, aged three, makes her first appearance on any stage at Little Rock, Ark., as the Duke of York in "Richard III."

1865—President Lincoln is assassinated at Ford's Theatre, Washington, April 14, while witnessing "Our American Cousin"; Charlotte Cushman in the principal role and E. A. Sothern as Lord Dundreary.

1865—Fifth Avenue Opera House, as Fifth Avenue Theatre, leased by Augustin Daly, where "Article 47" was produced by Fanny Davenport, Sarah Jewett, Mrs. Gilbert, James Lewis, George Clarke and Louis James.

1866—Theatre Francais, West Fourteenth street, New York, opened. Adelaide Ristori's debut.

1869—Booth opened Booth's Theatre, Sixth avenue and Twenty-third street, New York, with "Romeo and Juliet," aided by Lawrence Barrett.

Mrs. Kendal.

Blanche Walsh.

Mrs. Pat. Campbell.

Henrietta Crosman.

1870—Clara Morris first seen in the East, as a member of Daly's stock company, New York.

1875—Mary Anderson makes her first appearance.

1875—Tommaso Salvini, first visit to United States. Great enthusiasm as Othello.

1876—Charlotte Cushman died.
Brooklyn Theatre fire, December 6; 300 lives lost.

1877—Helen Modjeska's American debut, San Francisco.

1878—Eagle Theatre, Sixth avenue, between Thirty-second and Thirty-third streets, New York, rechristened "Standard"; Gilbert and Sullivan's plays presented; burned 1883.

1879—Daly's opened (Broadway and Thirtieth street), New York, bringing out Ada Rehan, John Drew and others.

1880—Bernhardt at Booth's Theatre in "Adrienne Lecouvreur."
Present Madison Square Theatre, New York, opened by Steele Mackaye; invented the double stage; long run of "Hazel Kirke." Later D. Frohman produced "Esmeralda," "May Blossom," etc.

1881—Wallack's third theatre, Broadway and Thirtieth street, New York, opened; company included Lester Wallack, John Gilbert, John Brougham, Charles Fisher, Dion Boucicault, Charles Mathews, Effie Germon, Mme. Ponisi and Rose Coghlan.

1897—Julia Arthur produces "A Lady of Quality."
Minnie Maddern Fiske produces "Tess of the d'Urbervilles."

1898—Suzanne Adams's American debut, Gounod's "Romeo et Juliette," Chicago, November 8.
John Philip Sousa's first comic opera "Bride Elect," produced, New Haven, December 28.
Mansfield produced "Cyrano de Bergerac," Garden Theatre, New York.

1899—Augustin Daly dies. His death affects the whole theatrical world.

DUTIES UPON THEATRICAL PROPERTY.

The following conditions must be observed to bring theatrical properties, costumes, etc., into the United States:

The customs laws permit the entry "free of duty" of scenery, properties and costumes (brought by proprietors or managers of theatrical exhibitions, arriving from abroad for temporary use in this country, and which have been used abroad by them) under bond, that they will be exported within six months, although this period is often extended by the Secretary of the Treasury.

Scenery should be numbered with serial numbers, 1, 2, 3, 4, etc., and described in the invoice or list opposite the serial number.

Properties, when packed in cases, should be numbered, and the invoice or list should state plainly the contents of each case by number; when not packed in cases or crates, serial numbers should be used same as on scenery.

Costumes should be packed in cases, baskets or trunks, marked and numbered with serial number, and the list, or invoice should state the number and style of costumes in each package and the value.

Costumes are not entitled to free entry under this law, unless they have been used abroad by the company importing them.

Wearing apparel belonging to the members of the company should be kept entirely separate from the costumes, and not mentioned in the list or invoice, as no duty will be charged on wearing apparel accompanying the owner.

"Les Cloches de Corneville."—Folly and Globe theatres, London, February, 1878. 610 times.

THE EDWIN FORREST HOME.

Edwin Forrest converted at his death his home at Springbrook, Holmesburg, near Philadelphia, into this retreat for actors incapacitated by age and infirmity. The house and 111 acres of ground were purchased by him in 1865 for the purpose of providing a home for his two sisters, Caroline and Eleanora, but he survived them both. Not more than twelve or thirteen inmates are received at one time, and they are provided with all the necessities and comforts of life. No restrictions are placed on the inmates, and they may go and come as they please. The Home contains, among many valuable paintings and books, an edition of Shakespeare, the first folio published in 1623 by John Heninge and Henrie Condell, brother actors of the Bard of Avon. List of officers: President, L. Clarke Davis; vice-president, J. Ford Zimmerman; treasurer, Samuel J. Sharp, 700 Market street; secretary, Henry E. Garsed, 133 South Twelfth street. Board of Managers—L. Clarke Davis, Adam Early, J. Fred Zimmerman, Henry Wheelan, Jr., Hon. Samuel Justin Thompson and Hon. Michael Arnold. Superintendent, Andreas Hartel, and librarian, Charles J. Fyffe, an old actor, who receives visitors with the greatest courtesy.

THE ACTORS' FUND HOME.

The Actors' Home is prettily situated on Brooks avenue, New Brighton, Staten Island, and was opened by the Actors' Fund on May 8, 1902. At the dedication ceremonies Mr. Daniel Frohman said: "The Home has been tendered to the profession, by the profession, and those interested in the actors' art, and it now remains for the actors and actresses to secure this in the future and to assist in the maintenance of this magnificent establishment. The officers of the Fund require very little from our brother artists and our sister actresses. It is simply two or three dollars a year from each. It remains, therefore, for us, ladies and gentlemen, for us to carry on this work in the same high spirit that so magnificently prompted it.

The Board of Governors are: Al. Hayman, president of the Fund; Joseph Jefferson, E. H. Sothern, John Drew, Richard Mansfield, William H. Crane, Francis Wilson, Daniel Frohman, A. M. Palmer, Frank W. Sanger, Maurice Grau, Antonio Pastor, Charles Frohman, Jacob Litt, Marc Klaw, De Wolf Hopper, James K. Hackett, Harry J. Powers, William A. Brady.

ACTORS' NATIONAL PROTECTIVE UNION.

This association was organized May 9, 1894, through the work of William Devere, better known as the "Tramp Poet." Lew Morton, secretary of Union No. 1, writes as follows of the vicissitudes of the union: "It started off with a boom. The initiation fee was only one dollar, and any one was accepted that had the dollar. Money was abundant. No accounts were kept, and no one was held responsible. After many unfortunate financial disasters the union, without funds, was tottering on the verge of entire disruption when a few conservative members, who believed in the principles of unionism, took hold of things and began the seemingly impossible task of putting the organization again on a sound basis. For nearly three years these members worked and managed to keep the union alive. On January 4, 1896, we received a national charter from the American Federation of Labor, branches having been organized in several large cities, since which time the organization has been surely and quite rapidly growing, until now it is in a prosperous condition, with every prospect of continuance. We have also a woman's branch, which is steadily increasing in membership. We have a prosperous local in San Francisco, organized October 25, 1902, and it is the intention soon to establish locals or branches in Chicago, St. Louis, Boston and other large cities." The officers are: John J. Pallas, president; Major Burk, vice-president; Joseph M. Lawrence, treasurer; Billie Williams, guardian. Board of Trustees—Andy Amann, Sig. Zarnes, George F. Gallot. Delegates to Central Federated Union—James L. Barry, Joseph M. Lawrence. James L. Brady is business manager and Lew Morton secretary of Union No. 1, at 8 Union Square, this city. Officers of Actors' National Protective Union No. 3, San Francisco, Cal., are: President, Matt Trayers; vice-president, William Courtright; Professor E. Henry, secretary and business manager; H. Leoma, guardian; W. J. Morton, prelate. Office and rooms located at 26 O'Farrell street, San Francisco, Cal.

THE PLAYERS' CLUB.

The Players' Club, a society of actors and artists, was organized February 9, 1888. It has for its object the promotion of social intercourse between representative members of the dramatic profession and members of the professions of literature, painting, sculpture and music, and, incidentally, the establishment of a library of the history of the American stage, and the preservation of play-bills, pictures and other objects of interest to and connected with the stage.

The membership roll of the club has contained many of the most prominent names in American drama and art, and is probably the New York club best known throughout the country. Many distinguished guests have been entertained at its building and more bright things have been said about it than about any American organization. The membership is limited to 500 resident and 500 non-resident members. The entrance fee is $100 and the annual dues $40, for residents. The fee for non-residents is $20.

The officers are: President, Joseph Jefferson; Vice-President, A. M. Palmer; Secretary, Charles E. Carryl; Treasurer, William Bispham.

Annie Russell.

Mrs. Fiske.

Margaret Anglin.

Maxine Elliott.

ACTORS' SOCIETY OF AMERICA.

This society was organized on the 22d of March, 1894. In September of 1895 it opened an office on West Twenty-eighth street between Broadway and Sixth avenue. It was incorporated under the laws of the State of New York on the 13th of May, 1896. The object of the society is to improve the conditions of the actor's calling by exposing and preventing fraud, and promoting equitable business dealings between actor and manager. The society is compiling a business record of every actor and manager in the United States of America. It is practically the Bradstreet of the theatrical profession. The membership is composed of actors, men and women, who have had not less than three years' professional experience. The number of members in good standing at the present writing is 1,676. Its present address is 114 West Fortieth street. The officers are as follows: President, F. F. Mackay; vice-president, Miss Bessie Taylor; secretary, George D. Macintyre; treasurer, Mrs. Robert B. Mantell. Board of Directors—Israel A. Washburne, chairman; William Courtleigh, Ralph Delmore, Eugene Jepson, W. D. Stone, Mrs. R. B. Mantell, Marie Doran, William F. Owen, George D. Macintyre, Bessie Taylor, James O'Neill, Frank Oakes Rose, Erroll Dunbar, Howell Hansel, Maida Craigen, Theodore Roberts, George Barr, George C. Staley, Ernest Lamson, F. F. Mackay, I. A. Washburne; counsel, Charles E. Le Barbier; assistant secretary, Miss K. E. Wilson; engagement department, W. H. Gregory.

THE LAMBS CLUB.

The Lambs' Club began life in America in a series of dinners held by a company of Bohemian spirits during the Winter of 1874. It was, however, already in existence in London, having been organized there by John Hare in 1869. It is a society of actors, authors and others who enjoy good times and have the spirit of good fellowship well developed.

One of the interesting features of the club is the annual "Gambol," a theatrical performance given by its members. These usually consist of plays written by the author members and performed by an array of talnet which could not be obtained elsewhere.

The home of the club is at No. 70 West Thirty-sixth street. The initiation fee for professional members is $50, and the annual dues $25. Resident members pay $200 entrance and $50 annually, and non-residents $100 and $25. The officers are: Shepherd, De Wolf Hopper; Boy, Digby Bell; Corresponding Secretary, John Drew; Recording Secretary, Thomas Manning; Treasurer, John A. Snow; Librarian, Horace W. Robbins.

THEATRICAL BUSINESS MEN'S CLUB.

The club, composed entirely of men connected with theatricals, has a pretty clubhouse at No. 139 West Forty-first street, New York City. It was established in 1901 with the following officers: Joseph Brooks, president; Frank L. Perley, vice-president; W. H. Wood, treasurer; E. O. Cordner, secretary. Board of Directors—George H. Broadhurst, A. L. Erlanger, Jules Murry, Al. Hayman, Hollis E. Cooley, George W. Lederer, M. W. Livingston, George H. Nicolai, W. F. Connor, William Harris, Frank McKee, Marc Klaw, Marcus R. Mayer, Benjamin F. Ronder, D. V. Arthur, John W. Hamilton.

Sporting Records.

YACHTING SEASON OF 1902.

By DUNCAN CURRY.

While there was some splendid yacht racing last year, the season of 1902 will go down into history as an off year in the annals of the sport.

Outside of three or four large steam yachts, few sailing boats were built, except in the one design classes, and as there was no race for the America's Cup, the sport as a whole did not attract as much public interest as in 1901.

One reason why so few boats were built was that the New York Yacht Club was contemplating a change in its rating rule, and next season the old Seawanhaka load water line and sail area rule will be a thing of the past.

Perhaps the most important feature of last year's racing was the conspicuous part played by Yankee yachts in foreign waters, particularly in Germany. The German Emperor's order to Designer A. Cary Smith for the schooner Meteor, which was built at Townsend & Downey's yard at Shooter Island, caused a big demand for American yachts in Germany, and as a result the American schooners Lasca and Alcaca and the yawl Navahoe were sold to German yachtsmen and swept nearly all before them in the German regattas.

The America's Cup.

Owing to the great size of the Meteor and the fact that she had to give hours' time allowance to her opponents, caused her to lose many prizes, particularly as the majority of her races were sailed in light winds. In spite of all these drawbacks she won some races and rendered a very good account of herself, all things considered.

Although the German Emperor extended a cordial invitation to American yachtsmen to take part in the Kiel regattas, only two American owned boats were entered, and both of them were successful.

One of these boats was the Virginia II., owned by Isaac Stern, of this city. The Virginia II. was a Herreshoff thirty-footer and was formerly known as the Oiseau. She was the champion in her class on Long Island Sound in 1901, and easily won her race at Kiel. The other Yankee boat which was equally successful was the Uncle Sam, a little twenty-one-footer of Crowninshield design, owned by Francis R. Riggs, of this city.

The race in which the Uncle Sam was successful was of really international importance, as England had two boats in the race—the John Bull, owned by W. Linsay, designed by Sibbick, of Cowes, and the Cis II., designed by Linsay and owned by Cecil Quintin.

The German Emperor had a German designed boat entered called the Samoa III., while France was represented by the Archdragon, owned by M. Gufflet, of the Societe de la Volle d'Archdragon, and the Archdragon II., owned by the Viscomte de Crusay, of the same club, while Sweden was represented by the Svalan, owned by Senator R. Ochnell, of the Kougl Svenska Segel-Sellskapet, of Stockholm. Altogether sixteen boats were entered, the others being owned by German yachtsmen.

The yachts raced for a special cup offered by the German Emperor and His Majesty sailed the Samoa III. himself. The contest was to have been best two out of four races, but only two races were necessary as the Yankee boat won both, capturing the first race by 22 minutes 26 seconds, and the second race by 24 seconds.

Outside of the New York Yacht Club cruise the most important contests sailed on this side of the Atlantic were three ocean races promoted by the Atlantic Yacht Club for prizes offered by Commodore Robert E. Tod.

The first of these races was sailed in July from Newport to Sea Gate, Coney Island, around Long Island, a distance of 149 miles, and was won rather easily by the schooner Endymion.

The second race was sailed on September 1 and was to and around Fire Island lightship and back, a distance of ninety miles and again the Endymion was successful.

The third and final race was sailed on September 22 and was over a 210-mile ocean course to Cape May and return. In this race the old time ocean cruiser Coronet finished first, but the little schooner Iroquois, which rode out the Blizzard in 1888, easily won on time allowance.

Edwin D. Morgan.

August Belmont.

Sir Thomas Lipton.

C. Oliver Iselin.

Another important feature of last year's racing was the great fleet of boats which took part in the New York Yacht Club cruise and the fine showing made by the old time boats.

The New York Yacht Club Regatta Committee very wisely offered special prizes for the old timers in addition to the regular class prizes and as a result nearly fifty yachts crossed the starting line each day instead of sixteen or eighteen boats as has been the case in former years.

The most important races of the cruise was for the Astor Cups off Newport, and the Scotch built yawl Ailsa easily gave the seventy-footers their time and beat them, while the Elmina won in the schooner class.

Early in the season the American built Vigilant, now rigged as a yawl, defeated the Ailsa in about every race they met, but did not take part in the cruise.

Another interesting feature of the cruise was the fine showing made by the Auxiliary fleet racing under sail alone, the chief winner being the Crane designed Ariadne, owned by H. W. Putnam, Jr., which won four races out of four starts and beat many of the big schooners boat for boat.

Digitized by Google

Abroad Alison V. Armour's Yankee Auxiliary yacht Utowana, which at home could never get out of her own way, defeated the pick of the English fleet in a race from the Nab Lightship to Cherbourg, France, and back for the Coronation Cup, presented by the Earl of Crawford.

Outside of the New York Yacht Club cruise the chief interest of the year centered in the seventy-foot sloop class, in which the Mineola, owned by August Belmont and sailed by Charlie Barr, raced against the Yankee, owned and sailed by J. Rogers Maxwell and his young son, Harry Maxwell, and the Rainbow, owned by Cornelius Vanderbilt. H. Clayton Haff was the skipper of the Rainbow, but the boat was sailed by her owner, assisted by E. A. Willard, a well-known amateur.

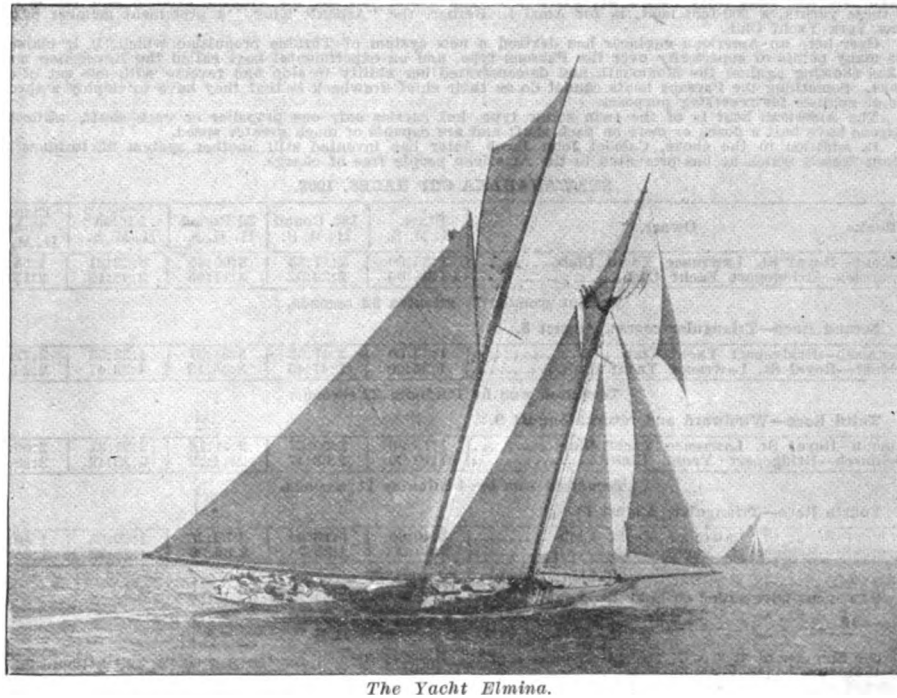
During the early part of the season neither the Yankee nor Rainbow was in any sort of condition, and as a result the Mineola had a practical walkover. Just prior to the New York Yacht Club cruise both the Yankee and Rainbow were fitted with new canvas, and after this the Mineola did not win a race either on the cruise or anywhere else and was withdrawn from racing before the season was over.

The record of these boats for the season shows that the Mineola won 10 firsts, 2 sailovers and 6 seconds. The Yankee, 9 firsts and 5 seconds, and the Rainbow, 4 firsts and 1 second prize.

The Rainbow's victories included the Carroll Cup and the Commodore's Cup for the ocean race from Vineyard Haven to Provincetown.

Among the schooners about all of the racing except the ocean races promoted by Commodore Tod, of the Atlantic Yacht Club, were between the seventy-footers, Elmina, owned by F. F. Brewster, and the Muriel, owned by Charles Smithers. These two boats sailed in over a score of races and in all but four the Elmina was successful, thanks to the clever handling of her skipper, William Dennis. As a result the Elmina wound up the season with a record of eighteen firsts, out of twenty-two starts and she was disabled in one of her races, while the Muriel only won three races.

One more victory should have been credited to the Muriel, but owing to what many people thought was



The Yacht Elmina.

an error in timing by the Regatta Committee of the New York Yacht Club, the Amorita was credited with a victory that really belonged to the Muriel.

The Elmina's prizes included the Larchmont Series and Schooner Cups, the Astor, Vice Commodore's and the Naval Alumni Challenge Cups, while the Muriel won the Commodore and Vanderbilt Cups.

Among the smaller single-stickers the two new Gardner bronze boats, Weetamoe, owned by H. F. Lippitt, and the Neola, owned by G. M. Pynchon, furnished good sport after they got tuned up, and toward the last of the season were able to save their time on the seventy-footers. As a result of the season's work the Weetamoe won eight first prizes and the Noela five.

The imported sixty-footers, with the exception of the Hester, which won three races, did not do any racing to speak of.

In the fifty-one-foot class of sloops Herman B. Duryea's Humma, sailed by Ralph N. Ellis, did the best work, while in the forty-three-foot class, F. M. Smith's Effort, thanks to the splendid handling of the Hanan boys, made a splendid record, and on the New York Yacht Club cruise beat all of the big boats on time allowance and captured the Vice Commodore's Cup and the Naval Challenge Cup by winning the majority of the squadron runs and making the best corrected time over the course.

During the early part of the season young Addison Hanan sailed the Gardner designed Dorwina to victory in this class, but when he transferred his energies to the Effort the Dorwina was not afterward heard of.

In the thirty-six-footer division H. L. Maxwell's Leda carried off the honors from a big field, while in the thirty-foot class Trenor L. Park's Crowninshield designed Mimosa was successful.

Among the little fellows the chief interest of the year centered in the effort of the Bridgeport Yacht Club to regain the Seawanhaka Challenge Cup, which has been held so long by the Royal St. Lawrence Yacht Club of Montreal.

No less than nine boats, representing almost all parts of the country except the Pacific Coast, were built for the honor of going to Canada, and of these no less than eight boats took part in the trial races which were sailed off Bridgeport during the last part of June and the first week in July.

Digitized by Google

As a result of these races the Tecumseh, owned by a Bridgeport syndicate of yachtsmen, and designed by Jones & Laborde, of Oshkosh, Wis., was selected to challenge for the cup. The Tecumseh was essentially a light weather boat, and in the cup races on the St. Lawrence only won one race out of four from the defender, Trident, designed by Duggan.

As usual the raceabouts furnished plenty of sport on the Sound, and to every one's surprise, one of the American Yacht Club's one-design boats, the Hobo, owned by Trenor L. Park, won the championship. The Hobo was one of a fleet of boats designed by Crownlnshield, and only cost $1,100, as against $2,000 or $2,500, the usual cost of boats in this class.

Among the one-design classes the Howdy, owned by Stuyvesant Wainwright, won in the American's twenty-one-foot class, and Simeon Ford's Mongoose III. in the eighteen-foot division. In the New Rochelle Club's class R. N. Bavier's Knave won first honors, while the Lambkin, owned by Stephen W. Roach, was successful in the Manhasset Bay Class.

So far as steam yachts are concerned something like two hundred of various sizes and types were built in the United States last season, and while a few of them were of good size, there still seems to be a tendency among American yachtsmen to buy large boats abroad in spite of the fact that they are not entitled to American registry.

The more important ones built in American shipyards included the Noma, owned by W. B. Leeds and the Rheclair, owned by D. G. Reid, designed by Clinton H. Crane; the Hanoh, designed by Henry J. Gielow for F. M. Smith, the "Borax King;" the Aztec, designed by Gardner & Cox for A. C. Burrage, and the Celt, a Wintringham boat, owned by J. Rogers Maxwell. By far the most sensational event of the year in steam yachting was the remarkable record breaking performance of Charles R. Flint's Arrow, designed by C. D. Mosher, which in a trial against time on the Hudson, on September 6, covered a mile in 1 minute 19 9-10 seconds, or at the rate of forty-five miles per hour.

Another advance made in yachting was the adoption of the Turbine principal of propulsion to pleasure craft. No less than three yachts are building abroad which will use the Parsons system, and the largest of these yachts, a 200-foot boat, is for Amzi L. Barber, the "Asphalt King," a prominent member of the New York Yacht Club.

Over here an American engineer has devised a new system of Turbine propulsion which, it is claimed, has many points of superiority over the Parsons type, and an experimental boat called the Revolution made a fine showing against the Monmouth and demonstrated her ability to stop and reverse with one set of engines. Something the Parsons boats cannot do as their chief drawback is that they have to employ a special set of engines for reversing purposes.

The American boat is of the twin screw type, but carries only one propeller on each shaft, while the Parsons have half a dozen or more on each shaft and are capable of much greater speed.

In addition to the above, Colonel John Jacob Astor has invented still another system of turbines for steam vessels which he has presented to the American people free of charge.

The races were sailed on Lake St. Louis (part of the St. Lawrence River).

AMERICA'S CUP RACES.

The Summer of 1903 will see Sir Thomas Lipton's third challenger for the America's Cup attempting to lift that time-honored trophy from the custody of the New York Yacht Club. As Sir Thomas humorously observed two years ago: "I have loosened some of the rivets holding it down, and I think one more pull will lift it from its anchorage." During the past 52 years no less than 11 attempts have been made by British yachtsmen to win this cup, the "Blue Ribbon of the Sea," and it is possible that this 12th attempt may prove unlucky for Yankee yachtsmen. In 1901 there is no question but the cup was in danger, and the victory of the Columbia over Shamrock II. was by the narrowest possible margin, only 5 minutes 36 seconds corrected time separating the two yachts as a result of the three races, or a trifle over 3 2-3 seconds per mile for the 90 miles sailed.

Sir Thomas and many others thought that handling and not any real difference in the speed of the boats was responsible for the result, and the Irish Knight was anxious for another race with the Shamrock II. for 1902 The rules of the New York Yacht Club, however, prevent a beaten boat racing for the cup in two successive years, and the project fell through.

Sir Thomas, on his return to England, stated that if no one else challenged in the meantime he would challenge with a new boat in 1902 for a race in 1903.

No one did challenge, and American yachtsmen were not surprised when a third challenge from the Royal Ulster Yacht Club, on behalf of the Irish Baronet, was received by the New York Yacht Club on October 15. A special meeting of the New York Yacht Club was held the following evening, the challenge accepted, and steps were at once taken to organize a syndicate for the defence of the Cup.

As the new challenger was well under way by this time, no time was lost in organizing a syndicate, and at a meeting of the New York Yacht Club on October 30, the names of the members of the syndicate were announced as follows: C. Oliver Iselin, managing owner; ex-Judge Elbert H. Gary, Clement A. Griscom, James J. Hill, William H. Leeds, William Rockefeller, Cornelius Vanderbilt, Henry Walters, P. A. B. Widener and Norman B. Ream.

At the same meeting it was announced that an order had been placed with Herreshoff for a new defender, and that C. Oliver Iselin would have charge of her and that Charlie Barr would be her skipper. It was also stated that J. Pierpont Morgan would place the Columbia in commission again, and that Edwin D. Morgan would have charge of her, and that "Lem" Miller would be her captain, while August Belmont would manage the Constitution, which would be sailed by Captain Urias Rhodes, assisted by Captain Norman B. Terry.

Digitized by Google

The members of the new syndicate are all well known in business and financial circles, and many are prominently identified with the big commercial corporations. Elbert H. Gary, of Chicago and New York, was the president of the Federal Steel Company, and now that it has been merged in the United States Steel Corporation, is a director of the new company. He was born in Illinois. After leaving college he was admitted to the Bar and devoted himself to the practice of corporation law. He is interested in many railroad and other companies and was one of the organizers of the United States Steel Corporation.

Clement A. Griscom is of Philadelphia, and he owns the steam yacht Alvina, and last Summer made a cruise in that boat in foreign waters. He is president of the International Steam Navigation Company and of the International Mercantile Marine Company, which has merged nearly all the transatlantic lines. He is prominently identified with many other corporations, and is a director of the United States Steel Corporation and of the Cramp Shipbuilding Company.

James J. Hill, of St. Paul, is the owner of the steam yacht Wacouta, in which he made a cruise to Labrador last Summer. He is president of the Northern Securities Company and of the Great Northern Railway Company.

William B. Leeds, of Pittsburg, is the owner of the steam yacht Noma. He is a director of the Chicago, Rock Island & Pacific Railroad Company and of the American Can Company.

Norman B. Ream is a Chicago capitalist and is a member of the Chicago Board of Trade and a director of the United States Steel Corporation.

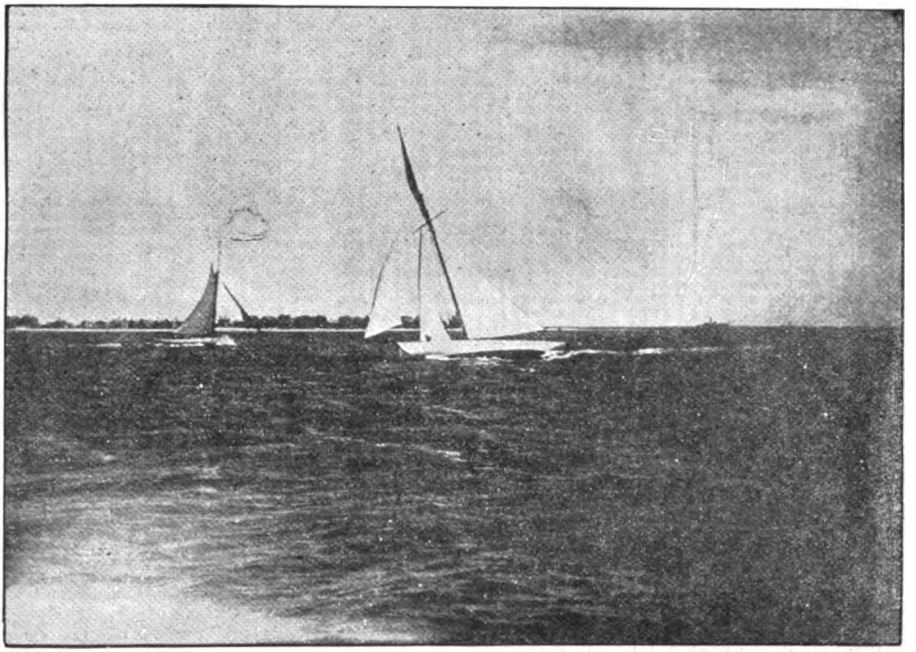
William Rockefeller is vice-president of the Standard Oil Company and a director of the Amalgamated Copper Company.

Henry Walters is a member of the Constitution syndicate and he owns the steam yacht Narada. He is a Baltimore man and is president of the Atlantic Coast Line Company.

P. A. B. Widener owns the steam yacht Josephine and made a cruise in that yacht in European waters last Summer. He is a director of the United States Steel Corporation, and has large interests in the street railways of Philadelphia, this and other cities.

Cornelius Vanderbilt is the only member of the syndicate who has taken an active interest in yacht racing. He has raced the 70-footer Rainbow successfully for three seasons, and recently purchased the big steam yacht North Star.

C. Oliver Iselin, who is to be the managing owner, has already managed three cup defenders successfully. He raced the Vigilant against Valkyrie II., Defender against Valkyrie III., and Columbia against



The Yacht Mineola.

Shamrock I. He had intended to spend the next two years in Europe, but the members of the Committee on Challenge and of the new syndicate, urged him to take charge of the new yacht, and he has consented to do so. He will sail from the other side for this port next week.

Ex-Commodore E. D. Morgan, who is to manage the Columbia, had charge of that yacht last year, and, like Mr. Iselin, he has given up a season in Europe to take charge of the yacht again. Mr. August Belmont has never had charge of a cup defender, but he has sailed on some of the boats that successfully defended the cup. He was a member of the Vigilant syndicate in 1893, and was on board the Constitution in many of her races last season. He has been an active yachtsman for many years, and in the season just ended sailed the Mineola very successfully. Captain Rhodes, who is to sail the Constitution, was sailing master of that yacht last year. He will be assisted by Captain Norman B. Terry, who sailed the schooner Grayling so successfully and who assisted Captain Hank Haff on the Defender in 1895.

Captain Barr is known as the skipper of the Columbia each time she defended the cup, and Captain "Lem" Miller, who is to sail the Columbia next year, was mate on that boat under Captain Barr.

With three yachts in the preliminary and trial races to choose from, the boat selected to defend the cup should be in first-class condition by August 20, the date of the first cup race, while Sir Thomas Lipton, with two Shamrocks to tune up the new boat with, should bring his challenger to the line in first-class condition, and this year Sandy Hook should witness the best and closest races ever sailed for the cup.

Digitized by Google

The Royal Ulster Yacht Club's challenge on behalf of Sir Thomas Lipton follows:

G. A. Cormack, Esq., Secretary New York Yacht Club: 7th October, 1902.

Dear Sir.—I am requested by Sir Thomas J. Lipton, Bart., K. C. V. O., to forward you this challenge for the America's Cup, subject to the same conditions as governed the last contest, and which proved to be so satisfactory, namely—the best three out of five races over the same courses, with like starts and other details.

The first race to be sailed on Thursday, 20th August, 1903. The second race to be sailed on Saturday, 22d August, 1903. The third race to be sailed on Tuesday, 25th August, 1903.

Further races (if any), to be sailed on each following Thursday, Saturday and Tuesday until finished.

I, therefore, on behalf of the Royal Ulster Yacht Club, and in the name of Sir Thomas J. Lipton, a member of the club, challenge to sail a series of matches with the yacht "Shamrock III." against any one yacht or vessel constructed in the United States of America for the America's Cup.

The following are the particulars of the challenging vessel, viz.: Owner, Sir Thomas J. Lipton, Bart., K. C. V. O. Name of yacht, Shamrock III. Length on load water line, 90 feet. Rig, cutter. The Custom House measurement will follow as soon as the vessel can be measured for registration.

I shall be much obliged if you will cable the receipt of this challenge.

(Signed) HUGH C. KELLY,
Honorary Secretary, Royal Ulster Yacht Club.

The members of the Challenge Committee of the New York Yacht Club who will have charge of the races are as follows: Commodore Lewis Cass Ledyard, Vice-Commodore Frederick G. Bourne, Secretary George A. Cormack, E. D. Morgan, E. M. Brown, J. P. Morgan, J. Malcolm Forbes, Archibald Rogers, and William Butler Duncan, Jr.

Oct. 4, 1901	Columbia..	4.32.57	Shamrock II.	‡3.33.38	‡Am. won by .41	15 m. leeward and back.

*Columbia disabled, but finished race. †Valkyrie III. fouled Defender, and the race was awarded to American boat, though the challenger finished 47 seconds ahead in 3:55:09. ‡Shamrock II. finished first, but lost race on time allowance of 43 seconds.

NEW YORK YACHT CLUB'S NEW RATING RULE.

After many years' discussion and endless talk, the New York Yacht Club has decided on a new rule of measurement and next season the old sail area and load water line Seawanhaka rule will be a thing of the past.

It was originally proposed that the new rule should be in force for five years, but this recommendation was not adopted, though all sailing yachts except the cup defending class designed this year, will probably be built under the new rule.

The Committee on Measurement of the New York Yacht Club, appointed in February last to consider the advisability of a change in the rating rule, which has held good for so many years, but which has been found fault with because of the ease with which freak boats were being developed, submitted its report at the October meeting of the club, and with one or two minor changes, the committee's recommendations were adopted.

The committee before making its report consulted with all the leading naval architects in this country and Europe, including Nathaniel G. Herreshoff, of Bristol, R. I.; A. Cary Smith, William Gardner, Clinton H. Crane, J. Beavor-Webb and John Hyslop, of this city; B. B. Crowninshield and A. S. Cheesborough, of Boston. Crossing the ocean, the committee secured the opinions of George L. Watson, William Fife and Arthur Milne, of Glasgow. In England, Arthur E. Payne, of Southampton; Linton Hope and J. N. Soper, of London; R. E. Froud, of Gosport, and J. T. Bucknell, of Bittern, contributed their ideas on the subject. Alfred Benzon, of Copenhagen, and Charles H. Duggan, the Canadian designer, were also consulted.

Briefly, the new rating measurement is found by multiplying the length of a yacht, obtained as provided for, by the square root of the sail area and dividing the result by five times the cube root of the displacement. This is a radical change from the old formula.

The result is the following formula:

Rating Measurement.—L multiplied by the square root of S A, divided by five times the cube root of D.

This means the length multiplied by the square root of the sail area, divided by five times the cube root of the displacement shall be the rating measurement of a yacht. The quantity L, representing the length of a yacht, is to be obtained as follows: "To extreme beam (B), wherever found, add greatest beam at load water line (b), and divide by eight (B+b: by 8); lay off line parallel to and this distance from middle line of hull on deck and take extreme length of hull measured on this line; to this add length of load water line on vertical projection of this line to water line plane and divide the sum of three lengths so obtained by two." The displacement is to be found as follows: At points dividing the length of the load water line into five equal parts find areas of immersed cross sections in square feet; from the areas in square feet obtained and load water line length find approximate displacement in cubic feet.

The limit of draught for all yachts exclusive of centreboards, except cup defenders and challengers, under the new rule is fixed at 18 feet, and it is provided that "should the extreme draught of any yacht in

Digitized by Google

racing trim exceed the limit of draught specified for her rating by the following scale, such excess of draught shall be multiplied by five and added to her rating." Another provision is that "should the load water line of any yacht in racing trim exceed the length by more than 10 per cent, such excess of load water line shall be added to her rating." It is also provided so as to limit sail area that "should the square root of the sail area of any yacht exceed her measurement of length by the foregoing formula more than 135 per cent, any such excess shall be added to her measurement."

A new classification is also provided as follows:

SCHOONERS.		SINGLE-MASTED VESSELS AND YAWLS.	
Class A.	All over 100 feet, rating measurement.	Class F.	All over 100 feet, rating measurement.
Class B.	Not over 100 feet and over 80 feet, rating measurement.	Class G.	Not over 100 feet and over 80 feet, rating measurement.
Class C.	Not over 80 feet and over 64 feet, rating measurement.	Class H.	Not over 80 feet and over 64 feet, rating measurement.
Class D.	Not over 64 feet and over 51 feet, rating measurement.	Class I.	Not over 64 feet and over 51 feet, rating measurement.
Class E.	Not over 51 feet, rating measurement.	Class J.	Not over 51 feet and over 40 feet, rating measurement.

A new formula for time allowance is also provided as follows:

"Time equals .8 (3,600 divided by the square foot of one) minus 3,600 divided by the square root of L." The 3,600 represents the number of seconds in an hour, I the rating measurement of the small yacht, and L the rating measurement of the large one. The committee in recommending this change says: "It was considered desirable by many that the full theoretical value of time allowance—100 per cent—be allowed, but the committee, wishing to be conservative, recommends that the tables now in use be raised from 60 to 80 per cent, as in the above formula, and that all vessels shall receive time allowance according to their rating in all races, except when otherwise specially provided."

A new crew rule was also adopted, which allows Classes A and F to carry one man for every 250 square feet of sail area or fraction thereof, and one man for every 300 square feet in Classes B, C, D, E, G, H, I, J and K.

The committee which suggested the above changes consisted of S. Nicholson Kane, chairman; C. Oliver Iselin, W. Butler Duncan, Jr.; A. Cass Canfield, Harry F. Lippitt, John F. Lovejoy, Oliver E. Cromwell, Newbury D. Lawton, Archibald Rogers, E. D. Morgan and George A. Cormack, secretary.

ROWING.

By TROY KINNEY, Yale '96.

The rowing season of 1902 was marked by no spectacular features. For the fifteenth time since 1878, Yale 'Varsity crew defeated Harvard on the Thames course at New London. Cornell won the intercollegiate on the Hudson at Poughkeepsie over a field of the best college oarsmen in the country. C. S. Titus again won the National Amateur Championship, for single sculls, at the National Regatta held at Lake Quinsigamond, Worcester, Mass., easily defeating his only opponent, Frank B. Greer. The Oxford-Cambridge race, at Putney, England, March 22, was won by Cambridge by an official distance of five lengths. The time was 19 minutes 9 seconds. The Diamond Sculls at the Henley Regatta were won by F. S. Kelley, of Balliol College, Oxford, and the eight-oared race for the Grand Challenge Cup was won by Third Trinity, of Cambridge University, who defeated Leander.

American interest in rowing is centred always in the Yale-Harvard race, and not even the annual football game between these two universities attracts so much general attention as the battle at New London for water supremacy. The rowing crowd may fall short of the football crowd by several thousand, but it has more enthusiasm, and the result of the contest is watched almost as closely in England as in America. The race of 1902 took place under unusually favorable circumstances, and though the 'Varsity contest had to be postponed for two hours on account of rough water, from the spectator's viewpoint nothing more could be desired. Harvard 'Varsity put up a great race and never ceased to try to wrest a victory from defeat until Yale was safely across the finish line. Yale won by three and a half lengths, in 20 minutes and 20 seconds. Harvard's time was 20 minutes 33 seconds.

Harvard played her best in the first two miles, and for the first half mile acted as pacemaker. Yale took the lead at this point and Harvard weakened. At the start Harvard's crew was hitting a stroke of 38 while Yale was down to 36, and Harvard was ahead by nearly half a length. With almost incredible rapidity Yale's boat crept up to the Crimson shell, and then Harvard's crew put every pound they could muster into their oars. Yale dropped her stroke to 33 and rowed like a perfect mechanism. Harvard's men were powerful, splendid individuals, but they lacked the crew work which gave Yale the advantage. The Crimsons splashed considerable and their boat seemed to travel on an uneven keel. At 1,500 yards Yale had a slight advantage and this was increased to 10 feet at the mile. Suddenly Harvard's stroke dropped to 32 and the Blue forged further ahead, still keeping to the swinging 33. Two miles from the start Harvard made a last effort and raised her stroke to 35 for half a minute, but it was beyond endurance, and it dropped back again to 32. Yale kept up the steady 33 that brought her victory, daylight came between the two boats, widened, and the people on shore saw that the finish would be a procession, with the sons of Eli far ahead.

Not a man toppled in the Yale shell when the race was done, but all looked very tired. Harvard's men stopped just before the finish line was reached, exhausted and disappointed. Watches gave the time as 20:20, ten seconds slower than the record.

Yale's victory seemed to be due to superior crew work. No matter how good an oarsman is developed from an individual, unless the entire eight work as one man, the skill of one may be detrimental rather than beneficial to the whole. In no sport so much as in rowing, does perfect team work count for so much. The slightest drag of one oar, or the tip of the blade touching the water retards the forward motion of the shell in what seems to be a proportion far exceeding the cause. Perfect time, the ultimate goal of team training, was Yale's throughout the contest, and won the race for her. Harvard took the lead with a high stroke, and in less than half a mile lost her advantage through Yale's superior time. Harvard's boat rolled and her men splashed. Without preparation Harvard's stroke was dropped six points, doing no good, but demoralizing the men still further. Yale continued to row a low stroke that became mechanical before the first mile was passed. It will be found to almost always follow that a steady low stroke in a four-mile race will mean victory for the team able to keep it. The stroke should never be lowered suddenly, but, if necessary, let down gradually. It seems to be always bad policy to lower the stroke and then attempt to increase it. Even the best trained crews will be thrown out of time by such tactics, and it would seem that Harvard's stroke had shown questionable judgment in starting the stroke at 38, dropping it to 32, and then raising it to 35, then dropping again.

The Freshmen eight-oared race, the curtain-raiser to the 'Varsity eight, was a dead heat, the time being 12:13. This was plainly Yale's race up to a point just beyond the flags marking the one and a half mile. Here Yale's coxswain lost his bearings and steered a crooked course, allowing Harvard to gain a lead. It would have been a victory for the Crimson but for the magnificent spurt the Blue crew made in the last 100 yards, which enabled them to get up in time to make it a dead heat.

The 'Varsity four-oared race was won by Harvard by two and a half lengths, in 11 minutes 19½ seconds. Yale's time was 11:25½. Harvard caught the water first and forged right ahead, opening up a length in the first quarter mile. Harvard's stroke throughout most of this race was 38 and Yale splashed all the way along the course trying to keep up to 37.

At the Intercollegiate Regatta at Poughkeepsie everything went to Cornell; the 'Varsity four and eight and the Freshman eight. It was simply a field day for the Ithaca oarsmen, and every race, and especially the big race, was won with consummate ease. The victory may be attributed to the so-called Courtney stroke, which, after considerable series of modifications, has become similar in essential respects to that

Digitized by Google

of Yale and the English universities; to the solid crew work that has become a tradition at Cornell, and to the polished watermanship that her oarsmen seem to acquire as an invariable part of their college training. Within ten strokes from the start the Cornell men caught their gait; then it was an even rhythm of 32 strokes to the minute that brought their shells in first in every contest.

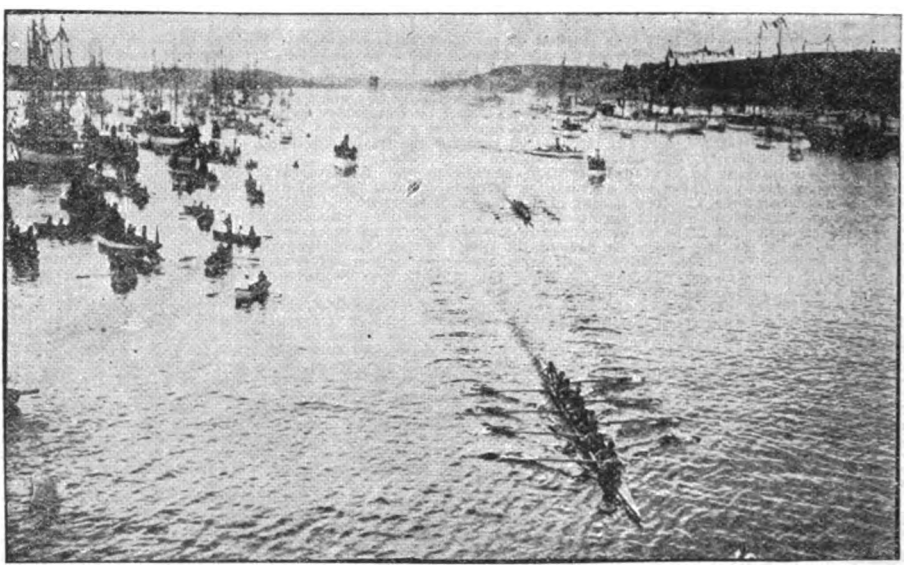
Cornell won the big race by fully three lengths, with Wisconsin second, one and one-quarter lengths before Columbia; then came Pennsylvania, two and a half lengths behind Columbia, and then Syracuse and Georgetown, too far back to count. The four-oared race was won by Cornell by two open lengths, with Pennsylvania second and Columbia third. The Freshman race was the Ithaca men's only hard fight, and in this contest Wisconsin finished less than a length behind. Columbia was third, one and a half lengths behind the Badgers, and three lengths back of Columbia were Syracuse and Pennsylvania.

The time in the 'Varsity race was: Cornell, 19:05 3-5; Wisconsin, 19:13 3-5; Columbia, 19:18 3-5; Pennsylvania, 19:26; Syracuse, 19:31 3-5; Georgetown, 19:32. The four-oared race was won in 10:43 3-5; Pennsylvania, 10:54 4-5; Columbia, 11:08; Freshman eight, 9:34 4-5.

It is interesting to note that the race of 1902 between Harvard and Yale came within a month and a half of the fiftieth anniversary of the first Yale-Harvard race, held on Lake Winnipesaukee, New Hampshire, August 3, 1852.

Nothing remarkable in the way of time was made at the Henley Royal Regatta in 1902. Third Trinity of Cambridge University defeated Leander Rowing Club in the finals for the Grand Challenge Cup, and earned a place of honor for itself. The time of the race, 7:17, was the poorest in six years. The winner of the Diamond Sculls, and with them the title of Amateur Champion Single Sculler of the World, was F. S. Kelley, of Balliol College, Oxford, who defeated R. B. Etherington-Smith, of Leander, by two and one-half lengths in 8:59. Since 1897 the Diamond Sculls have been in the hands of Americans, Edward H. Ten Eyck being the first from the United States to win the trophy. In the first heats of this race C. S. Titus, who won the American Amateur Championship at Worcester, Mass., in August, defeated W. W. Field, of Oxford, and Louis Scholes, of Toronto, Canada, beating the latter by a length and a half in 8:33, only 4 seconds behind the record time. In the ninth heat, however, he showed poor form, and lost to Kelley. In the first heats of the Grand Challenge the Americans made an excellent showing, when the Argonauts, of Toronto, Canada, beat University College, of Oxford, by two and a half lengths in 7 seconds. The Argonauts were defeated by Third Trinity, however, who won the cup.

The Oxford-Cambridge race, at Putney, on March 22, was a surprise in that Cambridge defeated Oxford



Finish Yale-Harvard Race at New London.

easily and unexpectedly. Oxford rowed a slow stroke and lost on the start. The official time was 19 minutes and 9 seconds, and the distance separating the boats was given by the officials as being five lengths, though observers on shore claimed it was at least eight lengths. In the Oxford boat were two Americans, J. G. and Devereaux Milburn, of Buffalo.

One of the features of the opening day of the Grand Army encampment at Washington, D. C., in October, was the regatta of the Potomac River Regatta Association, the first regatta held at Washington since 1896. The most interesting races were the intermediate eight, won by the Vespers of Philadelphia, and the junior double sculls, won by the Potomac Club from the Seawanhakas of New York. The senior eight-oared event was won by the Dauntless crew of New York from the Vesper crew of Philadelphia, in 7 minutes ¾ seconds.

The National Amateur Regatta was held at Lake Quinsigamond, Worcester, Mass., August 8 and 9, and was notable chiefly for the good fellowship shown to and by the visiting crews. G. S. Titus, just back from defeat at Henley, won the championship singles from Frank B. Greer, in 9:59½. The senior eight was won by the Vesper crew of Philadelphia, who defeated the Philadelphia Barge Club crew in 7:57½. An interesting feature of the regatta was the invitation war canoe race, in which there were five starters. This was won by the Quinebequins of Dedham, Mass., with the Tatassits of Worcester second.

Increased interest in rowing during the past few years has aroused a good deal of talk about an American regatta based on the plans of Henley. The American Rowing Association, formed for the purpose of exploiting this idea, sent out a circular to rowing associations in June, explaining its plans. The Board of Stewards held a meeting in May and decided that the first regatta under the auspices of the Association would be held on the Schuylkill River, Philadelphia, in June, 1903. The Board of Stewards consists of men prominently interested in rowing.

INTERNATIONAL RACES.

1869, August 27, Putney-Mortlake course, Thames River, Oxford (England), Harvard (America), fours. Won by Oxford, three lengths; time 22:20 4-5.

1876, August 29, Philadelphia Centennial Regatta, Yale and Columbia (America), First Trinity, Cambridge (English), Dublin (Ireland), fours; mile and a half straightaway. Dublin beaten in first heat; Yale and First Trinity in second heat; Columbia withdrew.
September 1, same course, International Interuniversity race. Yale won in 9:10¾; Columbia second, 9:20. First Trinity did not finish, one of the crew fainting.

1878, July 4, Henley-on-Thames Royal Regatta, Columbia (America), Dublin (Ireland), fours, 1 5-16 miles. Beaten in first trial heat for the Steward's Cup.
July 4-5, same regatta. Columbia won Visitor's Cup in 8:42, beating University College, Oxford; Jesus College, Cambridge; Hertford College, Oxford.

1881, July 2, Henley-on-Thames, Hertford College, Oxford (England), fours, defeated Cornell (America) easily.

1895, July 9-10, Henley-on-Thames, Royal Regatta, Grand Challenge Cup, 1 5-16 miles, eights. First heat Cornell (America) rowed over alone, Leander (England) failing to start; second heat Trinity Hall, Cambridge University (England), defeated Cornell by seven lengths in 7:15.

1896, July 7, Henley-on-Thames, Royal Regatta, 1 5-16 miles, Grand Challenge Cup, eights. Leander Rowing Club (England) defeated Yale (America) in first of trial heats.

1897, July 16, Henley-on-Thames, Royal Regatta, 1 5-16 miles, "Diamond Sculls." Edward Hanlon Ten Eyck (America) defeated H. T. Blackstaffe (England) in final heat; time, 8:35.

1898, July 7, Henley-on-Thames, Royal Regatta, 1 5-16 miles, for "Diamond Sculls." Won by B. H. Howell (America), who defeated H. T. Blackstaffe (England) in 8:29, best time ever made on the course.

1901, July 3-4, Henley-on-Thames, Royal Regatta, 1 5-16 miles, Grand Challenge Cup, eights. University of Pennsylvania (America) defeated London Rowing Club (England) in 7:01 2-5; second heat, University of Pennsylvania defeated Thames Rowing Club in 7:22; third heat, Leander Rowing Club (England) defeated University of Pennsylvania in 7:04 4-5.
July 13, at Lake Killarney, Ireland, special match, 3 miles. University of Pennsylvania (America) defeated Dublin (Ireland) by thirty lengths in 16:19 4-5.

1902, July 7-10, Coronation Henley Regatta, "Diamond Sculls." Won by F. S. Kelley, Balliol College, Oxford (England) over R. B. Etherington-Smith, Leander Rowing Club (England); time 8:59. Grand Challenge Cup won by Third Trinity, Cambridge University (England) over Leander Rowing Club (England); time 7:17.

THE STORY OF PUGILISM.

BY ROBERT FITZSIMMONS.

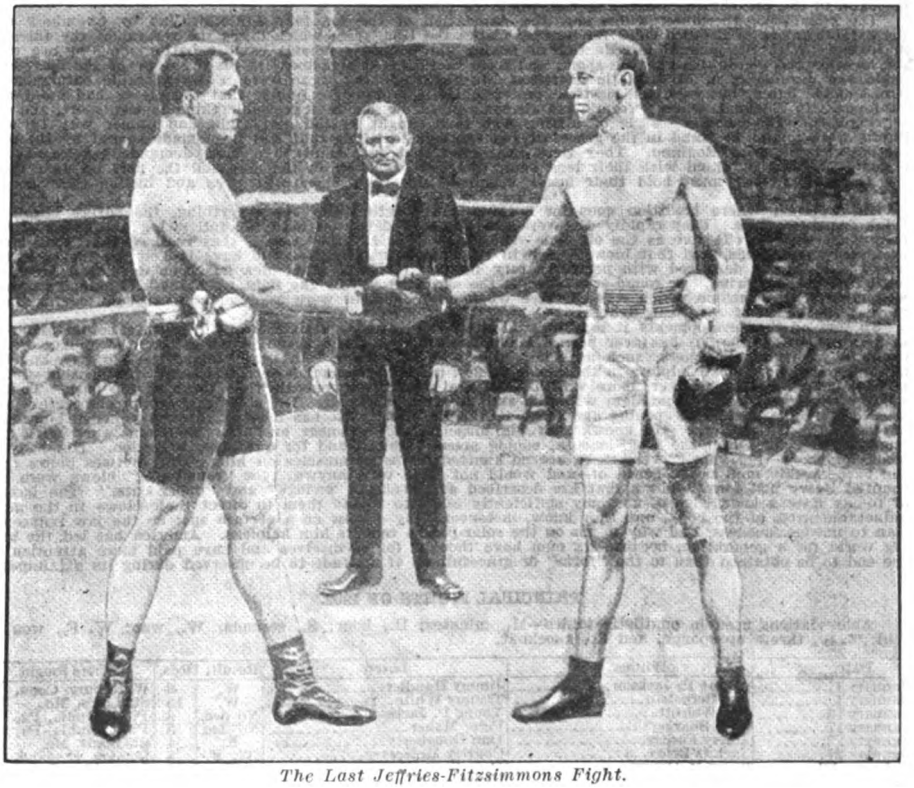
In no form of athletic sports has such progress been made during the last fifty years as in boxing, prize fighting or pugilism—whichever one may please to call it.

In the old days there was the greatest possible distinction between pugilism and boxing, but in these later days pugilism of the old fashion has practically disappeared, having been, by improvement and modification, merged into the gentler and more skillful sport of competitive boxing.

When the London prize ring, with its variable rules and its invariable brutality, held sway, it was not necessarily the man most skilled as a boxer who won the bout, but far more often the fighter who was most skilled in wrestling and "roughing" tactics. Anything short of kicking or hitting below the belt was allowable under the London system. Spikes were worn in the soles of the fighting shoes, and one of the favorite tricks seems to have been to watch for a chance to stamp on an opponent's instep, in the hope of disabling him.

It was the brutality of these contests, as well as the disreputable way in which they were frequently conducted, that finally caused the suppression of prize fights in England, which was then the home of the sport. For a time after this suppression prize fights were managed secretly, but, little by little, pugilism and its followers fell into such general disrepute that it seemed likely that a really useful and scientific sport would become obsolete.

It was due to the untiring efforts of John G. Chambers that scientific and decent boxing secured new recognition and again became a subject of athletic interest. It was he who really founded the Amateur Athletic Club and framed the boxing rules which are now so generally known as those of the Marquis of



The Last Jeffries-Fitzsimmons Fight.

Queensberry. In those days—as perhaps in these also—before any new plan or sport could hope to be regarded with favor in England it must receive the sanction and patronage of a member of the aristocracy. The commoner might do the work, but the lord must approve of it and receive the credit. The Marquis of Queensberry had been a patron of several prize fighters and had always been one of the sure attendants at any sort of contest. Mr. Chambers went to the Marquis of Queensberry with his plans, his revised rules and his ambitions, and the nobleman graciously gave them his approbation.

Briefly stated, Mr. Chambers's plan was to create interest in glove fighting by securing amateur contests under reasonable rules, and by sharply defining the difference between professionals and amateurs to give these amateur contests a standing which the professional bouts lacked. To this end there was prepared the code of rules now usually known as the Queensberry rules, which were intended to regulate both amateur and professional glove contests.

As originally written this code of rules provided for a series of contests, open to gentlemen amateurs, for challenge cups. The contests were to be participated in by three classes of contestants—heavy, middle and light weights. Heavy weights were to be over 158 pounds; middle weights were not to exceed 158 pounds, while light weights were not to exceed 140 pounds. The rules provided for three judges and a twenty-four-foot ring. Each bout was to consist of three rounds, each of any duration up to five minutes, with one minute's rest between rounds. Jerseys were to be worn on the body. Any contestant not responding to the call of "time" lost the match.

It will be noticed that in this part of the code, as originally formulated, no mention whatever is made of the existence of a ten-second time limit. Indeed, the intention seems to have been to let the men go the full three rounds, allowing a man who had been knocked down any reasonable time to "come around" again.

Digitized by Google

The part of the Chambers-Queensberry code under which all important glove contests are now conducted is that portion of the code which originally provided for "Contests of Endurance." This paragraph in its entirety says:

CONTEST FOR ENDURANCE.—To be a fair stand-up boxing match in a twenty-four-foot ring, or as near that size as practicable; no wrestling or hugging allowed; the round to be of three minutes' duration and one minute time; if either man fall through weakness or otherwise he must get up unassisted; ten seconds to be allowed him to do so, the other man meanwhile to retire to his corner, and when the fallen man is on his legs the round is to be resumed and continued until the three minutes have expired, and if one man fails to come to the scratch in the ten seconds allowed it shall be in the power of the referee to give his award in favor of the other man; a man hanging on the ropes in a helpless state with his toes off the ground shall be considered down; no seconds or any other person to be allowed in the ring during the rounds; should the contest be stopped by any unavoidable interference, the referee to name time and place for finishing the contest as soon as possible, so that the match must be won or lost, unless the backers of both men agree to draw the stakes. The gloves to be fair-sized boxing gloves of the best quality, and new; should a glove burst or come off it must be replaced to the referee's satisfaction. A man on one knee is considered down, and if struck is entitled to the stakes. No shoes or boots with spriggs allowed.

Several points of difference from the usual ring practice of to-day will be noticed upon an examination of these rules. It will be observed that it is only "in the power of the referee" instead of his bounden duty to award the fight to the other man when one of the contestants fails to come to the scratch within ten seconds, and that when a man is knocked down his opponent is required to retire to his corner.

A good many contests of late years have been conducted under what has purported to be "straight Marquis of Queensbery rules," but it can be seen from the foregoing that considerable changes would have to be made in the present custom before this would be possible.

The year 1866, therefore, which saw the foundation of the Amateur Athletic Club by Chambers and the establishment of definite rules for boxing, marks the time from which dates the revival of the interest in boxing. With the general introduction of boxing gloves into gymnasia came a better acquaintance with the niceties and possibilities of the sport, and from that time boxing took its place as one of the most valuable and developing of all athletic exercises. In the beginning there were a few sporadic outbreaks of bare-knuckle fights, but even the old-time professionals soon came to realize that the gloves had many advantages. In England, where "form" has always ranked as the most desirable thing in any sport, the old "straight-from-the-shoulder" style of hitting was then taught as the only right and proper way to box. Pupils were taught to stand in the gracefully conventional attitude that had been made sacred by the successive champions of England. They were instructed that such-and-such a blow demanded such-and-such a guard; they must stand with their legs bent, their elbows close to the side and the fists up near their faces. Finally they must hold their heads up, look into their opponent's eyes and incline their bodies slightly backward.

In America, where tradition goes for nothing and practicability for everything, the boxers began to think for themselves. They rapidly discovered that a blow delivered with the full swing and twist of the body was twice as effective as the old-time straight punch. In other words, they realized that the gloves protected their hands, and that blows which in the bare-knuckle days would have broken the bones of the fists could now be delivered with perfect safety and great effect. This idea has been developed steadily, until to-day the "swing," or round-arm blow, is the one most used by the fighter. Many of England's boxers still cling to the fashion which was effective when bare knuckles were used, and in consequence meet defeat at the hands of American fighters.

To sum up the developments it may be said that boxing to-day stands on a higher intellectual plane—it is more scientific—than it has ever been. Many times I have been asked how the boxer of to-day would compare with the old-timers, such as Tom Cribb and Jem Mace. In my opinion, the old bare-knuckle fighters would be almost helpless in the hands of first-rate professional boxers of to-day. The boxers of the present generation are quicker, more skillful, and are better ring generals than those of the past. To-day a boxer works out his ring problem with the skill of a chess player. He plans and works elaborately and laboriously for a particular opening and takes it like lightning. He has none of the heavy knotted muscles of the old prize fighters. He knows that big muscles and slowness are kin. Constant work with the punching bag gives him the long, smooth, supple muscles that stand for quickness in action. His body is a succession of very long curves; there are no knotted lumps of muscles on him. He practises blows that the bare-knuckle man never heard of—and would not have used anyway, for "round-arm" blows were accounted "very bad form"—blows that are described as "hooks," "swings" and "upper cuts." The boxers of to-day have a knowledge of anatomy sufficiently exact to enable them to direct their blows to the most vulnerable parts of the body, and they know, moreover, why a blow on a certain spot on the jaw reduces a man to unconsciousness, and why a jab on the solar-plexus renders him helpless. America has led the boxing world for a generation, because its men have thought for themselves and have paid more attention to the end to be obtained than to the "form" or gracefulness of attitude to be observed during its attainment.

PRINCIPAL FIGHTS OF 1902.

Abbreviations used in pugilistic tables—M., minutes; H., hour; S., seconds: W., won; W. F., won on foul; T. S., threw up sponge, and K., knockout.

Drawn Battle Between Tom Sayers, Champion of England & John C. Heenan (the Benicia Boy) Apr. 17th 1860 $2000 A Side & The Championship of the World.
25 ROUNDS 2 HOURS 6 MIN
Mr THOS SAYERS. WAS BORN AT, PIMLICO, Near BRIGHTON, SUSSEX. May, 1826. HEIGHT 5 FEET 8½ INCHES. FIGHTING Wt 10 STONE 10 LBS
RECEIVED THE CHAMPION'S BELT. VALUE £100 JUNE 22nd 1857

AMERICAN PRIZE RING CHAMPIONS.

Tom Hyer, American born, and a veritable giant, 6 feet 2½ inches in height, was the first champion pugilist of this country. He fought twice to gain the title. His first battle was with George McCheester, also known as "Country McCloskey." The men fought at even weight—180 pounds—at Caldwell's Landing, N. Y., September 9, 1841. McCheester was unmercifully banged all over the ring for 101 rounds, lasting 2 hours and 55 minutes. McCheester's second then threw up the sponge and Hyer was declared winner.

His next and last battle was the one which won for him the championship. "Yankee" Sullivan was the opponent this time. The bout was terrific from start to finish. Sixteen rounds were fought and the result proved Hyer the best man. Sullivan was so terribly punished that he had to be taken to Mount Sinai Hospital in Baltimore. Hyer was next matched to fight Morrissey, but the latter forfeited $100. They again agreed to fight, but when the men met at the ringside Hyer saw that his gang was outnumbered and that his chances of winning were slim. He produced a revolver for himself and one for Morrissey and offered to fight it out with them, but the latter declined. Hyer then had to retire as no one dared to meet him.

"Yankee" Sullivan, whose right name was James Ambrose, then fought John Morrissey for the title of champion and a purse of $2,000. Reports state that Sullivan was proving that he was undoubtedly better qualified for the honors when a wrangle ensued and Morrissey won on a technicality.

John C. Heenan then came into prominence and was pitted against Morrissey. The bout lasted eleven rounds and the latter won. Morrissey then retired and Heenan challenged the world for the title. The "defi" was accepted by Tom Sayers and a battle was duly fought, but it ended in a wrangle. Heenan then fought Tom King, who defeated him in twenty-five rounds. After this battle he retired from the ring.

Joe Coburn was then recognized as champion, after having defeated Mike McCoole. He retired and Bill Davis, of California, claimed the honor. James Dunn, a Brooklyn politician, disputed his claim, defeated him and retired. Davis again claimed the championship and this time Mike McCoole defeated him in thirty-four rounds.

The next battle for the championship was between Tom Allen and Bill Davis. Allen won in forty-three rounds and then challenged McCoole, who accepted. Reports state that Allen was the better man, but was defrauded and McCoole declared winner on an alleged foul. Allen then fought Jem Mace for the honors and a purse of $5,000. Mace won in ten rounds—44 minutes. Mace then went to England, and on his return brought Joe Goss with him, whom he matched to fight Allen. Goss won in twenty-one rounds—53 minutes—gaining the decision on a foul.

On May 30, 1880, the famous Joe Goss-Paddy Ryan battle was fought. It was in this bout that Ryan actually showed his ability as a pugilist. He received the decision after fighting 1 hour and 27 minutes. Two years later John L. Sullivan whipped Ryan in the memorable bout, which gained for him the championship. During June, 1887, Jake Kilrain claimed the heavyweight title because Sullivan had refused to fight him under the old London Prize Ring Rules. When Sullivan returned from England during the Fall of 1888 he challenged Kilrain to meet him and decide the question of supremacy. Articles were finally drawn up and a battle arranged, which Sullivan won in seventy-five rounds.

All these early fights were heavyweight battles. The recent history of the championship is well known to the followers of pugilism in this country.

Year.	Winner.	Loser.	Where fought.	Rds.	Result.	Time.	Date.
1849	Tom Hyer	"Yankee" Sullivan	Rockport, Md	16	W.	18m, 17s.	January 10.

1899	James Jeffries	R. Fitzsimmons	Coney Island, N. Y.	11	K.	....	June 9.

THE ENGLISH PRIZE RING.

The following tabulated list of English prize ring champions is, in itself, practically a history of pugilism from the day of its birth. Tom Figg, the man who introduced pugilists into England, was its first champion. He owned a theatre on what is known as the Oxford Road, where fist and glove encounters were patronized by royalty.

There is no authentic record to show that Figg fought more than one battle. This was with the "Venetian Gondolier," and Figg won. After he died, in 1734, the interest in pugilism waned until George Taylor came forth and claimed the title, which he defended against Jack Slack and Prince Boswell, a gypsy.

August 5, 1758, he was defeated by Tom Faulkner. The men fought a desperate bout, which lasted one hour and fifty minutes. Jack Broughton also defeated Taylor and became champion. He held the title until 1750, when he met defeat from the hands of Jack Slack.

Slack held the title for four years before he was challenged. The man who defied him was one Pettit, a

Digitized by Google

Frenchman. Slack accepted the challenge and the battle was decided at Harleston, in Norfolk. A more unscientific affair was never witnessed. The Frenchman started the bout by partially strangling his man and then unmercifully pounding him. After finally freeing himself, Slack settled the matter then and there by striking Pettit a terrific blow in the ribs. After this Slack won three more battles and then lost to Bill Stevens.

From March 2, 1762, to 1790, the champions in rotation were: George Meggs, a baker, who acquired the title fraudulently, having bribed Stevens to lose; George Milson, Tom Juchau, "Bill" Darts, Tom Lyons, Harry Sellers, Jack Harris, Thomas Jackling and Ben Ryan.

Ryan's record does not show that he was ever defeated. In size and stature he was a giant, standing nearly six feet tall and weighing 215 pounds. Ryan won the championship from Tom Johnson, who fought under the name of Jackling.

Mendoza, the next man who held the honors, was one of the cleverest boxers of his time. He claimed the title when Ryan died and defended it until he met his Waterloo in the person of John Jackson, better known as "Gentleman" Jackson. This famous pugilist fought only three battles, after which he had to retire, owing to the fact that there were few who cared to match their skill with his.

In 1803 Jem Belcher claimed the title and fought for it against all comers. His most important battle is given below, and it is claimed that at least $100,000 changed hands on the result.

Harry Pearce, the next man on England's list of prize-ring heroes made his claim as early as 1804. Belcher having announced his retirement. On October 8, 1805, Pearce, who was also known as the "Game Chicken," fought a furious battle with John Gully, which lasted over an hour and a quarter, during which time sixty-four rounds were fought. Pearce won and later retired.

When Pearce announced his retirement, the championship was conceded to John Gully, who declined to accept the honor. Gully afterward was elected to Parliament, and in 1846 he won the classic English Derby with Pyrrhus I. and The Oaks with Mendicant. In 1854 he again captured the Derby with Andover.

During Gully's reign the craze for pugilism was in its height in England and the ring saw its palmiest days. It was patronized by men of the highest rank and intellect, and it must be said to the credit of the pugilists that they fought much and often, and were always prepared and ready to defend their records.

Tom Cribb, the man who fought the famous battle with the negro Molineaux, at Copthall Common, next won the title. Besides his strength and fighting ability, his honesty gained for him the respect of all who knew him, his admirers being numerous.

Thomas Winter, also known as Tom Spring, succeeded Cribb; then followed the renowned Jem Ward. "Deaf" Burke, W. Thompson, also known as "Bendigo," his ring name, and Ben Caunt, who afterward allowed Thompson to regain the belt.

During 1850 "Bill" Perry, "The Tipton Slasher," succeeded Thompson, but the same year he won the honors, he was defeated by Harry Broome, who in 1853 forfeited the belt and retired from the ring. Tom Paddock was then conceded the honors.

Tom Sayers, the hero of the Heenan-Sayers bout, which was fought at Farnborough, Eng., April 17, 1860, next acquired the belt by defeating Perry, June 16, 1857. The result of the Heenan fight, which was for the championship of the world, discouraged Sayers and he retired, to be succeeded respectively by Sam Hurst, Jem Mace, Tom King and Joe Wormald.

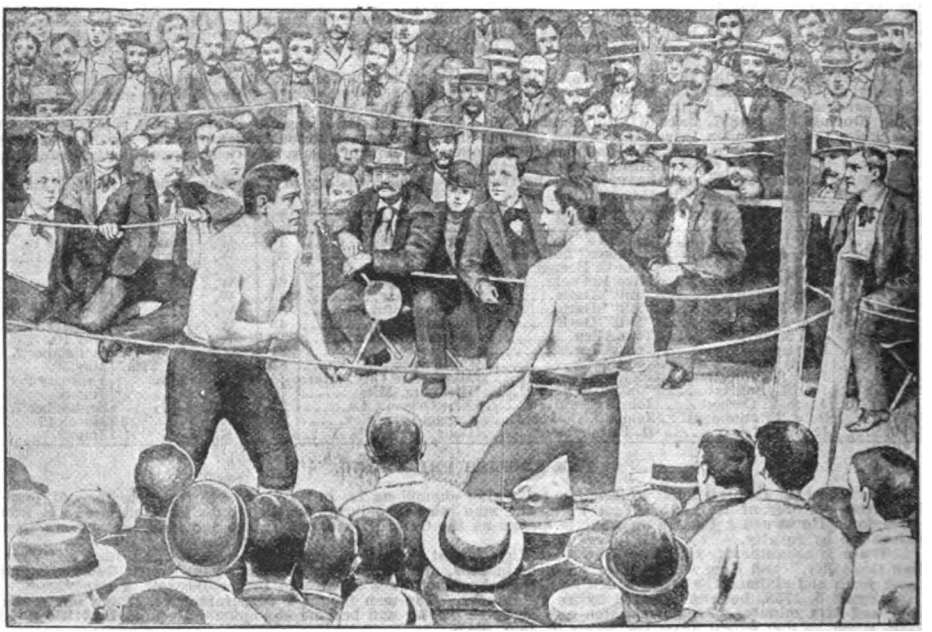
Jem Mace and Joe Wormald were matched to fight for the championship during 1865. Wormald injured his hand while training and forfeited the title. He regained it during 1867 by default.

It is claimed that Ed O'Baldwin, whom Wormald had been matched to fight for the title and £500 a side, was defrauded. The battle was never fought, but the referee gave both stake and title to Wormald. Mike McCoole (American) then succeeded to the title by defeating Tom Allen. He in turn was succeeded by Jem Mace, who held sway for fifteen years.

The next man to assume the responsibility was Jem Smith. Jake Kilrain disposed of him in 106 rounds and protected the belt for two years, when he met defeat in his memorable bout with the peerless American champion, John L. Sullivan.

Ever since Sullivan acquired the title no actual heavyweight champion has sprung up in England, and the honors are therefore undoubtedly held by American champions.

A table as carefully compiled and tabulated of English heavyweight champions as the following has never before been published:



The Sullivan-Kilrain Fight—The Last Bare-Knuckle Battle on the American Turf.

PRESENT AMERICAN CHAMPIONS, ALL WEIGHTS.

Winner.	Loser.	Rds.	Result.	Where fought.	Weight.	Date.
Harry Forbes	Dan Dougherty	4	K.	St. Louis, Mo.	Bantam	January 3, 1902.
W. H. Rothwell*	Terry McGovern	2	K.	Hartford, Conn.	Feather	November 28, 1901.
Joe Gans	Frank Erne	1	K.	Fort Erie, Ont.	Light	May 12, 1902.
Joe Wolcott	"Rube" Ferns	5	W.	Fort Erie, Ont.	Welter	December 20, 1901.
R. Fitzsimmons†	Jim Hall	4	K.	New Orleans, La.	Middle	March 8, 1893.
J. Jeffries	R. Fitzsimmons	11	K.	Coney Island	Heavy	June 9, 1899.

*Though these men fought at 126 pounds, which is four pounds above the bantam weight limit, Rothwell is regarded by the public as the actual champion. †As Fitzsimmons can no longer make the weight and because he has announced his retirement from the ring, Tommy Ryan has since claimed the title.

SCALE OF WEIGHTS.

Bantam	Under 115 pounds	Welter	142 pounds
Feather	122 pounds	Middle	158 pounds
Light	133 pounds	Heavy	Over 158 pounds

James J. Jeffries.

THE PRESENT AMERICAN CHAMPION.

James J. Jeffries, present heavy-weight champion of America, was born at Carrol, Ohio, April 15, 1875. An expert boilermaker by profession, his first knowledge of the prize ring was obtained while acting in the capacity of trainer of James J. Corbett.

Through the knowledge which he gained while in this position, Jeffries gradually succeeded in winning his way to fame. On August 5, 1898, he first appeared before a New York audience. On that day, at the Lenox Athletic Club, he was scheduled to fight two men, Bob Armstrong and Steve O'Donnell, ten rounds each.

In the first scheduled bout, the one with Armstrong, Jeffries' showing was regarded by the audience as poor for a man who had championship aspirations. He received the decision, but did not fight O'Donnell on account of a shattered finger.

His next appearance was in the bout with Fitzsimmons. Few persons thought he would win, and the betting was two to one against him. His decided victory over this past master of the game was the talk of the followers of pugilism for some time.

Jeffries is a man of great size and weight. He stands six feet and one and a half inches in height, and averages 215 pounds when entering the ring. His other measurements are:

Neck, 18 inches; chest, 43½ inches; chest, expanded, 48 inches; waist, 35 inches; reach, 76½ inches; biceps, 16 inches; calf, 17½ inches; forearm, 12½ inches; thigh, 26 inches.

His large size and strength have aided him greatly in winning the title. That he has never been defeated is shown by the following record:

1897—Knockout—T. Van Buskirk, 2 rounds; Dick Baker, 9 rounds. Draw—Gus Ruhlin, 20 rounds; Joe Choynski, 20 rounds.

1898.			Rounds.

POLO.

By GEORGE SANDS.

The polo season of 1902 in the United States was an extraordinary one. It was easily the most successful season in the history of the game on this side of the Atlantic. The tournaments were more numerous and better conducted than ever before. In fact, the season marked a turning point in the history of the game in this country. From now on the game is sure to grow in popular favor. It is no longer restricted to a few society men. It is being taken up by well-to-do sportsmen all over the country and military organizations, such as Squadron A and the Seventh Regiment. The large number of young players, boys under twenty-one years of age, who came to the front during the past season insures the future of the game. Perhaps the most prominent of these are the sons of George J. Gould, Kingdon and Jay. These boys, both of whom are under fifteen years of age, are remarkably expert and will doubtless class as high as Foxhall Keene and J. M. Waterbury, Jr., when they are a little older. These men have the highest rating, the handicap being 10. Kingdon Gould is rated at 4 and his brother and father are rated at 3. America was defeated by England during the season, the Englishmen taking two games out of three. The defeat of the Americans was attributed mainly to their lack of familiarity with the English rules, under which the games were played. The Englishmen have an off-side play rule, and permit the hooking or crackling of mallets. It was the latter that bothered the Americans more than anything else. They never knew when their strokes would be interfered with in this way, and it naturally handicapped them when rushing the ball toward the English goal. An effort is being made to have the English and American rules exactly alike. Until this is done, one team is bound to have an advantage over the other in international matches. The Americans were also bothered by their ponies, which suffered from the trip across the Atlantic and the strangeness of the grounds.

The championships at Saratoga were decided on a wet field, but despite this fact were successful in every way.

Record of the season:

International Tournament at Hurlingham, England.—First game, May 31, 1902—America defeated England by a score of 2 to 1.

AMERICAN TEAM.		ENGLISH TEAM.	
1—R. L. Agassiz.	3—Foxhall Keene.	1—C. P. Nickalls.	3—C. D. Miller.
2—J. E. Cowdin.	Back—Lawrence Waterbury.	2—P. W. Nickalls.	Back—W. H. Buckmaster.

Second game, June 9, 1902—England defeated America by a score of 6 to 1.

AMERICAN TEAM.		ENGLISH TEAM.	
1—R. L. Agassiz.	3—Foxhall Keene.	1—C. P. Nickalls.	3—George Miller.
2—J. E. Cowdin.	Back—Lawrence Waterbury.	2—Frederick Freake.	Back—W. H. Buckmaster.

Final game, June 21, 1902—England defeated America by a score of 7 to 1.

AMERICAN TEAM.		ENGLISH TEAM.	
1—R. L. Agassiz.	3—J. M. Waterbury, Jr.	1—C. P. Nickalls.	3—C. D. Miller.
2—Foxhall Keene.	Back—Lawrence Waterbury	2—P. W. Nickalls.	Back—W. H. Buckmaster.

SENIOR CHAMPIONSHIP AT SARATOGA.

First Game—Lakewood defeated Dedham by a score of 18¼ to 7½.

LAKEWOOD TEAM.		DEDHAM TEAM.	
1—Henry Lyle.	3—J. M. Waterbury, Jr.	1—Allen Forbes.	3—W. H. Goodwin.
2—J. E. Cowdin.	Back—Lawrence Waterbury.	2—Elton Clarke.	Back—J. Crane, Jr.

HOMING PIGEONS.

Homing pigeons have been bred in this country for many years, but not to the extent they have been in Europe, where there are probably 10 birds to one here. The long-distance record, from Little Rock, Ark., to New York, 1,072 miles, has been held by Sidney Corbett's pigeon, Adolph B., a picture of which is given herewith, since 1899, and he has for several years a challenge up, which is still open, to fly this bird against any brought against him, for $500 a side or more. The records up to date will be found in the annexed tables, which were prepared for the American Almanac and Cyclopedia by Mr. John Fischer, national secretary of the National Federation of American Homing Pigeon Fanciers.

These pigeons have been much used in the transmission of newspaper reports when the telegraph was not available, and, in many cases, successfully. The trouble is that they are not reliable on misty or hazy days, sometimes getting hopelessly lost and bringing up many miles from their destination.

Officer of the National Federation, Race Secretary, John Fischer, 192 Avenue C, New York, N. Y.

Manhattan Homing Pigeon Club, New York and Brooklyn, John Fischer, secretary, 710 East Thirteenth street, New York, N. Y.

FOOTBALL, 1902.

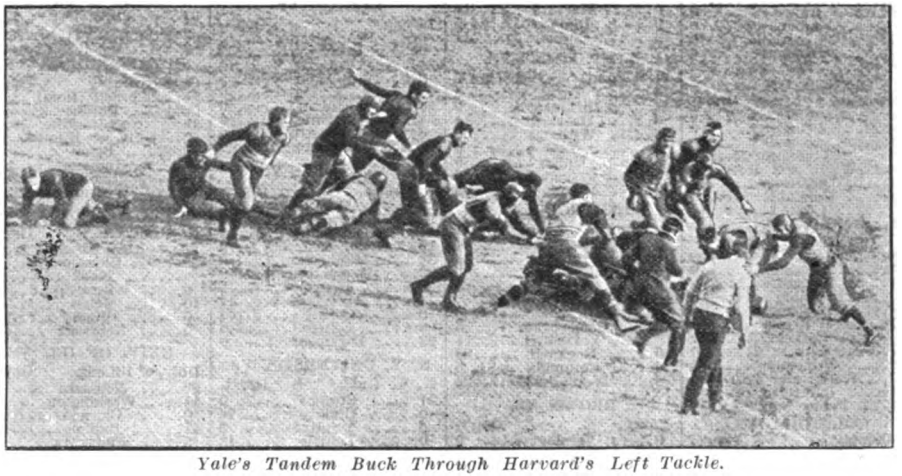
By HARRY BEECHER.

At the close of the football season of 1902 Yale had regained her supremacy by defeating both Princeton and Harvard—the former 12 to 5 and the latter 22 to 0—she earned an indisputable right to claim the championship of the gridiron. During the season no eleven beat the blue, and only one, West Point, succeeded in playing Yale a tie game.

In general the season was marked by the same style of play as had been used by all the big colleges for the two previous years. Mass formations and tandem plays were used almost exclusively as ground-gainers, runs around the end being employed only occasionally. As played by all the leading exponents it was a close and not an open game.

A feature of the Fall was the development of De Witt, the giant guard of the Princeton team, as a kicker. Showing but little proficiency in that direction when practice began, he was rapidly brought forward and at the close of the football year was one of the greatest punters and drop-kickers ever seen on the gridiron. He could boot the pigskin for 60 and even 70 yards, and could drop a field goal from anywhere inside the 50-yard line. Princeton scored against Yale only by De Witt kicking a goal from the 45-yard line, a feat that had hitherto been regarded as almost impossible.

Another prominent factor in the football world last year was the remarkable strength displayed by many of the smaller colleges. By engaging coaches from the big universities, some of the smaller elevens learned the game so well that in the early part of the practice season they were nearly as strong as the big teams. Notably was this the case with Brown and West Point. Brown gave both Yale and Harvard a hard tussle, and West Point scored against the Crimson in a close game and tied the Blue at 6. Dartmouth came to the



Yale's Tandem Buck Through Harvard's Left Tackle.

front very strongly toward the season's end. The New Hampshire boys, in their game with Harvard, had the Crimson beaten up to the last few minutes of play, and later they defeated the Brown eleven.

Columbia and the University of Pennsylvania were great disappointments to their admirers. Columbia opened the season well, but soon fell off and was defeated by nearly every team she met. Had it not been for Captain Weeke's brilliant individual playing, the Blue and White would have fared worse even than it did. The Quakers sank from one of the "Big Four" to a second-rate eleven, and a poor one at that. They showed none of their old-time snap and strength, and went down in the majority of important games they played. The Annapolis Cadets also fell off considerably in the season.

A peculiar feature of the year was that nearly all the games were played in weather more suited to baseball than football. In the Yale-Princeton game, for instance, the weather was so warm that the Yale giants lost an average of ten pounds per man. And the remarkable part of it was that in a week, under Yale's system of training, they recovered their weight and strength, and in the game with Harvard played even faster than they did against the Tigers. So snappy and aggressive was Yale's work in the big games that her eleven was by common consent put down as one of the fastest and greatest teams ever seen on the gridiron.

For training the big colleges employed principles very much alike. The professional trainers brought the teams along easily, abandoning temporarily all hard work at any sign of overtraining, and working with the sole object of having the men on edge for the big games. In this all the trainers were unusually successful. Yale, Harvard and Princeton went into the final contests as fit as an eleven could be.

Remarkably free from accident was the past season. In none of the big games was any man injured seriously, and throughout the Fall but few casualties were reported.

Following is the summary of the season's work of the most prominent clubs, 1902:

College.	Won.	Lost.	Tied.
Yale	11	0	1
Harvard	11	1	0
Princeton	7	1	0
Cornell	8	3	0
University of Pennsylvania	8	4	0
Columbia	7	4	1
West Point	6	1	1
Annapolis	3	7	1
Brown	4	4	1
Carlisle	8	3	1
Lehigh	6	2	1
Lafayette	8	3	0
New York University	5	3	0
Michigan	11	0	0
Bucknell	4	2	0
Chicago University	7	1	0
University of Illinois	2	5	0
Northwestern University	4	2	0

De Witt, of Princeton.

Glass, of Yale.

Kernan, of Harvard.

West Point-Annapolis.

1890—Navy, 24; Army, 0.	1893—Navy, 6; Army, 4.	1900—Navy, 11; Army, 7.
1891—Army, 32; Navy, 16.	1899—Army, 17; Navy, 5.	1901—Army, 11; Navy, 5.
1892—Navy, 12; Army, 4.		

FOOTBALL TERMS.

A **touchdown** is made when a player of one team carries the ball over the goal line of the opposing team. A touchdown counts five points and allows a free kick for goal, which, if successful, counts one additional point.

A **safety** is made when a player is downed with the ball in his possession behind his own goal line. A safety counts two points for the opponent.

A **goal from the field** is made when a player drops the ball to the ground, and, at the instant it rises therefrom, kicks it over the crossbar of the opponent's goal. A goal made in this way counts five points.

A **punt** is made by kicking the ball after it has dropped from the hands and before it touches the ground.

A **kick-off** is made with the ball upon the ground in the centre of the field. A goal cannot be scored from a kick-off.

A **punt-out** is made by a player of the side which has made a touchdown to another of the same side. The latter is allowed to catch the ball without interference.

The ball is **down** when the player having the ball is brought to a standstill or when he cries "down." A down is indicated by the blowing of the referee's whistle. Five yards must be made in three downs or the ball passes to the opponent team.

A **forward pass** is made when the ball is thrown, passed or batted toward the opponent's goal. The penalty for a forward pass is five yards.

A player is **off-side** when any part of his body is ahead of the ball when it is put in play.

A football **eleven** is composed of a centre rush, right and left guards, right and left tackles, right and left ends, right and left half backs, quarter back and full back.

A **gridiron** is a rectangular field, 330 feet in length and 160 feet in width.

RUNNING THE BASES, ETC.

Running the Bases—15 3-4s., C. Fulforth, Racine, Wis., May 22, 1879.
Throwing Lacrosse Ball—497 ft. 7 1-2 in., B. Quinn, Ottawa, Ont., September 10, 1892.
Batting Baseball—354 ft. 10 in., C. R. Partridge, Hanover, N. H., October 14, 1880.
Throwing Baseball—381 ft. 2 1-2 in., R. C. Campbell, North Adams, Mass., October 8, 1887.
Throwing Cricket Ball—347 ft., J. Von Iffland, Kingston, Ont., October 19, 1883.
Kicking Football, place kick—200 ft. 8 in., W. P. Chadwick, Exeter, N. H., November 29, 1887.
Kicking Football, drop kick—189 ft. 11 in., P. O'Dea, Madison, Wis., May 7, 1898.
Fence Vaulting—7 ft. 3 3-4 in., C. H. Atkinson, Cambridge, Mass., March 22, 1884.
One-hand Fence Vaulting—5 ft. 6 1-2 in., I. D. Webster, Philadelphia, Pa., April 6, 1886.
Bar Vaulting—7 ft. 4 in., T. C. Page, Gambier, O., May —, 1881.
Pulling the body up by the little finger of one hand—6 times, A. Cutter, Louisville, Ky., September 18, 1878.
Pulling the body up by one arm—12 times, A. Cutter, Louisville, Ky., September 18, 1878.
Pulling the body up by both arms—39 times, N. W. Mumford, Cambridge, Mass., April 2, 1888.

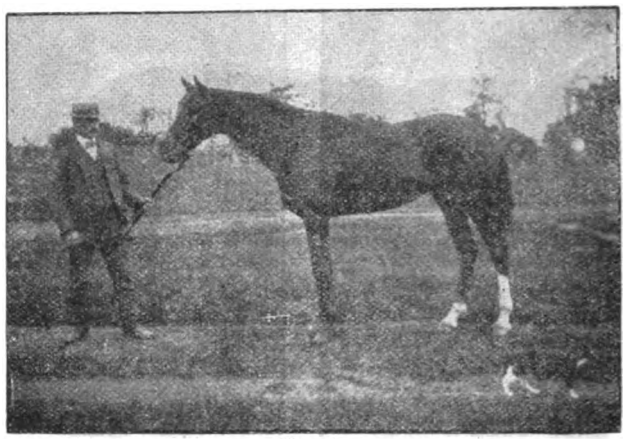
THE AMERICAN TURF.

By FRANK J. BRYAN, Associate Steward Crescent City Jockey Club.

The year for the thoroughbreds has been one of the best in the history of American racing. In every part of the country where the sport flourishes, success has been attained in all departments. All records in the way of attendance have been broken, and the support has been of the class that means a development of the sentimental interest.

As to the champions of the year opinions differ, and there are reasons that they should, for the question of supremacy has not been settled with the degree of satisfaction that we usually find. Among the two-year-olds the variation of opinion is especially marked. All Summer long the youngsters were repeatedly beating one another, which is proof positive of the lack of one that can be pointed to as a champion. It was hoped that the Fall meetings would bring the much sought for answer, but the hoped for failed to develop. The wonder of to-day was beaten when he next ran, and the wind-up of the season left the question far from settled. Among those best entitled to rate at the top of the list are Acefull, Irish Lad, Grey Friar, Meltonian and Eugenia Burch.

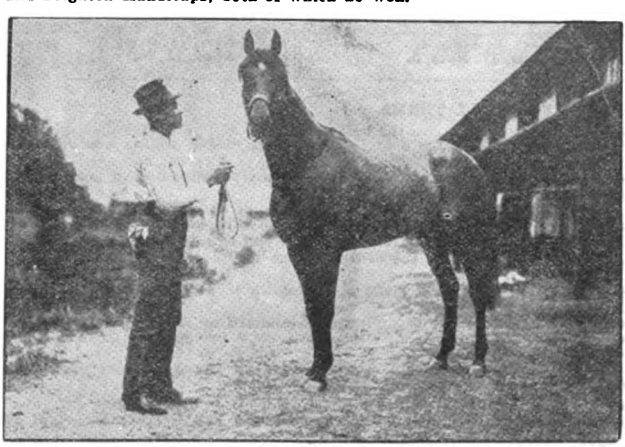


Hermis.

With the three-year-olds the season's campaign came closer to bringing a champion. Hermis's great record during the Fall, and some of the Summer meetings, stamps him not alone the colt of the year, but one of the speediest and gamest that we have seen in recent years. Of his supremacy over those of the East there is no question, and the only doubts to his claim to the title come with the prowess of the Western colt McChesney. The two never met, despite repeated efforts to bring them together, but practical horsemen, fair judges, that have seen them both at their best, are positive in their opinion that Hermis is the better stayer of the two.

Major Daingerfield, owing to the great number of rich stakes he won, is certainly entitled to rank among the leading three-year-olds.

Gold Heels was beyond all question the star of the handicap division. He met and beat the best, and under conditions that stamped him a colt far above the ordinary. Unfortunately he broke down before the season ended, and this will dull the lustre of his record some. His best showings were in the Suburban and Brighton Handicaps, both of which he won.



Gold Heels.

Among the stayers' division Advance Guard stands out all alone. This horse has been kept hard at it since he was a two-year-old, and is to-day as sound as any horse in training. At all sorts of distances and under all sorts of imposts he has proved his prowess in a manner that leaves his claim to supremacy undisputed.

With the sprinters the claims of Chuctanunda are equally convincing. He did not appear until the Saratoga meeting, but his record is a brilliant succession of great victories, and under the most trying conditions. Some have the idea that he is not alone a sprinter, but a stayer of merit, and there is no reason to dispute this claim. The fact that he was not asked to go a route does not prove that he cannot, for he did all that was asked of him in the most decisive style.

Among the riders there has been a great scarcity of desirable material. Odom, Redfern and Lyne stand out in a class by themselves, Burns, Bullman, Shaw, O'Connor, Turner, Wonderly and several more have shown brilliant work at times, only to drop back into an ordinary rut that more than wiped out their credits. The only consolation for this lack of material is the great showing that has been made by the apprentice division both East and West. Their work bespeaks several clever horsemen for the coming season.

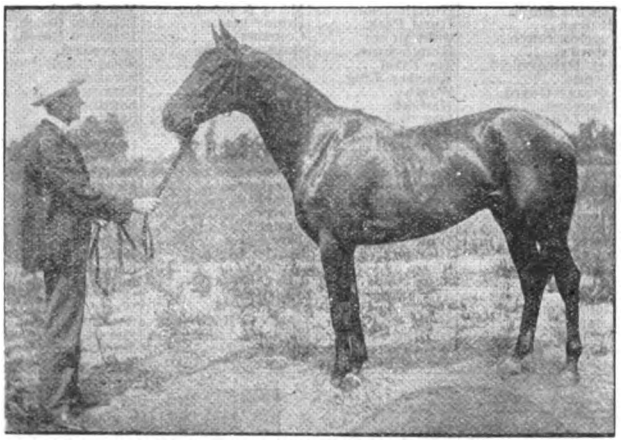
Racing officials during the past season have also demonstrated, more than ever, that they are no respecters of persons in their rulings and punishment of jockeys where they have been satisfied a punishment should be inflicted. Riders for wealthy owners, and in many cases for members of the Jockey Club, have been treated with the same severity as that visited upon lesser lights.

There has been no time in the history of the American turf when the compensation for good riders equalled that of the present. The earnings of several star jockeys are estimated at from $25,000 to $40,000 a year.

The increase in the value of purses and amount of added money in minor stakes has proven a wise act on the part of the racing associations. The increase in crowds on off days, when good contests between some of the best horses in training can be witnessed, is in sharp contrast to those of other years, when only the cheapest kind of selling platers were, as a rule, the contenders. This has also proved a great boon to small owners, who have in the past found it very hard to maintain a stable upon the purses and stakes their horses might win, and which forced them to try and make up their deficit in the betting ring. The adoption of the no-recall system of starting by the Jockey Club at all tracks under its jurisdiction has proved, on the

Digitized by Google

whole, a very wise innovation. While there have been many harsh criticisms at times upon this system, the wind-up of the season found very few horsemen and racegoers who would want the old recall system re-established. The inevitable end of Morris Park as a race course, owing to the demands of Greater New York for more homes for its growing population, has led to many conjectures as to what location would be selected to take its place. The Westchester Racing Association recently announced its plans for building a track in Queens, L. I. If the plans submitted to the State Racing Commission are carried out this will prove to be one of the most complete and elaborate race courses in the world.



Chuctanunda.

American horsemen have signified their intentions of improving upon their stables on the other side of the Atlantic. During the past two years Americans have had much to discourage them in sending over horses which, in many cases, were the pick of their stables. Mr. W. C. Whitney's Nasturtium and Mr. James R. Keene's Tommy Atkins are examples of noted horses that could not stand the hardships entailed by an ocean voyage. But the coming season will see several American owners represented by horses bred in their own country.

Another and a very pleasing development of the year has been the new blood that has been brought into the list of owners. Rich men in all parts of the country have started to collect racing establishments on a high scale without the idea of profit. They are patronizing the game solely through sentimental motives, which means the best sort of support. Society women have been induced to race under their own colors, and this particular feature bids fair to develop greatly.

All considered, the year furnishes many bright prospects for the future. The turf powers of the entire country are fast attaining the end so much desired, the lifting of the sport to a basis where it can be pointed to as an institution that all can be proud to support.

The following are tables of the stake winners of 1902, stake winners of the past, and of famous or important racing events:

PRINCIPAL STAKE EVENTS OF 1902.

Events.	Distance.	Winner.	Second place.	Third	Track.
Adirondack	6 fur.	Molly Brant	Wild Thyme	Sir Voorhies	Saratoga.
American Derby	1½ miles.	Wyeth	Lucien Appleby	Aladdin	Wash. Park.
Annual Champion	2¼ miles.	Maj. Daingerfield	Zoroaster	Slipthrift	Sheepshead.
Arkansas Derby	1 mile.	Prowl	Flora Pomona	Huntressa	Little Rock.
Belmont, The	1⅜ miles.	Masterman	Ranald	King Hanover	Morris Park.
Bennings Handicap	⅞ mile.	Himself	Bastile	The Heyden	Bennings.
Breeders' Stakes	1⅛ miles.	Lyddite	Ravelstoke	Plum Tart	Toronto.
Brighton Cup	2¼ miles.	Gold Heels	Sun Shower	Surmise	Brighton Beach.
Brighton Derby	1¼ miles.	Hyphen	Maj. Daingerfield	Homestead	Brighton Beach.
Brighton Handicap	1¼ miles.	Gold Heels	Blues	Arggregor	Brighton Beach.
Brighton Junior	6 fur.	Hurstbourne	Blue Ribbon	Woodlake	Brighton Beach.
Brighton Oaks	1 mile.	Hatasoo	Sun Shower	Ascension	Brighton Beach.
Brooklyn Derby	1½ miles.	Maj. Daingerfield	Homestead	King Hanover	Gravesend.
Brooklyn Handicap	1¼ miles.	Reina	Advance Guard	Pentecost	Gravesend.
Buffalo Derby	1½ mile.	Sombrero	Circus	Homestead	Buffalo.
Burns Handicap	1¼ miles.	Eonic	Nones	Corrigan	Oakland.
California Derby	1¼ miles.	Sombrero	Corrigan	Waterscratch	Oakland.
California Oaks	1⅛ miles.	Muresca	Colonial Girl	Doreen	Oakland.
Carter Handicap	7 fur.	Ethics	Contend	Petra II	Aqueduct.
Crescent City Derby	1¼ miles.	Lord Quex	Vassal Dance	Prowl	New Orleans.
Century	1½ miles.	Blues	Igniter	Maj. Daingerfield	Sheepshead.
Champagne	7 fur.	Meltonian	Acefull	Grey Friar	Morris Park.
Double Event (1)	5½ fur.	Mexican	Golden Maxim	Prediction	Sheepshead.
Double Event (2)	6 fur.	Whitechapel	Whorler	Mexican	Sheepshead.
Eclipse, The	5½ fur.	Mizzen	Dalesman	Mexican	Morris Park.
Expectation	5 fur.	Mexican	Mary Street	Sir Voorhies	Gravesend.
Flash	5½ fur.	Judith Campbell	Chas. Edward	Sergeant	Saratoga.
Flatbush	7 fur.	Irish Lad	Acefull	Hurstbourne	Sheepshead.
Flight	7 fur.	Smoke	Lord Pepper	The Musketeer	Sheepshead.
Fort Erie Derby	1¼ miles.	Red Robe	Dubious	Mattie Spencer	Fort Erie.
Futurity	6 fur.	Savable	Lord of the Vale	Dazzling	Sheepshead.
Gazelle	1 1-16 miles.	Blue Girl	Par Excellence	Hanover Queen	Gravesend.
Grand Union Hotel	6 fur.	Grey Friar	Judith Campbell	Whitechapel	Saratoga.
Great American	5 fur.	Dalesman	Artvis	Martic Lewis	Gravesend.
Great Eastern	6 fur.	Golden Maxim	Africander	Merry Acrobat	Sheepshead.
Great Filly	6 fur.	Girdle	Dazzling	Ada Nay	Sheepshead.
Great Trial	6 fur.	Irish Lad	Mizzen	Martic Lewis	Sheepshead.
Harlem	1⅛ miles.	John Bright	Aladdin	McChesney	Harlem.
Hyde Park	6 fur.	Dick Welles	Savable	Early	Wash. Park.
Iroquois	1⅛ miles.	Old England	Homestead	Gold Cure	Brighton Beach.
Junior Champion	6 fur.	Acefull	Lord of the Vale	Blue Ribbon	Gravesend.
Juvenile	5 fur.	Mizzen	Dalesman	Spencer Reiff	Morris Park.
Kentucky Derby	1¼ miles.	Alan-a-dale	Inventor	The Rival	Louisville.
King's Plate, The	1¼ miles.	Lyddite	Fly in Amber	Opuntia	Toronto.
Latonia Derby	1½ miles.	Harry New	South Trimble	Martin Burke	Latonia.
Matron's (colts)	Eclipse	Grey Friar	Surbition	Acefull	Morris Park.
Matron's (fillies)	Eclipse	Eugenia Burch	Merry Reel	Stolen Moments	Morris Park.
Merchants & Citizens'	1⅛ miles.	Herbert	Keynote	Whiskey King	Saratoga.
Metropolitan	1 mile.	Arsenal	Herbert	Carbuncle	Morris Park.
Missouri Derby	1½ miles.	Otis	Little Scout	Terra Firma	St. Louis.
Monadnock	1⅛ miles.	Hunter Raine	Scarlet Lily	Arggregor	Harlem.
Montgomery Derby	1⅛ miles.	Red Robe	Circus	Buccleuth	Memphis.
Montgomery Handicap	1 1-16 miles.	Circus	Wax Taper	Flora Pomona	Memphis.
National Stallion	5 fur.	Mizzen	Dalesman	Bensonhurst	Morris Park.

PRINCIPAL STAKE EVENTS OF 1902.—Continued.

Events.	Distance.	Winner.	Second place.	Third.	Track.
Neptune	6 fur.	Injunction	Sailmaker	Africander	Brighton Beach.
Nursery	Eclipse	Eugenia Burch	Hurstbourne	Merry Acrobat	Morris Park.
Produce (1)	6 fur.	Mexican	Hurst Park	Injunction	Brighton Beach.
Produce (2)	6 fur.	Eugenia Burch	Gold Money	Courtmaid	Brighton Beach.
Prospect	6 fur.	Astarita	Hurstbourne	Golden Maxim	Gravesend.
Realization	1⅝ miles.	Maj. Daingerfield	The Rival	Goldsmith	Sheepshead.
Saranac	1⅛ miles.	Hermis	Whiskey King	Cunard	Saratoga.
Saratoga Cup	1¾ miles.	Advance Guard	Wyeth	Andy Williams	Saratoga.
Saratoga Handicap	1 3-16 miles	Francesco	Herbert	Articulate	Saratoga.
Saratoga Special	5½ fur.	Irish Lad	Dazzling	Blue Ribbon	Saratoga.
Special (1)	1¼ miles	Hermis	Articulate	Gunfire	Gravesend.
Special (2)	1½ miles.	Blues	Sombrero	Advance Guard	Gravesend.
Spinaway	5½ fur.	Duster	Astarita	Judith Campbell	Saratoga.
Suburban	1¼ miles.	Gold Heels	Pentecost	Blues	Sheepshead.
Tennessee Derby	1⅛ miles	Abe Frank	Lou Woods	Buccleuth	Memphis.
Tidal	1⅛ miles.	Maj. Daingerfield	Goldsmith	Dixieline	Sheepshead.
Toboggan Handicap	Eclipse	Old England	Arsenal	Cervera	Morris Park.
Travers	1⅛ miles.	Hermis	Gold Cure	Cunard	Saratoga.
Tremont	6 fur.	Artvis	Whitechapel	Fire Eater	Gravesend.
Twentieth Century	1 3-16 miles.	Scintillant	Jiminez	Scarlet Lily	Harlem.
Twin City	1¼ miles.	Gunfire	Blues	Hyphen	Sheepshead.
United States Hotel	5½ fur.	Skilful	Athel	Chas. Elwood	Saratoga.
Western Produce	5 fur.	Maxnic	Sylvia Thorne	Vinetides	Oakland.
Wheeler Handicap	1¼ miles.	Flying Torpedo	Lucien Appleby	Wild Pirate	Wash Park.
Willow	5½ fur.	Astarita	Molly Brant	Eugenia Burch	Gravesend.
Withers	1 mile.	Compute	Old England	Igniter	Morris Park.
Woodlawn Vase	2¼ miles.	Advance Guard	Wyeth	Blues	Morris Park.
Young Handicap	1 3-16 miles.	Argregor	Scarlet Lily	Hunter Raine	Wash. Park.

George Odom.

Arthur Redfern.

Lucien Lyne.

STAKE WINNERS OF THE PAST.

The following is the official list of first, second and third horses in some of the important stake events since 1884.

AMERICAN DERBY, FOR 3-YEAR-OLDS.

1½ Miles. Run at Washington Park, Chicago, Ill.

Year.	Horses.	No. of starters.	Time.	Value to winner.
1884	Modesty, Kosciusko, Bob Cook	12	2:42¾	$10,700
1885	Volante, Favor, Troubadour	8	2:49½	9,570
1886	Silver Cloud, Blue Wing, Sir Joseph	10	2:37¼	8,160
1887	C. H. Todd, Miss Ford, Wary	14	2:36½	13,690
1888	Emp. of Norfolk, Falcon, Los Angeles	7	2:40½	14,340
1889	Spokane, Sorrento, Retrieve	7	2:41¼	15,440
1890	Uncle Bob, Santiago, Ben Kingsbury	7	2:55¾	15,260
1891	Strathmeath, Poet Scout, Kingsman	10	2:49¼	18,610
1892	Carlsbad, Zaldivar, Cicero	10	3:04¼	16,930
1893	Boundless, St. Leonards, Clifford	15	2:36	$19,500
1894	Rey El Santa Anita, Senator Grady, Despot	9	2:36	19,750
1895	Meeting discontinued.			
1898	Pink Coat, Warrenton, Isabey	8	2:42¾	9,225
1899	Meeting discontinued.			
1900	Sidney Lucas, James, Lieut. Gibson	6	2:40½	9,425
1901	Robt. Waddell, Terminus, The Parader	10	2:33 4-5	19,275
1902	Wyeth, Lucien Appleby, Aladdin	12	2:40 1-5	19,875

BROOKLYN HANDICAP.

1¼ Miles. Run at Gravesend, L. I.

Year.	Horses.	No. of starters.	Time.	Value to winner.
1887	Dry Monopole, Blue Wing, Hidalgo	17	2:07	$5,850
1888	The Bard, Hanover, Exile	11	2:13	6,925
1889	Exile, Port Royal, Terra Cotta	7	2:07½	6,900
1890	Castaway II., Badge, Eric	9	2:10	6,900
1891	Tenny, Port Royal, Tea Tray	21	2:10	14,800
1892	Judge Morrow, Pessara, Russell	12	2:08¾	$17,750
1893	Diablo, Lamplighter, Leonawell	13	2:09	17,500
1894	Dr Rice, Henry of Navarre, Sir Walter	14	2:07¼	17,750
1895	Hornpipe, Lazzarone, Sir Walter	12	2:11⅛	7,750

Digitized by Google

BROOKLYN HANDICAP.—Continued.

Year.	Horses.	No of starters.	Time.	Value to winner.
1896..	Sir Walter, Clifford, St. Maxim	8	2:08⅛	$7,750
1897..	Howard Mann, Lake Shore Volley	11	2:09¾	7,750
1898..	Ornament, Ben Holliday, Sly Fox	8	2:10	7,800
1899..	Nanister, Lucky Bob, Filigrane	16	2:06 1-5	$7,800
1900..	Kinley Mac, Raffaello, Herbert	9	2:10	7,800
1901..	Conroy, Herbert, Standing...	9	2:09	7,800
1902..	Reina, Advance Guard, Pentecost	14	2:07	7,800

FUTURITY, FOR 2-YEAR-OLDS.

Full Course. Run at Sheepshead Bay, C. I.

Year.	Horses.	No. of starters.	Time.	Value to winner.
1888..	Proctor Knott, Salvator, Galen	14	1:15 1-6	$40,900
1889..	Chaos, St. Carlo, Sinaloa II.	23	1:16 4-5	54,550
1890..	Potomac, Masher, Strathmeath	15	1:14 1-5	67,675

*Dead heat.

The English Derby is considered the most important stake event in the world, although the value, about $30,000, does not compare with many other stake races. It is run at Epsom Downs, 14 miles from London, and over a course of 1 mile, 4 furlongs and 29 yards.

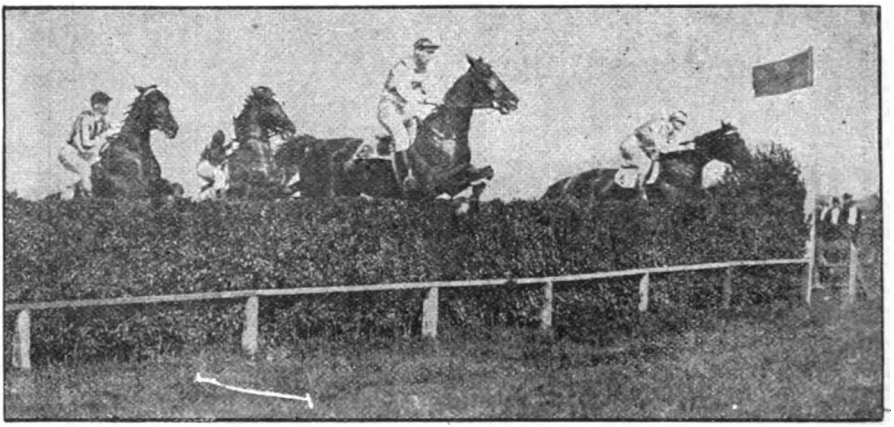
STEEPLECHASING IN 1902.

During the year great strides were made by the National Hunt and Steeplechase Association in the improvement of the branch of the sport of which it has assumed charge. A few years ago jumping races were scorned by the majority of the racing public, and with good reason. The horsemen, too, were inclined to view them with disfavor, but now they have been won over again. Some of the most prominent stables in the country to-day boast of a few horses given over to the hurdles or the field.

Best of the many features that have been developed with the return to favor of cross-country racing is the number of really clever horsemen from the gentlemen rider division who have shown a disposition to try their hands in public contests. Mr. Page, Mr. Clark, Mr. Holland, Mr. Harris, Mr. Holloway and Mr. Hayes have carried off the honors in the East, but they are only a few of many. In one race two gentlemen came from Canada to ride.



Taking the Jump.

Much of the improvement in this class of racing has been due to the fact that the old idea of turning over to the jumps only those horses that are useless for the flat, has been abandoned. Big prices are now paid for young horses that are sound, solely with the idea of schooling them for the field. Another very promising development is the offering of purses at the State fairs for the jumpers. This has been done with the idea of developing the game among the farmers.

Among those chiefly responsible for restoring to favor this class of sport are Mr. Thomas Hitchcock, Mr. J. G. Follansbee, Mr. H S. Page, Mr. F. Ambrose Clark, Mr. Harry S. Smith, Mr. F. R. Hitchcock, Mr. J. E. Widener, Mr. Chamblet and many others. The National Hunt and Steeplechase Association has also received hearty co-operation from the Canadian Hunt Association, and this has been of great value to them in their efforts in purification.

PRINCIPAL STEEPLECHASE EVENTS OF 1902.

Events.	Distance.	Winner.	Second place.	Third.	Track.
Ballston Cup	2½ miles.	Burrough	Self Protection	Rockstorm	Saratoga.

HARNESS RACING, 1902.

By FRANK WALKER, Official Starter on the Grand Circuit.

The light harness racing season of 1902 will go down in history as one of the most successful of the National Trotting Association. Increased interest in the sport was manifested in all sections of the country and particularly in the East, where trotting has heretofore had small claim on the public.

The Grand Circuit meetings were successful, and nearly all of the associations prospered. More than $400,000 in purses and stakes was offered by the twelve Grand Circuit tracks, and an additional $150,000 was divided between the Lexington and Memphis meetings, which are not in the Grand Circuit. The sport furnished throughout was exceedingly high class and the season saw the wiping out of several long-standing records. The world's trotting record for one mile, 2:02¼, made by Cresceus in 1901, withstood the attacks of the champion, who made several unsuccessful attempts to reduce his present record. The best the champion could do was 2:04, but he redeemed himself by trotting two miles in the wonderful time of 4:17, reducing the best previous time by 11 seconds. When the season opened, the record stood at 4:32, but Onward Silver brought the figures down to 4:28¼ before Cresceus made his attempt. Cresceus trotted the first mile in 2:10½ and made the second mile in 2:06½, an average of 2:08½ to the mile. Another trotter that covered himself with glory by his remarkable speed performances was Major Delmar, who trotted the fastest mile of the season in a race, 2:05½, a new world's record for five-year-old trotters, and established new figures for 1⅛ miles of 2:22½, and ½ mile of 1:01.

The largest stake contested for in a special match race in trotting turf history was decided at Hartford Conn., when E. E. Smathers's Lord Derby and Thomas Lawson's Boralma raced for a stake of $50,000. The match was for $20,000 a side and the winner's share of the gate receipts amounted to $10,000. The match was made by The American, and the forfeits amounting to $40,000 were deposited with the sporting editor of The American. Lord Derby was the winner in three heats. The match was rather a disappointment, owing to an injury to Boralma, which necessitated his withdrawal after the third heat. Boralma won the first heat and the second and third were captured by Lord Derby.

Dan Patch was easily king of the pacers. He equalled the world's record for one mile, of 1:59¼, made by Star Pointer in 1897. Dan Patch is the second harness horse to get inside the two-minute mark. Prince

Cresceus.

Alert came very near the goal when he paced a mile in 2:00 flat, thus reducing the gelding record held by himself. Prince Alert established a new world's record for ½ mile when he paced the distance in 0:57¾.

Direct Hal and Prince Direct established a new world's record for pacing teams, 2:05½, lowering the record of 2:08, made by John R. Gentry and Robert J., in 1897.

One interesting feature of the light harness racing last season was the appearance of many prominent amateur drivers in wagon races. The honors easily went to E. E. Smathers's Lord Derby. Lord Derby trotted the fastest mile to wagon in a race for the year, 2:05¼, and won the fastest two and three heat races, besides capturing a number of handsome trophies.

The Boston Challenge Cup race, decided at Cleveland, Ohio, was won for the third time by John A. McKerron, driven by his owner, Harry Devereaux, one of the best amateur reinsmen in the country. The Monk and Lord Derby were contenders for the honors, but McKerron won in straight heats. The victory gave Mr. Devereaux possession of the cup.

Catherine A. was the champion two-year-old filly of 1902, equalling the world's record of 2:14, made by Jennie T., in 1897.

Direct Hal was without a doubt one of the greatest fast performers of the year. Starting the year without a record, he won 13 straight races, and besides $20,000 in purses and stakes, he established a new record of 2:04¼ for green performers in the pacing division. Susie J. was the fastest five-year-old mare, getting a record of 2.06½. Charles Bedford drove the trotters York Boy and Bemay against time in 2:12¼ at Brooklyn, equalling the best previous record for trotting teams. C. K. G. Billings, known throughout the country as an amateur whip, established a new record when he drove The Monk 1⅛ miles in 2:25¼.

The trotter is fast growing in popularity. The interest taken in the sport around the metropolis is shown by the organization of new clubs composed of some of the most influential men throughout the horse world. The most recent club is the New York Driving Club, of which C. K. G. Billings is president. The promoters or charter members of this club, who have the interest of the sport at heart, purchased the Empire City Track at Yonkers, which is one of the finest racing courses in the country. The Empire City track is also the home of the Empire City Trotting Association, which held its first professional meeting last season. The New York Trotting Association, with its annual meets at Brighton Beach, has also done much to stimulate interest in the sport.

Digitized by Google

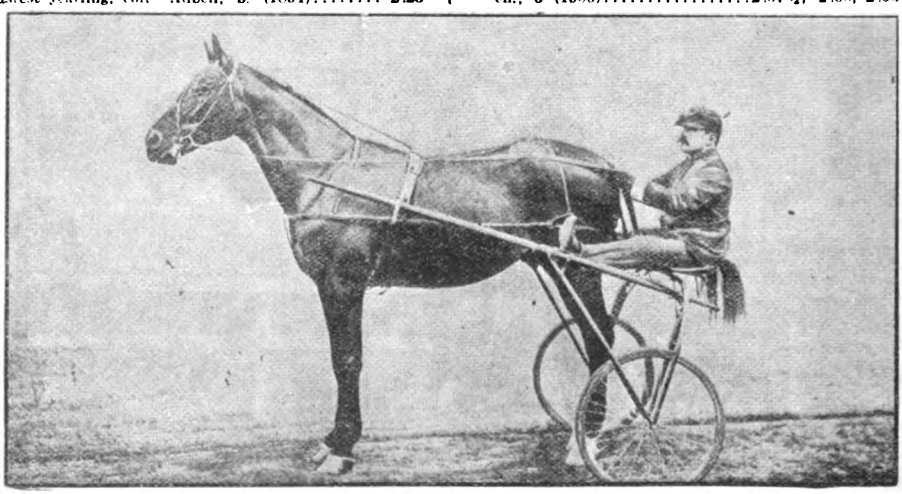
The New York Speedway, where some of the finest horses in the world are driven for road honors, has proved an ideal course for road drivers. More men of wealth and means are fast becoming enthusiasts as owners of fast record trotters, which they can themselves drive at speed in amateur contests and impromptu road brushes.

THE WORLD'S RECORDS.

TROTTING.

One-half mile—Major Delmar, b. g., Oct. 23, 1902, Memphis 1:01
One mile—Cresceus, ch, h., 7 (1901) 2:02¼
One and one-quarter miles—Lily Young (1902) ... 2:44
One and one-eighth miles—Major Delmar, b. g., Oct. 23, 1902, Memphis 2:22½
Two miles—Cresceus, ch. h., 8 (1902); Memphis .. 4:17
Three miles—Nightingale, ch. m., 8 (1893); first mile, 2:22; second mile, 2:19; third mile, 2:14½ 6:55½
Four miles—Senator L., ch. h., 5 (1893) 10:12
Five miles—Bishop Hero, b g., 10 (1893) 12:30¾
Five miles—Zamora (1902) 12:24
Six miles—Longtime, b. g., untraced (1893) 16:00
Ten miles—Pascal, blk, g. (1893) 26:15
Eighteen miles—Bill, ch. g., untraced (1885) .. 58:10
Twenty miles—Capt. McGowan, rn. h,. untraced (1895) 58:25
Thirty miles—Gen Taylor, gr. h., 10 (1857) ... 1:47:59
Fifty miles—Ariel, br. m., untraced (1846) ... 3:55:40½
One hundred miles—Conqueror, b. g., 11 (1853). 8:55:33
Fastest stallion—Cresceus, ch., 7 (1901) 2:02¼
Fastest gelding—The Abbot, b., 7 (1900) 2:03½
Fastest mare—Alix, b., 6 (1894) 2:03¾
Fastest yearling, colt—Adbell, b. (1894) 2:23

Fastest first heat—Cresceus, ch. h., 7 (1901) 2:03¼
Fastest second heat—Cresceus, ch, h., 7 (1901) .. 2:05
Fastest third heat—Alix, b. m., 7 (1894); Directum, blk, c., 4 (1893) 2:05¼
Fastest fourth heat—Beuzetta, ch. f. 4 (1895) ... 2:06¾
Fastest fifth heat—John Nolan, b, g., 4 (1898) .. 2:08
Fastest sixth heat—Countess Eve, b. m., 6 (1897) 2:09¼
Fastest seventh heat—Pat L., b, c., 4 (1896) .. 2:10¾
Fastest eighth heat—Cresceus, ch c., 3 (1897) .. 2:11½
Fastest ninth heat—Alix, b. m., 6 (1893) 2:09¾
Fastest dead heat—Nightingale, ch. m., 9, and Phoebe Wilkes, br. m., 9 (1894); Charley Herr, b. h., 5, and Gayton, b. h., 8 (1900) .. 2:12
Fastest two-heat race—Cresceus, ch. h., 7 (1901). 2:03¼, 2:06¼
Fastest two consecutive heats by two-year-old filly—Katherine A. (1902) 2:14. 2:15½
Fastest three-heat race—Alix, b. m., 6 (1894) 2:06, 2:06¾, 2:05¼
Fastest three-heat race, by a gelding—Azote, b., 8 (1895) 2:09½, 2:05¼, 2:07
Lord Derby, b., 5 (1900) 2:07, 2:07, 2:08
Fastest three-heat race, by a stallion—Cresceus, ch., 6 (1900) 2:07½, 2:06, 2:06



Star Pointer.

TROTTING—IN RACES.

Fastest yearling, filly—Pansy McGregor, b. (1893) 2:23¾
Fastest two-year-old, colt—Arion, b. (1891) 2:10¾
Fastest two-year-old, filly—Janie T., b (1897) ... 2:14
Fastest two-year-old filly—Katherine A. (1902) .. 2:14
Fastest two-year-old, gelding—Endow, b. (1899) .. 2:14
Fastest three-year-old, filly—Fantasy, b. (1893) .. 2:08¾
Fastest three-year-old, colt—Arion, b. (1892) 2:10½
Fastest three-year-old, geiding—Peter Stirling, ch. 1901) 2:11½
Fastest four-year-old, colts—Directum, blk. (1893); John A. McKerron (1902) 2:05¼
Fastest four-year-old, filly—Fantasy, b. (1894) .. 2:00
Fastest four-year-old, geldings—John Nolan, b. (1898); Boralma, ch. (1900) 2:08
Fastest five-year-old, stallions—Ralph Wilkes, ch. (1894); Bingen, br. (1898) 2:06¾
Fastest five-year-old, mare—Susie J 2:06½
Fastest record for five-year-old trotters—Major Delmar (1902) 2:05½
Fastest five-year-old, geldings—Lord Derby, b. (1900); Boralma, ch. (1901) 2:07
Fastest green performer—Lord Derby, b. g. (1900) 2:07
Fastest green mares—Fantasy, b. f., 3 (1893); Elcata, blk. f., 4 (1901) 2:08¾
Fastest green stallion—Rhythmic 2:08
Fastest heat—Cresceus, ch h., 7 (1901) 2:03¼
Fastest heat, mare—Alix, b., 6 (1894) 2:05¼
Fastest race heat by gelding—Major Delmar (1902). 2:05¼
Fastest heat, geldings—Azote, b., 8 (1895); Major Delmar (1902) 2:05½
Fastest heat, yearling—Pansy McGregor, b. f. ('93) 2:05½
Fastest heat, two-year-old—Jupe, b. c. (1896) 2:13¾
Fastest heat, three-year-old—Fantasy, b. f. (1893) 2:08¾
Fastest heat, four-year-old—Directum, blk. c. ('93) 2:05¼
Fastest heat, five-year-old—Susie J 2:06½

Fastest four-heat race—Fantasy, b. m., 6 (1896); (Kentucky Union won third heat 2:09, 2:08¼, 2:07¾, 2:08
Fastest five-heat race—Cresceus, ch. h., 6 (1900); (Charley Herr won first and second heats.. ..... 2:07¼, 2:07¼, 2:07¼, 2:07½, 2:08¾
Fastest six-heat race—Ozanam, br. m. (1902); (Major Delmar won first, Prince of Orange second and third) 2:09½, 2:09¾, 2:07½, 2:08, 2:09, 2:09¾
Fastest seven-heat race—Pat L., b. c., 4 (1896); (Beuzetta won first, Fantasy second and third, William Penn fourth heat) 2:07¾, 2:08¼, 2:10½, 2:09¼, 2:10¾, 2:12, 2:10¾
Fastest eight-heat race—Bouncer, b. f., 4 (1895); (Geneva won first, Altao second and third, and Bertie R. fifth and sixth heats) 2:11¼, 2:11, 2:12, 2:12, 2:13, 2:13½, 2:13¾, 2:14¼
Fastest eight-heat race—Cresceus, ch. c., 3 (1897); (Eagle Flanagan won first and third, The Monk fourth and fifth, and Shadeland Norward second heat) 2:15¼, 2:13¼, 2:12¼, 2:12¼, 2:14¼, 2:12¼, 2:11¼, 2:11¼
Fastest eight-heat race—Nutbearer (1902) (Alice Carr won first heat, Rythmic second heat, Wentworth third heat, Dulce Cor, fourth and sixth heats) ..... 2:09¼, 2:08¾, 2:09¼, 2:08½, 2:10¾, 2:12¾, ... 2:11¾, 2:12
Fastest nine-heat race—Alix, b, m., 5 (1893); (Pixley won sixth and eighth, Nightingale seventh, Lord Clinton fifth, and Hulda second and third heats ..... 2:07¾, 2:10¼, 2:10½, 2:11¾, 2:11¼ 2:09¾, 2:12¾, 2:15¼, 2:09¾

TROTTING TO WAGON.

One mile—The Abbot, b. g., 7 (1900)..... 2:05½
One mile (amateur driver)—Lord Derby (1902).. 2:05¾
One mile by a stallion—John A. McKerron, b., 5 (1902) 2:06½
Fastest two heats—Lord Derby.....2:05¾, 2:06½
Fastest three heats—Lord Derby (first heat won by The Monk).....2:06¼, 2:06, 2:06
One mile in a race—Lord Derby (New York, 1902) 2:05¾
One mile by a mare in a race—Mabel Onward, b. m., 6 (1901)..... 2:10½
One and one-eighth miles—The Monk (New York, 1902) 2:25½
Two miles—Dexter, br. g., 7 (1865)..... 4:56¼
Three miles—Prince, ch. g. (1857)..... 7:53½
Five miles—Fillmore, ch. g. (1863)..... 13:16
Ten miles—Julia Aldrich, ch. m. (1858)..... 29:04½
Twenty miles—Controller, b. g. (1878)..... 58:57
Fastest two heats—John A. McKerron, b. h., 5 (1900) 2:10, 2:11
Fastest three heats—Hopeful, gr. g., 12 (1878).. .....2:16½, 2:17, 2:17
Fastest four heats, wagon—Lord Derby, b. g. (1902) (Anzella won first heat)..... .....2:06¾, 2:06¾, 2:08¾, 2:09

TROTTING—UNDER SADDLE.

One mile—Great Eastern, b. g., 8 (1877)..... 2:15¾
Two miles—Geo. M. Patchen, b. h., 14 (1863).. 4:56
Three miles—Dutchman, b. g., 11 (1839)..... 7:32½
Four miles—Dutchman, b. g., 8 (1836).....10:51

TROTTING—WITH RUNNING MATE.

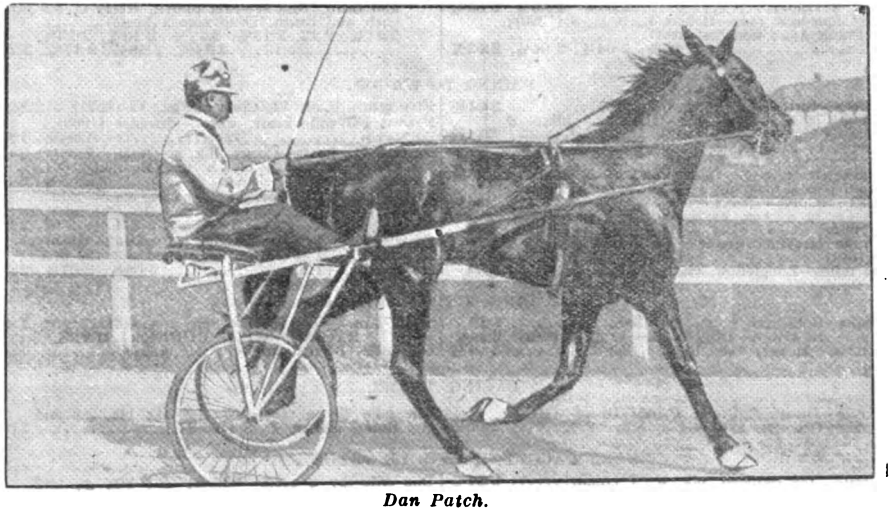
One mile (against time)—Ayres P., ch. g., 6 (1903) 2:03½
One mile (in a race)—Frank, b. g., 7 (1883).... 2:08½

TROTTING—TEAMS.

One mile—Belle Hamlin, br. m., 13, and Honest George, b. g., 7 (1892)..... 2:12¼
York Boy and Bemay (Bk'ln, Oct. 25, 1902).. 2:12¼
One mile (in a race)—Rosecleaf, blk. f., 4, and Sallie Simmons, b. f., 4 (1894)..... 2:15¼

TEAMS—TANDEM.

One mile—Mambrino Sparkle, ch. m., 8, and William H., b. g., 11 (1886)..... 2:32



Dan Patch.

TEAMS—THREE ABREAST.

One mile—Belle Hamlin, br. m., 12; Globe, br. g., 10, and Justina, b. m., 12 (18..)..... 2:14

TEAMS—FOUR-IN-HAND.

One mile—Damiana, ch. m., 9; Bellnut, ch. g., 8; Maud V., ch. m., 9, and Nutspra, ch. f., 4..... 2:30

TROTTING—HALF-MILE TRACK.

One mile—Cresceus, ch. h., 7 (1901)..... 2:09¼
One mile, by a mare—Bush, blk., 11 (1897)..... 2:11¾
One mile, by a gelding—Dandy Jim, gr., 12 (1897) 2:10½
One mile, in a race—Dandy Jim, gr. g., 12 (1897) 2:10¼
One mile—York Boy Bemay (Brooklyn, Oct. 25, 1902) 2:12½
Three heats, in a race—Pat L., b. c., 4 (1896).. .....2:12¾, 2:10½, 2:11¾
One mile (to wagon)—Cresceus, ch. h., 7 (1901). 2:12
One mile, by a team—Lynn Bourbon, br. m., 6, and Bertie Girl, b. m., 8 (1897)..... 2:16¾

PACING.

One mile—Star Pointer, b. h., 8 (1897)..... 1:59¼
Dan Patch, blk. s. (1902)..... 1:59¾
One and one-eighth miles—Carl Wilkes (1902).... 2:20
Two miles—Chehalis, blk. h., 7 (1897); (first mile 2:09, second mile 2:10¼)..... 4:19¼
Three miles—Joe Jefferson, b. h., 12 (1891)..... 7:33¼
Four miles—Joe Jefferson, b. h., 12 (1891)..... 10:10
Five miles—Lady St. Clair, b. m., 12 (1874)....12:54¾
Fastest stallion—Star Pointer, b., 8 (1897)..... 1:59¼
Fastest gelding—Prince Alert, b., 9 (1902)..... 2:00
Fastest mares—Lady of the Manor, ch., 5 (1899); Mazette, b., 6 (1901)..... 2:04½
Fastest yearling, filly—Belle Acton, b. (1892)... 2:20¾
Fastest yearling, colt—Rosedale, b. (1893)..... 2:22
Fastest yearling, gelding—Rollo, gr. (1891)..... 2:28½
Fastest two-year-old, colt—Directly, blk. (1894).. 2:07¾
Fastest two-year-old, filly—Extasy, b. (1898).... 2:10½
Fastest three-year-old, colt—Klatawah, b. (1898) 2:05½
Fastest three-year-old, filly—Little Squaw, blk. (1899) 2:09¼
Fastest three-year-old, geldings — Agitato, b. (1896); King of Diamonds, b. (1896)..... 2:09¼
Fastest four-year-old, colt—Online, b. (1894)... 2:04
Fastest four-year-old, filly—The Maid, b. (1899). 2:05¾
Fastest four-year-old, gelding—W Wood, b. (1892) 2:07
Fastest five-year-old, gelding—Coney, bl. (1900).. 2:02¾
Fastest five-year-old, stallion — Searchlight, br. (1899) 2:03¼
Fastest five-year-old, mare—Lady of the Manor, ch. (1899)..... 2:04¼
Fastest green performer—Direct Hal..... 2:04½
Fastest green gelding—Flying Jib, b., 8 (1892).. 2:05¾

Clarence H. Mackay.

RACQUETS AND COURT TENNIS.

There was a marked increase in the interest centered during the season of 1901-02 in racquets and court tennis, and it was a welcome sign of the increasing popularity of these two kindred branches of the original "sport of kings." It has been a long struggle for those who are most devoted to racquets and court tennis to introduce their favorite games in America, but while they can never hope to make them popular with the great body of American sportsmen, because of the expense and difficulties attached to playing them, the growth of interest has been steady and sure among a certain class of wealthy American sportsmen. New York, Boston, Philadelphia, Chicago, Montreal and several other American cities, besides Newport, Tuxedo and other fashionable resorts, have all courts built for the games, and still others have been projected.

Clarence H. Mackay, of New York, won the amateur championship at racquets last year, and Joshua Crane, Jr., of Boston, won the championship at court tennis. Both are home-bred American players, and their successes have been a welcome change to the dominating superiority of E. H. Miles, Jr., the English champion, who swept the board here in America two or three years ago, while he was here. The Americans unquestionably learned more of the fine points of the game from him than from any of the professional coaches, but in his absence there has been more enthusiasm shown in the championship tournaments than when he was here.

The annual tournament for the racquet championship was held at the Boston Athletic Association in February, and seven players entered for the title, three from Boston, two from New York, one from Philadelphia and one from Montreal. The final round brought Mr. Mackay against Quincey A. Shaw, Jr., of Boston, who won the championship the year before, and Mr. Mackay won the title again, beating his Boston rival by three games to one. The score: 2—15, 15—12, 15—7, 15—11.

The doubles for the racquet championship were held at the Philadelphia Racquet Club early in March and attracted an entry of seven teams, representing Philadelphia, New York and Boston. In the semi-final round George Brooke and Henry David, of Philadelphia, beat C. H. Mackay, the singles champion, and Lawrence Waterbury, of New York, while Newbold Etting and George McFadden, of Philadelphia, beat C. G. Winslow and H. S. Russell, of Boston. The finals brought the two crack Philadelphia teams together, and Brooke and David won by 15—6, 15—0, 15—6, 15—8.

There were eight entries for the American Court Tennis Championship Tournament, held at the New York Racquet and Tennis Club early in April. Joshua Crane, Jr., of Boston, the previous holder of the championship, returned from a trip to London, where he met the best of the English amateurs at his favorite game, in time to defend his title; while C. E. Sands, an old American player, who has been residing in Paris for some time and who held the French championship at the game; O. S. Campbell, of New York, former champion at lawn tennis, and L. M. Stockton, of Boston, another former champion at court tennis, were also among the entries. The finals brought Stockton and Crane, the two Bostonians, together, and a battle royal resulted, the victory ultimately perching on the banners of Mr. Crane by 6—2, 3—6, 6—2 6—3.

F. F. Rolland won the amateur championship of Canada at racquets March 15 in the Montreal Racquet Club court.

The professional championship of the world at court tennis was won by Peter Latham, of the Queen's Club, in a tournament for this title held in London, in April. Latham has held the championship for several years without defeat.

A team of Boston racquet players met the Philadelphians in an inter-city match at Philadelphia in January and were beaten in both of the two days' play.

The Philadelphia and New York racquet players arranged a home-and-home series of racquet matches in doubles, which were played late in January and early in February. The Philadelphia players won the first series of matches in their own court on January 25, and the New Yorkers won at home on February 1, while the decisive series, played in Philadelphia February 8, resulted in a final victory for the Philadelphia players. This was the first time in three years that the Philadelphians had beaten the New York players in these annual inter-city matches.

TRAP SHOOTING, 1902.

By DUNCAN CURRY.

The season of 1902 will go down into trap shooting history as a memorable one in the annals of the sport, and what is more to the point, the past season, thanks to the efforts of the American, will probably mark the end of live bird shooting in America. While New York and the Legislatures of one or two other States have passed bills prohibiting pigeon shooting for fun, it is not illegal to kill live birds in many of the Eastern and Western States. So that the decision of the Interstate Association, composed of all the prominent manufacturing and sporting goods houses, not to hold or promote another Grand American Handicap (which was by long odds the biggest live bird event of the year) has been brought about not through restrictive legislation, but through a healtay public sentiment aroused by the American.

While many small live bird shoots will be held in various parts of the country, the action of the Interstate Association marks the beginning of the end, and inside of two years "blue rocks," or inanimate targets, will take the place of pigeons. The feature of last season was the Grand American Handicap, promoted by the Interstate Association. Owing to the American's efforts the New York Legislature passed a bill prohibiting pigeon shooting in this State, and as a result the association was compelled to transfer the contest from Interstate Park, Queens, L. I., to Kansas City, Mo.

The contest was a record breaker in many ways, as there were no less than 493 entries and 456 actual contestants, or nearly 250 more than ever took part in the event before.

After a long drawn out contest no less than thirty-three men were tied with clean scores at the end of the twenty-fifth round. On the shoot-off H. C. Hirschy, of St. Paul, Minn, a 29-yard man, established a new record by killing 78 birds without a miss and won first prize and a handsome silver trophy. C. G. Spencer, another 29-yard man, hailing from St. Louis, Mo., was second, with a score of 77, and R. O. Heikes, from Dayton, Ohio, who shot from the 30-yard mark, was third, with a score of 55. The conditions and scores of sixty-three prize winners follow:

Grand American Handicap.—Twenty-five birds, $25 entrance (birds extra), high guns, not class shooting, handicaps 25 to 33 yards, $1,500 guaranteed by the Interstate Association, and all surplus added; sterling silver trophy and $600 to first high gun, $500 to second high gun, and $400 to third high gun; all money in the purse in excess of the $1,500 will be divided in accordance with the number of entries received.

The Pittsburg Baseball Club.

BASEBALL, 1902.

By SAM CRANE.

When it is taken into consideration that there was strife between the two foremost baseball organizations of the country last year, the National and American Leagues, the success attending the game throughout the country during the season of 1902 was little short of phenomenal.

In the face of warfare that was a constant battle from start to finish of the season, the attendance at the games was fully up to the standard established in times of peace. In fact, the war in certain sections of the country appeared to popularize the sport rather than to have a depressing effect. There was no effort made by the warring factions to arrange the schedules so as to have non-conflicting dates, and there were times when conflicting games were arranged purposely and with the avowed object of fighting it out on parallel lines. Under these unfortunate circumstances it was impossible for every club to make money. Many of them did, however. In the cities of Boston, Philadelphia, Chicago and St. Louis, where there were rival clubs, the American League teams proved to be the most popular, and drew the biggest crowds. Especially was this so in Philadelphia and Boston. In Chicago and St. Louis, however, things were more equal, and there is still a question as to which League had the "call" in the two big Western cities.

In Philadelphia there were many circumstances that worked favorably for the American League. Sentiment for the name "Athletic" was one thing, and the unpopularity of the management of the Philadelphia National League club was another. But the prime factor in the Athletics' success was the closeness of the American League race, and the self-winning fact that the team won the championship after a battle during which the interest in the contest was kept up to almost the last day of the race.

The Philadelphia club, on the other hand, never had a "look-in" for the National League pennant all the season, and the supineness of that club's management in failing to secure the services of that great player, Napoleon Lajoie, when it had the chance, completely "soured" Quaker City "fans" toward the National League club. Consequently, the Athletics simply walked away with everything, including money and popularity.

In Boston things were somewhat similar to the Philadelphia situation. The Boston American League team was nearly always up near the top, had better grounds and more popular management than the conservative old triumvirs who controlled the destinies of National League baseball in the Hub on lines of a decade ago.

In cities, however, where there were no rival clubs, the National League did far better than the American League. In New York, where the local team trailed along near the bottom all the season and finished disgracefully in last place, the game was never more popular. Whenever the "Giants" took a brace, which they did occasionally, crowds would turn out at the Polo Grounds in the best average attendance in the history of the game in Manhattan. In Pittsburg, too, the "Pirates" met with phenomenal financial success, notwithstanding the fact that they had a walkover for the pennant and had the "cinch" from the very start. The Cincinnati and Brooklyn clubs also had a balance on the right side of the ledger, while Chicago and St. Louis surely held their own. Of the American League clubs, those of Detroit, Cleveland, Washington and Baltimore did not do over well, Baltimore being a dragnet.

Owing to the inroads made in the ranks of National League players by the American League, as a direct result of the warfare between the two organizations, the parent body was left in a sad state. At the start of the season there was but a single team that could, by thhe widest stretch of imagination, be named as up to National League class. The Pittsburg team had been left intact by the American League raiders, but every other team had been drained almost to the dregs. The Philadelphia and St. Louis clubs were especially hard hit. The shrewd American Leaguers accomplished exactly the object they intended, for the National League race was a runaway from start to finish, the "Pirates" being the only team in sight. The winners not only beat out their nearest rivals, the Brooklyns, by 28 games, but also made a record in games won of 103, beating Boston's previous best record of 102 games in 1898 by one victory. The Pittsburgs' percentage over Brooklyn was .198, which is the highest any winner of a pennant ever got over the second team.

Beaumont.

But there was one good result gained by the American League raid—in that it was the means of developing many young players who otherwise would never have had the opportunity to get into major league clubs. Numbers of the ambitious youngsters showed themselves as being fully capable of holding their own with the old-timers, and, in fact, several developed into stars of the first magnitude. This infusion of young blood was needed, and will result in the dropping by the wayside of many blase old leaguers who have been in the business so long that the semi-monthly walk of their club's "ghost" is more of a pleasure to them than the winning of games. And so the players possibly have builded better than they thought by their bullfrog tactics.

Never in the history of baseball was there such high salaries paid to players as during the season of 1902. The competition for players' services, as a result of the war afforded the players the opportunity to accumulate yearly stipends that make a bank president's salary look like stage money. As an instance of the princely sums necessary to be offered to tempt the "downtrodden" ballplayers, a certain star was offered by the New York club in the Fall of 1902, $10,000 in cash and a contract for $25,000 additional for two years' service, making the player's salary $35,000 for two years' "pleasurable excitement," for that is all professional baseball is with a winning club, as was once remarked by one of the crack players to the writer. Contract jumping has been one of the worst features developed by the war, and unless some means are adopted to stop it, the game will suffer untold disaster from it. There was a time when a ballplayer's word was as good as his bond, but now the repudiating of written contracts is of almost daily occurrence. Such dishonest actions cannot help but prejudice the baseball public against the offenders, and, as a consequence, react upon the game as an honest sport. This war cannot last always, and when the reckoning comes there will be a sad awakening for certain grasping players who have forfeited their manhood for a few paltry dollars. Ballplayers are entitled to all they can get, and no one can blame them for taking advantage of the present opportunity, but they should be upright and honest in their negotiations and subsequent actions. Any ballplayer who "jumps" his contract should be forever barred from the game. It is just as dishonest a transaction as selling a game.

The National League played under the foul strike rule, while the American League batters were not handicapped by it. Consequently there were 32 players in the latter organizations who finished in the select .300 class, while but 21 of the National League sluggers were inside the .300 fold. This is considered a fit argument for the abolishment of the rule.

For the first time in the history of the National League, the season of 1902 saw it without a president. The duties of that office were performed by an Executive Committee of three, of which Mr. John T. Brush was chairman, and upon whom the entire management of the League devolved. The change proved a success, as the good fight put up against the American League demonstrates. The season closed with the war still being waged with vigor by both sides, and the outlook for peace at the close of the playing season was decidedly gloomy and uncertain. The warlike situation was intensified by the raiding of players by both warring factions. Both leagues made claims during the Fall and Winter to every one of the crack players in the country, and so clouded was the situation at the close of the year that the actual make-up of any team in either league was a matter of speculation or guesswork.

The prospects for 1903 are that the fight will be carried to the bitter end, especially so as the American League is carrying out its theory of expansion by the invasion of New York City and other National League strongholds heretofore left untouched.

A noticeable feature of the season of 1902 was the success that attended the first year's existence of the National Association of Professional Baseball Leaguers, under the leadership of President P. T. Powers. The organization is composed of all of the most prominent minor leagues in the country, and was formed for mutual protection against possible inroads in the ranks of its players by the major leagues. The National League saw fit to abolish the national agreement, under which the minor leagues were afforded player protection, and the success attained as a result of the new organization has been such that the association will be continued indefinitely.

The following table shows not only the records of the first and second clubs, but also the tail-enders in every National League race from 1876 to 1902. It is valuable from the fact that it shows the immensely stronger team the Pittsburg team of this year was over its nearest rival, the Brooklyns, and also the leading team's percentage each year over the last team. It shows conclusively the detrimental effects resulting from war. In 1890, the year of the Players' League, when the so-called "Brotherhood" was in existence, the Brooklyns finished 499 points ahead of Pittsburgs, winning 63 more games than the "J. Palmer O'Neill's misfits," the tail-enders of that most disastrous season. During that year an even more disastrous war was on than distinguished the season of 1902. This year was little better, for the difference between the leading Pittsburgs and the tail-end New Yorks was 388 points, a sad commentary on the evil results of friction.

Harry O'Hagan, manager of the Rochester Club, of the Eastern League, made an unassisted triple play during a game with Jersey City last Summer. O'Hagan was playing first base, Mack was on first and Shoch on second. A short infield fly was knocked, and O'Hagan ran for it, making what seemed to be an impossible catch, retiring the batter. He ran to first, Mack having started for second, and touched the bag, retiring his second man. Shoch had run to third, but started back to second. O'Hagan, after touching first, made his way to second and reached it in time to retire Shoch. The only other unassisted triple play on record was made by Paul Hines during a National League game at Providence, R. I., in 1878. One man was on first and one on second base. A high fly was knocked to short centre field. Hines, by a hard run, got under the ball. Without stopping, he ran to second base and stood upon it. The man who ran over the base was out. Hines touched

Manager McGraw.

Digitized by Google

the other man as he came to second base, making the third out. This record has been contested, but Charles E. Lincoln, of the Boston Herald, then official scorer for the National League, asserts that it is correct.

HOW PENNANTS WERE WON.

Since 1876 the Boston club has
cago, 6; Baltimore, 3; Brooklyn, 3;
lence, 2, and Detroit, 1.

It was in 1876 that the first year "Al" Spalding, "Ross" Barnes, original "big four," were induced $2,800 to desert the Boston club and infusion of "stars," won the cham the biggest deal ever made in base sensation. In 1880 Chicago won those famous pitchers, "Larry" Cor gether with a team that included Burns, Gore and others. This great seasons and won the pennant almost came disintegrated, and Boston be superseded by Providence the Charley Radbourn were the Provi under the able leadership of Anson, ond "big four" deal was consum Manager Watkins, of the Detroit this purchase Detroit secured the die" Richardson, "Jack" Rowe and ured in the first "big four" trans second deal was also a success, as in 1886 and won the championship to the front with "Jim" Mutrie as "Buck" Ewing, John Ward, "Tim" nor, Jim O'Rourke, and others, held

This brought the situation up to most of the best players in the League. Brooklyn won the National League pennant that season.

The sec- mated in the Fall of 1885, when club, bought out the Buffalos. By services of "Dan" Brouthers, "Har- "Jim" White, the latter having fig- action ten years previously. This the Detroits finished a close second in 1887. Then New York jumped manager, and with such players as Keefe, "Micky" Welch, Roger Con- the championship for two years. the Brotherhood fiasco in 1890, when country deserted to the Players'

Then Boston took another hold, and won three years in succession, under the leadership of Frank Selee. For three years after that series of victories, "Ned" Hanlon, with his "Orioles," of Baltimore, held the centre of the baseball stage and completely revolutionized the style of playing the game. Team work became a distinguishing feature and has been so ever since.

The following table gives the pennant winners from 1876 to 1902, inclusive:

Year.	Champions.	Won.	Lost.	P. C.	Year.	Champions.	Won.	Lost.	P. C.
1876	Chicago	52	14	.788	1890	Brooklyn	86	43	.667
1877	Boston	31	17	.648	1891	Boston	87	51	.630
1878	Boston	41	19	.707	1892	Boston	102	48	.680
1879	Providence	55	23	.705	1893	Boston	86	44	.662
1880	Chicago	67	17	.798	1894	Baltimore	89	39	.695
1881	Chicago	55	28	.667	1895	Baltimore	87	43	.669
1882	Chicago	55	29	.655	1896	Baltimore	90	39	.698
1883	Boston	63	35	.643	1897	Boston	93	39	.705
1884	Providence	84	28	.750	1898	Boston	102	47	.685
1885	Chicago	87	25	.770	1899	Brooklyn	101	47	.682
1886	Chicago	90	34	.725	1900	Brooklyn	82	54	.603
1887	Detroit	79	45	.637	1901	Pittsburg	90	49	.647
1888	New York	84	47	.641	1902	Pittsburg	103	36	.741
1889	New York	83	43	.659					

TAIL-ENDERS OF THE LEAGUE.

The following table shows the clubs occupying second place and those that were the tail-enders from 1876 to 1902:

	W.	L.	P.C.
1876.			
2—Hartford..	47	21	.691
8—Cincinnati.	9	56	.135
1877.			
2—Louisville..	28	20	.583
6—Cincinnati.	15	42	.263
1878.			
2—Cincinnati.	37	23	.617
6—Milwaukee.	15	45	.250
1879.			
2—Boston....	49	29	.628
8—Syracuse..	15	27	.357
1880.			
2—Providence	52	32	.619
8—Cincinnati.	21	59	.263
1881.			
2—Providence	47	37	.559
8—Worcester.	32	50	.390
1882.			
2—Providence	52	32	.619

Spokane	46	75	.380

NEW YORK STATE LEAGUE STANDING.

The season of the New York League was an interesting one, the special feature being the contest between Albany and Binghamton, which finished only .0008 apart, as close a fight as was ever known in base ball.

Clubs.	Won.	Lost.	P. C.
Albany	73	42	.6347
Binghamton	71	41	.6339
Ilion	59	47	.556
Syracuse	61	55	.526
Schenectady	56	56	.500
Utica	49	63	.437
Troy	40	63	.388
Johnstown-Gloversville	29	71	.290

EASTERN LEAGUE STANDING.

The Eastern League enjoyed a very successful season. The Toronto club won the championship after a sensational race with its nearest rival, the Buffalo club.

The following table gives the standing of the clubs and the victories won from each club:

Clubs.	Won.	Lost.	P. C.
Toronto	85	42	.669
Buffalo	88	46	.657
Jersey City	72	65	.526
Worcester	69	64	.519
Providence	67	68	.496
Montreal	59	77	.434
Rochester	57	76	.429
Newark	40	99	.288

LAWN TENNIS SEASON OF 1902.

By J. PARMLY PARET.

The lawn tennis season of 1902 furnished the most satisfactory and complete international victory in the sport that has ever been recorded. Great Britain sent her best players—admittedly her best—and they were decisively beaten on American courts—not in one tournament, but in three.

There was only one drawback to the brilliant season that the American players enjoyed, and that was the defeat of our leading teams in doubles by the Doherty brothers, which gave them the unquestionable championship of the world at this style of game.

The third challenge for the Davis international trophy brought to America at the end of July by far the strongest team of British experts that has ever visited this country. The challenging team was made up of Reginald F. Doherty, H. Laurie Doherty and Dr. Joshua Pim. They were accompanied by W. H. Collins, president of the English Lawn Tennis Association, who acted as team captain, although not a player.

President Collins and the two Dohertys arrived ten days before the date set for the international matches, and they went on to Boston for "tuning-up" practice in the Longwood tournament. One of the events in this meeting was for the Eastern Championship in doubles, and the Doherty brothers entered this and won the title, after a close match in the finals against the Wrenn brothers, their victory giving them the right to play at Newport in the championship finals. In this final match, the American pair won the first set and came within a single stroke of taking the second, only to finally lose the match in four sets (4—6, 7—5, 6—2, 6—2).

The Dohertys also entered at Longwood in the singles and the older brother here beat Beals C. Wright, one of the strongest of the American experts, in three straight sets. H. L., the younger, beat one or two of the second-rate Americans entered and then defaulted, while his brother defaulted after his match against Richard Stevens had been interrupted by rain. The debut of the visitors gave the Bostonians a bad case of "cold feet" in regard to our international chances, but the defeat of Wright, the only strong player whom the visitors had beaten, did not convince New Yorkers that the Englishmen were so sure to win the Davis cup.

W. A. Larned.

H. L. Doherty.

R. F. Doherty.

M. D. Whitman.

Dr. Pim arrived the following Saturday, August 2, and all three visitors spent the three days immediately preceding the international matches at hard practice on the courts of the Crescent Athletic Club, Bay Ridge, Brooklyn, where the cup matches were scheduled to take place.

As the challengers had named only three players as their representatives, the rules allowed them up to within twenty-four hours to nominate which men they would use in singles and which in doubles. The day before the matches began Captain Collins named R. F. Doherty and Pim for the singles, and the Doherty brothers for the doubles. Curiously enough, H. L. Doherty, the third member of the team, held both the English and Irish championships, although he beat neither his brother nor Pim to win these titles.

The American authorities had already named W. A. Larned and M. D. Whitman for the singles, and D. F. Davis and Holcombe Ward for the doubles. As four men were named, no substitution was allowed in the American team, which had to be nominated three weeks before, under the conditions.

The opening matches were played Wednesday, August 6, when R. F. Doherty met Larned and Whitman played Pim. The attendance was the largest that had ever attended a lawn tennis match in this country, and the accommodations and management of the Crescent A. C. committee were highly praised. No admission was charged to see the matches, entrance to the grounds being by invitation only.

The first day's play was interrupted by a hard thunder shower during the middle of the afternoon, which put a stop to the play. When the rain came, the Americans were making mincemeat of their British antagonists. Whitman had just completed his second set (6—1, 6—1), when the interruption came, and Larned and Doherty finished their second set in the rain, the American winning easily (6—2, 6—3).

It was agreed to resume these two matches where they were stopped, the following morning, and to continue the original schedule in the afternoon. Pim pulled out the third set from Whitman (6—1), but the American, thoroughly aroused, ran away with the deciding fourth set (6—0), scoring the first victory for the home team. In the meantime, however, Larned was slowly losing the big advantage he had won the day before. With much improved play, Doherty steadily pulled out three straight sets from the American, and took the other match of the first round (2—6, 3—6, 6—3, 6—4, 6—4).

The afternoon brought Larned against Pim and Whitman against R. F. Doherty. The American champion was in rare form, and Pim never had a chance against him, being beaten in three straight sets (6—3, 6—2, 6—3). This left the score two matches to one in favor of the American team, and Whitman had a chance to clinch the victory by defeating Doherty. This he did by the cleverest kind of play. He beat the brilliant Englishman in three straight sets, the last two of which were both close (6—1, 7—5, 6—4), and the international championship for the year was won for America, amidst the greatest enthusiasm of the big crowd.

A detailed summary of the results in the singles follows:

Analysis of the Singles.

Players.	Matches. W.	L.	Sets. W.	L.	Games. W.	L.	Points. W.	L.
M. D. Whitman	2	0	6	1	38	18	211	166
W. A. Larned	1	1	5	3	41	31	252	236
R. F. Doherty	1	1	3	5	33	42	249	254
Dr. J. Pim	0	2	1	6	16	37	153	209
Totals	4	4	15	15	128	128	865	865

Team Record.	Matches. W	L.	Sets. W	L.	Games. W.	L.	Points. W.	L.
American team	3	1	11	4	79	49	463	402
British team	1	3	4	11	49	79	402	463
Totals	4	4	15	15	128	128	865	865

The doubles match was played as scheduled, although it could not have any bearing on the result of the series, since the Americans had already won. For this last day's play the crowd was much larger than either of the preceding days, and the enormous capacity of the grandstands was taxed to its utmost. The Doherty brothers met Davis and Ward, the American champions, and beat them after a brilliant match that showed the Americans to advantage at first, but which finally wore down their brilliance and permitted the untiring steadiness and consistent play of the British experts to pull out a clean-cut victory. The detailed score follows:

FIRST SET.		SECOND SET.	
Doherty Bros.	2 3 3 4 2 4 4 4 2—28—3	Doherty Bros.	4 0 1 1 4 4 4 1 5 0 4 5 4 4 5 2 4 4—56—10
Ward and Davis	4 5 5 1 4 0 6 2 4—31—6	Ward and D...	1 4 4 4 0 1 1 4 3 4 1 7 0 6 3 4 1 1—49— 8

THIRD SET.		FOURTH SET.	
Doherty Bros.	4 2 4 1 4 4 4 4 4—31—6	Doherty Bros.	2 5 6 4 1 5 1 5 5 4—38—6
Ward and Davis	0 4 2 4 0 1 1 6 2—20—3	Ward and Davis	4 3 4 0 4 3 4 7 3 1—33—4

The following week the three visitors played at Southampton, but both of the Dohertys defaulted in the semi-final round, and Pim was beaten in the finals by Larned again, if anything, easier than at Bay Ridge. The Doherty brothers easily won the doubles.

The American championship tournament at Newport followed the week after Southampton, and the meeting attracted the largest list of competitors ever turned out for a Newport tournament. No fewer than eighty-three players entered for the championship, including many champions and ex-champions of England, Ireland and America—unquestionably the strongest entry ever received for any tournament in the world.

The luck of the draw brought all three of the Britishers on the same side, and ex-Champion Whitman on the other side. Whitman had little difficulty in reaching the finals, but Pim was beaten in straight sets (7—5, 7—5, 6—3) by L. E. Ware, of Boston, who succumbed immediately after to H. L. Doherty. The two visiting brothers came together in the semi-final round, and the younger defaulted to R. F., who went into the finals against Whitman, the same American who had already beaten him at Bay Ridge.

In this final match Whitman showed the most surprising reversal of form he has shown in five years, while Doherty's play improved fully half-fifteen over his skill shown in the internationals. The result was a decisive victory for the Englishman, who lost only the second set (6—1, 3—6, 6—4, 6—0).

The challenge match between R. F. Doherty and the former American champion, W. A. Larned, proved to be almost as surprising as the Doherty-Whitman final. The extreme heat hurt the visitor's chances, and he suffered a good deal from that and the fatigue due to his match of the day before. Larned, fresh from the most careful training, played an almost faultless match and scored a well-earned victory over his formidable challenger (4—6, 6—2, 6—4, 8—6), and so upheld the American championship for the Americans. The title in singles has never yet been won by a foreigner, although many determined efforts have been made by strong British players to win it.

In the doubles, the Americans did not fare so well, and for the first time in the history of the game on this side of the ocean, the championship was captured by foreign experts. The Doherty brothers (winners of the Eastern championship) played Kriegh Collins and L. H. Waldner, of Chicago (winners of the Western championship), in the final round, and beat them after a hard struggle (2—6, 6—3, 4—6, 6—3, 6—3), and then met D. F. Davis and Holcombe Ward, the American holders of the title, whom they had already beaten in the international matches at Bay Ridge, and won again in the challenge round (11—9, 12—10, 6—4), and so captured the American championship.

In doubles the Doherty brothers certainly showed better tennis, of the match-winning kind, than any of our teams, although some of the American methods are noticeably better and our leading American pairs have probably greater possibilities in their play than the visitors when they learn to cultivate some of the steadiness and the energy-saving ability of the foreigners.

In singles, Pim was clearly outclassed, although rated abroad as strong as the Dohertys and supposedly even with any other player in the world, amateur or professional. American cities saw too little of H. L. Doherty's play in singles to get any clear line on his comparative skill, but his brother proved himself to be practically even with the two American leaders. He beat Whitman at Newport and lost to him at Bay Ridge, and lost to Larned at Newport and beat him at Bay Ridge.

The international matches of 1902 were the second series for the Davis International trophy, although the challenge was the third. In 1900, the year the cup was first offered, an English team was beaten by 3 matches to 0 and 10 sets to 1. In 1901 the English Lawn Tennis Association challenged for the cup, but failed, at the last minute, to send a team. The cup is recognized on both sides of the Atlantic as emblematic of the world's international championship, so America has now been the champion nation for three years.

The championship tournament at Newport was the twenty-second for American supremacy. The record to date stands as follows:

AMERICAN CHAMPIONS AT LAWN TENNIS.

Champions in singles.	Winners of all-comers'	Champions in doubles.
1881.....R. D. Sears.	1881.....R. D. Sears.	1881.....C. M. Clark and F. W. Taylor.

NATIONAL INDOOR CHAMPIONS.

	Singles.	Doubles.
1900	John A. Allen	J. Parmly Paret and Calhoun Cragin.
1901	Holcombe Ward	O. M. Boatwick and Calhoun Cragin.
1902	J. Parmly Paret	Wylie C. Grant and Robert LeRoy.

WOMEN'S NATIONAL CHAMPIONSHIPS.

	Singles.	Doubles.	Mixed doubles.
1887	Miss Alice Hansell	There were no doubles before 1890.	There were no mixed doubles before 1892.
1888	Miss B. Townsend		
1889	Miss B. Townsend		
1890	Miss E. C. Roosevelt	Misses E. C. Roosevelt and G. W. Roosevelt	
1891	Miss Mabel E. Cahill	Miss M. E. Cahill and Mrs. W. F. Morgan.	
1892	Miss Mabel E. Cahill	Misses M. E. Cahill and A. M. McKinley	Clarence Hobart and Miss M. E. Cahill.
1893	Miss Aline M. Terry	Misses A. M. Terry and Hattie Butler	Clarence Hobart and Miss E. C. Roosevelt.
1894	Miss H. R. Hellwig	Misses H. R. Hellwig and J. P. Atkinson.	E. P. Fischer and Miss J. P. Atkinson.
1895	Miss J. P. Atkinson	Misses H. R. Hellwig and J. P. Atkinson.	E. P. Fischer and Miss J. P. Atkinson.
1896	Miss E. H. Moore	Misses E. H. Moore and J. P. Atkinson	E. P. Fischer and Miss J. P. Atkinson.
1897	Miss J. P. Atkinson	Misses J. P. Atkinson and K. G. Atkinson.	D. L. Magruder and Miss Laura Henson.
1898	Miss J. P. Atkinson	Misses J. P. Atkinson and K. G. Atkinson.	E. P. Fischer and Miss Carrie Neely.
1899	Miss M. R. Jones	Misses Myrtle McAteer and Jennie Craven	A. L. Hoskins and Miss Edith Rastall.
1900	Miss M. McAteer	Misses Jennie Parker and Hattie Champlin.	Alfred Codman and Miss M. Hunnewell.
1901	Miss E. H. Moore	Misses J. P. Atkinson and Myrtle McAteer.	R. D. Little and Miss Marion Jones.
1902	Miss M. R. Jones	Misses Marion Jones and J. P. Atkinson	W. C. Grant and Miss E. H. Moore.

OFFICIAL RANKING FOR SEASON OF 1902.

Singles.

Rank.	Players.	Handicap.
1	W. A. Larned	Owe 3-6 of 15.
2	M. D. Whitman	Owes 2-6 of 15.
3	B. C. Wright	
4	Holcombe Ward	Scratch.
5	W. J. Clothier	
6	L. E. Ware	
7	R. D. Little	
8	H. H. Hackett	Receive 2-6 of 15.
9	Clarence Hobart	
10	Kriegh Collins	
11	Richard Stevens	Receive 3-6 of 15.
12	R. P. Huntington	
13	S. C. Millett	
14	L. H. Waldner	Receive 4-6 of 15.
15	J. C. Davidson	
16	J. P. Paret	
17	H. F. Allen	
18	E. W. Leonard	
19	I. C. Wright	
20	L. E. Mahan	Receive 5-6 of 15.
21	R. G. Hunt	
22	R. C. Seaver	
23	A. S. Pier	
24	H. H. Whitman	
25	F. G. Anderson	
26	J. C. Neeley	Receive 15
27	R. Bishop	
28	E. R. Patterson	
29	W. C. Grant	
30	A. C. McMaster	
31	H. E. Avery	Receives 15 and 2-6.

Doubles.

Rank.	Players.	Handicap.
1	Wrenn brothers	Scratch.
2	Ward and Davis	
3	Collins and Waldner	
4	Whitman and Ware	
5	Little and Alexander	
6	Wright and Clothier	2-6 of 15.
7	Emerson and Diehl	
8	Wright brothers	
9	Ogden and Clothier	4-6 of 15.
10	Leonard and Clothier	

The committee omitted from the ranking in singles the following players for lack of data from which to judge of their skill: F. B. Alexander, Alfred Codman, D. F. Davis, Ernest Diehl, E. P. Fischer, J. D. Forbes, L. W. Glazebrook, W. P. Knapp, E. P. Larned, R. M. Miles, Jr., Montgomery Ogden and H. A. Plummer.

FIRST TEN PLAYERS OF AMERICA FOR THE LAST SIX YEARS.

10	W. S. Bond	G. K. Belden	R. P. Hunting'n, Jr.	R. D. Little	W. J. Clothier	Kriegh Collins.

WHIST.

The American Whist League is made up of 103 clubs having a membership of 6,540. These, however, are not all players, as the number includes the active membership of social, athletic and similar organizations, which include whist sections, but do not wholly consist of players of the game. The officers of the league for 1902 consisted of John Mitchell, President, Chicago, Ill.; T. A. Whelan, Vice-President, Baltimore, Md.; H. T. Fry, Recording Secretary, Chicago, Ill.; C. W. Vaill, Corresponding Secretary, 43 Decatur street, Brooklyn, N. Y.; F. C. Thwalt, Treasurer, Milwaukee, Wis., and a board of twelve directors. The object of the organization is the encouragement and promotion of the study and play of whist, and such other literary, educational and social purposes as are connected therewith or incident thereto.

The league holds an international tournament each Summer lasting a week. That in 1902 was held at the Oriental Hotel, Manhattan Beach, June 23-28. Over 400 players participated and sessions were held twice each day. The American League challenge trophy was won by a team from the Philadelphia Whist Club, the Brooklyn trophy by the New York State Whist Association; the Minneapolis trophy by the Cleveland Whist Club, and the Milwaukee trophy by the Knickerbocker Athletic Club of New York City. The Associate Members' trophy was won by Mr. and Mrs. Henry Newman, of Bergen Point.

The Summer tournament of 1903 will be held at Detroit, Mich., July 18-18.

GOLF, 1902.

By W. A. CURLEY.

American ingenuity finally asserted itself in 1902 in the ancient sport of golf, the one pastime of which it had been conceded that our British cousins had nothing to learn and we nothing to teach. But on this side was devised a new golf ball that has during the year practically revolutionized the game. The ball is constructed of a thread of white rubber tightly wound inside a skin of gutta percha. Its principal characteristic is its remarkable life. It enables a man to drive nearly twice as far as he would with the gutta percha sphere, and it rolls considerably more after it lands. It has neutralized the effect of bunkers on many links that were supposed to be difficult to clear, and on some courses the hazard that was formerly an impediment on the approach shot is negotiated by means of the lively ball on the drive. In the opinion of many experts it is of a greater benefit to the poorer class player, and narrows down the game to a question of putting.

The ball created quite a furore in England and Scotland and attained great popularity among the players there. Indeed, it was used by Hutchings and Herd, winners respectively of the amateur and open championships of Great Britain. The innovation was viewed with horror by the conservatives abroad, who endeavored to have the golf associations legislate against the American ball. But the majority of English players were advocates of it, and cried down its attempted suppression.

In America the lively ball is used by nearly every player of prominence.

The men's eighth annual Amateur National Championships, decided on the Glenview links, Chicago, revealed the strength of the younger element in this venerable game. It was won by Louis N. James, of Chicago, a lad still in his teens, who only by the greatest of luck was among those to qualify for match play. Another youthful player, E. M. Byers, of Chicago, proved the undoing of Walter J. Travis, twice holder of the title, and who the experts believed would win it again. In the medal round Travis divided the low score honors with G. A. Ormiston, of Pittsburg, each doing a 79, while James, who was destined to capture the title, tied with six others for 64th place with a score of 94, 15 strokes behind the leader. Had the rule in vogue in 1901 and previous years, that only 32 qualify for match play, prevailed, James would have been hopelessly out of it on the first day. Travis was beaten by the narrow margin of 1 up in the third round by Byers, who faced James in the final match for the title. He lost by 4 up and 2 to play.

That Travis's defeat may have been due to that element of luck which enters greatly into the game of golf was shown throughout the season, as he won a number of open tournaments in which some of the best experts of the country competed and easily took first honors in the Metropolitan Championships.

Of the sixteen open tournaments held during last season first prize in seven was won by Travis.

Travis also distinguished himself in the open championship, which was won by Jacob Auchterlonie. Travis tied for second place with Stewart Gardner, the first time an amateur ever achieved a place in this event. Another feature of the open championship of 1902 was the playing of John H. Shippen, who tied with Anderson, the 1901 champion, for fifth place. Shippen is an American-bred golfer and hitherto no man had ever been placed in the championship who had not learned the game in Scotland.

The women's National Golf Championship for 1902, decided at Brookline, Mass., was truly a national event, as among the contestants were players from Chicago and San Francisco. Thirty-two, instead of sixteen, as heretofore, qualified for match play.

Disagreeable, rainy weather marred the early days of the tournament from the spectators' viewpoint, but did not discourage the players, who bravely faced the elements as they trod the links in quest of championship laurels. In the medal round Miss Margaret Curtis, Essex County, and Mrs. L. A. Wells, Brookline, tied for low score honors, with 89, the best score ever made in the women's championship, and eight strokes better than the previous women's record for the course.

MEN'S NATIONAL AMATEUR CHAMPIONSHIP, GLENVIEW LINKS, CHICAGO, JULY 15-19, 1902.

FIRST ROUND.

(Score in qualifying round is given in parenthesis.)

W. J. Travis (79), Garden City, beat W. T. G. Bristol (89), Midlothian, 5 and 3; J. C. Davidson (86), Washington, beat H. Vose (91), Milwaukee, 4 and 2.

J. A. Holabird (87), Glenview, beat J. B. Mahon (92), Omaha, 2 and 1; E. M. Byers (84), Allegheny, beat Howard Griffin (90), East Orange, 3 and 2.

Digitized by Google

Stephen Bull (90), Racine, beat W. P. Smith (85), Philadelphia, 4 up; L. L. Harban, (88), Washington, beat S. T. Chase (93), Onwentsia, 4 and 2.

J. C. Daniels (92), Midlothian, beat W. Fairbanks (87), Denver, 1 up; H. C. Egan (82), Exmoor, beat W. R. Kirk (89), Onwentsia, 7 and 6.

Thayer McMillan (89), Detroit, beat Harold Weber (83), Toledo, 1 up; Percy Pyne, 2d (87), Princeton, beat J. O. Hinkley (92), Midlothian, 1 up.

F. R. Hamlin (86), Chicago, beat C. B. Fownes (91), Pittsburg, 3 and 2; G. H. Leslie (88), Skokie, beat O. C. Fuller (94), Milwaukee, 6 and 4.

D. P. Fredericks (84), Oil City, beat W. H. Bennett (90), Skokie, 4 and 3; A. G. Lockwood (88), Boston, beat E. J. Buchan (92), Racine, 6 and 4.

Max Behr (87), Morris County, beat B. F. Cummins (92), Exmoor, 2 up; A. Poole, Jr. (80), Onwentsia, beat C. Zeublin (89), Midlothian, 4 and 2.

P. H. Hoyt (82), Glenview, beat R. R. Kimball (89), Omaha, 4 and 3; M. Doran, Jr. (92), St. Paul, beat C. Beach (87), Cleveland, 3 and 2.

H. J. Tweedie (93), Belmont, beat F. O. Horstmann (88), Washington, 4 and 2; R. E. Hunter (85), Midlothian, beat W. S. Harban (90), Washington, 3 and 1.

L. H. Conklin (86), Princeton, beat W. C. Carnegie (91), Allegheny, 2 and 1; L. N. James (94), Glenview, beat Maturin Ballou (88), Apawamis, 6 and 5.

R. W. Keyes (87), Glenview, beat W. A. Stickney (92), St. Louis, 1 up; Ralph McKettrick (84), St. Louis, beat F. D. Frazier (90), Glenview, 6 and 5.

Allan Hibbard (83), Milwaukee, beat R. E. James (89), Glenview, 4 and 2; H. C. Smith (87), Onwentsia, beat H. C. Fownes (92), Highland, 6 and 4.

L. T. Boyd (88), Milwaukee, beat C. Counselman, Jr. (93), Midlothian, 2 and 1; F. O. Reinhart (86), Baltusrol, beat O. D. Thompson (91), Allegheny, 7 and 5.

W. E. Egan (84), Lake Geneva, beat A. C. Browne (90), Springfield, 5 and 3; N. F. Moore (88), Onwentsia, beat J. G. Thorpe (92), Oakley, 3 and 1.

G. T. Brokaw (91), Princeton, beat J. R. Maxwell (86), Des Moines, 1 up; G. A. Ormiston (79), Pittsburg, beat J. H. Cady (89), Rock Island, 2 up.

SECOND ROUND.

Travis beat Davidson, 7 and 6; Byers beat Holabird, 1 up; Harban beat Bull, 6 and 5.
H. C. Egan beat Daniels, 3 and 2; Pyne beat McMillan, 5 and 3; Leslie beat Hamlin, 3 and 2.
Fredericks beat Lockwood, 5 and 4; Poole beat Behr, 2 up; Hoyt beat Doran, 1 up.
Tweedie beat Hunter, 2 and 1; L. N. James beat Conklin, 1 up; McKettrick beat Keyes, 5 and 3.
Smith beat Hibbard, 5 and 4; Reinhart beat Boyd, 2 and 1; W. Egan beat Moore, 3 and 2; Armiston beat Brokaw, 2 up.

THIRD ROUND.

Byers beat Travis, 1 up; H. C. Egan beat Harban, 6 and 5; Leslie beat Pyne, 3 and 2.
Fredericks beat Poole, 3 and 2; Hoyt beat Tweedie, 5 and 3; L. N. James beat McKettrick, 6 and 5.
Reinhart beat Smith, 5 and 3; W. Egan beat Armiston, 2 up.

FOURTH ROUND.

Byers beat H. C. Egan, 3 and 2; Fredericks beat Leslie, 1 up.
L. N. James beat Hoyt, 3 and 2; Reinhart beat W. Egan, 1 up.

SEMI FINAL ROUND.

Byers beat Fredericks, 4 and 3; James beat Reinhart, 2 and 1.

FINAL ROUND.

L. N. James, Glenview, beat E. M. Byers, Allegheny, 4 and 2.

1896—H. J. Whigham, won at Shinnecock Hills G. C.
1897—H. J. Whigham, won at Chicago G. C.
1898—F. S. Douglas, won at Morris County C. C.
1899—H. M. Harriman, won at Onwentsia C. C.
1900—W. J. Travis, won at Meadowbrook C. C.
1901—W. J. Travis, won at Atlantic City G. C.

WOMEN'S NATIONAL GOLF CHAMPIONSHIP.

Brookline Country Club, Mass., October 1 to 4, 1902.
(Qualifying round score is given in parenthesis.)

FIRST ROUND.

Miss M. Curtis (89), Essex County, beat Miss A. Phipps (97), Springfield, 5 and 3; Miss P. Mackay (100), Oakley C. C., beat Miss E. Lockwood (96), Lexington, 3 and 2.
Miss M. Brownell (96), Agawam H. C., beat Miss E. Hurlbert (101), Morris County, 3 and 2; Mrs. W. M. Gorham (99), Huntingdon Valley, beat Mrs. E. A. Manice (93), Lenox, 5 and 4.
Miss B. Anthony (94), Glenview, beat Mrs. E. S. Porter (99), Oakley C. C., 1 up; Mrs. N. P. Rogers (97), Baltusrol, beat Miss Ruth Milne (102), Albany, 4 and 3.
Miss G. Hecker (95), Apawamis, beat Mrs. E. Sanford (100), Essex County, 3 and 2; Miss R. Underhill (90), Nassau C. C., beat Mrs. R. G. Brown (98), San Francisco, 1 up.
Miss L. A. Wells (89), Brookline, beat Miss E. Farrington (98), Vesper C. C., 6 and 4; Miss M. B. Adams (96), Wollaston, beat Miss C. G. Willis (100), Morris County, 6 and 4.
Miss M. W. Phelps (97), Brookline, beat Mrs. J. B. Kenney (100), Baltusrol, 5 and 3; Miss F. C. Osgood (93), Brookline, beat Miss M. K. Wetmore (99), Newport, 1 up.
Miss F. L. Vanderhoff (99), Ardsley, beat Miss J. A. Carpenter (95), Chicago, 2 up; Mrs. W. Shippen (97), Morris County, beat Mrs. J. F. Hubbard (103), Harbor Hill, 2 up.
Mrs. C. F. Fox (96), Huntingdon Valley, beat Miss M. Oliver (101), Albany, 2 and 1; Miss G. B. Bishop (99), Brooklawn C. C., beat Miss G. Fiske (99), Concord, 1 up.

SECOND ROUND.

Miss Curtis beat Miss Mackay, 5 and 1; Mrs. Gorham beat Miss Brownell, 2 up; Miss Anthony beat Mrs. Rogers, 4 and 3.
Miss Hecker beat Miss Underhill, 4 and 3; Miss Wells beat Miss Adams, 1 up; Miss Osgood beat Miss Phelps, 1 up.
Miss Vanderhoff beat Mrs. Shippen, 6 and 5; Mrs. Fox beat Miss Bishop, 2 up.

THIRD ROUND.

Mrs. Gorham beat Miss Curtis, 4 and 2; Miss Hecker beat Miss Anthony, 2 up.
Miss Wells beat Miss Osgood, 6 and 5; Mrs. Fox beat Miss Vanderhoff, 1 up.

SEMI FINAL ROUND.

Miss Wells beat Mrs. Fox, 2 up; Miss Hecker beat Mrs. Gorham, 4 and 2.

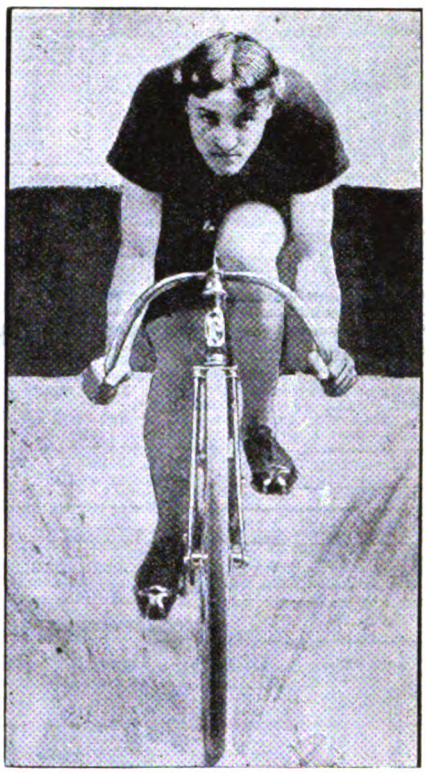
Harry Elkes.



Frank Kramer.

BICYCLE RECORDS.

By A. G. BATCHELDER, Chairman N. C. A.

In cycle competition during the season of 1902 the record list received a very complete revision, though there was little done with the against-time slate. Joe Nelson at Pittsburg travelled a mile in 1:18 3-5 erasing Major Taylor's wind-shield effort of several years ago, but otherwise the fast work behind the "devil machines" was accomplished in competition. Not only does the public consider that time in actual racing is more meritorious than when made against the watch, but the makers have lost interest in this former widespread form of advertising.

Nelson, the little Swede, excelled in rapid journeying up to twenty miles, when Champion secured credit for the next five miles, and then Elkes, one of the greatest pace-followers the world has ever seen, rounded out the hour. His 41 miles 250 yards at Charles River Park, a third-mile track with inadequate banking for the present rate of speed, is a more wonderful ride than the European times negotiated in the rear of the cumbersome wind-shield pacing artillery with double the protection allowed American riders.

The N. C. A. endeavored to bring about uniform pacing restrictions, but it was outvoted in the congress of the Union Cycliste Internationale, though the necessity of adopting the American ideas was admitted toward the end of the season, when in Paris an attempt was made to do away with wind-shields and otherwise limit the amount of protection. The greater the protection, the easier it is for a rider to follow, but the increase of horsepower resulted in miles entirely too fast for the banking of the tracks, and it was this contingency that caused the N. C. A. to decide upon only twelve inches in the rear of pacing machines. The performances of American riders are more praiseworthy than those of the Europeans, except those established in England, where the conditions are nearly similar to those in this country. Again at the Easter congress of the international body the N. C. A. will endeavor to have a general plan adopted for paced riding.

In unpaced competition there were few changes, the most notable of which was Frank Kramer's 54 4-5 seconds for a half mile, done in a handicap at Vailsburg. Woody Headspeth covered 26 miles 19 yards in the hour at Dayton, Ohio, and this ride by a newcomer was very creditable. Samuelson, the Salt Lake rider, who held the world's unpaced mile at 1:53 2-5, pedaled a half in 52 3-5.

The amateurs had a busy inning, and much happened both in competition and against the watch. Walter Smith lost the mile to Joe Nelson, then an amateur, early in the season, and later regained the honor with a ride in 1:25 3-5, and also continued and appropriated everything up to and including five miles, when Nelson's figures of a year ago entered the table. Sam Sulkins obtained the competition figures for five miles, and then Nelson's 1901 times held good for the next ten miles.

Hurley rode like a champion and attached many unpaced records to his list. With the exception of Linley's ten miles at New Haven, the N. Y. A. C. flyer dominated the competition revising. Hopper at Salt Lake City, where the air is favorable to fast riding, established new unpaced time records for the half at 0:53 2-5, and also tied Snow's old quarter of 0:25 at Providence in 1896.

NATIONAL PROFESSIONAL CHAMPIONSHIP.

Kramer again won the championship of the Grand Circuit by a convincing score, and then, to prove indisputably his right to the title, he defeated decisively Major Taylor, his only rival, in a match race. Of

Digitized by Google

Iver Lawson, much had been expected, but he had not thoroughly recovered from a typhoid illness of the previous Winter. The complete 1902 Grand Circuit score was as follows:

Name.	First	Second.	Third.	Fourth.	P'ts.	Name.	First.	Second.	Third.	Fourth.	P'ts.
1. Frank L. Kramer...	18	4	1	0	128	8. O. L. Stevens.....	0	0	2	1	8
2. Major Taylor.....	5	6	1	1	57	9. John Bedell.....	0	0	1	1	4

4. O. S. Kimble.....	0	4	3	4	28	11. Lester Wilson.....	0	0	1	1	3
5. G. H. Collett.....	0	2	6	3	28	12. E. C. Bald.....	0	0	1	0	2
6. W. S. Fenn.....	1	0	1	4	17	13. G. C. Schreiber.....	0	0	0	1	1
7. J. T. Fisher.....	0	1	3	1	12	14. J. P. Jacobson.....	0	0	0	1	1

Circuit champion, Frank L. Kramer. Quarter-mile champion, Frank L. Kramer. Half-mile champion, W. S. Fenn. One-third mile champion—dead heat between Frank L. Kramer and Major Taylor. One mile champion, Frank L. Kramer. Two-mile champion, Major Taylor. Five-mile champion, Frank L. Kramer.

Behind the motors no positive claim to the title was established, though the adherents of three riders figure out their choice is entitled to the crown. Harry Elkes, Bobby Walthour and Albert Champion excelled all others. Elkes made a poor finish, and Champion also started out better than he wound up. Walthour unquestionably led in the concluding struggles. But the champion was not satisfactory owing to pacing problems which were not adjusted in time to insure contests with few exceptions wherein conditions were such that all riders involved had an equal chance. Another season there will not be any difficulty of this sort, and there will also be a paced circuit on which the title will be decided beyond any question of doubt.

NATIONAL AMATEUR CHAMPIONSHIPS.

Though he had lorded it over all the other amateurs in nearly every open event in which he appeared, Marcus Hurley came within an ace of losing the championship medal through an attack of tonsilitis at the time of the series for the title. Three nights of racing, with six races, and point scoring, evolved the winner. These were the results:

Hartford, August 20—Quarter-mile—Billington 1, Diggs 2, Root 3. Hurley, absent. Time 0:30 1-5. Five mile—Root 1, Stauder 2, Schlee 3, Linley 4. Time 10:46.

Springfield, August 21—One-third mile—Hurley 1, Root 2, Billington 3, Glasson 4. Time 0:40 2-5. One mile—Hurley 1, Root 2, Dove 3, Collett 4. Time 2:17 1-5.

New Haven, August 22—Half-mile—Hurley 1, Billington 2, Glasson 3, Dove 4. Time 1:10 3-5. Two mile—Root 1, Hurley 2, Billington 3, Stauder 4. Time 5:18 3-5.

Point scoring—Hurley, 18; Root, 18; Billington, 12; Stauder, 4; Glasson, Diggs, Dove, 3 each; Schlee, 2; Collett, Linley, 1 each.

The tie between Hurley and Root was decided at Hartford September 8, Hurley winning in two straight heats, the first of which was won twice on account of an unintentional foul by Hurley at the start.

At the New Haven meet, the amateur middle-distance paced title was won by Sam Sulkins, of Boston, who defeated Fred Dahlke, of Buffalo, in a fifteen mile race. Time, 25:44 1-5.

AUTOMOBILE RECORDS.

Though automobile racing seems to be giving way to "endurance runs" and fewer reports of broken records are heard, the sport still has a hold upon owners of fast vehicles, and manufacturers still continue to make racing machines. The fatal ending of the meet at Staten Island, New York, on May 31, 1902, put a damper on racing for the rest of the year, and the endurance run from New York to Boston was the only organized automobile meet of consequence held during the last six months.

Among the most notable speed trials held recently—within two or three years—were those at Newport in August, 1901, and the races held in France. The track at Aquidneck Park, Newport, is but half a mile long and the turns are sharp and unprotected by banks, but some good records were made. In the first 5-mile race William K. Vanderbilt, Jr., established a record of 7 minutes 43½ seconds with his "Red Devil," and in the third race made a new record of 7 minutes 36¾ seconds with the same machine. In 1900 he also had the honor of beating all American records on the same track with his "White Ghost."

On July 5, 1901, at Elkwood, near Long Branch, N. J., Albert C. Bostwick, with a forty horsepower American machine, did a mile in 1 minute, 16¾ seconds, and three miles in 3 minutes, 52½ seconds. Henri Fournier, the French professional, cut the time for one mile to 1 minute, 6 4-5 seconds on October 10, at the Empire City track, at Yonkers, N. Y. Two weeks later Alexander Winton, in a trial at Detroit, beat Fournier's record by 2-5 second. Fournier, however, regained the supremacy on November 16 by making a mile in 51 4-5 seconds on the Ocean Parkway, Brooklyn, N. Y., a straightaway track. Foxhall Keene did the same distance in 54 2-5 seconds and Mr. Bostwick made it in 56 2-5 seconds.

The best long distance records have been made in Europe, especially in France, where the racing automobile had its genesis. The first important road race was instituted by Le Petit Journal, of Paris, and was a speed trial from Paris to Rouen and return, a total distance of about 150 miles. The race was won by a Daimler motor in 5 hours and 40 minutes. In 1895 there was a race from Paris to Bordeaux, a distance approximated at 710 miles. The best time was made by M. Lavassor in 48 hours, 48 minutes. In 1898 Rene de Knyff made the trip in 15 hours and 15 minutes, and the year following M. Charron won in 11 hours, 4 minutes, 20 seconds. Henri Fournier made the trip from Paris to Bordeaux, 348 miles, eighteen miles of which were through cities, in 8 hours, 44 minutes and 44 seconds, an average speed outside of towns of fifty-three miles an hour. The average for the entire distance was forty miles an hour.

The most remarkable long distance race ever attempted was that held in June, 1901, from Paris to Berlin. It was planned at first to make the course from Paris to St. Petersburg, but racing through Russia was found to be practically impossible. One hundred and ten vehicles started in this race, and forty-nine made the entire journey. Henri Fournier was again the leader, winning in 16 hours and 6 minutes, at an average speed of more than thirty-nine miles an hour.

Automobile owners and builders seem to be more and more in favor of endurance runs as true tests of a machine's value, and two that were held in the East in 1902 were completely successful from all viewpoints. The second endurance test to be held in America was on May 30, 1902, over a course of about 90 miles, on Long Island. Of the fifty-five vehicles that actually started, forty-four, or 80 per cent, finished within the time limit. In the run from New York to Boston and return, held in October, the per cent finishing within the time limit was larger, though the number of machines having perfect scores at the end was smaller.

After the New York-Boston event the Contest Committee of the Automobile Club of America recommended a number of modifications in the rules governing endurance runs. One is the abolishment of the three classes of certificates and the substitution of one only. Another was the elimination of time allowance for stops, so that machines that stopped to take on water or make permissible repairs might be penalized if they failed to make up the time lost thereby.

The tables which are given below show the best records made by automobiles in various countries and under various conditions. They form the most complete record of automobile racing ever published, and were prepared especially for The American Almanac.

FIELD AND TRACK ATHLETICS, 1902.

By J. H. CLAUSEN.

Athletes of America and England changed several of the records at athletic sports during the year 1902, and among the swimmers the year was particularly good for record-breaking.

No international meeting between the United States and Great Britain took place, but three American athletes—S. S. Jones, of the New York A. C.; A. F. Duffey, of Georgetown University, and W. W. Coe, of Boston—were among the winners at the British athletic championships.

In the tables which follow an effort has been made to keep the standard events prominent and to avoid such records as 51 yards, at running, 97 yards at hurdling, and odd distances at walking, swimming or skating.

All the records given below are correct, and several advertised performances do not find a place here for the reason that they have not been vouched for in a satisfactory manner.

RUNNING RECORDS.

(Amateur records precede the professional records.)

50 Yards—5⅛s., L. E. Myers, New York City, December 12, 1884. Professional—5¼s., H. M. Johnson, New York City, November 22, 1884.

60 Yards—6 2-5s., L. E. Myers, New York City, December 12, 1882; J. W. Tewksbury, New York City, January 13, 1899; A. F. Duffey, New York City, November 30, 1899; W. D. Eaton, Buffalo, N. Y., September 6, 1901; W. Delgado, New York City, February 4, 1901; A. F. Duffey, Travers Island, N. Y., June 7, 1902. Professional—None.

75 Yards—7 3-5s., L. H. Cary, Princeton, N. J., May 9, 1891; B. J. Wefers, Boston, Mass., January 25, 1896. Professional—7⅛s., James Quirk, Parkhill, Canada, October 30, 1888.

80 Yards—8s., Wendell Baker, Boston, Mass., July 1, 1886. Professional—None.

100 Yards—9 3-5s., A. F. Duffey, New York City, May 31, 1902. Professional—9 3-5s., E. Donovan, Brockton, Mass., September 2, 1895 (13 inches down grade).

110 Yards—11 1-5s., W. Baker, Cambridge, Mass., May 23, 1886; C. H. Sherrill, Travers Island, N. Y., June 15, 1889; L. H. Cary, Travers Island, N. Y., June 7, 1890. Professional—11s., F. N. Bonine, Ann Arbor, Mich., May 22, 1886.

120 Yards—11 2-5s., B. J. Wefers, Worcester, Mass., August 20, 1897. Professional—11⅛s., George Seward, London, England, May 3, 1847.

125 Yards—12 2-5s., C. H. Sherrill, New York City, May 4, 1889. Professional—12 2-5s., A. R. Downer, (128½ yards), Edinburgh, Scotland, January 3, 1898. American record, 12½s., M. K. Kettleman, Pittsburg, Pa., August 18, 1884.

130 Yards—13s., W. Baker, Cambridge, Mass., May 23, 1886. Professional—12⅛s., W. Johnson, Fenham Park, England, February 9, 1867. American record, 12⅛s., H. M. Johnson, Pittsburg, Pa., July 17, 1886.

135 Yards—13 1-5s., professional record, W. M. Christie, Philadelphia, Pa., April 16, 1900.

140 Yards—13⅛s., professional record, H. Hutchins, London, England, June 3, 1885.

150 Yards—14 3-5s., B. J. Wefers, Travers Island, N. Y., Oct. 2, 1897. Professional—14½s., H. Hutchins, Sydney, Australia, March 2, 1887. American record, 15s., H. M. Johnson, Titusville, Pa., Oct., 18, 1883.

180 Yards—18s., W. Baker, Boston, Mass., June 14, 1886. Professional—None.

200 Yards—19 4-5s., E. H. Pelling, London, September 28, 1889; A. R. Downer, London, May 11, 1895; G. Jordon, Oxford, March 16, 1896. American record, 20s., W. Baker, New York, November 8, 1890. Professional, 19½s., George Seward, London, March 22, 1847.

220 Yards—21 1-5s., B. J. Wefers, New York City, May 30, 1896. Professional, 21 4-5s., H. Hutchins, London, May 11, 1885.

Sixty Miles.—11h. 11m. 10s., A. W. Sinclair, London, August 26, 27, 1881; America, 11h. 48m. 53s., G. B. Gillie, New York City, May 10, 11, 1878. Professional—9h. 40m. 47s., J. Hibberd, London, May 14, 1888; America, 10h. 41m. 38s., D. O'Leary, Chicago, Ill., November 10, 1877.

Seventy Miles.—13h. 11m. 15s., A. W. Sinclair, London, August 26, 27, 1881; America, 13h. 57m. 40s., G. B. Gillie, New York City, May 10, 11, 1878. Professional—11h. 38m. 35s., J. Hibberd, London, May 14, 1888; America, 12h. 32m. 31s., D. O'Leary, Chicago, Ill., October 16, 1875.

Eighty Miles.—15h. 9m. 16s., A. W. Sinclair, London, August 26, 27, 1881; America, 16h. 35m. 35s., G. B. Gillie, New York City, May 10, 11, 1878. Professional—14h. 01m. 53s., W. Howes, London, May 15, 1880; America, 14h. 49m. 50s., D. O'Leary, Chicago, Ill., October 16, 1875.

Ninety Miles.—17h. 37m. 51s., A. W. Sinclair, London, August 26, 27, 1881; America, 18h. 48m., G. B. Gillie, New York City, May 10, 11, 1878. Professional—15h. 59m. 10s., W. Howes, London, May 15, 1880; America, 16h. 49m. 18s., D. O'Leary, Chicago, Ill., October 16, 1875.

One Hundred Miles.—19h. 41m. 50s., A. W. Sinclair, London, August 26, 27, 1881; America, 21h. 42s., G. B. Gillie, New York City, May 10, 11, 1878. Professional—18h. 8m. 15s., W. Howes, London, May 15, 1880; America, 18h. 53m. 40s., D. O'Leary, Chicago, Ill., October 16, 1875.

Greatest distance walked without a rest (professional), 121 miles, 385 yards, C. A. Harriman, Truckee, Cal., April 6, 7, 1883.

JUMPING RECORDS.

(The professional records follow the amateur records in each event.)

Standing High Jump, without weights—5 ft. 5¼ in., Ray C. Ewry, Buffalo, N. Y., September 7, 1901.

Standing High Jump, with weights—Professional, 5 ft. 8½ in., T. F. Kearney, Oak Island, Mass., July 25, 1889

Running High Jump, without weights—6 ft. 5 5-8 in., M. F. Sweeney, New York City, September 21, 1895. Professional—6 ft. 1 in., M. F. Sweeney, Philadelphia, Pa., August 3, 1896.

Running High Jump, with weights—Professional—6 ft. 8¼ in., R. H. Baker, Leeds, England, July 14, 1900. American record—6 ft. 6½ in., R. H. Baker, Cambridge, Mass., August 31, 1895.

Standing Jump for Distance, without weights—11 ft. 3 in., R. C. Ewry, Syracuse, N. Y., April 27, 1900. Professional—12 ft. 1½ in., J. Darby, Dudley, England, May 28, 1890. American record—10 ft. 10½ in., H. M. Johnson, New York City, September 4, 1884.

Standing Jump for Distance, with weights—12 ft. 9½ in., J. Chandler, Carrick-on-Suir, Ireland, August 28, 1898. American record—12 ft. 9½ in., L. Helwig, Brooklyn, N. Y., November 20, 1884. Professional—14 ft. 9 in., J. Darby, Liverpool, England, September 19, 1890. American record—14 ft. 5½ in., G. W. Hamilton, Romeo, Mich., October 3, 1879.

Standing Two Jumps, without weights—Professional—22 ft. 2½ in., H. M. Johnson, St. Louis, Mo., September 15, 1888.

Standing Two Jumps, with weights—Professional—28 ft., J. Darby, Walsall, England, November 6, 1891.

Standing Three Jumps, without weights—35 ft. 7¼ in., R. C. Ewry, Buffalo, N. Y., September 6, 1901. Professional—35 ft. ½ in., W. Marsh, Boston, Mass., August 29, 1899.

Standing Three Jumps, with weights—38 ft. 10 in., J. Chandler, Tipperary, September 13, 1897. Professional—41 ft. 7½ in., R. H. Baker, Blackpool, England, July 18, 1898. America—41 ft. 2 in., P. J. Griffin, Hartford, Conn., September 7, 1896.

Standing Five Jumps, without weights—Professional—61 ft. 5½ in., J. Darby, Dudley, England, May 28, 1890. America—55 ft. 2 in., H. M. Johnson, St. Louis, Mo., September 2, 1888.

Standing Five Jumps, with weights—Professional—76 ft. 3 in., J. Darby, Dudley, England, May 28, 1890.

Standing Ten Jumps, without weights—116 ft. 3½ in., B. J. Mulligan, Celtic Park, Long Island, N. Y., September 1, 1902. Professional—111 ft. 4 in., H. M. Johnson, St. Louis, Mo., September 15, 1888.

Standing Ten Jumps, with weights—Professional—140 ft., R. H. Baker, Leeds, England, July 14, 1900.

Standing Hop, Step and Jump, without weights, start by standing on one leg—30 ft. 3 in., J. Cosgrove, Albany, N. Y., April 25, 1894. Start by standing on both feet—31 ft. 10 in., M. W. Ford, Brooklyn, N. Y., July 18, 1886.

Standing Hop, Step and Jump, with weights—All these records are confusing. Most jumpers leap from both feet, but the record tables do not state whether the performances were made by starting off one leg or both. Investigation will be necessary.

Standing Backward Jump, with weights—9 ft., J. J. Carpenter, Ann Arbor, Mich., November 8, 1884. Professional—12 ft. 11 in., J. Darby, Haden Hill Park, England, September 14, 1891. America—12 ft., P. J. Griffin, Hartford, Conn., September 7, 1896.

Two Backward Jumps, standing, with weights—Professional—21 ft. 4 in., J. Darby, Birmingham, England, December 17, 1897.

Three Backward Jumps, standing, with weights—Professional—32 ft. 4 in., T. Colquitt, Bolton, England, June 9, 1899.

Standing Hop, Two Steps, Hop, Two Steps, and Jump—Professional—79 ft. 9¼ in., W. Marsh, Medford, Mass., August 5, 1899. This event is known as the "double put."

Running High Kick—9 ft. 8 in., C. C. Lee, New Haven, Conn., March 19, 1887.

Running Hitch and Kick—9 ft. 1 in., C. D. Wilbur, Annapolis, Md., June 6, 1888; 9 ft. 1 in., E. W. Goff, Albany, N. Y., April 22, 1892.

Running Hop, Step and Jump, without weights—49 ft. 2¼ in., W. McManus, Cootamundra, N. S. W., April 15, 1893. American record—48 ft. 6 in., E. B. Bloss, Chicago, Ill., September 16, 1893. Professional—48 ft. 8 in., T. Burrows, Worcester, Mass., October 18, 1884.

Running Two Hops and Jump, without weights—50 ft. 1½ in., D. Shanahan, Limerick, Ireland, August 6, 1885. American record—49 ft. ½ in., J. B. Connolly, New York City, September 19, 1896. Professional record—49 ft. 6 in., T. Burrows, Manchester, England, June 3, 1882.

Pole Vaulting for Height—11 ft. 10½ in., R. G. Clapp, Chicago, Ill., June 18, 1898. Professional—10 ft. 10½ in., G. Musgrove, Cockermouth, England, 1866. America—10 ft. 3 in., J. A. McDonald, South Boston, Mass., August 2, 1902.

Pole Vaulting for Distance—27 ft. 7¼ in., William Baird, Philadelphia, Pa., December 19, 1901.

Running Long Jump, without weights—24 ft. 11¾ in., P. O'Connor, Dublin, Ireland, August 5, 1901. American record—24 ft. 7¼ in., M. Prinstein, Philadelphia, Pa., April 28, 1900. Professional record—22 ft. 6 in., T. F. Keane, Grasmere Sports, Scotland, August 23, 1900. American record (A. A. U. rules)—21 ft. 11 in., J. P. Watson, Boston, Mass., September 21, 1897.

Running Long Jump, with weights—Professional—29 ft. 7 in., J. Howard, Chester Race Course, England, May 8, 1854 (used 5 lb. dumb-bells), taking off from a block of wood, 2 ft. long 1 ft. wide, wedge shaped, 3 in. thick, and raised 4 inches.

Miscellaneous Sports.

THROWING WEIGHTS.

Amateur Records.

56-Pound Weight, with one hand, without run or follow—27 ft. 4 in., J. S. Mitchel, Toronto, Ont., September 28, 1889.

56-Pound Weight, with two hands, without run or follow—28 ft. 5 in., John Flanagan, New York City, February 3, 1902.

56-Pound Weight, with both hands from a 7-foot circle, without follow—36 ft. 9½ in., J. Flanagan, Long Island City, October 20, 1901.

56-Pound Weight, thrown for height—15 ft. 6⅝ in., J. S. Mitchel, Bayonne City, September 6, 1897.

Throwing the Discus, 4½ pounds—127 ft. 8¾ in., Martin J. Sheridan, Celtic Park, Long Island, N. Y., August 30, 1902.

Digitized by Google

THROWING THE HAMMER.

(Hammer with handle 4 feet long thrown with both hands from a mark, without run or follow.)

12-Pound Hammer Head—124 ft. 11 in., W. L. Coudon, Wilmington, Del., May 10, 1888. Professional—133 ft. 5½ in., G. Perrie, Philadelphia, Pa., August 20, 1894.

14-Pound Hammer Head—115 ft. 4 in., W. L. Coudon, Wilmington, Del., May 10, 1888.

16-Pound Hammer Head—113 ft. 11 in., W. O. Hickok, New Haven, Conn., May 12, 1894. Professional—119 ft. ½ in., G. H. Johnstone, Stirling, Scotland, September 19, 1896 (Handle 4 ft. 2 in long.)

21-Pound Hammer Head—82 ft. 3½ in., C. A. J. Queckberner, Staten Island, November 17, 1888. Professional—79 ft., G. Davidson, Edinburgh, Scotland, June 2, 1883.

Thrown with both hands, with 9 feet run and no follow.

16-Pound Hammer, including weight of head and handle—164 ft., 6 in., J. Flanagan, Bayonne, N. J., September 4, 1899.

Thrown with both hands, with 7 feet run and no follow.

12-Pound Hammer, including weight of head and handle—184 ft. 1 in., J. R. De Witt, Pottstown, Pa., May 27, 1900. Professional—183 ft. 6 in., T. Carroll, Sacramento, Cal., July, 10, 1896.

16-Pound Hammer, including weight of head and handle—171 ft. 9 in., J. Flanagan, Long Island City, September 3, 1901. Professional—165 ft.. T. Carroll, Sacramento, Cal., June 4, 1898.

21-Pound Hammer Head—90 ft. 3in., C. A. J. Queckberner, Staten Island, November 17, 1888. Professional- 112 ft. 1½ in. (21 pounds, including handle), T. Carroll, San Francisco, Cal. July 21, 1897.

A. C. Bowen.

S. S. Jones.

E, C. Schaeffer.

SHOT PUTTING.

American amateurs use a 7 ft. circle; British amateurs use a 7 ft. square; professionals use a run of 7 ft. 6 in.

12-Pound Shot—55 ft. 2 in., G. R. Gray, Travers Island, N. Y., June 11, 1892. Professional—50 ft. ½ in., J. McPherson, Brooklyn, N. Y., August 20, 1887.

14-Pound Shot—51 ft. 5½ in., G. R. Gray, Travers Island, N. Y., June 11, 1892. Professional—51 ft. 4 in., C. J. Currie, Toronto, Ont., August 23, 1889.

16-Pound Shot—47 ft., G. R. Gray, Chicago, Ill., September 16, 1893. British record, 48 ft. 2 in., D. Horgan, Queenstown, Ireland, October 9, 1897. Professional—44 ft. 8 in., G. Perrie, Pitlochrie, Scotland, September 5, 1896.

18-Pound Shot—41 ft. 9½ in., G. R. Gray, Travers Island, N. Y., June 7, 1890.

20-Pound Shot, Professional—40 ft. 11¼ in., J. D. McPherson, Toronto, Ont., November 10, 1888.

21-Pound Shot—39 ft. 1½ in., G. R. Gray, St. Catherine's, Ont., August 10, 1891.

22-Pound Shot—35 ft. 10½ in., D. J. McKinnon, London, England, June 22, 1884. Professional—37 ft. 8 in., C. McLean, Pitlochrie, Scotland, September 4, 1897.

24-Pound Shot—33 ft. 11¾ in., G. R. Gray, Boston, Mass., April 12, 1890.

ROPE-CLIMBING.

Using both hands and feet—35 ft. 8 in. up, in 14 4-5s., C. E. Raynor, South Bethlehem, Pa., April 2, 1887.

THREE-LEGGED RACES.

50 Yards—6 2-5s., C. S. Busse and H. H. Morrell, West New Brighton, S. I., September 7, 1891.
60 Yards—8s., C. S. Busse and C. L. Jacquelin, New York City, December 16, 1890.
100 Yards—12 2-5s., C. S. Busse and H. H. Morrell, West New Brighton, S. I., September 7, 1891.
110 Yards—14 4-5s., W. H. Luddington, Jr., and C. H. Sherrill, Jr., New Haven, Conn., June 3, 1887.
150 Yards—20 2-5s., C. S. Busse and C. L. Jacquelin, Bergen Point, N. J., August 31, 1889.
200 Yards—28 1-2s., A. Randolph and H. D. Reynolds, Baltimore, Md., May 24, 1880.
220 Yards—33s., H. K. Zust and F. C. Puffer, New York City, April 1, 1893.

RUNNING BACKWARDS.

50 Yards—7 4-5s., S. S. Schuyler, New York City, October 8, 1887.
75 Yards—11 1-5s., S. S. Schuyler, New York City, October 8, 1887.
100 Yards—14s., A. Forrester, Toronto, Ont., June 23, 1888.

SACK RACING.

25 Yards—5 3-5s., R. Mercer, Rochester, N. Y., March 15, 1901.
50 Yards, over 4 hurdles 1 foot high—9 3-4s., J. M. Nason, Buffalo, N. Y., December 6, 1890.
50 Yards—7s., R. Mercer, Buffalo, N. Y., April 20, 1901.
60 Yards—9s., J. M. Nason, Buffalo, N. Y., April 18, 1891.
65 Yards—9 3-5s., J. T. Norton, New York City, January 13, 1897.
75 Yards—10 4-5s., R. Mercer, Buffalo, N. Y., April 20, 1901.
75 Yards, over 6 hurdles 1 foot high—16s., J. M. Nason, Buffalo, N. Y., December 6, 1890.
100 Yards—13 3-5s., J. M. Nason, Buffalo, N. Y., July 11, 1891.
100 Yards, over 10 hurdles 18 inches high—21 1-4s., J. M. Nason, New York City, September 29, 1882.
110 Yards—25 1-5s., J. M. Nason, New York City, May 12, 1883.
110 Yards, over 10 hurdles, each lift 18 in. high—21s., C. M. Cohen, Williamsbridge, N. Y., September, 19, 1896.

LIFTING.

Lifting with the hands alone—1,384 lbs., H. Leussing, Cincinnati, O., March 31, 1880.
Lifting with harness—3,239 lbs., W. B. Curtis, New York City, December 20, 1868.

HOPPING.

50 Yards—7 1-5s., S. D. See, Brooklyn, L. I., October 15, 1885.
80 Yards—10 4-5s., S. D. See, Brooklyn, L. I., October 15, 1885.
100 Yards—13 3-5s., S. D. See, Brooklyn, L. I., October 15, 1885.

PARALLEL BARS.

Three successive arm jumps, without spring—15 ft., S. Strasburger, New York City, November 10, 1873.
Three successive arm jumps, with swings—19 ft. 9 in., A. A. Conger, New York City, November 10, 1873.
Push-ups, without swing—58 times, S. L. Foster, Cambridge, Mass., April 18, 1884.

POTATO RACING.

(In all races of this kind the potatoes are gathered one at a time.)

8 potatoes, 2 yards interval, with 5 yards additional at finish, total distance 149 yards—31 1-5s., C. J. P. Lucas, Medford, Mass., August 8, 1901.
10 potatoes, 5 feet interval, total distance 183 1-3 yards—49 2-5s., B. G. Woodruff, New York City, August 17, 1894.
10 potatoes, 2 yards interval, total distance 220 yards—51 1-5s., G. R. Preston, New York City, November 25, 1882.
10 potatoes, 2 yards interval, with 5 yards additional at finish, total distance 225 yards—47 2-5s., C. J. P. Lucas, Boston, Mass., August 30, 1902.
12 potatoes, 12 feet interval, total distance 208 yards—55s., C. G. Carr, Rochester, N. Y., June 16, 1877.
15 potatoes, 2 yards interval, total distance 480 yards—1m. 57 1-4s., E. P. Harris, Amherst, Mass., October 9, 1881.
15 potatoes, 5 yards interval, total distance 1,200 yards—4m. 40⅝s., H. F. Snow, Hanover, N. H., May 22, 1879.
25 potatoes, 1 yard interval, total distance 650 yards—2m. 39 1-2s., M. Brewer, Williamstown, Mass., October 18, 1879.
30 potatoes, 1 yard interval, total distance 930 yards—3m. 32s., C. Donaldson, Clinton, N. Y., May 28, 1881.
50 potatoes, 1 yard interval, total distance 1 mile 790 yards—11m. 29s., G. R. Starke, Montreal, P. Q., June 8, 1878; 9m. 23 1-2s., J. Shaw, Manchester, Eng., August 20, 1874.
50 potatoes, 1 yard interval, but the basket 10 yards instead of 1 yard from the first potatoe, total distance 1 mile 1,690 yards—13m. 15s., T. R. Pakeman, Cheltenham, England, April 6, 1882.

AMERICAN AMATEUR SKATING RECORDS—UNAIDED BY WIND OR BY FLYING START.

50 Yards, straightaway—6s., S. D. See, and C. B. Davidson, Van Cortlandt Lake, N. Y., December 28, 1885.
75 Yards, straightaway—8 3-5s., S. D. See, Van Cortlandt Lake, N. Y., December 30, 1883.
100 Yards, straightaway—9 4-5s., J. S. Johnson, Minneapolis, Minn., March 1, 1893.
120 Yards, straightaway—11 3-5s., J. S. Johnson, Minneapolis, Minn., March 1, 1893.
150 Yards, straightaway—15 7-8s., G. D. Phillips, New York City, January 27, 1883.
200 Yards—17 2-5s., J. S. Johnson, Minneapolis, Minn., February 26, 1893.
220 Yards—20 1-5s., J. Nilssen, Montreal, Canada, February 1, 1896, and also W. Caldwell, Montreal, Canada, February 6, 1897.
300 Yards, straightaway—31 2-5s., G. D. Phillips, Van Cortlandt Lake, N. Y., December 30, 1883.
440 Yards—39 1-5s., J. K. McCulloch, St. Paul, Minn., January 27, 1896.
600 Yards—55 1-4s., O. Rudd, Minneapolis, Minn., March 5, 1893.
880 Yards—1m. 20 2-5s., J. Nilssen, Montreal, Canada, February 1, 1896.
1 Mile—2m. 41 1-2s., O. Rudd, Minneapolis, Minn., February 14, 1896.
1½ Miles—4m. 28s., J. S. Johnson, Montreal, Canada, February 26, 1894.
2 Miles—5m. 42 3-5s., O. Rudd, Red Bank, N. J., January 25, 1895.
2½ Miles—7m. 32s., J. S. Johnson, Montreal, Canada, February 26, 1894.
3 Miles—8m. 48 2-5s., J. Nilssen, Montreal, Canada, February 2, 1895.
4 Miles—12m. 1-2s., J. Nilssen and A. Schiebe, Minneapolis, Minn., February 13, 1894.
5 Miles—14m. 24s., O. Rudd, Minneapolis, Minn., February 20, 1896.
10 Miles—31m. 11 1-5s., J. S. Johnson, Montreal, Canada, February 26, 1894.
20 Miles—1h. 6m. 36 2-5s., A. D. Smith, St. Paul, Minn., January 26, 1894.
25 Miles—1h. 31m. 29s., J. F. Donoghue, Stamford, Conn., January 26, 1893.
50 Miles—3h. 15m., 59 2-5s., J. F. Donoghue, Stamford, Conn, January 26, 1893.
75 Miles—5h. 19m. 16 4-5s., J. F. Donoghue, Stamford, Conn., January 26, 1893.
100 Miles—7h. 11m. 38 1-5s., J. F. Donoghue, Stamford, Conn., January 26, 1893.

JUMPING ON SKATES.—AMATEURS.

LACROSSE.

There are two lacrosse leagues in the United States—the Inter-University Lacrosse League, and the Intercollegiate Lacrosse Association.

The Intercollegiate Lacrosse Association is composed of the following universities: Johns Hopkins, Lehigh and Swarthmore. Johns Hopkins won the championship for 1902.

The Inter-University Lacrosse League is composed of teams from Cornell, Harvard, University of Pennsylvania and Columbia. Cornell won the championship for 1902.

The Crescent Athletic Club Lacrosse team are the champions of the United States for 1902, having defeated every team which they played. The Shamrock Lacrosse team of Montreal, Canada, are champions of the world. The Dufferins, of Orangeville, are champions of the Canadian Lacrosse Association. The Crescents of Perth are the champions of Eastern Canada. The Toronto University team are the Intercollegiate champions of North America.

Jacob Schaefer at the Billiard Table.

BILLIARDS.

The only important event in billiard circles in the past year was the professional championship tournament at 18-in balk-line, which was won by Schaefer, who was victor in five games, losing none. His highest average was 12.5, and his general average was 8.89. The games were played in New York December 3, 1901, to December 15. The other players, in the order of precedence, were Slosson, Barutel, Sutton, Morningstar and Howlson. Barutel challenged Schaefer, and the games were played December 18 to 20, 400 points a night, the latter winning 1,200 to 746.

The A. A. U. games, for the amateur championship, were played in New York in February, resulting in a tie between Morris, of New York, and Sigourney, of California, and Morris won the play-off. W. P. Foss having held the championship for two years, and the result of this tournament entitling Morris to challenge him, he did so. Foss won the game, 500 to 464, this giving him the championship for the third time and thus making him the owner of the $1,000 championship bowl.

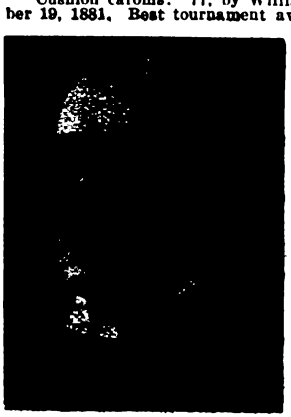
The annual tournament of the National Association of Amateur Billiard Players was held January 13 to 18, and was won by E. Gardner, he taking 4 games and losing none. E. Townsend was second, Stark third, Paggenburg fourth, and F. Gardner fifth.

There is a controversy between the A. A. U. and the National Association as to which is entitled to hold the amateur championship. It is generally conceded, however, that the honor belongs to the A. A. U. It might be settled by a contest between the winners of the two tournaments, and players hope that some such game may be arranged.

No records were broken during the year and the old ones therefore stand as follows:

Three-ball straight rail: 1,531, by Maurice Vignaux, at Paris, France, in a match with George F. Slosson, April 10-14, 1880.

Cushion caroms: 77, by William Sexton, against Jacob Schaefer, at Tammany Hall, New York, December 19, 1881. Best tournament average, 10, in a game of 200 points, by Jacob Schaefer, at Chicago, November 10, 1887. Best match average: 4.76-100, in 500 points, by George F. Slosson, at Chicago, April 4, 1887.



George F. Slosson.

Balk-line game, 8 inch: 329, by Maurice Vignaux, at Paris, in January, 1884. He also made the highest average at this game, 44 52-67, in the same game.

Balk-line game, 14 inch, anchor nurse allowed: 566, by Jacob Schaefer, at New York, December 16, 1893.

The most important event of 1903 will be the tournament to be played in Paris, beginning in January, and in which Schaefer, Slosson, Daly, Sutton and Howlson will take part.

POOL.

The most important event in pool during the year 1902 was the world's championship tournament, held at Green's Montauk Rooms, in Brooklyn. In this there were nine contestants: Charles Weston and W. H. Clearwater tying for first place with seven games won each. In the play-off Clearwater won by a score of 125 to 105. He was soon after challenged by Grant Eby, and the game, 600 points, was played May 8, 9 and 10, and resulted in a victory for Eby by a score of 600 to 447. November 7 Patrick Walsh challenged him, and the game, 600 points, was played at Pittsburg, Pa., December 4, 5 and 6. It resulted in a score of 600 for Eby to 375 for Walsh. Each made 15 balls as his highest run.

This was not a particularly brilliant game, as is seen by the small high runs. Eby plays usually a steady game and is billed for a longer contest than for a showy one. He was next to the last man in the Brooklyn tournament, but easily beat the winner in the championship contest. It is hoped that some one else will now challenge him.

BOWLING.

No sport or pastime is on a firmer basis than the ancient game of bowling. The lovers of the game are numbered into the hundreds of thousands, and every year sees the accession of thousands of new bowlers. It is a pastime that is easily mastered, but it requires constant practice to maintain a high average of skill. As an exercise to keep a man in sound physical condition it has few superiors among indoor pastimes, and it is a game that few men ever grow weary of.

Expert bowlers are numbered by the thousand. This fact is perhaps due to the many magnificent alleys that have been recently built in every city of the country. Up to within two or three years ago the alleys were invariably constructed in the basement of buildings. They are now, however, being built on any floor and in such a manner that the sound of the constantly rolling balls and falling pins can hardly be heard on the other floors of a building. There were very few single matches. The followers of the game have found that they get better sport by playing on a team in tournaments. There were hundreds of tournaments last year, and the record of the games would fill a pretty big volume. Every branch of trade and all kinds of clubs and lodges have bowling teams, and the game is now as well understood in the United States as baseball or poker.

The team championship tournament of the United States for the season of 1901-1902, the third of its kind, took place at Buffalo. There were close to 150 teams in the tournament, and it was therefore impracticable to decide the title by match games. The team rolling the biggest total in three games won the match. The Fidelia Club secured the honor, with a total of 2,792 points. This team was composed of Captain William Amann, Otto Foege, William Rothermel, John Coster and Peter Schultz.

Nineteen experts participated in the individual championship tournament, held in New York City. The tournament resulted in a tie between Dave Shiman and John Voorheis, each winning 14 out of 18 games. Mr. Shiman won the "roll-off" and secured the title of champion. His average for 72 games was 200 11-72.

The Fidelia Club also won the Metropolitan team championship. Ten clubs took part in this tournament, five from Manhattan Borough and five from Brooklyn.

The highest team score made last season in Greater New York was 1,089 by the Corinthian team in the National League tournament. This record was beaten, however, in the early part of the season of 1902-1903 by the Fidelia Club, which scored 1,092 points. The Illinois Bowling Club, of Chicago, has topped this during the present season with a total of 1,101 points. The team record is 1,103 points, made by the Empire team in 1899. H. Dohn, of the Mohawk Club, of this city, still holds the individual record of Manhattan Borough with a performance of 289. W. Rothermel, of the Fidelia Club, is regarded as the best spare bowler in the country. W. Gerdes, who captured the individual championship three years in succession, is still the king-pin of all the bowlers, although he practically retired after this remarkable feat. The seven best bowlers still in harness are: Dave Shiman, of New York; John Voorheis, of Brooklyn; Fred Clinch, of Chicago; P. Wolff, of Brooklyn; J. Strang, of Chicago; Charles Starr, of New York, and W. Rothermel, of New York. The Fidelia team is undoubtedly the premier team of the country.

Last season this team won the championship of the United States, the Metropolitan Championship and the New York League tournament. The team also finished well up in other tournaments.

The winning clubs of the important tournaments in Greater New York last season were as follows:

Custom House Tournament—Won by Fifth Division.

Carruthers Tournament—Won by Metropolitan B. C.

Bank Clerks' Tournament—Won by First National Bank.

New York Inter-Club League Tournament—Won by New York Athletic Club.

American National Tournament—Won by Metropolitan B. C. This victory gave the Metropolitan Club permanent possession of the two-year cup.

New York League Tournament—Won by Fidelia B. C.

Harlem League Tournament—Won by Lotus Club.

Wholesale Drug Trade Association Tournament—Won by Johnson & Johnson, of New Brunswick.

Life Insurance League Tournament—Won by first team of Prudential Life Insurance Company, Newark division.

National League Tournament—Won by Roseville Athletic Club.

New York Royal Arcanum Tournament—Won by Americus Council.

Columbia League Tournament—Won by Belvidere B. C.

Stock Exchange Tournament—Won by Post & Flagg team.

Business Men's Championship, the teams representing the best bowlers in the various commercial tournaments—Won by the Wholesale Drug Clerks.

The determined effort to bring bowlers under some organized management was continued during the season of 1902, and though harmony among the sectional factions seemed doubtful at one time, the American Bowling Congress, the only association of national character in the sport, is now generally recognized as authoritative.

The second annual convention of the Congress was held in Buffalo, N. Y., January 20 to 25. There was a bad split over the voting of proxies at the convention, and the New York and Brooklyn delegations left the hall in a body. They finally returned to the convention the next day, and harmony was restored by a compromise. In the annual tournament the New Yorkers again won all three prizes in one of the three championship events, and finished second in another.

In September the leading bowlers of the metropolitan district organized another association, to be known as the New York Bowling Association, and this is intended to govern the many league tournaments held in this section. Among the tournaments held last season in the metropolitan district there were two which were generally accepted as representing the individual and team (five-men) championships.

Results of the national championships, held at Buffalo, and the metropolitan championships follow:

Individual Championship—Won by Fred Strong, Chicago, 649 pins (for three games); John Koster, New York, second, 647; Joe Berlin, Chicago, third, 643. (Frank Brill, Chicago, won in 1901, with 648 pins.)

Two-Men Team Championship—Won by J. McLain and F. Steers, Chicago, 1,237 pins (for three games); J. Dysinger and H. Krang, Los Angeles, second, 1,220; F. Elwert and J. Funke, Belleville, Ill., third, 1,169. (J. Voorhies and C. K. Starr, New York, won in 1901, with 1,203 pins.)

Five-Men Team Championship—Won by Fidelia team, New York, 2,792 pins (for three games); National team, New York, second, 2,782; Rosedale team, New York, third, 2,724. (The Standard team, of Chicago, won in 1901, with 2,720 pins.)

CHESS IN 1902.

By DR. L. D. BROUGHTON, JR., Secretary of the New York Chess Association.

American interest in the game of chess increases with every year, one contributing cause being the rivalry fostered by such events as the International Chess Masters' Tournaments and the International cable matches for the Newnes Cup and the Rice intercollegiate emblem. These were the great events in the chess world for the year 1902. America lost in the Masters' tournaments at Monte Carlo and at Hanover, although bravely represented by Pillsbury, the famous Brooklyn player, and W. E. Napier and F. J. Marshall. At Monte Carlo Pillsbury was second to Maroczy, of Budapest, and at Hanover was second to Janowski, the French champion. The cup contests were won by the American teams, Columbia, Harvard, Yale and Princeton scoring their first victory over Oxford and Cambridge, and Brooklyn defeating the British Chess Club.

An event of more peculiar interest in connection with chess was an impromptu game, begun, but not finished, between players on two steamships in mid-ocean. Wireless telegraphy figured in the play, and the event is especially worthy of record as constituting the first of its kind. On June 10, 1902, Mr. Ginman, Marconi operator on the Cunard steamship Campania, learning that Mr. Paul Ginther, one of the passengers, was an expert chess amateur, asked him if he would like to play a game with any player who might be on the steamship Philadelphia, then eighty miles distant, if a match could be arranged. Mr. Ginther was pleased with the idea, and the voyagers on the Philadelphia were soon astonished by a Marconi message asking, "Would the Philadelphia like to play chess?" Six fairly good players were found among the passengers, and the game was opened, Mr. Ginther playing against the Philadelphia's team of six. Play continued several hours, until a recess was taken for supper. The ships failed to re-establish communication when the players were ready to resume, and so the first game played by the aid of wireless telegraphy remains unfinished.

The first international Chess Masters' Tournament for the year opened at Monte Carlo on February 3 and closed on February 12. Herr Lasker, the world's champion, was not a participant, but the meeting created universal interest, Pillsbury, Napier and Marshall representing the United States. It was marked by a close finish in the contest between Maroczy and Pillsbury for the first prize. The Budapest expert defeated his Brooklyn rival by only a quarter of a point.

The international cable match for the cup given as a trophy by Sir George Newnes, of London, was played on the 15th and 16th of June between a team composed of members of the Brooklyn Chess Club and an English team. The match was one of the most evenly contested of any for this famous trophy since it was first contended for in 1896, although not quite so close as that of 1901, when there was a tie. In the contest of 1902 the issue was in doubt until the very last moment, when the English club conceded the match to their American opponents by the odd game. When play was stopped three games were unfinished. The secretary of the Brooklyn club then cabled that Hodges and Howell, both of the American team, each held winning positions, and that the game between Newman, of the American team, and Blake, of the English team, should be called a draw. After due consideration the English experts accepted this as a correct statement of the situation, a most sportsmanlike action, thus giving the match to the Americans by one game. Following is the summary:

Board No.	American Team. Player.	Score.	Style of opening.	No. of moves.	British Team. Player.	Score.
1..	Pillsbury	½	Ruy Lopez	77	Lawrence	½
2..	Barry	½	English opening	55	Mason	½
3..	Marshall	0	Queen's gambit dec.	36	Atkins	1
4..	Hodges	1	Queen's gambit dec.	56	Lee	0
5..	Hymes	½	Sicilian defense	44	Mills	½
6..	Voigt	½	Queen's gambit dec.	43	Bellingham	½
7..	Delmar	0	Dutch defense	48	Trenchard	1
8..	Newman	½	Ruy Lopez	55	Blake	½
9..	Howell	1	Ruy Lopez	56	Mitchell	0
10..	Helms	1	Queen's pawn	36	Girdlestone	0

Following is a record of the cable matches for the Newnes trophy. The first match was played with eight players a side, all the others with ten:

Year.	America. Won.	America. Lost.	Great Britain. Won.	Great Britain. Lost.	Year.	America. Won.	America. Lost.	Great Britain. Won.	Great Britain. Lost.	Year	America. Won.	America. Lost.	Great Britain. Won.	Great Britain. Lost.
1896...	4½	3½	3½	4½	1899...	6	4	4	6	1901...	5	5	5	5
1897...	4½	5½	5½	4½	1900...	6	4	4	6	1902...	5½	4½	4½	5½
1898...	4½	5½	5½	4½										

Maroczy was not entered in the Hanover tournament, but Pillsbury again met his match. Janowski, the French champion, won the first prize and Pillsbury again finished second.

The results follow:

Player.	Games won.	Games lost.	Player.	Games won.	Games lost.	Player.	Games won.	Games lost.
Janowski	13½	3½	Tschigorin	9	8	Cohn	7	10
Pillsbury	12	5	Olland	8½	8½	Bardeleben	6½	10½
Atkins	11½	5½	Marshall	8	9	Suechting	6½	10½
Mieses	11	6	Swiderski	8	9	Gemsberg	6	11
Napier	10	7	Gottschall	7½	9½	Mason	5½	11½
Wolf	10	7	Levin	7½	9½	Popiel	5	12

The annual Masters' Tournament at Monte Carlo will open on February 1. Only fourteen competitors will be admitted, but they will play two games against each other. In this way the actual ability of the players will be tested in a manner that will leave no room for doubt. The prize fund is to be distributed according to a system of points for each game won.

American chess experts extended a cordial welcome to Herr Lasker, the world's champion, who arrived in this country on October 12. He has been the guest of the Manhattan, Dutch Arms, Franklin, Chicago and other chess clubs in the later months of the year. The only recorded defeat of Lasker in single combat was by C. S. Martinez, of Philadelphia.

The challenge for the eighth cable chess match for the Newnes Trophy was received from the City of London Chess Club by the Brooklyn Chess Club on November 17.

University chess has taken an advanced position in college sports during the year, and the results are very creditable to the chess clubs of Columbia, Harvard, Yale and Princeton.

The tenth annual match for the intercollegiate trophy was played in New York in the last week of 1901, and Yale surprised her student rivals by scoring her first victory. The eleventh tournament will be played in the Christmas holidays this year. Each college is represented by four players.

Of the ten tournaments played for the intercollegiate trophy Columbia won the first two; Harvard won the following six, and in 1900 Columbia was again the winner. Yale won in 1901. Ten consecutive victories are necessary for permanent possession of the trophy.

Digitized by Google

The scores each year were as follows:

Year.	Columbia.	Harvard.	Yale	Princeton.	Year.	Columbia.	Harvard.	Yale	Princeton.
1892	9	7½	5	2½	1897	6½	10	4½	3
1893	8½	7	5	3½	1898	8½	10	2½	3
1894	3	9	6	6	1899	8½	9	5	1½
1895	8	8½	3½	4	1900	8½	6	3½	6
1896	4½	10	4	5½	1901	6½	5½	7½	4½

The Isaac L. Rice International Intercollegiate Challenge Chess Trophy for annual matches by cable between the universities of the United States and Great Britain was played for in April between teams of six representing Columbia, Harvard, Yale and Princeton in this country and Oxford and Cambridge in England. It was the fourth annual match for the trophy, Great Britain scoring victories in 1899 and 1900, the match of 1901 resulting in an even score, as did the contest for the Newnes Trophy that year. Columbia, Harvard, Yale and Princeton won a very good match this year, and the trophy is now in this country. The American end of the match of 1902 was contested under the hospitable care of the Boston Athletic Association, the team being the guests of the association at their clubhouse. The scores of the four matches were:

1899..... United States, 2½; Great Britain, 3½
1900..... United States, 1½; Great Britain, 4½
1901..... United States, 3 ; Great Britain, 3
1902..... United States, 3½; Great Britain, 2½

The New York State Chess Association has held two meetings during the year. Dr. B. Lasker, brother of the world's champion, won the State championship at the February meeting. C. S. Howell, representing the Brooklyn Chess Club, won the "Rice Trophy" at the midsummer meeting after tying with Julius Finn, of the Manhattan Chess Club. The "Farnsworth Cup" was won by E. Curt, of Brooklyn. The officers of the association for 1902 were: President, Isaac L. Rice; vice-presidents, W. E. Scripture, A. McMartin, Abel E. Blackmar; secretary and treasurer, Dr. L. D. Broughton, Jr., 418 Madison street, Brooklyn. Advisory Committee—D. F. Searle, H. Helms, George H. Thornton, J. M. Hanham, Julius Finn.

COURSING IN CALIFORNIA.

By ROBERT N. WHITNEY.

The sport of coursing flourishes on the Pacific Coast and particularly in the vicinity of San Francisco as it does in no other section of America. At Union Park, situated barely beyond the confines of the metropolis, stakes are run on Saturdays and Sundays throughout the year. The hounds that compete in these stakes are of the highest class, representing as they do the best strains of the richest of old English stock. The maintenance of these high class hounds is made possible by the number of those who favor the sport and the consequently high value of the stake prizes. On an ordinary Sunday of coursing at Union Park it is not unusual to find from one to two thousand visitors in attendance.

The big events at Union Park are all held under the auspices of the Interstate Coursing Club, which in turn has as its parent body the California Coursing Committee, an organization representing a consolidation of the various coursing clubs in California.

Pool selling on the results of all coursing at Union Park is carried on under a five per cent system of profits for the pool seller.

In the great annual event the John Grace Challenge Cup, which bids fair to soon surpass the world-famed Waterloo Cup, in the class of the dogs named and the amount of the purse offered, a record meet is anticipated. This event in 1901, owing to the industrial strike disturbances prevailing at the time, did not reach the value that it did in 1900, when $6,600 was dispersed in prizes to the winners among the sixty-four entries.

During the past few seasons many dogs have been imported from Australia and England, both for racing and breeding purposes and as a consequence the California stock will soon be second to none in the world. America's premier coursing judge, John Grace, presides in the saddle at Union Park, while his son, James F. Grace, handles the slips.

The hares used at Union Park are obtained from the plains of Southern California, and excepting the Spring of the year, are nearly always possessed of speed and staying power.

Of the big stakes run at Union Park, the John Grace Challenge Cup Stakes easily takes precedence. The entries in this stake are limited to sixty-four at a price of $50 each.

The California Futurity Stake, generally run in September, is next in importance. It is for listed puppies whelped each year.

The California Plate Stake, open to all hounds, follows in order of valuation. The Belle Brandon Cup Stake, run at the same time as the California Plate, is for saplings whelped the year previous. The Junior Champion Stake is open to two-year-olds. Following is a summary of the most important stakes run at Union Park during the seasons of 1901-2:

California Plate Stake: February 22, 23 and 24; purse, $1,800. First prize, $400; second prize, $200. Eighty entries. Winner: Eugene Geary's b. w. d. Palo Alto (Emin Pasha—Geary's Bonnie Lass). Runner up; M. Dunlea's w. b. d. Erin (Emin Pasha—Geary's Bonnie Lass).

Belle Brandon Cup Stake: February 22, 23, 24; purse, $350. First prize, $80; second prize, $50. Winner: Sterl & Knowles's w. b. Freeze Out (For Freedom, imp.—Amarosa). Runner up; R. C. Taylor's r. d. Merriwa (Rochester—Wattlebloom).

California Coursing Committee Stake: May 30-31; purse, $1,425. First prize, $300; second prize, $150. Twenty-four entries. Winner: H. A. Deckelman's b. w. d. Sir Pasha (Emin Pasha—Pride of the Valley). Runner up: J. A. Kline's b. w. d. Palo Alto (Emin Pasha—Geary's Bonnie Lass).

Ladies' Day Champion Stake: June 21-22; purse, $1,200. First prize, $300; second prize, $200. Winner: F. Jones's w. b. b. Harlean Gladys (Sir Lawrence—Moonlight).

California Futurity Stake: September 9-10; purse, $3,000. First prize, $1,140; second prize, $570. Winner: Sterl & Knowles's w. d. Cold Shivers (For Freedom, imp.—Amarosa). Runner up: G. Nethercott's b. d. Hickory Dick (Rochester—Little Wonder).

Junior Champion Stake: September 28-29; purse, $1,000. First prize, $200; second prize, $100. Fourteen entries. Winner: H. Lynch's b. d. A. J. Martin (Hughie, imp.—Mystic Maid). Runner up: J. H. Rissiter's w. d. Royal Archer (For Freedom, imp.—Daisy Hill).

John Grace Challenge Cup Stakes: October 19-20; purse, $3,750. First prize, $700; second prize, $400. Winner: A. R. Curtis's b. d. Beacon (Skyrocket—Buenretiro). Runner up: A. R. Curtis's r. d. Rector (Chartist—The Fram, imp.).

1902.—California Plate Stake: February 22-23; purse, $1,800. First prize, $300; second prize, $160. Winner: D. J. Healey's b. w. d. Sisquoc (Emin Pasha—Wave). Runner up: A. R. Curtis's b. d. Beacon (Skyrocket—Buenretiro).

Belle Brandon Cup Stake: February 22-23; purse, $400. First prize, $100; second prize, $50. Winner: Condrey & Raught's b. w. b. Silver Heels (Fetter Free, imp.—Daisy Belle). Runner up: J. J. Maloney's f. b. Topsy—Turvy (Happy Day—Gercel).

California Coursing Committee Stake: June 1; purse, $1,425. First prize, $250; second prize, $150. Sixteen entries. Winner: Dr. F. P. Clark's r. d. Rector (Chartist—The Fram, imp.).

Ladies' Day Champion Stake: July 6-7; purse, $1,500. First prize, $300; second prize, $200. Sixteen entries. Winner: Ed Walsh's w. f. d. Sacramento Boy (Winged Foot—Tipperary Lass). Runner up: T. J. Cronin's w. f. d. Vandal (Border Ruffian—Daisy Hill).

California Futurity Stake: August 30-31; purse, $3,400. First prize, $992; second prize, $450. Sixty entries. Winner: George Nethercott's b. w. d. Pocotelli (Emin Pasha—Little Wonder). Runner up: W. Raught's b. w. b. Belle Free (Fetter Free, imp.—Daisy Belle).

Junior Champion Stake: September 27-28; purse, $1,000. First prize, $200; second prize, $100. Twenty-eight entries. Winner: P. Tiernan's r. b. Reta S. (Fear Not—Mary Ann). Runner up: W. Raught's b. w. d. Mickey Free (Fetter Free—Daisy Belle).

John Grace Challenge Cup Stake: October 18-19; purse, $6,640. First prize, $1,500; second prize, $700. Sixty-four entries.

Each year in November a three days' meet on the plains of California is held under the auspices of the Interstate Coursing Club. A summary of the 1901 meet at Petaluma follows:

1901 California Cup Stake, run under the auspices of Interstate Coursing Club at Petaluma, November 12, 13, 14, 1901; purse, $1,000. First prize, $200; second prize, $125. Eighty-eight entries. Winner: G. M. Malcolm's b. w. d. Acolus (For Freedom, imp.—Golden Russet). Runner up: D. J. Healey's w. b. b. For Glory (St. Lawrence—Firenzi).

In the city of Los Angeles coursing similar to that held at Union Park, but upon a much reduced scale, occurs ten months of the year.

CRICKET.

By F. F. KELLY, Secretary of the New York Cricket Association.

Cricket enjoyed a lively season, like all other sports in America during the past year. There were two international matches, the American representatives losing one match and winning another. The international contest between Canada and the United States was decided in Philadelphia, and the American experts captured the event by an inning and 104 runs. The other international affair was between the famous team of Lord Hawke and the best players of California. Lord Hawke's aggregation won by 3 wickets and 30 runs. The championship of the New York Cricket Association was left undecided, the Columbia Oval and Essex County teams having tied for first place.

From the interest taken in the sport this season it is apparent that this old game of the Britons is gaining a big following among native-born Americans, and there is reason to believe that it will eventually become one of the popular sports of the country. The game is now being played by the students of Harvard, the University of Pennsylvania and several other colleges. At Harvard more than one hundred men indulge in this interesting sport.

The following are the statistics of the season of 1902:

METROPOLITAN DISTRICT CRICKET LEAGUE CHAMPIONSHIP.

	Played.	Won.	Lost.	Drawn.	P. c.		Played.	Won.	Lost.	Drawn.	P. c.

INTER CITY MATCHES.

August 2, at Philadelphia.—All New York vs. All Philadelphia. Score, New York, 141 runs; Philadelphia, 163 runs for 7 wickets. Philadelphia won by 3 wickets and 22 runs.

August 30, at Bayonne, N. J.—All New York vs. All Philadelphia. Score, Philadelphia, 117 runs; All New York, 75 runs. Philadelphia won by 42 runs.

VETERANS' MATCH.

All New York vs. All Philadelphia (over 40 years), June 19, at Brooklyn: Philadelphia Veterans, 129 runs; New York Veterans, 49 runs. Philadelphia Veterans won by 80 runs.

INTERNATIONAL.

September 12 and 13, at Philadelphia.—United States vs. Canada. United States, 287 runs; Canada, 49 runs and 134 runs. United States won by an inning and 104 runs.

November 26, at San Francisco.—Lord Hawke's English Eleven vs. Eighteen of California Cricket Association, California, 125 runs; Lord Hawke's eleven, 155 runs for 8 wickets. Lord Hawke's team won by 3 wickets and 30 runs.

NEW YORK CRICKET ASSOCIATION.

Owing to the lateness of the season, the championship of the minor league was not actually decided, the Columbia Oval and Essex County clubs being tied for first place. The individual prizes, however, were won by A. Bunce, of the Paterson club, for batting, and H. O. Wilkinson, of the Columbia Oval Club, for bowling.

CURLING.

By DAVID FOULIS.

The Curlers were active in this vicinity last season, the booming of the curling stones being heard frequently at Van Cortlandt Lake. The most important match of the season was the contest for the John Dewar Challenge Cup and four gold medals. In the final round the Utica team easily defeated the Empire City Rink by the overwhelming score of 21 to 10. The coming curling will be the most active ever seen in this country, owing to the fact that a number of Scotch experts will cross the Atlantic to measure their skill with the best Curlers of Canada and the United States.

John Dewar Challenge Cup and four gold medals to the winning rink, played at Cortlandt Lake, February 12 and 13, 1902. 15 rinks competing.—Final Round—Utica No. 1 vs. Empire City.—A. H. Mirsac, vs. Adam Manwell, F. M. Calder vs. Adam Manwell, W. F. Allen vs. Joseph Connell, J. E. McLoughlin, skip 21, vs. W. Dunn Manwell, skip 10.

Skip McLoughlin's rink won the challenge for the Utica club, and four gold medals for the rink, the latter to be personal property of the players in the rink.

North vs. South of Scotland match for the Dalrymple Medal, Van Cortlandt Lake, January 12, 1902.—Won by South by a majority of 7 shots. Treasurer George W. Peene won the Dalrymple Medal, Robert Dillin the Hoagland Flag, and W. G. Fraser the Fitzpatrick Medal. All three trophies won by the Southern rinkers.

SIX-DAY BICYCLE RACE.

The fourth in the series of six-day team races on the bicycle track, inaugurated in Madison Square Garden, New York City, in 1899, was started at 12:01 a. m., Monday, December 8, 1902, and ended at 10:40 p. m. on the succeeding Saturday. Of the large number of teams which started accident or weariness compelled the retirement of a considerable proportion, and only eight teams participated in the finish, which was fully as exciting as that of the previous year. These were so closely bunched at 10:08 p. m. that all were called off the track and notified that their final positions would be determined by one-mile sprints with a flying start. The leaders were to contend for first and second place; the teams tied for second place were to race for third, fourth and fifth money; and the two in third place would sprint for the sixth and seventh positions. Leander, of the Leander-Floyd Krebs team, and Jacobson, of the Newkirk-Jacobson team, made a gallant race for the leading honor, and were only two feet apart at the end of the mile, which was covered in 2m. 52 1-5s., only the final lap being a fast one. Jacobson led at the start and it was not until the seventh lap that Leander passed him and got a lead of ten yards. Jacobson put on terrific speed in the final lap, but Leander outsprinted him and won. Better time was made by McFarland in the second sprint, he beating J. Bedell by 15 yards in 2m. 41 4-5s., with Moran third. Leander's time was excelled again by Root in the third sprint, he finishing his mile in 2:45 3-5. The distance covered in the race as a whole was another falling off from the record made in 1899, and the result would appear to indicate that the long-distance riders are not developing endurance of speed, the distance growing less with each year:

The positions of the men at the end of the race were as follows:

	Miles.	Laps.	Feet.		Miles.	Laps.	Feet.
1. Leander and Floyd Krebs.....	2,477	3	2	5. Moran and Stinson	2,477	2	..
2. Newkirk and Jacobson.....	2,477	3	..	6. Root and Galvin.....	2,477	1	..
3. McFarland and Maya.....	2,477	2	..	7. Keegan and Peterson.....	2,477	1	..
4. Bedell Brothers	2,477	2	..	8. Barclay and Franz Krebs.....	2,477	0	..

The prizes paid were: First, $1,500; second, $1,000; third, $750; fourth, $500; fifth, $300.

RECORDS OF PREVIOUS RACES.

Winners and scores of the last four races held in Madison Square Garden:

	Miles.	Laps.		Miles.	Laps.
1898 Miller	2,007	4	1898 Aaronson	1,729	5
Waller	1,985	2	Noan	1,721	7

FENCING IN 1902.

By GEORGE SANDS.

Fencing enjoyed a pronounced boom during the season of 1901-1902, especially among college students. In fact, it was the liveliest season that fencing has ever enjoyed in this country. This is plainly shown by the fact that no less than seven teams took part in the intercollegiate championship, including teams from West Point and Annapolis. Although it was the initial appearance of the West Point cadets in this contest, the young soldiers easily carried off first honors, with the fine record of 40 victories and 14 defeats. Annapolis, which won the championship in 1901, was beaten out for second place by Columbia University. The sailors lost by a single point. The representatives of the Fencers' Club of New York did the best work of the season. Most of the points in the national championship went to the members of this old organization. Fitzhugh Townsend has, perhaps, the best individual record of the year. In the senior team championship at foils he did not lose a single bout. He seemed to be off-color at the national individual championships, for the best he could do was to get second place to Charles Tathem in the dueling sword competition. James P. Parker, of the Boston A. A., gave an exceptionally clever exhibition at the national championships and surprised the New York experts by winning the contest with foils.

There is every indication that the graceful pastime of fencing is rapidly growing in popular favor.

Important matches of the year:

National Championships, Season 1901-1902.—Held in the gymnasium of the New York Athletic Club on April 25.—Foils—Won by James P. Parker, Boston Athletic Association; second, Charles G. Bothner, New York Athletic Club; third, D. Crackenthorpe, Fencers' Club of Washington. Dueling Swords—Won by Charles Tathem, Fencers' Club of New York; second, Fitzhugh Townsend, Fencers' Club of New York; third, D. M. Wood, Fencers' Club of New York. Sabres—Won by A. V. Z. Post, Fencers' Club of New York; second, Charles G. Bothner, New York A. C.; third, J. Langdon Erving, Fencers' Club of New York.

Intercollegiate Championship at Foils.—Held at New York A. C. on March 30.—Won by West Point with a score of 40 victories and 14 defeats; second, Columbia University, with 35 victories and 19 defeats; third, Annapolis, with 34 victories and 20 defeats. Cornell finished fourth, Harvard fifth, Yale sixth, and Pennsylvania seventh. West Point team, G. V. Strong, S. D. Breckenridge and W. M. Nichols. Columbia team, F. B. Clark, E. Piton, Jr., and L. E. Mahan. Annapolis team, J. P. Lannon, G. J. Rowcliffe and F. S. Whitten. Cornell team, H. F. Blount, W. L. Bowman and B. O. Frick. Harvard team, T. D. Roberts, F. V. Palfrey and R. M. Henderson. Yale team, E. H. Delafield, G. H. Spaulding and E. H. Calmer. Pennsylvania team, L. B. Holland, N. L. Knipe and C. Dominguez.

Junior Team Championship at Foils.—Held at Fencers' Club.—Columbia defeated Yale in the final round by a score of 5 bouts to 4 bouts. Teams from the New York Turn Verein and the Fencers' Club of New York also competed. The Columbia team was composed of F. B. Clark, E. Piton and L. E. Mahan. This contest was for the Neubold Morris trophy.

Senior Team Championship at Foils.—Held at the Fencers' Club on April 15.—The team of the Fencers' Club of New York defeated the New York A. C. team by a score of 5 bouts to 3 bouts in the final round. In the preliminary round the New York A. C. defeated the Boston A. A. by a score of 7 to 0, and the Fencers' Club of New York defeated the Fencers' Club of Washington, by a score of 7 to 1. Teams—Fencers' Club of New York: Fitzhugh Townsend, A. V. Z. Post and Charles Tathem; New York A. C.: C. G. Bothner, W. T. Heintz and Dr. G. M. Hammond; Boston A. A.: J. P. Parker, S. Cabot and A. Brownell; Fencers' Club of Washington: Dr. Crackenthorp, W. W. Wright and James Early. Judges, John Allaire, Dr. M. Echeverria, W. S. O'Connor and C. G. Thatcher. Fitzhugh Townsend won every bout in which he competed.

Junior Open Foils.—Held at the New York A. C. on January 21.—Won by C. W. Davis, Fencers' Club of New York; second, Sewell Cabot, Boston A. A.; third, A. L. Queneau, Columbia University.

HOCKEY.

The championship of the Intercollegiate Hockey League, composed of Yale, Brown, Princeton, Harvard and Columbia, was won by Yale in 1902. After the regular series had been played, a special series for the championship was played between Yale and Harvard, Yale again winning. The standing of the teams in the regular series was as follows:

Team.	Won.	Lost.	Per cent.	Team.	Won.	Lost.	Per cent.
Yale	4	0	1.000	Brown	1	3	.250
Harvard	3	1	.750	Columbia	0	4	.000
Princeton	2	2	.500				

Amateur Hockey League, composed of the Crescent A. C., New York A. C., Hockey Club of New York, St. Nicholas Skating Club and Brooklyn Skating Club. Championship won by the Crescent A. C. team.

STANDING OF THE TEAMS.

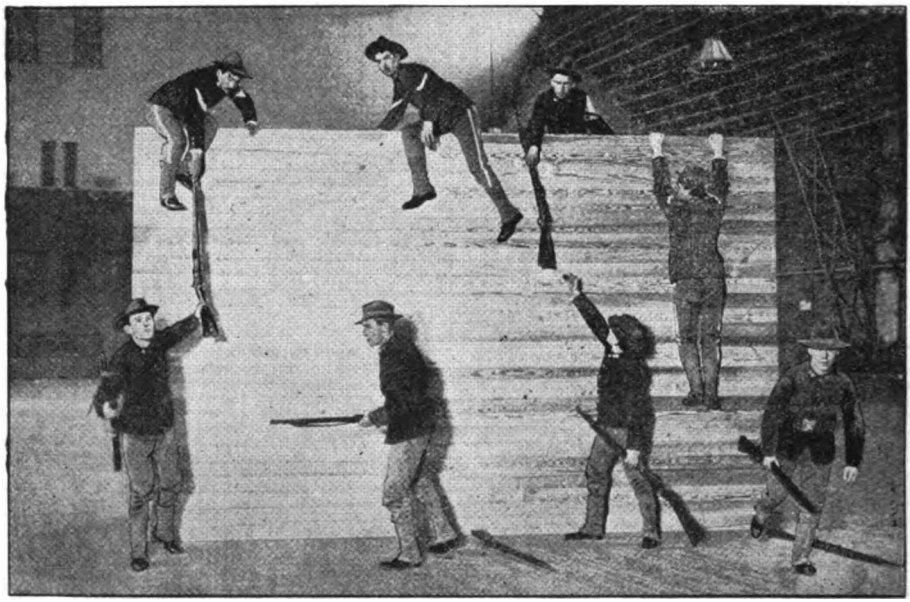
Team.	Won.	Lost.	Per cent.	Team.	Won.	Lost.	Per cent.
Crescent A. C.	6	2	.750	St. Nicholas S. C.	3	5	.375
New York A. C.	6	2	.750	Brooklyn S. C.	0	8	.000
Hockey Club of N. Y.	5	3	.625				

In a special game played between the first two teams to decide the championship the Crescent A. C. team won.

Intermediate Hockey League, composed of the Kensington A. C., Heffley School, Stevens Institute, College of the City of New York, St. Francis Xavier, Bedford A. C., and Naval Reserves. Championship won by the Kensington A. C.

New York Interscholastic Hockey League, composed of the Cutler, Berkeley, Dwight, Columbia Grammar, Drisler and De La Salle schools. Championship won by the Cutler team.

Long Island Interscholastic Hockey League, composed of Polytechnic Preparatory School, Brooklyn Boys' High School, Erasmus Hall High School, Brooklyn Latin School and Pratt Institute. Championship won by the Polytechnic Preparatory School team.



An Exercise at the Military Tournament.

MILITARY ATHLETIC LEAGUE.

The Military Tournament takes place annually at Madison Square Garden, New York City. It is held under the auspices of the Military Athletic League, an organization made up of National Guardsmen. The tournament, which lasts a week, is sanctioned by the United States authorities, and detachments of artillery, cavalry and infantry are always detailed by the War Department to give exhibitions during the week. Each night of the tournament there is a review of the Regulars and National Guardsmen by some prominent official or army or navy officer. After the review there are musical drills, battle drills and mimic warfare. Altogether it is one of the most picturesque fixtures held in the metropolis during the year.

The profits of the tournament are used for the purpose of supplying the army posts and ships of the navy with gymnasium apparatus. During the past two years more than $20,000 has been spent by the league in this way. These athletic outfits, furnished by the Military Athletic League, give the enlisted men an opportunity to improve their physical condition that they could get in no other way. In connection with the military tournament there are a great number of athletic events, and the organization winning the biggest number of points in these contests wins the championship trophy. The Twenty-second Regiment won the trophy for the fifth time at the last tournament. The Twenty-second Regiment scored a total of 89 points, while its next nearest competitor, the Twenty-third Regiment, scored but 46 points.

The officers of the League are: Colonel Charles H. Luscomb, president; Lieutenant-Colonel H. H. Treadwell, of the Twenty-second Regiment, and Lieutenant-Commander Alfred B. Fry, Major W. A. Turpin, Thirteenth Regiment, vice-presidents; Captain John J. Dixon, Forty-seventh Regiment, recording secretary; Brevet Major David Wilson, Second Battery, corresponding secretary, and Lieutenant-Colonel N. B. Thurston, Ordnance Officer on General Roe's staff and former Deputy Police Commissioner, treasurer.

Six tournaments have been held since the inception of the League.

SOCIALIST LABOR PARTY.

NATIONAL EXECUTIVE COMMITTEE.

The National Executive Committee of the Socialist Labor party is composed as follows: Julius Hammer, Eber Forbes, Jon J. Kinneally, Rudolph Katz, Adolph Klein, August Gilhaus and E. Siff. Julius Hammer is the recording secretary and Eber Forbes the treasurer of the committee.

Henry Kuhn, 2-6 New Reade street, New York City, is not only the national secretary, but acts as financial secretary for the committee. He is not officially a member of that body, and while he is permitted to have a voice in its deliberations, he has no vote.

The local organizations of the Socialist Labor party are known as "sections," and these sections exist in thirty-two States and two Territories, while many persons who reside in parts of the country where there are no such sections are members-at-large of the national body, in which the requirements of membership provide that each applicant shall acknowledge his belief in the principles of the party and assert that he has withdrawn from all affiliations with other political parties.

The National Association of Democratic Clubs.

The National Association of Democratic Clubs was organized July 4, 1888. Plans looking toward this result were laid two years previously. The original number of twenty-one clubs has increased until, during the campaign of 1900, almost ten thousand clubs, with an aggregate membership of 1,200,000 were in existence.

The Association acts in complete harmony with the Democratic National Committee and the Democratic Congressional Committee. The helpfulness of the National Association of Democratic Clubs to its party has been marked, and the officers of the association have again and again received the highest commendation from the party leaders.

The objects of this association are set forth in the second article of the constitution, which reads:

"To foster the formation of permanent Democratic clubs and societies throughout the United States and insure their active co-operation in disseminating Jeffersonian principles of government;

"To preserve the Constitution of the United States, the autonomy of the States, local self-government, and freedom of elections;

"To resist revolutionary changes and the centralization of power;

"To oppose the imposition of taxes beyond the necessities of government economically administered;

"To promote economy in all branches of the public service;

"To oppose unnecessary commercial restrictions for the benefit of the few at the expense of the many;

"To oppose class legislation, which despoils labor and builds up monopoly;

"To maintain inviolate the fundamental principles of Democracy—'Equality before the Law'; and

"To co-operate with the regular organization of the Democratic party in support of Democratic men and Democratic measures."

All political clubs and societies which concur in the object of this association are eligible to membership.

The regular convention of the association is held once every four years after the National Democratic convention, and at a time and place fixed by the Executive Committee.

Much of the association's early success was due to the energetic efforts of that distinguished Democrat, Chauncey F. Black, of Pennsylvania, who was at the head of the organization for a number of years. Mr. Black was succeeded by Representative Benton McMillin, of Tennessee, who subsequently became Governor of that State. He resigned, and William Randolph Hearst, of New York, was appointed, by a unanimous vote of the Executive Committee, Mr. McMillin's successor. At the Indianapolis National Convention he was unanimously elected. The activity of the association under this gentleman's leadership was a conspicuous feature of the campaign of 1900, and the Democratic Congressional campaign of 1902. The great mass meeting in and about Madison Square Garden in 1900 is declared by many to have caused the subsequent Democratic victory in Greater New York. A similar demonstration in 1902 in the interest of the Democratic Congressional candidates brought about the election of every Democratic candidate with the exception of one, despite the fact that the previous reapportionment was designed to make four districts safely Republican.

The president of the association was, after each campaign, formally thanked by letter for the efforts of the association by the Democratic National Committee and the chief candidates for office.

The officers of the association are: William Randolph Hearst, President; Max F. Ihmsen, Secretary; Executive Committee, James K. Jones, Ark., chairman; Chauncey F. Black, Pa.; Edward Murphy, Jr., N. Y.; Benton McMillin, Tenn.; George H. Lambert, N. J.; C. C. Richards, Utah; James L. Slayde, Texas; W. J. Stone, Mo.; S. M. White, Cal.; James Creelman, N. Y.; E. P. Howell, Ga.; E. Chambers Smith, N. C.; John R. McLean, Ohio; Charles J. Faulkner, W. Va.; J. L. Mitchell, Wis.; J. C. Dahlman, Neb.; Blair Lee, Md.

The headquarters of the association is Room 11, Tribune Building, New York City, with a branch office in Washington, D. C.

Basis of Congressional Representation.

The basis for the apportionment of Congressional representation depends upon the population of the various States. At the institution of the Government, in 1790, the apportioning of Representatives was made by Congress, and this method continued until 1850, when Congress not only determined that the number of members of the House should be 233, but directed that in the future the Secretary of the Interior should make all necessary changes in this apportionment. In 1860, therefore, the changes necessitated by the taking of the Eighth Census were made in accordance with the provisions of this law, but, in 1862, Congress again fixed the total number of members, and, as all subsequent changes have been made by Congress itself, the act of 1850, which delegated this power to the Secretary of the Interior, may be said to have been repealed by implication.

The act of Congress, approved January 16, 1901, provides that after March 3, 1903, the House of Representatives shall be composed of 386 members, each of whom shall represent a district composed of contiguous territory, and it is also provided that, as each new State is admitted to the Union, the Representatives assigned to it shall be in addition to this membership and shall be elected as Representatives-at-Large until such time as the Legislature shall redistrict the State which elected them.

The following table shows the ratio of Congressional representation since the institution of the Government:

State.	Constitution. Ratio 30,000.	1800 Census. Ratio 33,000.	1810 Census. Ratio 33,000.	1820 Census. Ratio 35,000.	1830 Census. Ratio 40,000.	Fifth Census. Ratio 47,700.	1840 Census. Origin of Names of States, Their Popular Sobriquets and the Flower Selected as State Emblem.

Alabama was named in 1817, from its principal river. The principally accepted authority says that De Soto's last battle was in 1541 at Alibamo, on the River Yazoo, where there was a strong fortress of a tribe called sometimes Alibamos and sometimes the Alabamus. Its flower is the golden rod.

Alaska is from the Indian word, Alakshak, meaning "large country."

Arkansas took its name in 1819 from its principal river, and that from the tribe of Indians once living near its mouth. Schoolcraft ascribes the name to the fact that a species of acacia grew there from which the Indians made bows, which led to their being called "arc, or bow Indians." Sometimes it is called the Bear State, on account of these animals, which formerly lived in its forests. Its flower is the apple blossom.

Arizona is thought to come from the Aztec word Arizuma, meaning a rocky country.

California received its name from the officers of Cortez, who found it in a Spanish romance which told of "the great island of California, where a great abundance of gold and precious stones are found." Its flower is the California poppy.

Colorado is named from its chief river, the word being Spanish and signifying ruddy or colored. It is also known as the Centennial State, from the fact that it was admitted to statehood in 1816. Its flower is the purple columbine.

Connecticut was so called from the Indian name of its principal river, spelled originally Quin-nah-tukyut and signifying "land on a long tidal river." It is popularly known as the Nutmeg State, from the fact that its residents were formerly said to have made nutmegs from wood, for sale to the unwary, and also as the Freestone State, from the quantities of that material found there.

Dakota took its name from the tribe of Indians which formerly inhabited the State and the vast regions in its neighborhood, the word meaning originally "leagued."

Delaware was named in 1703, from Lord de la Warr. It is sometimes called the Diamond State, from its small size and supposed great worth. Its flower is the peach blossom.

Florida was so called by Juan Ponce de Leon in 1512, because it was discovered on Easter Sunday, in Spanish Pascua Florida. It is often called, from its shape, the Peninsular State. Its flower is the japonica.

Georgia was named in 1732 in honor of King George II.

Idaho is the Indian word for "Gem of the Mountains." Its flower is the kyringia.

Illinois was named in 1809 from its principal river. The name is said to signify "superior men." It is called the Prairie State, from the extent of its prairies. Its flower is the rose.

Indiana was so called in 1802 from the American Indians. It is known as the Hoosier State, the word being a corruption of Husker, formerly a common term for "bully," in the West. Its flower is corn.

Iowa took its name in 1838 from a tribe of Indians who lived within its borders, and the word is said to be a contraction of Ah-hee-o-va, meaning sleepers. It is also known as the Hawkeye State, the term said to have been derived from the name of a famous Indian Chief of that region. Its flower is the wild rose.

Kansas takes its name from its great river, which in turn received its appellation from the Indians who lived along its banks. The name is said to come from Cayas, which was given the region by De Soto.

Kentucky was so called from its principal river, in 1782. The word is said to mean "at the head of the river."

Louisiana was named by La Salle in 1682, in honor of Louis XIV. of France. It is popularly called the Creole State. Its flower is the magnolia.

Maine was so called as early as 1622, from the description in its charter calling it the "mayne land," meaning the main or chief portion of the territory. It is known as the Lumber State, from the large amount of that material produced within its borders, and also as the Pine Tree State, for the same reason. Its flower is the pine cone.

Maryland was named in honor of Henrietta Maria, Queen of Charles I., in his patent to Lord Baltimore in 1632.

Massachusetts derived its name from a tribe of Indians who lived in the neighborhood of the present location of Boston. The word is a compound of "massa," meaning great, and "wadchuach," meaning hills or mountains. It is known as the Old Colony State, from the fact that the first colonies of New England settled on its shores, and the Bay State, it having been originally known as the Colony of Massachusetts Bay.

Michigan was named from the lake on its borders. The word, it is believed, is derived from the Chippewa "mitcha" and the Algonquin "gan," meaning great lake. It is known as the Lake State, from the fact that it borders on four great lakes. Its flower is the apple blossom.

Minnesota takes its name from its chief stream, which, in the Indian dialect, signifies "slightly turbid water." Its flower is the moccasin.

Mississippi takes its name from the great river, the title meaning in Indian "the whole river," so called because many streams unite in making it. Its flower is the magnolia.

Missouri was so called in 1821, from its principal river, the word signifying in the Sioux language, "muddy water."

Digitized by Google

Montana took its name from the Rocky Mountains, which traverse the State. Its flower is the bitter root.

Nebraska is named after its principal river. The meaning of the word is disputed. Its flower is the golden rod.

Nevada is named for its mountain chain, which was called after the Sierra Nevadas of Granada.

New Hampshire was called so with reference to the original patentee, who was Governor of Portsmouth in Hampshire, England. It is known as the Granite State, from the fact that its mountains are largely composed of that stone.

New Jersey was so called in 1644 in compliment to one of its original proprietors, Sir George Carteret, who had defended the Isle of Jersey against the long parliament during the civil war in England. It has no State flower, but adopts instead a tree—the sugar maple.

New Mexico takes its name from the Aztec war god Mexildi. Its flower is the crimson rambler rose.

New York was named in honor of the Duke of York and Albany, to whom the territory was granted in 1664. It is known as the Empire State, from its wealth and great population, and the Excelsior State from its motto. Its flower is the rose.

North Carolina (and **South**) were so called in 1654 by the French, in honor of Charles IX. of France, although some claim the honor for Charles I. of England. The former is known as the Old North State and as the Turpentine, it producing large quantities of this material; and the latter as the Palmetto State, from the tree borne on its coat of arms. North Carolina's flower is the chrysanthemum.

Ohio was so called in 1802 from the Indian O-he-zuh, meaning "something great."

Oklahoma is from an Indian word meaning "a beautiful land." Its flower is the mistletoe.

Oregon is supposed to come from a Sioux word, meaning "the great flowing river." Its flower is the Oregon grape.

Pennsylvania was named after William Penn, the entire word meaning Penn's Woods. It is known as the Keystone State, from its having been the central State at the formation of the Constitution.

Rhode Island was so called in 1644, from the Dutch, signifying "redisland." Its flower is the violet.

Tennessee was named in 1796, and the word is said to signify a curved spoon or a bend in the river.

Texas was named by the Spaniards in 1690. The word is said to be derived from the Spanish "tigus," meaning "covered houses," and also from the Indian "tachies," meaning friends. It is known as the Lone Star State, from the emblem on its flag. Its flower is the blue bonnet.

Utah was adopted from the name of the Indians living in that region. Its flower is the sego lily.

Vermont was so called by its inhabitants in their declaration of independence in 1877, from the French words, meaning green mountains. It is also known as the Green Mountain State for the same reason. Its flower is the red clover.

Virginia was named in honor of Elizabeth, England's virgin Queen. It is known as the Mother of Presidents, five of its sons having held that office; as the Mother of States, having been the first settled of the first thirteen States, and also as the Old Dominion.

Washington was named after our first President. Its flower is the rhododendron.

Wisconsin was so named in 1836 from the river of the same name. The word is said to mean "westward flowing." It is popularly known as the Badger State.

Wyoming is an Indian name, a corruption of a word meaning "large plains."

Governors of States, 1902-1903.

State.	Capital.	Name of Governor.	Politics.	Length of term, yrs.	Term expires.	Salary.	State election held	Name of Lieut.-Gov.

STATISTICS OF CITIES.—TABLE NO. 4.—POLICE, SALOONS, SUICIDES AND ARRESTS, BY CAUSES.

(Compiled by the United States Department of Labor.)

[In this table drunkenness includes "common drunk," "drunk and disorderly," and all cases where drunkenness in any form was the primary cause of arrest; disturbing the peace includes all cases of disorderly conduct not attributable to drunkenness; assault and battery includes all cases of assault; vagrancy includes arrests of beggars, tramps, loafers, loiterers, and all persons without apparent means of support; housebreaking includes burglary and all cases of breaking and entering; and larceny includes pocket picking, robbery, and all cases of theft.]

Cities.	Policemen.	Licensed retail liquor saloons.		Arrests for.								Total arrests.	Suicides.
		Number.	Amount of license.	Drunkenness.	Disturbing the peace.	Assault and battery.	Homicide.	Vagrancy.	Housebreaking.	Larceny.	All other offences.

CONGRESSIONAL ELECTION, 1902.

Districts.	
I.—Counties of Camden, Gloucester, Salem.	
Henry C. Loudenslager, Rep.	20,371
Richard T. Miller, Dem.	15,279
Robert T. Seagrave, Pro.	1,128
Loudenslager's plurality	5,092
II.—Counties of Cape May, Cumberland, Atlantic, Burlington.	
John P. Gardner, Rep.	19,966
Thomas A. Gash, Dem.	9,465
Marian R. Owen, Pro.	2 323
D. W. Davis, Soc.	199
Gardner's plurality	10,501
III.—Counties of Middlesex, Monmouth, Ocean.	
Benjamin F. Howell, Rep.	20,014
Jacob A. Geissenhaimer, Dem.	18,345
Robert Bruce Crowell, Pro.	546
Howell's plurality	1,669
IV.—Counties of Hunterdon, Somerset, Mercer.	
W. M. Lanning, Rep.	18,972
Lewis Perrine, Dem.	16,966
Wm. Sarger, Pro.	588
W. H. Wooton, Soc.	381
Lanning's plurality	2,006
V.—Counties of Union, Morris, Warren.	
Chas. M. Fowler, Rep.	21,030
De Witt C. Flannagan, Dem.	19,881
Joel Van Clse, Pro.	883
J. M. Beaman, Soc.	417
Jacob Griev, Soc. Lab.	231
Fowler's plurality	1,159
VI.—Counties of Bergen, Passaic, Sussex.	
Wm. Hughes, Dem.	24,084
Wm. Barbour, Rep.	20,236
Robert F. Richards, Pro.	435
W. H. Wyatt, Soc.	777
Louis A. Magnet, Soc. Lab.	419
Hughes's plurality	3,848

CONGRESSIONAL ELECTION, 1902.

Districts.

I.—Counties of Accomac, Carolina, Essex, Gloucester, King and Queen, Lancaster, Matthews, Middlesex, Northampton, Northumberland, Richmond, Spottsylvania, Westmoreland, and the city of Fredericksburg.

W. A. Jones, Dem.	7,331
M. A. Coles, Rep.	2,762
Jones's plurality	4,569

II.—Counties of Charles City, Elisabeth City, Isle of Wight, James City, Nansemond, Norfolk, Princess Anne, Southampton, Surry, Warwick, York, and cities of Norfolk, Portsmouth, Williamsburg and Newport News.

H. L. Maynard, Dem.	9,746
R. M. Hughes, Rep.	2,917
Maynard's plurality	6,829

III.—Counties of Chesterfield, Goochland, Hanover, Henrico, King William, New Kent, and the cities of Richmond and Manchester.

D. J. Lamb, Dem.	5,300
B. W. Edwards, Rep.	963
Lamb's plurality	4,337

IV.—Counties of Amelia, Brunswick, Dinwiddie, Greenesville, Lunenburg, Mecklenburg, Nottoway, Powhatan, Prince Edward, Prince George, Sussex, and the city of Petersburg.

R. G. Southall, Dem.	4,717
R. T. Vaughan, Rep.	507
Southall's plurality	4,210

V.—Counties of Carroll, Floyd, Franklin, Grayson, Henry, Patrick, Pittsylvania and the city of Danville.

C. A. Swanson, Dem.	10,363
B. A. Davis, Rep.	6,414
Swanson's plurality	3,949

VI.—Counties of Bedford, Campbell, Charlotte, Halifax, Montgomery, Roanoke, and the cities of Lynchburg, Radford and Roanoke.

C. Glass, Dem.	6,313
A. Graham, Pro.	1,412
Glass's plurality	4,901

VII.—Counties of Albemarle, Clarke, Frederick, Greene, Madison, Page, Rappahannock, Rockingham, Shenandoah, Warren and the cities of Charlottesville and Winchester.

James Hay, Dem.	8,461
S. J. Hoffman, Rep.	4,620
Hay's plurality	3,841

VIII.—Counties of Alexandria, Culpeper, Fairfax, Fauquier, King George, Loudoun, Louisa, Orange, Prince William, Stafford and the city of Alexandria.

J. F. Rixey, Dem.	6,618
W. S. Skinner, Rep.	2,311
Rixey's plurality	4,307

IX.—Counties of Bland, Buchanan, Craig, Dickenson, Giles, Lee, Pulaski, Russell, Scott, Smyth, Tazewell, Washington, Wise, Wythe and the city of Bristol.

W. F. Rhea, Dem.	707
C. S. Demp, Rep.	703
Rhea's plurality	4

Digitized by Google

X.—Counties of Alleghany, Amherst, Appomattox, Augusta, Bath, Botetourt, Buckingham, Cumberland, Fluvanna, Highland, Nelson, Rockbridge and the cities of Staunton and Buena Vista.

H. D. Flood, Dem.	9,119
J. Lyons, Rep.	4,235
Flood's plurality	4,884

* Terms begin March 4, 1903. † Appointed by Governor at death of Senator McMillan.

Digitized by Google

New York State Government.

The Governor and Lieutenant-Governor are each elected for a term of two years. Each must be a citizen of the United States, 30 years of age, and must have been a resident of the State for five years preceding his election. The Supreme Court consists of 76 Justices. The State is divided into eight judicial districts and four judicial departments. The Appellate Division is composed of 22 Justices. The Court of Appeals consists of a Chief Justice and six Associate Justices, elected for a term of fourteen years. State Senators are elected for a term of two years, and members of the Assembly for one year each.

The following is a list of New York State officials:

Position.	Name.	Residence.	Salary.

SOCIALIST LABOR STATE COMMITTEE.

Hugo Vogt, recording and corresponding secretary; Henry Kuhn, financial secretary-treasurer; Max Forker, Patrick Murphy, Alfred C. Kihn, Justus Ebert, Stephen D. Cooper.

The Primary Law of New York State.

The Primary law of the State of New York was finally amended by the Legislature of 1901, and has for its object the granting to every registered voter the right to enroll with any political party with which he wishes to affiliate, for the purpose of taking part in the primaries of that party for the ensuing year. Every person registering as a voter is provided with an envelope and secret ballot by the election inspectors. On this ballot he marks with a cross the party for which he has preference, and seals the ballot in the envelope, which is indorsed by the inspectors. The envelopes are opened one week after election, and the political preference of the voter is marked in the enrollment books opposite his name.

Any voter may enroll with a party after he has registered by filing an affidavit with the custodian of primary records, and any person coming of age after the time set for registration may also enroll his name by affidavit.

The time set for the annual primary day is the seventh Tuesday before the day of a general election, except in the case of Presidential elections, when the time set is the tenth Tuesday. A primary is also held in March of a Presidential year for the election of delegates to a State convention, who in turn elect delegates of a National Convention.

The custodians of primary records consist of the county clerks and the police in New York City. A political party has been defined to be an organization which polled at least 10,000 votes at the last election for Governor. Unofficial primaries may be held at any time at the expense of the political parties, provided that a notice must be published the same as for the official primary and the election.

Safe Deposit Companies of the State of New York.

Name.	Location.	Capital.

Pawnbrokers in the State of New York.

Section 5. Every pawnbroker shall, at the time of each loan, deliver to the person pawning or pledging any goods, article or thing, a memorandum or note signed by him, containing the substance of the entry required to be made in his book by the last preceding section, and no charge shall be made or received by any pawnbroker for any such entry, memorandum or note.

Section 7. No pawnbroker shall ask, demand or receive any greater rate of interest than three per cent. per month, or any fraction of a month, for the first six months, and two per cent. per month for each succeeding month, upon any loan not exceeding the sum of one hundred dollars, or than two per cent. per month for the first six months, and one per cent. per month for each succeeding month on any loan exceeding the sum of one hundred dollars.

Section 8. No pawnbroker shall sell any pawn or pledge until the same shall have remained one year in his possession, and all such sales shall be at public auction, and not otherwise, and shall be conducted by licensed auctioneers of the city where the business shall be carried on, or of an adjoining city.

A Review of New York State Legislation During 1902.

Such an unusually large number of important laws were added to the statute books of the State by the last Legislature that the session is regarded as one of the most beneficial that has been held in recent years. The important bills passed were nearly all designed to benefit the public service, and the scarcity of private measures was one of the remarkable features of the session.

ECONOMY IN PUBLIC ADMINISTRATION.

One of the year's most notable achievements in the line of public economy was the reduction of the direct State tax from $10,704,153 to $6,824,306, of which sum $6,100,000 was raised by increasing the indirect taxation of trust and insurance companies to that amount from $2,981,286, which left only $748,000 to be raised by public taxation.

The Legislature abolished the boards of managers of the State hospitals for the insane and transferred the administration of the affairs of such institutions to the State Commission in Lunacy. The appropriation for the construction of new buildings and for the maintenance of inmates was reduced from $4,175,000 to $4,050,000, and it was further provided that, in the future, the cost per inmate at the State hospitals shall be limited to $450, which is a reduction of $100 per patient.

Another step in economical administration of State institutions was taken by a law directing the Governor to appoint a fiscal supervisor of the affairs of all the State charitable institutions. This official will revise all estimates for the maintenance of charitable institutions under State control, and his approval will be required before any such institution may obtain either money or supplies.

New York City Claimed considerable attention from the Legislature.

The Board of Estimate and Apportionment was empowered to readjust all salaries in the city service. This bill was drawn for the purpose of abolishing sinecures, a number of which have crept into existence by the benevolent operation of the new charter.

Another law that struck at the financial system of the city was one permitting a reduction of expenses in the offices of the Sheriff, Register and County Clerk of Kings County.

A law in the interest of economy authorized borough presidents to reduce salaries of officers in their respective boroughs. This law was passed in response to the public demand for retrenchment in expenses for the administration of the affairs of Greater New York. The salary list was so large that there was an outcry against it, and while it was not shown that there was undue extravagance on the part of the city administration, the city charter made it mandatory on the city officials to employ certain persons at salaries greatly in excess of what they would earn in similar positions in private life. Hence the law authorizing the borough presidents to make such reductions in salaries as seemed reasonable.

MORE JUDGES FOR GREATER NEW YORK.

The congestion of legal business in Kings and New York counties has become so serious as to demand special legislation looking to its relief. It was stated that it has frequently been necessary to summon justices from interior counties of the State to assist in the work of trying cases in those counties, with the result that legal matters in country districts are often blocked in consequence of the absence of justices on business in Greater New York. To give immediate relief to this condition, a law was adopted authorizing the appellate division of any judicial department of the State to make assignments of judges when calls were made for their services in other parts of the State; and, under another act, which was also passed, it was provided that no judicial district shall be left without at least two trial justices by reason of such assignments to special duty, a law which was designed to prevent the possibility of any judicial district being left without a justice.

Furthermore, the Legislature enacted that a commission of seven persons shall be appointed to inquire fully into the condition of affairs in the courts of Kings and New York counties, for the purpose of learning what measures are necessary to expedite legal business in those counties, the commission to report to the Governor. At the same time an amendment to the Constitution was adopted, which will be submitted to the people for ratification, authorizing the Legislature to increase the number of justices in any district, except the first and second, to not more than one justice for each 60,000 of the population, or fraction over 35,000; in the first and second districts the apportionment of justices shall not exceed one in every 80,000, or fraction over 40,000, of the population. Another judicial district is to be formed in the second district, and when the additional justices are elected for the new district there will be a reapportionment of justices in the old district.

GOOD ROADS LEGISLATION.

Appreciation of the value of good roads throughout the State was shown by the Legislature, which passed laws increasing the appropriation for such work from $420,000 to $750,000. In addition to this, a law was passed by which the State's contribution to the building and maintenance of country roads was increased $700,000 annually. As Chapter 156 of the Laws of 1902 also provides that the State shall pay 50 per cent of all sums levied by towns for highway repairs, it is believed that this law will induce many towns to keep their roads in better condition than ever before. The State formerly paid 25 per cent of such expenses, leaving 75 per cent to be borne by the towns.

Another law in the interest of good roads authorizes any county in the State to appoint a county engineer, who shall have supervision of road work, and another law authorizes any county to borrow money for the purchase of all necessary machinery and equipment for the construction of roads. By the provisions of still another law, if any Board of Supervisors shall neglect to keep an improved State highway in proper condition, the highway shall be repaired by the State engineer, and the expense therefor shall be charged against the offending county. This law is calculated to prevent neglect of State highways after they have been put in good condition at public expense.

Among other new acts relating to highways in the State are the following: (1) The commissioners of highways shall inspect highways whenever a board of supervisors may so direct, a law which places upon the board of supervisors the responsibility for the neglect of any highway, and is so calculated to keep them watchful of public interest. (2) When the majority of the electors of a town vote to buy a road roller for the improvement of the town roads the town is not only required to buy the roller, but to keep it in running condition. (3) All persons who throw ashes, sticks or anything calculated to injure a road upon a highway are liable to a fine of $10, and any person who fails to pay a poll tax for highway purposes, when assessed, may be fined $5. (4) Commissioners of highways are required to file vouchers of all moneys expended for road work with the town clerk. (5) Snow must be removed from obstructed highways in the country at public expense, a requirement which will, if carried out, make country travel more easy in Winter than it has ever been. (6) Another law provides for the issue of town bonds for the erection of bridges, to be constructed under the supervision of the county engineer and the commissioners of highway, who are to report all matters affecting the work to the towns which pay the expense for such work. (7) It is also provided that no street railway shall operate on any State highway which has been improved except by consent of the State Engineer, who shall prescribe the regulations for the running of cars over such roads. (8) The conflicting claims of adjoining property owners for land taken by the State for highway purposes led the Legislature to enact a law limiting the amount to be paid for gravel banks to $200, except by approval of the county judge and treasurer, in which case not more than $1,000 may be paid for them. (9) Highway repairs may be made without reference to the town voters to an amount not exceeding $1,999, but when a greater sum is needed for such purpose the question of appropriating the money must be submitted to the voters in special town meeting.

A new law affecting the speed of automobiles was adopted by the Legislature, the speed of such vehicles now being limited to eight miles an hour in cities and incorporated villages, and to twenty miles an hour on roads outside such cities and villages.

PIGEON SHOOTING PROHIBITED.

The inhuman slaughter of pigeons at shooting tournaments was prohibited by an act passed in the interest of true sport, and in obedience to a public sentiment which deprecated the wholesale annihilation of whole flocks of birds. The idea was supported by the American and Journal from its inception, as it

Digitized by Google

was shown that at these so-called tournaments many birds were only wounded and were allowed to escape and die after suffering several days from the effects of the shot in their bodies. The sport was shown to be so brutal, and in every respect so demoralizing, that sportsmen throughout the State rejoiced at the passage of the bill.

RAILROADS AND CANALS.

The recent extension of the surface trolley lines throughout the State has made much special legislation on the subject of such roads necessary. By a new law, passed at the last session, no new trolley line in the country districts may parallel a competing line except by special permission of the State Railroad Commission.

Another railroad law allows a railroad to convert its bonds into stock.

The Pennsylvania Railroad tunnel bills which became laws authorize the Board of Aldermen to grant franchises and the Board of Rapid Transit Commissioners to supervise the construction of two tunnels under the North River, Manhattan Island and the East River, from Jersey City to Brooklyn, that the railroad may make direct connection with the Long Island Railroad, which it controls.

The New York Central Railroad Company came in for a share of good legislation. The company has been hampered for lack of space at its Forty-second street terminals by reason of inability to secure additional ground for trackage, but by an act of the Legislature it was authorized to make such changes in the Park avenue tunnel as will afford better facilities for handling the immense amount of traffic on its lines at the Grand Central Depot. Another law in the interest of the same company and its patrons was one permitting it to change the motive power of trains running through the tunnel. The change is to be adopted by May 1, 1905, after which date no steam locomotives are to be operated in the tunnel.

The New York & New Jersey Railway Company was allowed an extension of four years in which to complete its tunnel between New Jersey and Manhattan Island, under the North River.

The Dock Department of the city was authorized to condemn water-front property on the North River without consent of property owners, in order that the improvements along the water front, which have long been in abeyance, might be expedited.

The demand of the canal boatmen for a berth on the North River was heeded, and a law was passed authorizing them to secure a harbor for that purpose. They have heretofore been confined to a small haven in the North River.

It was decided by the Legislature that all trolley and other railroad companies crossing State bridges over State canals shall keep such bridges in repair and shall be responsible for damage resulting from their use of such bridges.

The long-mooted project for a canal between Hempstead and Jamaica bays, across Long Island, was discussed by the Legislature and a law was passed appropriating $500 for a survey of the proposed route of the new waterway.

The rapid transit tunnel also received some attention from the Legislature, and the contractor constructing it is authorized to assign the operation of the tunnel to a company already in existence or that may be organized after the tunnel is completed.

A MEMORIAL TO PRESIDENT M'KINLEY.

The State is to remember President McKinley by erecting a monument in Niagara square, Buffalo, at an expense of $100,000.

The assassination of President McKinley induced the Legislature to pass a law branding as felony the preaching of any political doctrine calling for the death of any executive officers of the Government or the overthrow of existing government, either by speech or writing.

A law that will facilitate appeals in murder cases was passed. It provides that in all cases where the judgment is death the convicted prisoner's appeal must be made before the Court of Appeals within six months after the prisoner takes such appeal. The time may, however, be extended by the court which passed sentence.

The extreme penalty for attempting murder was increased from ten years to twenty-five years.

LAWS AFFECTING BUSINESS AND EMPLOYMENT.

Proceedings toward the dissolution of a moneyed corporation may be instituted by the Superintendent of Insurance or of Banks, but the actual proceedings must be taken by the Attorney-General of the State, and the charges of receivers for their services are limited to a certain reasonable sum. The new law was passed to protect creditors of such corporations from the rapacious charges of receivers and appraisers.

All veterans of the civil and Spanish wars employed in the State service are to be allowed leave of absence from their labors on Memorial Day without loss of pay.

A law extending and regulating the liability of employers for damages to employes suffering injury while engaged in active labor was passed.

The civil service laws were amended so that war veterans appointed to positions in the civil service shall not be subject to the probationary period, and veterans of the Spanish-American war are also exempt from dismissal from civil service positions except for incompetency and misconduct. Provisional appointments to the civil service are not to be made for a period longer than two months.

All gas companies are authorized by the Legislature to acquire natural gas wherever it is procurable for sale in addition to their manufactured product.

The Legislature appropriated $50,000 for the promotion of beat culture in the State.

The racing associations throughout the State are now to be required to pay a sum aggregating $98,000 per year, to be applied toward the support of agricultural fairs.

The use of a label without legal authority was made a misdemeanor.

The right of married women to bring action against employers for wages due them was upheld by the Legislature, which passed a law giving them the right to sue in their own name and behalf for such purposes.

The sale of imitation butter was prohibited except under certain restrictions.

Savings banks were formerly prohibited from investing in railroad bonds, but by the terms of a new law such institutions are now allowed to invest their deposits in such securities.

Savings banks in this State are now also allowed to invest in the bonds of Los Angeles, California. This indicates that Los Angeles bonds are now regarded as good securities.

PROPOSED CONSTITUTIONAL AMENDMENTS.

Five proposed amendments to the State Constitution were passed in concurrent resolution, and will be submitted, as required in such cases, to the Legislature of the present year. If approved by both branches they will be submitted to the popular vote. Two of the proposed amendments affect Article VI., relating to the judiciary. One of them is as follows:

Section 24.—At the general election next after the adoption of this amendment, there shall be elected, and thereafter as the offices become vacant through expiration of term or otherwise, by the electors of the Second Judicial District two Justices of the Supreme Court in addition to the Justices of that court now in office in said Judicial District. The Justices so elected shall be invested with their offices on the first day of January next after their election.

Another provides for an increase of the number of Justices, and reads:

The Legislature may from time to time increase the number of Justices in any Judicial District, except that the number of Justices in the first or second district, or in any of the districts into which the second district may be divided, shall not be increased to exceed one Justice for each 80,000 or fraction over 40,000 of the population thereof, as shown by the last State or Federal census or enumeration, and except that the number of Justices in any other district shall not be increased to exceed one Justice for each 60,000 or fraction over 35,000 of the population thereof as shown by the last State or Federal census or enumeration. The Legislature may erect out of the Second Judicial District as now constituted another Judicial District and apportion the Justices in office between the districts, and provide for the election of additional Justices in the new district not exceeding the limit herein provided.

Digitized by Google

An amendment of importance to the labor element is proposed in the following provision to be added to Article XII.:

The Legislature may regulate and fix the wages or salaries, the hours of work or labor, and make provision for the protection, welfare and safety of persons employed by the State or by any county, city, town, village, or other civil division of the State, or by any contractor or sub-contractor performing work, labor, or services for the State, or for any county, city, town, village or other civil division thereof.

In relation to the payment of debts of the State it is proposed to amend Article VII. as follows:

Section 11.—The Legislature may appropriate out of any funds in the Treasury moneys to pay the accruing interest and principal of any debt heretofore or hereafter created, or any part thereof and may set apart in each fiscal year, moneys in the State Treasury as a sinking fund to pay the interest as it falls due and to pay and discharge the principal of any debt heretofore or hereafter created under Section 4 of Article VII. of the Constitution until the same shall be wholly paid, and the principal and income of such sinking fund shall be applied to the purpose for which said sinking fund is created and to no other purpose whatever; and, in the event such moneys so set apart in any fiscal year be sufficient to provide such sinking fund, a direct annual tax for such year need not be imposed and collected, as required by the provisions of said Section 4 of Article VII., or of any law enacted in pursuance thereof.

The other pending amendment is to Article VIII., relative to the limitation of indebtedness of counties, cities, and towns by exempting New York from the provisions of Section 10, and after January 1, 1901, "except that debts incurred by the city of New York after that date to provide for the supply of water shall not be included."

OTHER IMPORTANT LEGISLATION.

Trustees of places of scenic and historical interest may, by a law passed by the Legislature, recommend improvements of such places under their charge, the expense of which shall be borne by the municipality or other local government in whose jurisdiction they may be located. This act will prove of great value in preserving such places from vandalism and dilapidation.

The Legislature authorized the appointment of a commission to inquire into the causes of floods and to take measures to prevent them in future. The commission which has been appointed is now investigating that interesting subject.

An important step was taken by the Legislature toward the selection of a site for a new public park. It is purposed to reserve the wild and forest land in Suffolk County, on Long Island, for such a recreation ground, and the appointment of a commission to select such lands as may be needed for that purpose was authorized.

The Forest, Fish and Game Commission of the State was also authorized to make contracts for the purchase of An Sable Chasm and adjoining lands for addition to the Adirondacks Park reserve.

The amount of money awarded to rural schools from the public funds is to be increased under the provisions of a law which increases the Free School Fund from $3,500,000 to $3,750,000, of which sum rural schools will receive $332,500.

New York State will be suitably represented at the exposition to commemorate the centennial of the Louisiana Purchase at St. Louis. An appropriation of $100,000 for a State building was authorized by law, and a commission will be appointed to supervise the State interests in the matter.

The tenement house problem was partially solved by the passage of a law requiring all new tenement houses to be provided with air courts 14x8 feet in size, and the opening of dark rooms in old houses to give better light and ventilation.

Municipalities and school districts are to be allowed to raise moneys for public libraries by special tax.

Other bills that became laws during the last session were:

A law authorizing the selection of a new site for the State Industrial School at Rochester.

Authorizing the State Comptroller to issue short time bonds to $6,000,000, in anticipation of revenues to be collected.

Giving the State Racing Commission supervision over the organization of steeplechase corporations.

Authorizing the Governor to remove Coroners.

Authorizing the condemnation of riparian rights for the running of logs on streams.

Requiring concurrent resolutions for the amendment of the Constitution to be so printed as to indicate clearly the matter and manner of such amendments, for the greater convenience of voters.

The term of imprisonment for abduction was increased from five years to ten years.

An amendment to the primary laws was passed by which provision is made for the enrollment of members of political parties in towns.

And another law provides that when town or village elections are held concurrently with general elections, all electors in such towns or villages must be registered.

Regents' Examinations of the State of New York.

By CHARLES F. WHEELOCK, Head Inspector, Albany, N. Y.

Regents' academic examinations furnish a uniform standard for graduation from the high schools and academies of the State of New York, and Regents' credentials based on these examinations are required for admission to the study of the professions in this State.

The examinations are held in about seven hundred high schools and academies of the State in January, March and June of each year, and in New York, Albany, Syracuse and Buffalo also in September. The questions in sixty-one subjects are prepared by experienced educators in the Regents' Office in Albany and over half a million answer papers are written each year. The answer papers are first read and rated by the teachers of the schools, and those that reach a standing of 75 per cent are forwarded to the Regents' Office, where they are finally passed on, those that are rejected being returned in all cases.

The list of subjects in which examinations are held, and the counts assigned to each, is as follows:

Subjects.	Branches.	Counts.	Subjects.	Branches.	Counts.	Subjects.	Branches.	Counts.
English	12	34	Latin	9	26	History, etc.	11	21
German	3	12	Greek	6	19	Other studies	12	25
French	3	12	Mathematics	7	18			
Spanish	3	12	Science	8	20	Total	74	199

PROGRAMME OF EXAMINATIONS.

The date of the examinations for 1903 are: January 26-30, March 25-27, June 15-19 and September 29 to October 1, inclusive. The daily programmes for the year are as follows:

JANUARY AND JUNE (76, ALL) SUBJECTS.*

Monday. 9:15 a. m.	Tuesday. 9:15 a. m.	Wednesday. 9:15 a. m.	Thursday. 9:15 a. m.	Friday. 9:15 a. m.
German, 2d year	English, 2d year	Greek composition	Sallust's Catiline	Writing
French, 2d year	Rhetoric	Plane geometry	Greek, 1st year	Elem. English
Virgil's Eclogues	Amer. selections	Physics	Arithmetic	Cicero's Orations
Adv. arithmetic	German, 1st year	Chemistry	Trigonometry	Medieval history
Algebra	Latin, 1st year	U. S. history and civics	Adv. U. S. history	Business English

REGENTS' EXAMINATIONS.—Continued.

Monday. 1:15 p. m.	Tuesday. 1:15 p. m.	Wednesday. 1:15 p. m.	Thursday. 1:15 p. m.	Friday. 1:15 p. m.
Advanced English	Caesar	English, 3d year	Greek, 3d year	Spelling
English, 1st year	Latin, 2d year	Eng. selections	Homer's Iliad	English reading
German, 3d year	Virgil's Aeneid	Adv. Eng. comp.	Geography	Hist. of literature
French, 1st year	Latin, 3d year	Physiology and hygiene	Phys. geography	Solid geometry
French, 3d year	Xenophon's Ana.	Zoology	Astronomy	Geology
English composition	Greek, 2d year	Economics	English history	Drawing
Roman history	Botany	Bookkeeping	Civics	Business writing
	Spanish, 1st year	Business practice	Spanish, 2d year	
	Spanish, 3d year		History of commerce	
	Business arithmetic			

MARCH (27) SUBJECTS.*

Wednesday. 9:15 a. m.	Thursday. 9:15 a. m.	Friday. 9:15 a. m.
U. S. history	Rhetoric	Writing
Plane geometry	Xenophon's Anab.	Elementary English
Physics	Arithmetic	German, 1st year
	Algebra	Latin, 1st year
	Stenography	Cicero
1:15 p. m.	1:15 p. m.	1:15 p. m.
Advanced English	Geography	Spelling
English composition	Physical geography	Caesar
Physiology and hygiene	English history	Virgil's Aeneid
Bookkeeping	Civics	Economics
		Drawing

SEPTEMBER (25) SUBJECTS.

September examinations are for professional and technical students only.

Tuesday. 9:15 a. m.	Wednesday. 9:15 a. m.	Thursday. 9:15 a. m.
Rhetoric	German, 2d year	Arithmetic
German, 1st year	Plane geometry	Advanced U. S. history
Latin, 1st year	Physics	Stenography
Algebra	U. S. history	Caesar
American selections		
1:15 p. m.	1:15 p. m.	1:15 p. m.
Advanced English	English selections	Physical geography
English composition	Physiology and hygiene	English history
Botany	Economics	Civics
Roman history	Bookkeeping	Drawing

UNIVERSITY CREDENTIALS.

To those who have satisfactorily passed the requisite examinations the University issues the following credentials:

1. **Preliminary (preacademic) certificate.**—Reading, writing, spelling, elementary English, arithmetic, geography.

2. **Medical student certificate.**—1. For matriculates prior to May 9, 1893, for any 20 counts, allowing 10 for the preliminaries, not including reading and writing. 2. For matriculates prior to May 13, 1895, for arithmetic, elementary English, geography, spelling, United States history, English composition and physics; or any 50 counts, allowing 14 for the preliminaries.** 3. For matriculates prior to January 1, 1896, for any 12 academic counts (Regents' examinations only).** 4. For matriculates prior to January 1, 1897, for any 24 academic counts (Regents' examinations only).** But all matriculates after January 1, 1897, must secure 48 academic counts.

3. **Law student certificate.**—Advanced English, English composition, first year Latin, arithmetic, algebra, geometry, English history, U. S. history, civics, economics, or any 36 academic counts.

4. **Dental student certificate.**—Any 36 academic counts or their equivalents (for matriculates before January 1, 1905).

5. **Veterinary student certificate.**—Any 24 academic counts or their equivalents (for matriculates before January 1, 1905).

6. **Academic certificates.**—All preliminaries and the subjects specified for the first year certificate; all preliminaries and any 24, 36, 48, 60, etc., counts, if one-sixth of these counts are in English.† The number of counts that each subject represents is given in the table of groups above. For 24 counts a two-year certificate will be issued, and for 36, 48, etc., counts, a three, four, etc., year certificate will be issued. A new certificate will be given when 12 additional counts, which represent a full year's work, are earned.

First Year Certificate.—No certificate is issued for 12 counts unless it includes the preliminaries and

7. **Academic diploma.**—All preliminaries and any 48 counts, if not less than eight are in English† and not less than six each from the second, third and fourth groups.

Classical Academic Diploma.—This credential will be issued on request to such students as meet the requirements for an academic diploma and have credit for the required classical studies. The required classical studies are as follows: First year Latin, Caesar or second year Latin, Cicero, Virgil, Latin composition, first year Greek, Xenophon or second year Greek, Iliad, Greek composition, Greek history, Roman history.

Advanced Diploma.—This single diploma provides for all academic courses longer than the regular 48 count course covered by the academic diploma above. It is issued only to those who have earned the regular 48 count diploma and 12, 24 or 36, etc., counts in addition. On its face are specified the total counts, its name being determined by the highest multiple of 12.

Honors.—When three-fourths of all the counts for any academic certificate or diploma are won by at least 90 per cent. the credential will be recorded and marked as having been earned "with honor," and the annual report will show how many honor credentials have been issued to each school, with names of recipients.

*The oral examinations in reading may be held any time during examination week at the convenience of the examiner.

**Satisfactory evidence of the completion of four years of high school work after eight years of preacademic work is required as an equivalent, but three years of such work is accepted if it was completed before August 1, 1896.

†Any foreign language may be substituted for English, but the papers of all students who claim this privilege will be revised carefully for English.

OTHER EXAMINATIONS.

The Regents' examinations for licenses to practise medicine, dentistry and veterinary medicine are required by law of all those who wish to practise these professions in the State. They are held at stated times in New York, Albany, Syracuse and Buffalo from questions prepared by the various State Boards of Examiners. The dates of these examinations for 1903 are as follows: January 27-30, May 19-22, June 23-26, September 29-October 2.

Examinations for certified public accountants under the law of 1896 will be held January 28-29 and June 24-25 in New York, Albany, Syracuse and Buffalo. Examinations in sixteen subjects of library science are held in Albany in connection with the State library school only, while examinations in seven subjects for entrance to this school are held in numerous places throughout the United States.

Those wishing to take these examinations should make application in writing to the Regents' Office, Albany, N. Y.

State Assessments, 1901.

The following table, which was prepared for the American Almanac by the State Board of Equalization, shows the equalized value of real and personal estate in the State of New York for 1901, as well as the State tax by counties and the percentage of State tax paid by each county:

Counties.	Assessed value of real estate, 1901.	Assessed value of personal estate, 1901.	Total assessed value of real and personal property subject to local taxation for all purposes, 1901.	Equalized value of real estate.	State tax levied upon each county.		Percentage of State tax paid by each county

New York State Militia.

In his annual report Adjutant-General Nelson H. Henry for the year 1901 presents the following summary regarding the condition of the State Militia of New York:

The Military Code of the State prescribes that all able-bodied male citizens between the ages of eighteen and forty-five years, who are residents of this State, shall constitute the militia, subject to certain exemptions.

The census of the year 1900 gives the population of the State as 7,268,012 persons, of whom 3,614,780 are reported males; of these 953,785 are reported to be foreigners, leaving 2,660,995 males who, at least, are unquestionably citizens and residents of this State. It further shows that of the 3,614,780 males, 2,184,965 are between the ages of eighteen and forty-five years; that of the 953,785 foreigners, there are 838,136 between the foregoing ages, giving as liable to service in the militia, 1,346,829 citzen residents of the State between the ages of eighteen and forty-five years.

Based upon the results obtained at the time of drafts in this State during the War of the Rebellion (of the Spanish-American War no information on this subject is as yet available) the exemptions for mental and physical disabilities, including also those exempted by the provisions of United States laws and the Military Code of the State, can be placed in round numbers at 300 of each 1,000 subject to military service.

Taking into consideratelon that a large number of the young men of foreign birth have, no doubt, become citizens, the State of New York can, therefore, be supposed to have in its population, say 1,000,000 men subject to, and fit for military service. Of these it may be estimated that possibly 250,000 have had, at some time during the last twenty years, military instruction and training.

The National Guard is a portion of the militia, but armed, equipped and ready for service at all times. It numbers 14,410 officers and enlisted men. The Naval Militia is also a portion of the militia of the State, and, like the National Guard, is armed and ready for service at a moment's notice. It numbers 651 officers and enlisted men.

The National Guard is composed as follows:

(Corrected by Adj.-Gen. Nelson H. Henry.)

Organizations.	Brigades.	Regiments.	Battalions.	Signal Corps, troops, batteries and companies.	Commissioned officers.			Enlisted men.						Aggregate.
					General and general staff officers.	Regim'ntal, battalion & company officers.	Total.	Non-commissioned staff officers.	Non-commissioned officers.	Hospital corps.	Field music.	Cooks, artificers and privates.	Totals.

Trans-Manhattan Railroad Tunnel.

The Pennsylvania Railroad Company proposes to construct, at an estimated cost of $40,000,000, a tunnel connecting its terminal in New Jersey with the lines of the Long Island Railroad, which it now owns. This tunnel will pass under the Hudson River, Manhattan Island and the East River, terminating in Queens Borough, and one of the advantages New York City will derive from it will be the erection of a great passenger station to occupy the four blocks bounded by Seventh and Ninth avenues and Thirty-first and Thirty-third streets. A bill authorizing the city to grant the necessary franchise was passed by the State Legislature in March, 1902; received the approval of Mayor Low in April, after a public hearing had been given upon it, and was thereupon signed by Governor Odell. The company on May 27 accepted the proposition of Comptroller Grout that it should pay the city $932,400 for the use of the franchise for twenty-five years; and on June 11 agreed to a proposition increasing this rental to $2,500,000. The Rapid Transit Commission approved the project on June 17, 1902. In the Board of Aldermen the first franchise was defeated on July 22, and a second franchise was under discussion from that time until December 16, when it was approved by the Board, which, at the same meeting, adopted a resolution favoring a franchise sought for the New York and New Jersey Railroad tunnel. The tunnel last named is intended for a trolley line, and it is proposed that it shall strike Manhattan at the foot of Morton street, running thence up to Greenwich street. The company contemplates the continuation and completion of the partly constructed tunnel under the North River, work on which is being prosecuted on the New Jersey side.

The franchise which was granted to the Pennsylvania Railroad Company had been modified in a number of particulars before receiving approval, among the changes being several of much importance. The city was given additional powers not contemplated in the first draft, these including the right of the presidents of boroughs to control all street openings; the delegation of authority to the Health Department to supervise the sanitary arrangements of the tunnel; and the acceptance of terms imposed in regard to the closing of streets and the compensation of persons affected thereby.

The actual work of driving the tunnel will not begin, it is thought, until some time in September, 1903, as the sinking of the shafts to the bottom level of the tunnel will occupy about nine months, and this work must be completed before the driving of the big tubes can be inaugurated. Work upon the shafts will begin simultaneously in New Jersey, Manhattan and Long Island. It is not expected that the tunnel will be completed in every particular in less than three or four years, but prominent officials of the railroad company anticipate that trains will be running through it long before the work is entirely finished. The tunnel will be built to be absolutely safe. It is proposed to run the heaviest trains through it; and the construction will be so strong that such trains may be run from Jersey City through to Long Island continuously at the rate of forty-five miles an hour. The tunnel will be small in order to facilitate its ventilation, and the running of the trains will be one of the means relied upon to clear the tubes of foul air. It is intended to make the roadway the best that can be built, in accordance with the latest developments of railroad science, and the liability to accident will be reduced to a minimum, especially if electricity should be adopted as the motive power. Such accidents as the breaking of an axle, which cannot be provided against, will cause only limited danger, as the tunnel will be so constructed as to make it practically incapable of being wrecked, either from without or within.

Courts of New York.

The Court of Appeals was first organized under the Constitution of 1846. It was then composed of eight Judges, four elected by the electors of the State, and four chosen from the class of Supreme Court Justices having the shortest term to serve. It was formed to succeed the Court for Trial of Impeachments and the Correction of Errors. By an amendment to the Constitution in 1899 the Governor was empowered to designate not more than four Justices of the Supreme Court to act as Associate Justices of the Court of Appeals. The regular Court of Appeals is now composed of a Chief Judge and six Associate Judges.

The State is divided into eight judicial districts. There are twenty-two Justices in the First District, twelve in the Second, six each in the Third, Fourth and Sixth Districts; seven each in the Fifth and Seventh Districts and ten in the eighth, making seventy-six in all.

There is an Appellate Division of the Supreme Court in each Judicial Department, consisting of seven Justices in the first department and of five Justices in each of the other departments. The Governor appoints the presiding Justice. The Appellate Court is located as follows: The first department in New York City, the second department in Brooklyn, the third department in Albany and the fourth department in Rochester; but terms may be held elsewhere in such departments as public interests may require.

THE CHILDREN'S COURT OF NEW YORK CITY.

On September 2, 1902, the first term of the Children's Court was held in New York. It is a court established to hear the small sins of children and to decide the best method of stopping at the beginning any tendency toward crime. The existence of such a court saves children from being taken into the dock with older criminals, and prevents the effects such association might have upon them. When children are arrested they are taken directly to the court, without the intervening period in a station house. In special cases, where there is a certainty that the child will be bailed at once by its parents, the offender is taken to the police station, and in case an arrest is made after the court is closed the prisoner is left in the care of the Society for Prevention of Cruelty to Children until next day.

Officially, the Children's Court is known as the "Court of Special Sessions, First Division of the City of New York, Children's Part." It is, as its name implies, but another court of the Court of Special Sessions. The act of Legislature which created it provided for another Justice, in addition to the five that already made up this court, and arranged that but one Judge at a time should occupy the Children's Bench, instead of the three that sit at the regular special session.

For the purpose of the court, all under sixteen years of age are considered children. Any crime, save a capital offence, or any offence committed in company with an adult, comes within its jurisdiction. Actual punishment, in most cases, is the last resort. As often as possible the result of examinations held at the Children's Court is suspended sentence and probation. The "Gerry" Society acts as "probation officer," and the young offenders must report each week to this society to give account of themselves.

Destitute and needy children, as well as offenders, are brought to the attention of the Judge, who in turn gives them into the care of the "Gerry" Society, which sees that thier needs are satisfied.

The building in which the court is located is at No. 66 Third avenue, New York City. It contains, besides the court room and general offices, detention rooms for children of both sexes, made comfortable and with as little as possible of the prison atmosphere. Those especially responsible for the new court were Edward T. Devine, of the Charity Organization Society; Elbridge T. Gerry and Charity Commissioner Homer Folks.

Supreme Court Justices of New York State.

Justices of the Supreme Court are elected for a term of fourteen years. In case of a vacancy occurring the Governor is empowered to make an appointment. Justices of the First and Second Districts receive an annual salary of $17,500; and those of the remaining districts, $7,200. Non-resident Justices, sitting in the Appellate Divisions of the First and Second Departments receive the same salaries as the Justices in those departments. If assigned to duty in the First and Second Districts, other than in the Appellate Division, they receive an additional compensation of $10 a day.

Government of Greater New York.

THE MAYOR.

The chief executive power of the city of New York is vested in the Mayor, who serves for a term of two years, beginning on the first day of January following his election. He is eligible for re-election. He has power to appoint the heads of departments and members of commissions, except the head of the Department of Finance and the heads of certain departments, which are placed under the jurisdiction of the Borough Presidents. The Mayor may, should he deem it necessary to the best interests of the public, remove any officer appointed by him, except members of the Board of Education, the Aqueduct Commissioners, trustees of the College of the City of New York, the trustees of Bellevue and Allied Hospitals and those judicial officers for whose removal other provision has been made.

It is the duty of the Mayor to make a report to the Board of Aldermen, at least once each year, giving a general statement of the finances, government and improvements of the city; to oversee the workings of all city departments, and to be vigilant in enforcing all city ordinances and laws of the State.

The Mayor has the power of veto over all ordinances and resolutions of the Board of Aldermen. However, such ordinances and resolutions may be passed over the Mayor's veto by a vote of two-thirds of all the members of the Board, except in the case of the expenditure of money, the creation of a debt or the laying of an assessment, a vote of three-fourths of all members being required to pass it over the Mayor's veto. In the case of a grant of a franchise the Mayor's veto is final.

In the absence or sickness of the Mayor the President of the Board of Aldermen becomes Acting Mayor.

MAYOR'S OFFICE.

Position.	Name.	Residence.	Salary.
Mayor	Seth Low	30 East 64th st	$15,000
Secretary to the Mayor	James B. Reynolds	184 Eldridge st	5,000

Clerk—Brooklyn	Joseph V. Scully	481 2d st., Brooklyn	2,500
Clerk—Bronx	Thomas J. McCabe	655 East 155th st., Bronx	1,500
Clerk—Queens	William R. Zimmerman	81 Crescent st., Long Island City	2,000
Clerk—Richmond	Michael J. Collins	Stapleton, S. I.	1,500

OFFICE OF BOROUGH PRESIDENT.

The Presidents of the boroughs are the head executive officers of their respective boroughs, and, in addition, members of the Board of Estimate and Apportionment and of the Board of Aldermen. They are elected by the electors qualified to vote for the Mayor in their respective boroughs, and their terms are coterminous with that of the Mayor.

The Borough Presidents have control of all matters relating to streets, sewers and public buildings, except as otherwise provided for, within their boroughs; of the construction and maintenance of bridges; of the opening of streets; of the laying of surface railroad tracks in any public street or road, and of the removal of incumbrances. They are empowered to prepare all contracts relating to their boroughs. They are the chairmen of and have a vote in all local boards.

Position.	Name.	Residence.	Salary.
Manhattan—			
President	Jacob A. Cantor	9 West 70th st., Manhattan	$7,500
Secretary	George W. Blake	109 West 84th st., Manhattan	4,000
Auditor	Robert V. Davis, Jr.	107 West 110th st., Manhattan	3,000

Richmond—			
President	George Cromwell	Dongan Hills, Staten Island	5,000
Secretary to President	Maybury Fleming	New Brighton, Staten Island	2,500

DEPARTMENT OF FINANCE.

The Department of Finance has control of all fiscal concerns of the corporation. The Comptroller is the head of the department, his term being coterminous with that of the Mayor. The most important duties of the Comptroller and of his subordinates are as follows: To inspect and revise the accounts of all other departments; to prescribe the mode of paying creditors, officers and employes of the city; to make all payments by or on behalf of the city; to adjust all claims and settle all accounts in which the city is concerned; to give assent to the acquisition by purchase of any real estate on the part of the city; to certify upon all contracts entered upon by any department that there are sufficient funds applicable for the payment of such contracts; to collect all taxes and assessments; to prescribe the form of and to advertise for proposals for the purchase of bonds and stocks of the city; to issue all bonds authorized by the Board of Estimate and Apportionment; to have sole charge of the Wallabout Market lands in Brooklyn; to publish within two months after the close of each year a detailed statement of receipts, expenditures and surplus during the preceding year.

The Comptroller is a member, ex-officio, of the Sinking Fund Commission, the Board of Estimate and Apportionment, the Rapid Transit Commission, the Bank Commission, the Board of the City Record, the Aqueduct Commission and the Board of Revision and Assessments.

The Chamberlain is appointed by the Mayor, and must give a bond for $300,000. It is his duty to receive all moneys paid into the City Treasury and to deposit such in their proper places, to pay all warrants drawn on the treasury by the Comptroller and countersigned by the Mayor, and to exhibit his accounts before the Comptroller each month.

Position.	Name.	Residence.	Salary.

do	Edward F. Boyle	322 East 51st st., Manhattan	2,100

SINKING FUND COMMISSION.

The Sinking Fund Commissioners consist of the Mayor, the Comptroller, the Chamberlain, the President of the Board of Aldermen and the Chairman of the Finance Committee of the Board of Aldermen.

BOARD OF ESTIMATE AND APPORTIONMENT.

The Board of Estimate and Apportionment consists of the Mayor, the Comptroller, the President of the Board of Aldermen and the Borough Presidents. The Mayor, the Comptroller and the President of the Board of Aldermen are entitled to three votes each, the Presidents of the Boroughs of Manhattan and Brooklyn two votes each, and the Presidents of the Boroughs of The Bronx, Queens and Richmond one vote each. It is the duty of the Board to prepare and to submit to the Board of Aldermen each year a budget of the amount estimated to be required to pay the expenses of the city government during the ensuing year. The Board of Aldermen may decrease, but may not increase, certain items of expense. However, such decrease is subject to the veto of the Mayor, and, unless passed over his veto, the original amount stands as part of the budget.

BOARD OF ALDERMEN.

The legislative power of the city is vested in the Board of Aldermen, which consists of seventy-three members, the President of the Board and the five Borough Presidents. The President of the Board is elected in the city-at-large and the other members in the aldermanic districts, each for a term of two years. Each head of a department of the city is entitled to a seat, being required to answer all questions concerning his department and having the right to partake in discussion, but without right to vote. Meetings must be held at least once each month. The Mayor may call a meeting at any time, or upon the signed requisition of fifteen members he must call a meeting.

It is within the power of the Board of Aldermen to pass all laws, rules, regulations and by-laws applicable throughout the city or to specified portions thereof, as may seem meet for the good rule and government of the city, and to carry out the purposes and provisions of the charter, or of other laws relating to the city, and may provide for the enforcement of the same by such fines, penalties, forfeitures and imprisonment as may by ordinance or by law be prescribed.

A majority of all the members of the Board of Aldermen is required to pass an ordinance. All ordinances must be signed by the Mayor, or, if he veto it, it must pass by a two-thirds majority to take effect; except in the case of expenditure of money, the creation of a debt or the laying of an assessment, a three-fourths vote is required to pass it over the veto; and except if it involves the grant of a franchise, the Mayor's veto is final.

The Police and Fire Departments of Greater New York.

On the 30th of September, 1902, the police force of Greater New York comprised 7,722 men. The election of Mayor Low in 1901 was believed to be largely due to the disapproval by the people of the way in which police matters had been managed by preceding administrations. A general shake-up was the result and the force has been in a state of unrest most of the time since. There have been various complaints and many efforts have been made to straighten out matters, but without remarkable success. The criticisms were not directed against the patrolmen, who are mostly brave, honest and hard-working men, but against the higher officials, who are believed to have used their power to blackmail lawbreakers and sell them protection. In August last the Mayor appointed a commission, consisting of General Avery C. Andrews, Police Commissioner in the Roosevelt Board, and former District-Attorney Eugene A. Philbin, to cooperate with Police Commissioner Partridge to perfect a plan for reorganization of the police force and report the necessary changes in the law.

An unusual happening was the action of the patrolmen in the Spring of 1902 in shutting up the saloons on Sunday. While they were generally understood to be "protected," the patrolmen decided to close up all those that were running illegally. The consequence was that at midnight of April 5 every place in the Tenderloin and the Bowery districts, with the exception of those having hotel licenses, was closed tight. Such scenes were never before witnessed in the Tenderloin. The streets were filled with people suddenly ordered out of well-known resorts. Crowds gathered at the corners, discussing the strange turn of events in the war between the patrolmen and the captains of the police force. The closing was not a blind. Proprietors stood outside the resorts with the keys of the doors in their pockets. Blinds were drawn up and interiors were seen to be absolutely unoccupied. The Liquor Dealers' Association instructed its members in every precinct of the city to search out any and all violators of the Blue Laws other than excise, and to cause all places of business to be closed, or to prefer charges against policemen who disregarded notice thereof.

Immediately after this occurrence the Aldermen, by a vote of 65 to 13, passed a resolution calling upon Commissioner Partridge to restore the three platoon system. The American made a strong fight for this reform. It showed that under the two platoon system patrolmen were required to be on duty ten hours a day, the average hours of reserve being about five and one-half, and the average hours off duty nine. The two platoon system has failed to provide sufficient men on occasions when they were needed. The women interested held a mammoth mass meeting in October, in which they appealed strongly for the three platoon system, and declared that they would fight for it until they won. It was participated in by wives of policemen, letter carriers, firemen and employes of other departments. This resolution, with its preambles, was adopted:

"Whereas, The patrolmen of the city of New York, the imperial city of the Western World, are kept at their work and away from their homes for an unreasonable and inhuman time, and,

"Whereas, In this, the time of bettering the condition of the working classes, the patrolman is compelled to work from fourteen to sixteen hours a day and is deprived of the comforts of his home on some occasions for days at a time, and,

"Whereas, The mothers, wives, sisters and daughters of these men are forced to sacrifice the society and influences of the patrolman and father through the two platoon system, and,

"Whereas, The Board of Aldermen has passed resolutions indorsing the three platoon system, after a long and thorough investigation, and,

"Whereas, The united clergy has denounced the iniquitous two platoon system, and, sacrificing important church duties, travelled to Albany in personal appeal to the Legislature for the restoration of the three platoon system, and,

"Whereas, Thousands of citizens representing all walks of life have petitioned for the three platoon system, and,

"Whereas, The three platoon system has already been tested and proved a success, meeting all requirements not only from the patrolman's standpoint, but also to the best interests of the taxpayer; therefore, be it

"Resolved, That we, the wives, mothers, daughters and sisters of the patrolmen, letter carriers, firemen and other civic employes, in mass meeteng assembled, this day, Thursday, October 23, 1902, in Cooper Union, do respectfully petition the Hon. Seth Low, Mayor of New York City, to bring about the restoration of the three platoon system."

A resolution was also adopted thanking William Randolph Hearst for the efforts of the American in behalf of the patrolmen. This demand was reinforced later by a plea from the City Club for a three platoon system, and a change from the present plan will undoubtedly be effected sooner or later.

On October 16 Captain A. R. Piper, formerly in the Street Cleaning Department, was appointed Second Deputy Commissioner of Police. He was an army officer, and immediately introduced army methods into the service. He has inforced discipline in the ranks and has made endeavor to bring about a more strict observance of the rules in all cases. He expects to improve the force in many respects.

During the first nine months of 1902 93,658 men were arrested and 21,467 women, of which 8,511 were for principal felonies. Of these, 2,723 were discharged without trial, 1,086 were acquitted, 1,378 were convicted and 33 died while awaiting trial. The remainder were either sent to other authorities or their cases are pending. There were 1,953 lost children taken in charge, of whom 1,644 were returned to their parents, and the rest were disposed of in other ways.

Of the valor and expertness of the 3,000 men who compose the Fire Department of Greater New York nothing need be said. It is too well known to require comment. The chief matter of interest in this department during the past year has been the attack by Commissioner Sturgis on Chief Croker. Acting as prosecuting attorney and judge, Mr. Sturgis decided that his charges against Mr. Croker were sustained, and dismissed him from office. Mr. Croker then appealed to the courts, which decided that his removal was illegal and reinstated him in office, which position he still retains, awaiting further action by the Commissioner. That he has the confidence of the public is shown by the fact that responsible business men petitioned Mayor Low to overrule Commissioner Sturgis and retain Mr. Croker in office, while the International Association of Fire Engineers elected him president during his trial.

Police Force of Greater New York.

The executive authority of the Police Department is vested in a Police Commissioner, who is appointed by the Mayor for a term of five years, unless sooner removed by either the Governor or the Mayor. The Commissioner appoints two deputies, known as the First Deputy Police Commissioner and the Second Deputy Police Commissioner.

EXECUTIVE DEPARTMENT.

Position.	Name.	Salary.
Police Commissioner	John M. Partridge	$7,500
First Deputy Police Commissioner	Frederick H. E. Ebstein	4,000
Second Deputy Police Commissioner	Alexander R. Piper	4,000

RULES GOVERNING APPOINTMENT TO THE POLICE FORCE.

Appointments to the Police Force are made in accordance with the following rules:

No person will be appointed Patrolman of the Police Force unless—1st. He is able to read and write the English language understandingly. 2d. He is a citizen of the United States, and has been so for one year next prior to his application for appointment. 3d. He has been a resident of this State during a term of one year next prior to his application for appointment. 4th. He has never been convicted of felony. 5th. He is at least five feet seven and one-half inches in height, measured in his bare feet, and weighs not less than one hundred and thirty-eight pounds, avoirdupois, without clothing, and his chest measurement shall be at least 34 1-2 inches. 6th. He is less than thirty years of age. 7th. He is of good health, and sound in body and mind. 8th. He is of good moral character and habits.

Candidates for appointment as Doormen shall be between the ages of twenty-five and thirty-five years, and their physical qualifications shall be the same as required for Patrolmen. Their height shall not be less than five feet seven inches. Captains are required to give their personal attention and supervision to the orders for investigations into the character, habits and associates of applicants for appointment on the Police Force referred to them for report. They shall satisfy themselves, affirmatively, as to the character, habits and associates of the applicant, and shall make no favorable report in relation to the applicant until they are reasonably assured that his character, habits and associates are good. Applicants for appointment as Police Surgeon shall be between twenty-seven and forty-five years of age, and they shall be physically sound in all respects.

Fire Department of Greater New York.

The head of the Fire Department is the Fire Commissioner, appointed by the Mayor. The Commissioner in turn appoints a deputy, whose office is in Brooklyn. The Department is directly under the authority of a Chief, who is responsible to the Commissioner for its routine excellence.

Executive Department.

Position.	Name.	Salary.
Fire Commissioner	Thomas Sturgis	$7,500
Deputy Fire Commissioner	R. H. Laimbeer, Jr.	5,000
Chief of Department	Vacant	6,000

Water Rates for Greater New York.

The following scale of water rents has been established by the Board of Aldermen:

Residences occupied by only one family, 16 feet and under frontage, one story, $4.00; 16 to 18 feet frontage, $5.00; 18 to 20 feet frontage, $6.00; 18 to 22½ feet frontage, $7.00; 22½ to 25 feet frontage, $8.00; 25 to 30 feet frontage, $10.00; 30 to 37½ feet frontage, $12.00, and 37½ to 50 feet frontage, $14.00. For each additional story, $1.00 is charged. One bath and a water closet is included in the above rate.

Where more than one family occupy a house an additional charge of $1.00 is made for each. The charges for baths are $3.00 each, and water closets $2.00 each.

Water meters are placed at the discretion of the Commissioner of Water Supply. The charges are fixed at 10 cents per 100 cubic feet, measured by meter.

For building purposes the rates are ten cents per 1,000 brick and forty cents per 100 square yards of plastering.

The rates for commercial and other businesses vary, and in a great many instances are fixed by the Commissioner.

Trust Companies in Greater New York.

THE POWERS OF TRUST COMPANIES.

Under section 156 of the Banking Laws of this State, the following powers are, in effect, given to Trust Companies:

To transact a general banking business; to receive deposits of money on active account, subject to check at sight, and to allow interest thereon; to receive deposits in trust; to loan money on bond and mortgage, personal security, business paper or approved collaterals; to act as fiscal or transfer agent, or as trustee under any mortgage or bond issued by any municipality or corporation; to act as executor, administrator, trustee, guardian, and as committee of the estate of persons of unsound mind; to accept and execute any and all trusts with regard to the holding, management and disposition of any estate or property that may be granted or confided to it; to supply investment securities; to act as registrar for corporate securities; to act as legal depository for court and estate funds, and to furnish foreign drafts or bills of exchange to its clients.

Ferries in Greater New York.

Astoria—From Ninety-second street, East River.

Blackwell's Island—From Twenty-sixth street, East River; from Fifty-second street, East River; Seventieth street, East River, One Hundred and Sixteenth street, East River.

Brooklyn—From Whitehall street to foot of Thirty-ninth street, Brooklyn; from Whitehall street, to Hamilton avenue; from Whitehall street to Atlantic avenue; from Wall street to Montague street; from Fulton street to Fulton street; from Catherine street to Main street; from Roosevelt street to Broadway; from Grand street to Grand street; from Grand street to Broadway; from Houston street to Grand street; from East Twenty-third street to Broadway; from East Forty-second street to Broadway.

College Point—East Ninety-ninth street; East One Hundred and Thirty-fourth street (foot passengers only).

Edgewater—From West One Hundred and Thirtieth street.

Ellis Island—From Barge Office, foot of Whitehall street.

Greenpoint—From East Tenth street to Greenpoint avenue; from East Twenty-third street to Greenpoint avenue.

Hart's Island—From Twenty-sixth street, East River.

Hoboken—From Barclay street to foot of Newark and Ferry streets; from Christopher street to foot of Newark and Ferry streets; from West Fourteenth street to Fourteenth street.

Jersey City—From Whitehall street to C. R. R. of N. J. Dock, Communipaw; from Liberty street to C. R. R. of N. J. Dock, Communipaw; from Cortlandt street to Montgomery street; from Desbrosses street to Montgomery street; from Chambers street to Pavonia avenue; from West Twenty-third street to foot of Montgomery street; from West Twenty-third street to foot of Pavonia avenue.

Liberty Island—Battery.

Long Island City—From James Slip to Borden avenue; from East Thirty-fourth street to Borden avenue; L. I. R. R. Annex during Summer.

North Brother Island—From East One Hundred and Thirty-eighth street.

Randall's Island—From East Twenty-sixth street; from East One Hundred and Twenty-ninth street.

Staten Island—Foot of Whitehall street.

Ward's Island—From One Hundred and Sixteenth street, East River.

Weehawken—From Franklin street to R. R. Slip; from West Forty-second street to R. R. Slip; from West Forty-second street to Old Slip.

Beggars in the City.

Like all great cities, New York is infested with beggars. Efforts have been made, but without much success, to suppress them, and charitably disposed people have tried to arrange so that no one should suffer for want of food. If accosted by one of them, he should be referred to any of the following addresses, where the case will be investigated, and if found needy, his wants will be relieved with as little delay as possible: The Charity Organization Society, Fourth avenue and Twenty-second street, 9 Chambers street, 297 Broome st., 208 East Fiftieth street, 169 East Sixty-third street, 594 Seventh avenue, 527 Amsterdam avenue, 15 East One Hundred and Twenty-fifth street. At night they should be referred to the Wayfarers' Lodge, 516 West Twenty-eighth street.

A Prisoner's Rights in the State of New York.

(From information furnished at the office of the District-Attorney.)

Unless the prisoner is charged with murder in the first degree or with arson, he has the right to be released on bail.

If he is charged with a misdemeanor, the police sergeant may accept bail, which in no case must exceed the sum of $500.

If a felony is charged, a city magistrate must name the bail, which can exceed the sum of $500 to whatever amount the magistrate deems justifiable.

If a prisoner desires to furnish his own bail he must deposit the amount in cash with the City Chamberlain, who issues a certificate of deposit. This certificate is then turned over to the sergeant or magistrate and the prisoner is released. If after his release the prisoner desires to substitute a bondsman for his cash bail he may do so. If the prisoner does not want to furnish cash bail, he has the right to demand that a messenger be sent to communicate with his friends or prospective bondsman. A bondsman must be a resident, householder or free holder, of the State, and, unless the magistrate directs otherwise, a resident of the county in which the bail is to be furnished.

Under no circumstances will the New York County District-Attorney's office accept the bail of a bondsman not a resident of the county. The bondsman must be worth the amount specified in the bond, exclusive of property exempt from execution. It is within the jurisdiction of the magistrate to demand the sureties, in which case the second bondsman acts in the same capacity as the indorser of a note—guarantees that he will furnish the bond if the property of the first bondsman is found not to be sufficient. After the bail has been accepted by the sergeant or magistrate, the bond is sent to the Court of General Sessions, where the District-Attorney may make a motion to increase it, or the defendant's counsel a motion to decrease it. If the bail is increased, the defendant must furnish the additional amount or forfeit his freedom.

If the defendant fails to appear in court at the time when the bail has ceased to be effective, he forfeits the bond and is still liable to arrest and prosecution.

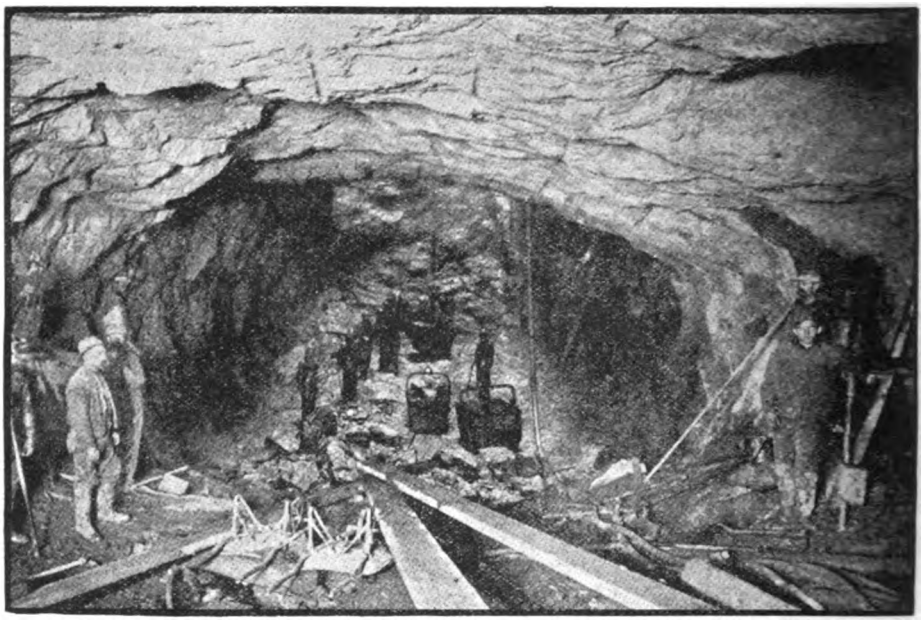
Rapid Transit in Greater New York.

The close of the year 1903 will see the new rapid transit system of New York City completed and in operation, so far as the routes originally planned are concerned. It will see also the extension from the Post Office to the Battery, and thence under the East River into Brooklyn Borough quite far advanced. So far as completed the system will consist of twenty-one miles of tunnel, subway and viaduct, extending from the City Hall to Spuyten Duyvil Creek on the westerly side of the city, and to Bronx Park on the easterly side. The route is a single one as far northward as to One Hundred and Fourth street, at which point the easterly line diverges at right angles, passing through One Hundred and Fourth street from Broadway to Central Park, under which it passes obliquely to Lenox avenue, following that thoroughfare to One Hundred and Forty-fifth street. There is another sharp divergence at One Hundred and Forty-first street, whence the line continues to and under the Harlem River into the Borough of The Bronx. One of the excellent features of the system, in the matter of its road construction, is that the gradients are remarkably light throughout its whole extent, not exceeding 1.25 per cent, except at a very few points, and not exceeding 3 per cent anywhere, that being the gradient in the tunnel under the Harlem River.

By the contract, which was signed and executed on February 21, 1900, with John B. McDonald, as the contractor, it is required that the work shall be completed by September, 1904. Mr. McDonald sublet his contract in sections, and the first actual work was begun in Section 1., the Post Office loop, on March 24, 1900, by the Degnon-McLean Contracting Company, one of the sub-contractors. The beginning of operations in other sections quickly followed, and such rapid progress was made that there has been no stage at which the work has not been in advance of what was necessary to insure its completion within the stipulated time.

The wonder of it was that such extensive operations, involving the opening up of some of the city's busiest thoroughfares, and the undermining of some of the largest buildings, could be carried on with so little interruption of traffic through the streets, so few accidents, and such freedom from damage to property. In fact, the stupendous character of the undertaking was but meagrely indicated by what the public saw of it, and the actual progress of the work could be judged but indifferently. At various points in the city huge excavations became centres of attraction for curious people. Where the excavations had to be made in



Side Drift at 168th Street.

rock the suggestions of the mining regions were frequently picturesque, while the necessity for blasting lent to the scene that fascination which possible danger invariably has for the venturesome seeker after sensation. And here it may be remarked that, considering the fact that this work required the use of a ton and a half or two tons of dynamite daily, some of it in the most populous sections of the city, there has been a gratifying freedom from accidents occasioned by explosions, notwithstanding the unfortunate disaster at Park avenue, and one or two other serious happenings.

Some of the difficulties attending the work have been of extraordinary magnitude. They included the construction of temporary sub-structures to support street railways in thoroughfares where the line passes under such; the support of water and gas mains, sewer pipes, and other underground work abounding in every part of the city; the shoring-up of massive buildings standing near the line of excavation, and many other things which required the most careful engineering. Such work as this alone has cost to the beginning of the present year about $2,000,000, and constitutes therefore a considerable percentage of the $35,000,000 which is the contract price for the road complete. This item of expense is practically eliminated from the cost yet to be incurred, as little, if any, of such work remains to be done. In fact, of the entire estimated amount of excavation, inclusive of tunneling there remains only 12 per cent to be done. The estimated total was 3,000,000 cubic yards, and the amount done at the close of the year 1902 was 2,647,000 cubic yards, or 88 per cent of the whole. Of earth excavation the amount done is about 1,660,000 cubic yards, or 97 per cent of the total amount as estimated. The total amount of rock excavated is 987,000 cubic yards, or about 76 per cent of the full amount as estimated. The remaining excavation to be made consists principally of about 1,400 lineal feet of tunneling at Fort George, and this will be mainly rock work.

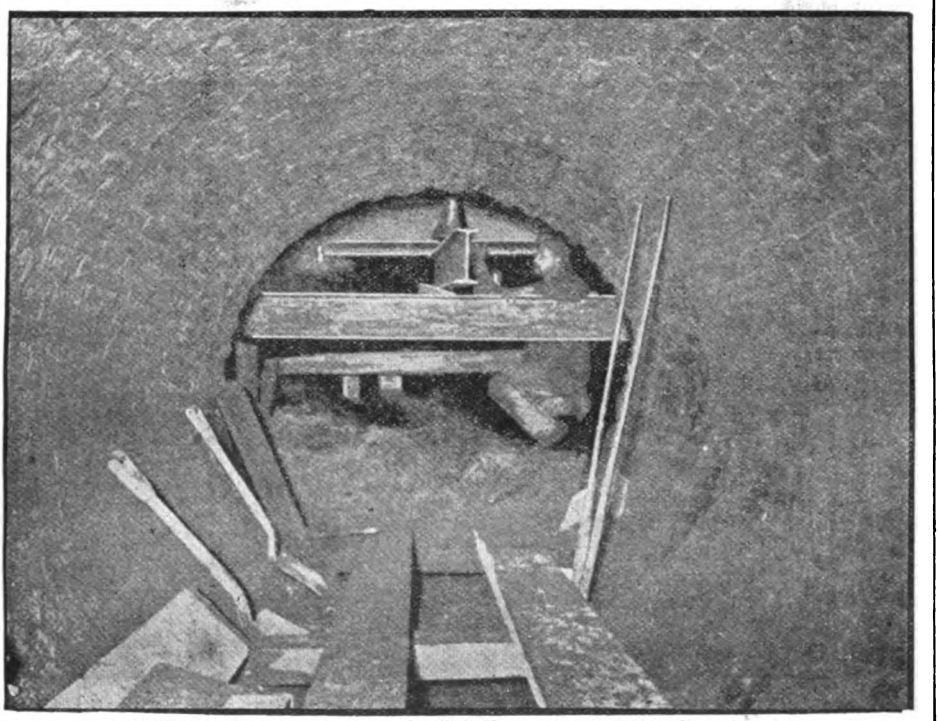
The work has employed an army of laborers of various grades, and the number at work daily has been not less than 7,500. Including all, excepting of course the workmen in mills supplying the necessary steel, iron, etc., employed in construction, the number of men employed daily approaches very nearly a round 10,000. The expenditures on account of the work, from the beginning of operations under the contract until the close of 1902 were a little short of $24,000,000, leaving something more than $11,000,000 yet to be expended of the contract price of $35,000,000. The greater proportion of this balance will be required for

Digitized by Google

putting in the steel and iron construction not yet finished, for laying tracks, for building stations, and for the general preparation of the system for the installation of power plants, rolling stock, and the other details of operative equipment. The equipping of the road after the construction is complete will cost about $15,000,000, making the total outlay for the system, to the date of opening, in the neighborhood of $50,000,000.

On the twenty-one miles of line constituting the rapid transit system in the boroughs of Manhattan and The Bronx, fifteen and a half miles will be practically underground, although the length of actual tunnel is only three and a quarter miles. The tunnels are between Thirty-third and Forty-second streets, between One Hundred and Fiftieth and One Hundred and Ninetieth streets, on the West Side, under the northwestern corner of Central Park, and under the Harlem River, from One Hundred and Forty-first street to Mott Haven. The elevated construction will be at the northern extremities of the two routes.

The contract under which this great undertaking is approaching its culmination is a document which constitutes a printed volume of 180 pages. Omitting formal and technical details, its provisions may be summarized in brief, and in its essential aspect, as follows: The contractor undertakes to construct and equip the Rapid Transit Railroad upon the routes and general plan of the Commission; to put the same in operation; and to use, maintain and to operate it under a lease from the city for the term of fifty years. The city, on its part, agrees to pay thirty-five million dollars in case the whole of the road is constructed, and other specified sums in case it should determine to construct less than the whole. The city stipulates to give the contractor the right to construct and operate the railroad "free of all right, claim or other interference, whether by injunction, suit for damages or otherwise on the part of any abutting owner or other person." All parts of the structure, where exposed to public sight, are required to be designed,



Tunneling a Sewer Beneath the "L" Foundations at Chatham Square.

constructed and maintained with a view to the beauty of their appearance as well as to their efficiency, and all work is to be done in a good, substantial and workmanlike manner, and in accordance with the detailed specifications embodied in the contract. The work to be done by the contractor is to include all necessary readjustment of pipes, subways or other subsurface structures; the support and care, including underpinning wherever necessary, of all buildings, monuments and elevated and surface railways; and the reconstruction of street pavements and surfaces. The construction of sewers, readjustment of mains, pipes and other subsurface structures, and the support, care and underpinning of buildings, monuments and railways are declared to be essential parts of the construction of the railway. The contractor is required to provide a complete equipment for the railroad, including not only cars, but also all engines, electric wires, conduits, power houses, and lighting, signalling and ventilation apparatus. The Board reserves the right during the progress of the work to amplify the plans, to add explanatory specifications, and to furnish additional specifications and drawings. It also reserves the right to require additional work to be done, on paying the reasonable value thereof to the contractor, or to require work to be omitted, in which case a reasonable deduction from the contract price is to be made. The contract further provides for the most thorough and minute inspection by the Board of all work and materials from the beginning of their manufacture or preparation, and declares that the work is to be done and the materials are to be furnished in all cases subject to the direction and approval of the chief engineer of the Board.

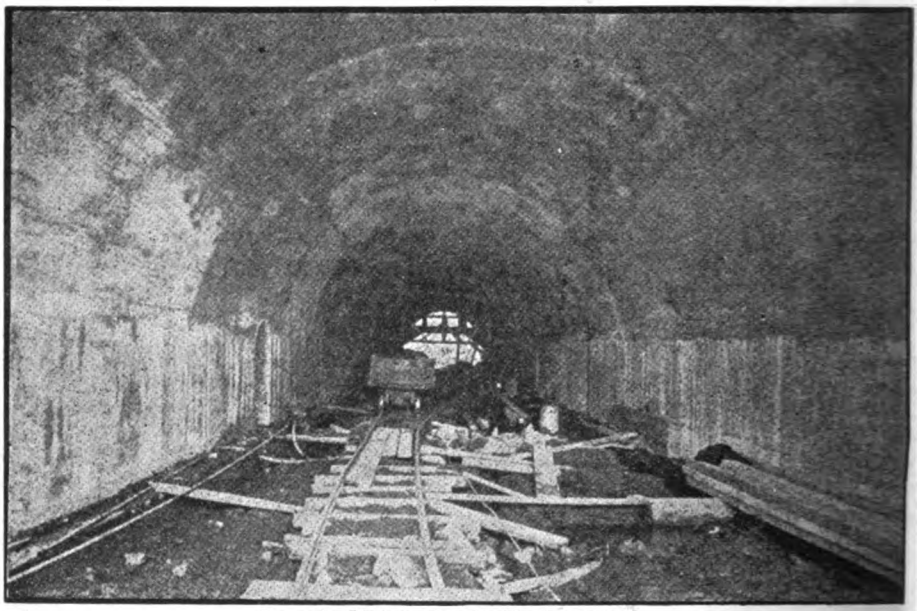
The Brooklyn extension of the rapid transit system was begun in December, 1902. It will cost an additional sum of between $9,000,000 and $10,000,000, but the contract under which it is being constructed is for $2,000,000 only. The balance of the cost will be met by the Rapid Transit Railway Company, the corporation which is back of Mr. John B. McDonald, the contractor. The most costly feature of this extension will be the tunnel under the East River, which will begin at Battery place, in Manhattan, and extend to the Borough Hall, in Brooklyn, one mile and a half.

Mr. Alexander E. Orr is president of the Rapid Transit Commission, being one of the original Commissioners specified in the Act of May 22, 1894, creating the Commission. He was elected president of the Board on June 8, 1894. Mr. William Barclay Parsons has been chief engineer since June 18, 1894.

Digitized by Google

The history of projects to provide rapid transit for the city of New York extends back to the middle of the past century. During this period there has been constant demand for increased facilities to accommodate the passenger traffic of the city. The first important step in the direction of meeting it was the construction of the street railways. Growth of business and the great increase of population from year to year, with the consequent extension of thickly populated areas, made it apparent that some better mode of transit would soon become necessary, and various propositions for elevated and underground systems were agitated, until the Legislature, in 1868, granted a charter to the New York Central Underground Company, with ample powers as to route, capital and facilities for construction. Inability to raise the money required for the enterprise caused its failure. Cornelius Vanderbilt and others were incorporated by the Legislature in 1872 as the New York City Rapid Transit Company, with authority to construct and operate an underground railway, which would have extended from the City Hall to the Grand Central Station on Forty-second street, but which was never constructed because of Commodore Vanderbilt's sensitiveness to the criticisms which the project evoked. Among subsequent propositions which obtained legislative approval was that of the Beach Pneumatic Railroad Company, which projected what was known as the "Arcade Railroad," which, with others, failed to command the support of capital.

The elevated railroads constructed under the act of 1875, known as the Rapid Transit Act, met the existing need in their time, but their ultimate inadequacy was foreseen long before it began to be experienced, and agitation for an underground system was resumed in 1884. The matter was brought to the attention of the Common Council by Mayor Abram S. Hewitt in his message of January, 1888. In this communication the Mayor expressed his conviction that underground rapid transit could not be secured by the investment of private capital, but that in some way or other its construction depended upon the use of the city's credit. It was apparent to him that if such credit were used the property must belong to the city, although, as it would not be safe for the city to undertake the construction, the intervention of a contracting company appeared to be indispensable. To secure the city against loss, this company must necessarily be required to give a sufficient bond for the completion of the work and be willing to enter into a contract for its continued operation under a rental which would pay the interest upon the bonds



Concrete Lining of a Double-Track Arch.

issued by the city for the construction, and provide a sinking fund sufficient for the payment of the bonds at or before maturity. It was suggested further that it seemed to be indispensable that the leasing company should invest in the rolling stock and in the real estate required for its power houses and other buildings an amount of money sufficiently large to indemnify the city against loss in case the lessees should fail in their undertaking to build and operate the railroad. Mr. Hewitt's views failed to meet the approval of the Common Council, but he submitted to the Legislature during the same year a bill wherein they were embodied in a general way, provision being made in it for competition on the part of any and all responsible individuals or corporations who might be disposed to undertake the work. He appeared before a committee of the Legislature in behalf of the measure, but it was not even reported back.

The Legislature of 1890 passed a bill entitled, "An act to provide for rapid transit railways in cities of over one million inhabitants," which was approved by Governor David B. Hill. Under this act Mayor Hugh J. Grant, on April 9, 1890, appointed a commission to decide on routes. August Belmont, Charles Stewart Smith, John H. Starin, William Steinway and O. N. Potter constituted the commission, which reported on June 16 in favor of an underground route from the City Hall to Harlem. A new commission composed of William Steinway, Samuel Spencer, John H. Starin, Eugene L. Bushe and F. P. Olcott was appointed by Mayor Grant on December 23, in the same year.

New legislation on the subject was enacted in 1891, and under it the commissioners just named were continued in office, with authority to decide upon the necessity of a rapid transit railroad; to adopt routes and general plan of construction; to obtain consent of local authorities and property holders affected by the construction and operation of such railroad, or of the General Term of the Supreme Court, should such consent be withheld; to adopt detailed plans for construction and operation, and, finally, to sell the right to construct and operate such railroad to a corporation to be formed under the terms of the act for such a period of time as they should deem advisable, and upon such terms as they should be able to exact.

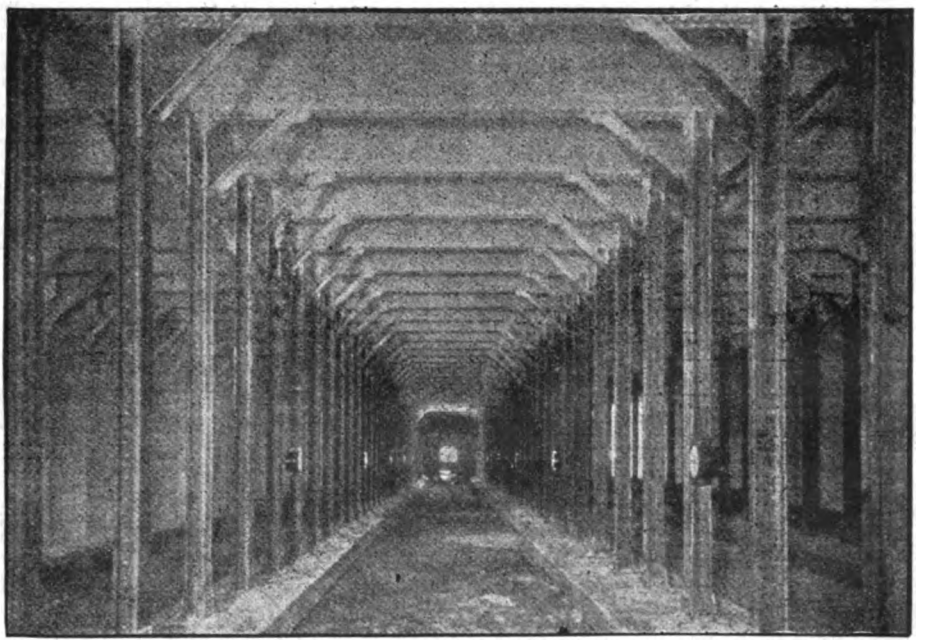
After reaching the conclusion that the needs of the city could be met adequately only by the construction of underground railroads, the commission adopted a route and general plan for the construction of a railroad running underground through the built-up portions of the city, and emerging only in its northern portions, where the contour of the surface made it necessary. Necessary consents were obtained, detailed plans and specifications were adopted and the franchise was offered for sale to the highest bidder

Digitized by Google

on December 29, 1892. No bidder of approved responsibility appeared willing to undertake the enterprise, and the project, which had cost $130,000 for preparation, was abandoned.

This brings the history down to the inception of the enterprise, the culmination of which will be one of the great events of the year 1903. The law under which the present Rapid Transit Commission is acting was passed by the Legislature of 1894, and was signed by Governor Roswell P. Flower on May 22 of that year. The events leading to its introduction and enactment are worthy of record. A proposition was made to the Chamber of Commerce of New York by a responsible banking house in the city of New York to undertake the construction of the underground system, provided the city of New York would loan its credit to the corporation undertaking the work to an amount not exceeding thirty millions of dollars. This proposition was referred to a committee of the most prominent members of the Chamber, who, despairing of any other solution of the question, reported at a meeting of the Chamber in favor of the proposition. Former Mayor Hewitt took part in the discussion which followed, and he pointed out that such a loan of credit would be contrary to the Constitution of the State of New York, and that it was not expedient to submit to the people any proposition under which the public credit could be utilized for private purposes. He insisted upon the importance of vesting the ownership in the city. Mr. Hewitt's views were unanimously approved and he was named on a new committee appointed to formulate a bill to be presented to the Legislature, which bill was to embody the suggestions which he, as Mayor of the city, had made to the Common Council in 1888.

The Act of 1894 substituted a new Rapid Transit Board for the one existing under the Act of 1891, the new board being composed of the Mayor, the Comptroller and the president of the Chamber of Commerce, as ex-officio members, and Messrs. William Steinway, Seth Low, John Claflin, Alexander E. Orr and John H. Starin. The board held its first meeting on June 8, 1894, and organized by the selection of Alexander E. Orr for the position of president. At the same meeting Mr. Orr, who had been elected president of the Chamber of Commerce, and had thus become an ex-officio member of the Board as well as being named by the statute an individual member thereof, resigned the individual appointment conferred upon him by the Legislature, and Mr. John H. Inman was elected to fill the vacancy thus created. Subsequently



Four-Track Structure at Bleecker and Houston Streets.

Mr. Starin was elected vice-president; Henry R. Beekman and Albert B. Boardman were appointed counsel and William Barclay Parsons was appointed chief engineer. The first important step taken was to submit to the voters of the city the question of municipal construction of the system, and the result, secured in the election of November 6, 1894, showed an overwhelming majority in favor. The total vote was 175,962; affirmative, 132,647; negative, 42,916; defective ballots, not counted, 399.

It was not until January 14, 1897, that the undertaking reached the point of establishing the present route and plan. As to route, the resolution of the commission provided:

"One route as follows: Its centre line shall commence at a point at or near the intersection of Broadway with Park Row; thence under Park Row and Centre street to a point at or near its intersection with New Elm street, as proposed; thence under New Elm street, as proposed, to Lafayette place; thence under Lafayette place to Eighth street; thence across and under Eighth street, and thence under private property lying between Eighth and Ninth streets and east of the westerly side or line of Lafayette place, produced to Fourth avenue; thence under Fourth avenue and Park avenue to Forty-second street; thence turning from Park avenue into Forty-second street, and taking for the purpose of the curve, if necessary or convenient, private property at the southwest corner of Park avenue and Forty-second street; thence under Forty-second street to Broadway; thence under Broadway to Fifty-ninth street; thence under the Boulevard to a point at or near One Hundred and Thirty-fourth street; thence under the Boulevard and Eleventh avenue to a point on Eleventh avenue situated north of One Hundred and Ninetieth street and distant therefrom not less than one thousand and not more than one thousand five hundred feet, and thence under or over (as may be most convenient) private property to a point at the southeast end of Ellwood street near Hillside street, and thence over Ellwood street to Kingsbridge avenue or Broadway; thence over Kingsbridge avenue or Broadway as now proposed to Riverside avenue and thence easterly over Riverdale avenue to a point within five hundred feet of the present Kingsbridge station of the New York & Putnam Railroad Company.

"This route shall include a loop at the City Hall Park which shall connect with the portion of the

Digitized by Google

route aforesaid along Centre street at or near the south end of that street, and thence proceed westerly and southerly under City Hall Park and Broadway and thence easterly to again connect with the portion of the route aforesaid in Park Row. All of the said loop shall lie under City Hall Park, Park Row, between the south end of Centre street and Ann street, and the portion of Broadway adjoining City Hall Park lying between Vesey and Murray streets. This route shall also include suitable tracks and connections from the City Hall loop to the Post Office, such tracks and connections being under the City Hall Park and under the portion of Park Row between the south end of Centre street and Ann street. This route shall also include suitable tracks and connections from the portion of the route near the corner of Park avenue and Forty-second street to the yard and tracks of the Grand Central Station. All of the tracks and connections last mentioned shall be under Park avenue and Forty-second street and private property to be acquired. By private property in this description is meant property not forming part of the streets of the city of New York and not belonging to the city of New York.

"Also a route as follows: Its centre line shall diverge from the route aforesaid on the Boulevard, between a line parallel to and one hundred feet north of One Hundred and Third street and a line parallel to and one hundred feet south of One Hundred and Third street; thence under private property to a point in One Hundred and Fourth street; thence under One Hundred and Fourth street to and across Central Park West; thence under Central Park to the intersection of Lenox avenue and One Hundred and Tenth street; thence under Lenox avenue to a point near One Hundred and Forty-second street; thence curving to the east and passing under private property, One Hundred and Forty-third and One Hundred and Forty-fourth streets, to the Harlem River at or near the foot of One Hundred and Forty-fifth street; thence under the Harlem River and private property to East One Hundred and Forty-ninth street at or near its intersection with River avenue; thence under East One Hundred and Forty-ninth street to a point near its intersection with Third avenue; thence with a curve to the left and under Third avenue to a point near its intersection with Westchester avenue; thence with a curve to the right to and under Westchester avenue, and thence by viaduct over and along Westchester avenue to the Southern Boulevard; thence over and along the Southern Boulevard to the Boston Road, and thence over and along the Boston Road to Bronx Park."

A number of legal and technical difficulties had to be overcome before the commission arrived at the stage when it was possible to invite bids for the construction of the road. After due notice, two bids were received on January 15, 1900, the date appointed for receiving and opening them. One was from John B. McDonald, offering to construct the entire road for $35,000,000; the other was from Andrew Onderdonk, who offered to construct the road for $39,300,000, and further proposed that, in case the gross receipts exceeded $5,000,000 in any one year, to pay, in addition to the rent fixed by statute, five per cent on the first million dollars in excess and two and one-half per cent on each additional million up to a maximum of fifteen per cent. Each of these bids was accompanied by a deposit of $150,000. Mr. McDonald's bid was accepted and the contract was signed on February 21, 1900. On March 24, following, the work of construction was formally begun in front of the City Hall with simple but appropriate ceremonies, Mayor Robert A. Van Wyck turning the first spadeful of earth. Subsequently there were several modifications in routes and plan, the most important of which were the substitution of a loop and terminal tracks under City Hall Park instead of a loop entirely around the Post Office Building; and a change in the route of the railroad from Fort George to Kingsbridge by diverting it somewhat to the eastward, so as to pass along Naegle avenue and Amsterdam avenue to the Kingsbridge Road. The matter of an extension to Brooklyn was acted upon by the Municipal Assembly, which passed resolutions approving such extension under the East River to Flatbush and Atlantic avenues, Brooklyn, the Mayor giving his approval on June 1, 1901.

Budget for Greater New York, 1902.

Driveways of Greater New York.

No city in the world has done so much for the owners of fine harness horses as has New York. The Speedway is, of course, the principal drive of New York. Three miles long, and built at a cost of about $8,000,000, more fast horses can be seen there on a fine afternoon than in any other place. The men who drive them are not horsemen in the common acceptation of the term, but business men who are interested in the horse, not for the money they can make out of him, but for the pleasure they derive from riding behind him. Among those who are to be seen on the drive, holding the reins over fast ones, are Nathan Straus, T. R. McMann, J. W. Cormick, J. B. Baller, John F. Cockrell, B. T. Kearns, Col. Alex. Newburger, David Lamar, C. K. G. Billings, of Chicago, and others. For two years Mr. Straus's Cobwebs held the honors as star of the Speedway, but was finally beaten by Mr. Billings's Lucille after a close and hard-fought contest. The location of the Speedway, along the west bank of the Harlem River, is unsurpassed for natural beauty, and when it is connected, by work now in progress, with the Riverside Drive, the whole will make a road for pleasure driving unequalled in the world.

In October of 1902 ground was broken for the Grand Concourse in The Bronx, which will connect all the parks of that borough. It will start at One Hundred and Sixty-first street and be four miles long. Its width is to be 180 feet, and it will cost over $1,000,000. It is expected that it will be completed in about three years.

On Seventh avenue, above Central Park, the principal driveway of the days when Robert Bonner and Commodore Vanderbilt were kings of the road, many fine equipages are seen. It is the principal street leading to the Speedway, and its liberal width and smooth pavement make it an ideal driving street.

The principal driveways of Brooklyn are those about Prospect Park and the roads to the various seaside resorts, which are well kept and give pleasure to many owners of good horses.

Classified Cities of New York State.

There are 42 cities in New York State, which are divided into three classes in order to facilitate legislation. The first class includes those cities having a population of 250,000 or more, the second class, those cities having a population of 50,000 and less than 250,000, and the third class includes all other cities. Following are the cities, as classified: First Class—New York, Buffalo. Second Class—Rochester, Albany, Syracuse, Troy. Third Class—Amsterdam, Auburn, Binghamton, Cohoes, Corning, Cortland, Dunkirk, Elmira, Geneva, Gloversville, Hornellsville, Hudson, Ithaca, Jamestown, Johnstown, Kingston, Little Falls, Lockport, Middletown, Mount Vernon, Newburgh, New Rochelle, Niagara Falls, North Tonawanda, Ogdensburg, Olean, Oneida, Oswego, Poughkeepsie, Rensselaer, Rome, Schenectady, Utica, Watertown, Yonkers, Watervliet.

New York Civil Service Rules.

The following synopsis of the regulations governing the operation of the Civil Service of the city of New York was supplied for the American Almanac for 1904 by Mr. S. W. Eustis, Secretary of the Municipal Civil Service Commission.

There are approximately 27,422 positions in the civil service of the city of New York that are subject to the rules of the Civil Service law. The applications for examination for such positions last year numbered 16,257, but of that number only 4,962 were found to appear to the Commission. Of these only 4,903 appeared and were examined, and of those examined only 1,675 were appointed. During the year 1,000 positions were made vacant by the granting of 2,467 by resignation, 135 by death and 135 by retirement, a total of 3,775 vacancies, which left 2,100 positions to be filled by transfers and promotions from other branches of the service.

The Civil Service Law prescribes that appointments and promotions in that service shall be made according to merit and fitness to be ascertained so far as practicable by competitive examination, and no appointing officer may fill any vacancy except in accordance with the Civil Service rules. No employe in the Civil Service may be transferred to any position in a higher class than that which he has held, unless he has passed an examination for the higher position, or he has served the city three years in a similar position.

No transfer shall be made from the unclassified to the classified branch of the service nor from any position in the competitive class to another in that class without examination of the Municipal Civil Service Commission, and a violation of that rule is good cause for the dismissal of the offending official.

There are four divisions of the classified service: The Exempt Class, the Non-Competitive Class, the Competitive Class and the Labor Class.

The Exempt Class comprises the deputies of the principal executive officers of the several departments.

The Non-Competitive Class includes persons appointed in an emergency to fill vacancies for which there is no eligible list on hand. Such an appointment however, cannot continue longer than two months, nor can the vacancy be again created and filled temporarily. A permanent appointment must be made after examination at the expiration of that period.

The Competitive Class includes all positions and classes of employes except those of the Labor Class, which includes all laborers and other employes who shall not be subject to examination, and except those especially exempt from examination under the Civil Service rules or the statutes of the State.

Applications for appointment under the Civil Service must be addressed to the secretary of the Municipal Civil Service Commission, and all applicants must furnish their full names and addresses, with such other information concerning themselves as is naturally of use in judging their qualifications and fitness for appointment. Applicants will find it desirable to state what branch of the service they wish to serve, if they have a preference, and they must take oath before a notary as to the truth of all their statements.

No person under eighteen years of age can be appointed to a position in the Competitive Class unless otherwise provided by the rules. Professional persons who are to perform technical or expert duties are required to satisfy the Commission that they are regularly authorized by the laws of the State to engage in their particular field of effort before they can be accepted under the Civil Service, but such persons are not expected to submit to an examination adapted for non-professional persons.

A false statement will disqualify an applicant, and the Commission may refuse to examine a person who is unsuitable for the service. No person who has been convicted of crime, who has been dismissed from the public service or who has attempted to practise fraud in connection with his application can be appointed. Intemperance also debars.

All examinations are conducted in writing and the utmost care is exercised to prevent fraud in the preparation of applicants' papers. Any person detected in fraud is instantly dismissed by the Commission. No person who has failed to pass an examination may be again admitted to examination within nine months without consent of the Commission.

Applicants for senior clerical positions must attain an average percentage of 80, and no person who receives less than 70 can be appointed to any clerical position.

Applicants for positions requiring technical or professional knowledge must attain an average of 75 per cent; otherwise they cannot be accepted.

Applicants for positions in the Fire and Police Departments are required to average 70 per cent in mental examination and 70 per cent in physical examination.

No applicant who fails utterly in any one branch of the examination can be appointed to the service.

Candidates for promotion in graded positions must attain an average of 80 per cent in all grades up to the second, and 85 per cent in all higher grades, while in the Police and Fire Departments they must average 70 per cent.

If a person feels that he has not been fairly treated by an examining board he may appeal to the Municipal Commission, who will investigate his complaint and will remedy any injustice that may have been done.

In all eligible lists prepared by the Secretary of the Commission candidates who have been honorably discharged from the United States naval military service, having served during the Civil War, will be specially indicated in order that they may receive preference in the matter of appointments. No eligible list shall be effective for a term longer than four years, and at the expiration of that time or the lapse of one year a new list may be submitted to the Secretary. The eligibility of those on the old list will expire at the same time, so that they will be obliged to pass a new examination in order to be placed on the new list.

A person who is appointed to a Civil Service position is expected to accept it within four business days after receiving notice of his appointment. Delay longer than four such days is interpreted as a declination. A person may waive his right to a position on ground of non-residence, insufficiency of salary, or temporary disability.

No person whose name is on an eligible list may take an examination for another position within nine months of the issuance of the list, except by consent of the Commission.

Persons on the eligible list of any department may accept temporary appointment in emergency cases without affecting their rights to permanent appointment later.

When extra clerks are required for temporary employment in the departments of Taxes, Finance, Elections, Assessments and Arrears, Water Rates and Water Supply, temporary appointments may be made from the eligible lists and otherwise without special examination, but such employes selected from the eligible list will be given preferment when permanent appointments are made in those departments. Those whose names are on the eligible list will be restored to that list in their original order at the expiration of their temporary service in any one of the departments named.

Every original appointment in the Civil Service is for a probationary period of three months, except in the case of firemen and of patrolmen, when it is one month's probation; if the appointee is then declared competent his appointment is made permanent; if not, he is dismissed.

Promotions from lower to higher grades of a department are made on the basis of merit, seniority of service and examination. An increase of salary is deemed promotion.

Delinquency and misconduct are sufficient causes for dismissal, and no person dismissed for such reasons may be appointed to any position under the Civil Service within two years after dismissal. No person may be dismissed from the Civil Service for political reasons, nor until the person has been given an opportunity to refute the charges made.

Any person who has retired from the Civil Service voluntarily or who has been dismissed without prejudice may be reinstated within one year after leaving his position. If he wishes to re-enter the service after the expiration of that period he must submit to examination again.

While there is no rule prohibiting persons in the Civil Service contributing to political campaign funds it is expressly stipulated that no such person shall be dismissed from the service for refusing to contribute to such funds. Nor shall any person in authority exercise his power against any Civil Service employe because of his political or religious affiliations.

Applicants for positions as laborers are required to furnish satisfactory references as to character,

Digitized by Google

sobriety and physical fitness for such work and their names are registered by the Labor Clerk, but no appointment to that class is for a longer period than one year, when they may be reappointed if they pass another physical examination. If at any time they fail to fulfil the physical qualifications required they are dismissed, but without prejudice; that is to say, their dismissal is no reflection upon their character. One department may call upon another to furnish extra labor forces temporarily, in which case the Commission will indicate what assignments are to be made, and from the lists so submitted to him the executive officer of the department requiring the laborers will select such persons as he needs and will report his selections to the Labor Clerk.

If an emergency arises under which laborers are required immediately the executive officer may hire such persons as he wants without examination, but not for a period longer than three days.

The municipal departments which come under the jurisdiction of the Civil Service Commission are:

Armory, Board of.	Borough of Richmond.	Court of Special Sessions.	Plumbers, Examining Board of.
Aqueduct Commission.	Charities, Dept. of Pub.	Docks, and Ferries, Dept. of.	Police Dept.
Art Commission.	City Record, Supervisor of the.	Education, Dept. of.	Street Openings, Bureau of
Assessors, Board of.	Civil Service Com.	Elections, Board of.	Taxes and Assessments, Dept. of.
Bellevue and Allied Hospitals.	Correction, Dept. of.	Examiners of New York.	Tenement House Dept.
Bridges, Dept. of.	Coroners.	Finance Dept.	Water Supply, Dept. of.
Borough of Manhattan.	Court, City.	Fire Dept.	
Borough of The Bronx.	Court, City Magistrates.	Health Dept.	
Borough of Brooklyn.	Court of General Sessions.	Law Dept.	
Borough of Queens.	Court, Municipal.	Municipal Explosives.	
		Parks, Dept. of.	

MAYORS OF THE CITY OF NEW YORK.

Prior to the Revolutionary War the office of Mayor of New York was filled by appointment by the Governor of the province. After the close of the war and until 1820 the appointments were made by the State Appointing Board, of which the Governor was chairman, and until 1830 by the Common Council. Since 1830 the office has been an elective one. At first the term of office was two years, but in 1871 the city charter was amended extending the term to three years. At the time of consolidation the charter fixed the term of office for Mayor at four years, but the amended charter, passed in 1901, reduced this term to two years.

The following is the list of those who have held the office of Mayor in what are now the various boroughs of Greater New York.

Names.	Terms.
Thomas Willet	1665
Thomas Delevall	1665
Thomas Willet	1667

	Total	.....	$29,441,900.00

Pre-Revolutionary Edifices in New York City.

New York City will lose, early in 1903, one of the extremely few of the remaining landmarks inherited from the period of the American Revolution. Modern progress has doomed the old edifice, conspicuous by its dinginess and nondescript architecture, which stands among the group of public buildings on City Hall Park, immediately opposite the Manhattan entrance to the Brooklyn Bridge. Erected as a jail about the year 1756, it was used by the British as a military prison during the struggle for independence, and was the scene of horrors which history can tell only in part. For this reason its demolition is deprecated by that class of people who desire to see historical relics preserved, often at the expense of utilitarianism. With the disappearance of this building, the original aspect of which disappeared many years ago, when it became the Hall of Records, New York City will retain only three of its pre-revolutionary edifices. Of these the oldest is Fraunces's Tavern, at Pearl and Broad streets, erected early in the eighteenth century, and the scene of many brilliant social and official events during the colonial period. The Morris, or Jumel Mansion, on One Hundred and Sixtieth street, near St. Nicholas avenue, is nearly as old as the ancient tavern, having been built in 1758. Its greatest claim to popular interest is that it was occupied by Washington as headquarters in 1776. St. Paul's Chapel, on Broadway, between Vesey and Fulton streets, is the other of the three monuments of old New York, and it is the one which, amid all the wonderful changes of its surroundings, retains most of old-time suggestion. In its ancient graveyard are the tombs of some of New York's earliest families, and within its walls is the pew where Washington knelt in prayer or sat listening to the sermon on Sundays during his residence in New York. The cornerstone of St. Paul's was laid in 1764.

Altitudes of Greater New York.

The following table gives the surface elevations in feet above high water mark at the points indicated:

Highest.	Feet.	Lowest.	Feet.
Richmond—Near Toad Hill	413	Richmond—South Beach	10
The Bronx—Near Riverdale, Mosholu avenue	285	Manhattan—Houston street, corner Mangin street	3 05
Manhattan—Bennett property, near 181st street	266	The Bronx—Park avenue, corner 135th street	5
Queens—Payne's farm, near Little Neck	267	Queens—Hempstead, Rockaway avenue, corner of Holland avenue	1.15
Brooklyn—Prospect Park reservoir	202	Brooklyn—Ocean Parkway, corner of Canal avenue.	3

Bridges in New York City.

The territory included within the present city limits of New York is intersected and cut into by waterways, great and small, which are crossed by eighty-one bridges, not including the High Bridge over the Harlem River at West One Hundred and Seventy-third street, nor bridges owned and controlled by railway companies. This bridge is an aqueduct, 1,460 feet long, supported by thirteen arches on granite piers, the highest arch being 116 feet above water level. As a bridge it is open to pedestrians only. Among the eighty-one other structures there is a number of foot bridges. Every variety of construction is represented, from the wooden trestle to the magnificent suspension bridge which spans the East River, connecting the boroughs of Manhattan and Brooklyn.

The New York and Brooklyn Bridge, as the greatest of these many structures is officially designated, was opened to traffic on May 24, 1883. The work of construction was begun January 3, 1870, and the approximate cost of the completed bridge was $17,000,000. It is supported by two towers of solid granite masonry, each pierced by two lofty arches through which the several roadways pass. These consist of a carriage way on each side, with a railway next to each, and a promenade for foot passengers in the centre. Tracks for trolley cars are laid on the carriage ways. The promenade is elevated above the level of carriage ways and railway, opening at the towers upon platforms affording a passage above the roadways, through the arches. These platforms are 119 feet 3 inches above high water, and afford fine views of river and harbor. The bridge is 85 feet wide, and its entire length, from City Hall Park, Manhattan, to the Brooklyn terminal is 6,537 feet. The carriageway has a length of 5,989 feet. Other interesting statistics follow: Length of New York approach, 1,562 feet 6 inches; Brooklyn approach, 971 feet; two land spans, each, 930 feet; river span, 1,595 feet 6 inches. Clear height above high water at centre of river span, temperature 90 deg. F., 135 feet. Height of towers above high water, 278 feet; above roadway, 159 feet. Size of towers at high water line, 140x59 feet; at roof course, 136x53 feet. The foundation of the Manhattan Borough tower extends 78 feet below high water mark, and the size of the caisson is 172x102 feet; the Brooklyn Borough tower foundation extends 45 feet below high water mark, and the caisson is 168x102 feet. The anchorages of solid masonry at each end of the bridge are each 129x119 feet at the base; 117x104 at the top; 89 feet high at the front, and 85 feet at the rear. Each anchor plate weighs twenty-three tons. The bridge is suspended from four cables, each 15¾ inches in diameter, each cable containing 5,296 parallel galvanized steel, oil-coated wires closely wrapped to form a solid cylinder. Each single wire is 3,578 feet 6 inches long, and weighs one pound to each twelve feet. The ultimate strength of each cable is 12,000 tons, and the permanent weight suspended is 14,680 tons.

The bridge railway was opened to the public on September 24, 1883, and in the nineteen years since that date the train service has grown from a single car every five minutes to a four-car train every fifty-five seconds during the busy hours. The passenger traffic has increased from a daily average of 15,400 to about 150,000. The first trolley cars passed over the bridge in 1897, and the total number of round trips made by trolley cars is upward of 4,000 per day. This traffic is hampered during the busy hours by the inadequacy of the loops at the Manhattan end of the bridge for the rapid handling of the crowds which gather there to board the cars. The problem of affording facilities for the quick dispatch of a greater number of cars from this end of the bridge is the subject of continual study. On a typical day the heaviest travel toward Manhattan is between 6 and 9 A. M., and the heaviest travel toward Brooklyn is between 5 and 7 P. M. The actual count on a typical day gave the following figures: To Manhattan, in bridge cars, 60,895; in trolley cars, 82,931; total for twenty-four hours, 143,826. To Brooklyn, in bridge cars, 53,569; in trolley cars, 85,669; total, 139,238; grand total for twenty-four hours, 283,064. No accurate count has been made of people crossing the bridge by the promenade and carriageways, but it is estimated that on a typical day the number is about 300,000. It may be safely estimated that the number of people now crossing the bridge is more than one hundred millions per year. Of those who travel in the bridge cars, including the trolley cars, only one person has been killed during the entire period of nineteen years—a remarkable fact when it is considered that on the bridge railway alone the aggregate number of passengers carried during that period exceeds 750,000,000.

NAMES AND LOCATION OF BRIDGES.

Following is a list of the other bridges:

Over Harlem River.—Washington Bridge; steel arch; West 181st st., Manhattan to Aqueduct ave., Bronx Borough. New York and Putnam Railroad Bridge, approaches; 8th ave., Manhattan to Sedgwick ave., Bronx Borough. Macomb's Dam Bridge; draw; 155th st., Manhattan to Jerome ave., Bronx Borough. Madison Avenue Bridge; draw; Madison ave., Manhattan to East 138th st., Bronx Borough. Third Avenue Bridge; draw; 3d ave., Manhattan and Bronx Boroughs. Second Avenue Bridge, sidewalks of Suburban Transit Railroad Bridge; draw; 2d ave., Manhattan and Bronx Boroughs. Willis Avenue Bridge; draw; East 125th st. and 1st ave., Manhattan, to 134th st. and Willis ave., Bronx Borough. The great drawbridge of the New York Central Railroad, not included among city bridges, crosses the Harlem at Park ave. and 133d st.

Over Spuyten Duyvil Creek.—Spuyten Duyvil Creek Bridge; slate girder; Broadway, Manhattan and Bronx Boroughs. Kingsbridge; wood; Kingsbridge ave., Manhattan and Bronx Boroughs. Farmer's Bridge; wood; Farmer's Bridge road, Manhattan to Kingsbridge road, Bronx Borough.

Other bridges in this vicinity are: Harlem Ship Canal Bridge; draw; at Broadway, Manhattan. Mott Haven Canal Bridge; draw; at East 135th st., Manhattan.

Over the Bronx River.—Tremont Avenue Bridge; bowstring; Tremont ave. to West Farms road. Williamsbridge; pony truss; Olin ave. to Gun Hill road. Westchester Avenue Bridge; temporary pony draw; Westchester ave. to turnpike. Samuel Street Bridge; pony truss; Samuel st. to West Farms road. Second Street Bridge; footway; at 2d st., Williamsbridge. Woodlawn Bridge; lattice; 233d st. to 19th ave. In addition to these, all in Bronx Borough, there are fourteen unnamed bridges over small creeks and streams.

Other Bridges in Bronx Borough.—Cromwell's Creek Bridge; trestle; at East 165th st. Tibbitt's Brook Bridge; deck stringer; at Riverdale ave. Broadway Bridge; masonry arch; over Tibbitt's Brook. Westchester Turnpike Bridge; stringer; over Baretto Creek. Hutchinson's River Bridge; draw; at Boston Post road. Unionport Drawbridge; over Westchester Creek; 6th st. to Eastern Boulevard. Westchester Creek Bridge; stringer; at Main st. City Island Bridge; draw; over Pelham Bay Narrows at Pelham Bay and City Island.

Over Newtown Creek.—Greenpoint Avenue Bridge, or Blissville Bridge; draw; Greenpoint ave., Brooklyn and Queens Boroughs. Vernon Avenue Bridge; draw; Commercial ave., Brooklyn to Vernon ave., Queens Borough. Meeker Avenue Bridge; draw; Meeker ave., Brooklyn and Queens Boroughs. Grand Street Bridge; draw; Grand st., Brooklyn and Queens Boroughs. Metropolitan Avenue Bridge; wooden trestle; Metropolitan ave., Brooklyn and Queens Boroughs. Metropolitan Avenue Bridge; swing; over branch of creek at Metropolitan ave., Brooklyn. Kingsland Avenue Bridge; trestle; over branch of creek at Kingsland ave., Brooklyn.

Over Gowanus Canal, Brooklyn.—Hamilton Avenue Bridge; swing. Ninth Street Bridge; swing. Third Street Bridge; swing. Carroll Street Bridge; Boston draw. Union Street Bridge; swing. Third Avenue Bridge; fixed span; over branch of canal.

Over Coney Island Creek, Brooklyn.—Harway Avenue Bridge; bascule; West 18th st. West 17th st. Ocean Avenue Footbridge; Sheepshead Bay to Manhattan Bach. Emmons Avenue Bridge; trestle; at Emmons ave. Shell Road Bridge; stringer; at Shell road. Coney Island Avenue Bridge; stringer; at Coney Island ave.

Over tidal and town creeks in Brooklyn.—Barren Island Footbridge, Barren Island trestle. Shell Road Bridge, Bergen Beach; stringer. Voorhees Avenue Footbridge., Gravesend Beach Lane Bridge.

Other bridges in Brooklyn Borough.—Old Mill Bridge; stringer; over Betts Creek at Old Mill road. Kouwenhoven Lane Bridge; stringer; over Bedford Creek. Washington Avenue Bridge; Boston draw; over Wallabout canal. Kent Avenue Bridge; fixed span; over Bushwick Creek.

Over Dutch Kills Creek, Queens Borough.—Borden Avenue Bridge; draw. Hunter's Point Bridge; draw. Thompson Avenue Bridge; stone and brick arch.

Digitized by Google

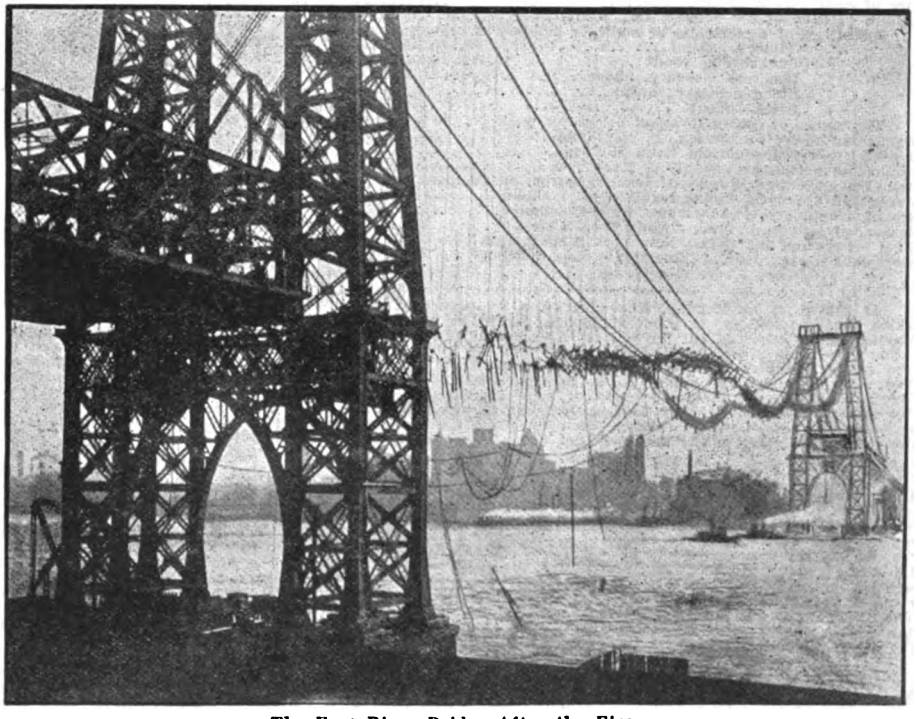
Other bridges in Queens Borough.—Clinton Road Bridge; wooden trestle; over English Kills Creek. Locust Avenue Bridge; wooden trestle; over Beaver Creek; Locust ave. to Rockaway road. Flushing Creek Bridge; draw; Jackson ave. to Broadway. Strong's Causeway Bridge; draw; over Horse Brook; Flushing to Corona. Little Neck Bridge; draw; over Alley Creek at Broadway. Norton's Creek Bridge; draw; Far Rockaway to Edgemere. There is also in Queens Borough the long trestle of the New York and Rockaway Railroad across Jamaica Bay.

Bridges in Richmond Borough (Staten Island).— Mill Creek Bridge, Richmond terrace; stone arch. Lemon Creek Bridge, Princess Bay; draw. Fresh Kills Bridge; draw and trestle; over Richmond Creek at South Broadway. Western Avenue Bridge; wood trestle; over Bridge Creek.

THE WILLIAMSBURG (NEW EAST RIVER) BRIDGE.

The Williamsburg, or New East River Bridge, the second to be built to afford transit between the boroughs of Manhattan and Brooklyn, was authorized under the provisions of Chapter 789 of the Laws of 1895. This act was approved by the Governor on May 27, of the same year. In accordance with its provisions six commissioners were appointed, three each by the Mayors of the then existing cities of New York and Brooklyn, the two Mayors acting as ex-officio members of the commission. On December 18, 1895, the commission purchased for $200,000 all the rights of the East River Bridge Company to build a bridge at the chosen site. The route of the bridge is parallel with Delancey street, the northerly line of the bridge corresponding with the southerly line of that street, and extending to a point in Brooklyn on South Fifth street, about 220 feet east of Driggs avenue.

A general plan of the bridge was adopted by the commission on August 19, 1896, and was formally filed in the Departments of Public Works in the cities of New York and Brooklyn. An amended plan was adopted and filed in May, 1897. Extensive diamond drill borings were made on both sides of the river at the sites of the tower foundations during the Summer of 1896. The first actual work on the bridge was begun on the Manhattan tower on October 28 of that year.



The East River Bridge After the Fire.

A new commission of six members was appointed under the Greater New York Charter on January 19, 1898, and served until January 1, 1902, when the New East River Bridge Commission ceased to exist. The Revised Charter went into effect that day, and under its provisions the Williamsburg Bridge, in common with all other bridges constructed or to be constructed for the city were placed under supervision of the Commissioner of Bridges. In the meantime the tower foundations on both sides of the river, together with the towers and anchorages, had been completed, and the first wire for the construction of the temporary foot bridge was strung on April 11, 1901. The first wire for the permanent cable crossed the river on November 29 of that year.

The tower foundations on both sides of the river rest on solid rock, the north pier on the Manhattan side at a depth of 56 feet, and the south pier at a depth of 65 feet, at high water. On the Brooklyn side the south pier reaches the rock at a maximum depth of about 90 feet, and the north pier at a maximum depth of about 110 feet below high water. The Manhattan anchorage rests on 3,500 piles driven through clay to a bed of sand overlying the rock, while the Brooklyn anchorage rests on natural sand.

Land for the approaches to the bridge has been acquired at a cost of upward of $9,000,000, which sum will probably be increased by acquisitions yet to be made. Two full blocks and a part of two others will be taken in Brooklyn for a plaza. It was originally intended to take two blocks for the same purpose in Manhattan.

The Brooklyn approach is substantially completed, and the Manhattan approach is nearly one-half done. The cables were completed in August, 1902, ready for the suspenders. Manufacture and erection of the suspended span was commenced the same month, and it is expected that this span will be fully erected by July, 1903, at which time the approaches should be completed, and the only work remaining to be done on

Digitized by Google

the bridge would consist of laying the flooring and pavement, grading the plazas and the work of painting, etc., for the final completion of the bridge.

Connected with the building of the bridge the engineering and executive office staff employed is composed as follows: L. L. Buck, consulting engineer; O. F. Nichols, engineer in charge; H. D. Robinson, K. L. Martin, Alex. Johnson, Robert E. Hawley, W. R. Bascome, E. D. Knap, George S. G. Lewis, Olaf M. Kelly, J. A. Tilly, assistant engineers; J. D. Wilkins, draughtsman; L. Krummel, rodman; Edward Joyce, bookkeeper; William D. Avery, Lucy E. Litchfield, stenographers and typewriters.

Following are data as to dimensions, features, materials, etc., of the bridge:

Length of main span, centre to centre of towers	1,600 feet
Length of entire bridge	7,200 feet
Width of bridge, main span over all	118 feet
Height of bridge above high water at pier head lines	117 feet
Height of bridge for 400 feet over middle of river	135 feet
Height of masonry towers above high water	23 feet
Height of cables at towers above high water	335 feet
Width of each of two carriageways	18 feet
Number of trolley tracks	4
Number of elevated railway tracks	2
Weight of steel in each tower	3,048 tons
Weight of steel in Brooklyn approach	6,085 tons
Weight of steel in Manhattan approach	10,550 tons
Weight of steel in main span	7,772 tons
Weight of steel in cables and fittings	5,000 tons
Diameter of cables, outside of wires	18¾ in.
Number of wires in each cable	7,696
Size of each wire in cables	(No. 6) = about 3-16 in.
Length of each of the cable wires, about	8,500 feet

Quantities of material to be made or handled in bridge:

Timber, about	6,500,000 feet B. M.
Excavation, about	125,000 cubic yards
Concrete masonry, about	60,000 cubic yards
Stone masonry, about	130,000 cubic yards
Steel, about	40,000 tons

The names of contractors and prices for work on the seven large contracts already let are as follows:

Manhattan tower foundation, P. H. Flynn	$373,462.71	completed
Brooklyn tower foundation, Colin McLean	485,082.75	completed
Manhattan anchorage, Shanly & Ryan	797,770.00	
Brooklyn anchorage, Degnon-McLean Construction Company	771,778.00	
Manhattan approach, Pennsylvania Steel Company	1,464,000.00	
Brooklyn approach, Pennsylvania Steel Company	947,000.00	
Suspended structure, Pennsylvania Steel Company	1,123,400.00	
Steel towers and end spans, New York Steel & Iron Company	1,221,726.60	
Steel cables, etc., John A. Roebling's Sons Company, of New York	1,398,000.00	
Total	$8,582,220.06	

At 4:30 p. m. on Monday, November 10, a fire occurred on top of the Manhattan tower of this bridge, which burned itself out in about six hours, destroying the timber platforms and framework used in cable making on the south end of the tower. As a result of the fire the foot bridges fell and new working platforms were made necessary for the completion of the cables. Some of the outer wires at the saddles on the two southerly cables were so heated as to impair their strength, and a commission of engineers was appointed to determine the extent of the damage done and the method of repairing it. Messrs. L. L. Buck, George S. Morrison and C. C. Schneider were appointed members of the commission. First estimates of the damage done were greatly exaggerated, and it was feared that the completion of the bridge would be seriously delayed. Latest estimates, however, place the amount of damage at about $60,000, and it is believed that the delay in the work will not cause a loss of more than two months.

BRIDGE NO. 3.

Work on the bridge designated No. 3, to connect Manhattan and Brooklyn, was begun on August 29, 1901. The plans contemplate a structure about 9,135 feet in length, of the suspension type, to cost in the neighborhood of $16,000,000. Its entrance in Manhattan will be at the junction of the Bowery and Canal street; and in Brooklyn on Willoughby street, between Prince and Gold streets. There will be three spans carried from four cables, the centre or river span to have a length of 1,465 feet, and the land spans 850 feet each. The approaches will be carried on steel viaducts from terminals to anchorages, that in Manhattan to be about 1,940 feet long, and that in Brooklyn about 4,230 feet. The towers supporting the cables will rise about 325 feet above mean high water, and will be of steel framework, resting upon masonry bases rising 23 feet above mean high water. There will be eight legs to each tower, two directly under each cable. The bridge will carry four trolley tracks, two sidewalks, each 11 feet wide in the clear, supported on cantilever beams outside the trusses, and a roadway 36 feet wide in the clear, occupying the central part of the bridge. There will also be an upper deck carrying elevated tracks.

BRIDGE NO. 4.

Bridge No. 4, upon which the work of construction is now in progress, will connect the Boroughs of Manhattan and Queens. It is to be of cantilever type, having five spans, with a total length, including the approaches, of about 8,230 feet. The bridge proper will consist of five spans of unequal length, their total length being 3,673.5 feet. These spans will be supported by six piers—four main piers, of which two will be on Blackwell's Island, and two anchor piers. The Manhattan entrance to the bridge will be on Second avenue, near 60th st., and the Queens Borough entrance on Hunter avenue, at Jane and Academy streets. The estimated cost of this bridge is $12,548,500.

Pilot Boats of New York.

The cruising ground of pilot boats for New York harbor is from Sandy Hook to Fire Island, east, and to Barnegat, south. They are under the supervision of Five Commissioners, of whom T. P. Ball, A. F. Higgins and W. B. Hillow were appointed by the Chamber of Commerce, and J. H. Winchester and W. I. Comes by the Board of Underwriters. A. F. Higgins is president of the Board and D. A. Nash, having his office at No. 17 State street, is the commissioner. Two sail boats, the Ambrose Snow and the C. H. Colt, and two steamers, the New York, 6, and the New Jersey, are on duty always, and the Washington, 5, and the Edward A. Barrett, are held in reserve prepared for duty.

The day signal is a Jack at the foremast head, and the night signal is a flash of blue light shown anywhere on deck. Boats on station carry from sunset to sunrise a bright red under a white signal light.

The rates of pilotage between April 1 and November 1 are as follows: Inward bound vessels drawing less than 14 feet, $2.78 per foot; between 14 and 18 feet, $3.38 per foot; between 18 and 21 feet, $4.13 per foot; 21 feet and upward, $4.88 per foot. Outward bound vessels drawing less than 14 feet, $2.02 per foot; 14 to 18 feet, $2.33 per foot; 18 to 21 feet, $3.08 per foot; 21 feet and over, $3.56 per foot. Vessels bound inward also pay off shore pilotage, an additional 25 per cent, if they take a pilot aboard more than 16 miles from Sandy Hook light, unless the pilot waives this claim. If he gives up the extra pay he must be taken aboard, if not his services may be refused until the limit is reached. Between November and April an addition of $4 is made to the general bill. If an outward bound vessel is detained after a pilot has been engaged, except by stress of weather, $3 per day and living expenses is charged in addition to fees.

Exchanges and Boards of Trade in New York.

The exchanges and boards of trade of the city are located as follows: The Stock Exchange, seats in which now sell for over $80,000, will occupy the fine new building in Broad street in the course of the current year. In these bodies the amount of business transacted is immense, and fortunes vary upon the fluctuations in prices of the goods dealt in. A visitor to the city always finds them among the most interesting places to be seen.

Name.	Location.	Incorporated.	No. of members.	President.	Secretary.
Building Material Exchange	11 Broadway	....	....	Orin F. Perry	Chas. J. Warner
Chamber of Commerce	66 Liberty	1770	1,371	Morris K. Jesup	Louis H. Peck.

Jury Duty in Greater New York.

(Revised to date at the office of the Commissioner of Jurors.)

A person over 21 years and under 70 years of age is liable to be called upon for jury duty in the County of New York provided he is a citizen of the United States and a resident of the county in which the court is held. A resident within the meaning of the jury law is one who dwells or lodges within the county for the greater part of the time between the 1st day of October and the last day of June. He must also be owner in his own right of real or personal property to the value of $250, though the husband of a woman owning that amount of property in her own right is eligible. Other requirements are the possession of the natural faculties, intelligence, good character and ability to read and write the English language understandingly.

In the County of Kings a man, to be qualified, must be a citizen of the United States, and a resident of that county, not less than 21 nor more than 70 years of age, the owner in his own right of real property to the value of $150, personal property to the value of $250, or the husband of a woman owning real or personal property to that value in her own right. Other qualifications are the same as for the County of New York.

Those disqualified in the County of New York are the following: The Governor, Lieutenant-Governor, Governor's private secretary, the Secretary of State, the Comptroller, State Treasurer, Attorney-General, State Engineer and Surveyor, a Canal Commissioner, Inspector of State prisons, a Canal Appraiser, Superintendent of Public Instruction, Superintendent of the Bank Department, Superintendent of the Insurance Department, a member of the Legislature during the session of the House of which he is a member, a judge of the Court of Record, a Surrogate, a Sheriff, Under Sheriff, the clerk of a Court of Record, and the deputies of the above officers.

The following are exempted as trial jurors upon claiming the right, although qualified: A clergyman officiating as such, and following no other calling; a practising physician, surgeon or surgeon dentist having patients requiring his daily personal attendance, and not following any other calling; a licensed pharmacist, while actively engaged in his profession as a means of livelihood; a registered veterinary surgeon actively engaged in his profession; an attorney or counselor-at-law, regularly engaged in the practice of law; a professor or teacher in any college, academy or public school, not following any other calling; an editor or reporter or editorial writer employed on a daily newspaper and not following any other vocation. The holder of an office under the United States, or the State or city or County of New York, not disqualified. A Consul of a foreign nation; a captain, engineer or other officer actually employed upon a vessel making regular trips, or a licensed pilot actually following that calling. A superintendent, conductor or engineer employed by a railroad company other than a street railway company, or a telegraph operator employed by a telegraph company, actually engaged in duty for the company by which he is employed. A Grand Juror or Sheriff's juror selected for the year pursuant to law; any officer, non-commissioned officer, musician or private actually serving in a brigade, regiment, battalion, company or troop of the Old Guard of the City of New York, or of the National Guard of the State, uniformed and equipped according to the law, and faithfully performing his duty; or a general or staff officer actually performing duty as such, or a person who has been honorably discharged from the National Guard after five years' service in either capacity; a person who has been honorably discharged from the military forces of the State after seven years' service, provided this service has been performed prior to 1862, either as a general or staff officer or non-commissioned officer, musician or private in a uniformed battalion, company or troop, of the militia of the State, and since April 23, 1862, as a member of the National Guard of the State of New York; a person who has been honorably discharged after at least five years' faithful service in a fire company or fire department; persons who are physically incapable of performing jury duty by reason of severe sickness, deafness or other physical disorder; a person holding office in the fire or police department of the city; a duly licensed engineer of steam boilers actually employed as such; election officials; municipal court jurors.

Those having the right to claim exemption in the County of Kings are the same as in the County of New York with the exception of Consuls of foreign nations, Grand Jurors and Sheriff's jurors; and including persons belonging to the army or navy of the United States.

By a law passed in 1901 a Commissioner of Jurors was appointed and the selection of special juries provided for in criminal and civil actions in any county having a population of at least 1,000,000. Special jurors are selected from the persons qualified to serve as trial jurors. No person may be selected who has been convicted of a criminal offense, or found guilty of fraud or other misconduct by the judgment of any civil court; nor any person who possesses conscientious opinions regarding the death penalty such as would deter him from finding a verdict of guilty for any crime the penalty for which is death; nor any person opposed to convictions on circumstantial evidence, or any person who holds any opinions that would prevent his giving a fair and impartial verdict.

A special jury may be drawn in civil cases where it appears to the court, upon application, that the case at issue is of such importance or intricacy or that the subject-matter of the indictment has been so widely commented upon that an ordinary jury cannot, without delay and difficulty, be obtained to try such issue. Under such circumstances as these the court may order a special jury to be drawn, specifying when the drawing of the special jury shall take place, the number of special jurors to be drawn and the day of the term of court on which they shall appear.

Justices of the Supreme Court residing in the County of Kings, or a majority of them, may require the Commissioner of Jurors to examine and revise the general panel of trial jurors for the county, under their supervision and direction. He is empowered to subpoena every person on the panel for the year, and make inquiries and examine them as to their competency and qualifications, and may take off from the list those persons who do not meet with the requirements. If any person summoned fail to appear, except on account of physical disability, or refuse to be sworn, or to answer such pertinent questions as the Commissioner may ask, he may be punished by any trial justice of the Supreme Court sitting in that county. Every person so summoned must present, at that time, any exemption from jury service that he may have, and if he fails to do so, he shall be deemed to have waived his right and cannot be excused thereafter except for lack of some requirement.

Markets in New York City.

The following is a list of the markets in Manhattan:

Catharine—Established 1786. Bounded by Catharine, Cherry and South streets, and Catharine slip.

Zoological Parks and Aquarium in Greater New York.

What is to be one of the largest and most complete zoological parks in the world is the institution popularly known as the "Zoo," which is located precisely in the centre of the Borough of The Bronx midway between the Hudson River and Long Island Sound. It occupies a tract of 261 acres, varied in surface, traversed by the stream known as Bronx River, covered in part with natural forest growth and abounding with heavy outcroppings of rock. This tract was given by the city of New York to the New York Zoological Society for the purpose to which it has been devoted. An appropriation of $120,000 was added to the gift. The Society, which had expended about $15,000 in the preparation of plans for the institution, had provided $138,000 for their execution, and the enterprise was launched under favoring financial auspices. Possession of the territory was taken on July 1, 1898, and the first building erected—the Aquatic Birds' House—was begun on August 11. It is a substantial edifice of brick with terra cotta trimmings, the ornamentation, as with all the buildings subsequently erected, being appropriate to the character of its occupants. The buildings erected thus far include, in addition to the Aquatic Birds' House, the Primates' (or monkey) House, the Reptile House and the Lions' House, all of the same substantial character, together with smaller structures for various creatures. One of the features of the place is the huge flying-cage, as large as a city block. Here, in the Summer, may be seen every variety of bird on the wing, from the swift and graceful songster to the lumbering but lordly eagle. In convenient locations dens have been cut in the rocks for the wild animals; quarters have been provided for the burrowing rodents; little lakes and streams have been created for aquatic birds and amphibious creatures, and ranges have been laid out for deer and antelopes. For the comfort and pleasure of visitors ample provision has been made also, and as admission is free on five days of the week, including Sundays and holidays, the park is visited by thousands on every day when the season and the weather are favorable. The work of developing the park makes constant progress, Winter and Summer.

Besides the Zoological Park there are zoological collections in Central Park, Manhattan, and in Prospect Park, Brooklyn, both of which are of fair size, varied character, and attractive to the public.

The Aquarium, which occupies the building formerly known as Castle Garden, at Battery Park, is a very complete institution of its kind, and the collection of fishes and aquatic animals, reptiles, etc., to be seen there is interesting either to the student or the pleasure seeker. Among the specimens there are usually a number of rare character, while always there may be seen varieties of strange-shaped and gorgeous hued fishes, unfamiliar except through pictures and collections. The Aquarium was established by the city, but was turned over to the care of the New York Zoological Society during the year 1902.

Coal Weighing Stations.

The following scales have been designated by the Mayor as weighing stations for coal and coal vehicles under the provisions of Chapter 174 of the laws of 1897:

Every purchaser of coal in New York City is entitled to send any load of coal so purchased to any of the following scales to be weighed, and a certificate of the weight given, by paying to the driver of the vehicle 15 cents a ton to pay the weighmaster's fee; provided, however, that the scale selected shall not be more than one-half mile distant from the place of loading or of the place of delivery of said coal.

Location of Scales—West Side—477 Washington street, 608 Greenwich street, 508 West street, 14th street and 10th avenue, 560 West 23d street, 293 9th avenue, 373 10th avenue, 475 11th avenue, 46th street, North River, 513 West 54th street, 646 West 55th street, 95th street and Boulevard, 227 St. Nicholas avenue, 572 Boulevard, 2118 Boulevard, 151st street and 7th avenue. **East Side**—245 South street, Delancey street and East River, 88 Mangin street, 4th street and East River, 5th street and East River, 14th street and Avenue D, 20th street and East River, 32d street and East River, 610 1st avenue, 49th street and East River, 56th street and East River, 206 East 65th street, 74th street and East River, 502 East 80th street, 94th street and East River, 107th street and East River, 2330 1st avenue, 13 West 136th street, 444 East 138th street, Bedford Park, 496 Southern Boulevard, 161st street and 3d avenue.

Churches in Greater New York.

Brooklyn as "The City of Churches" is rapidly losing its distinction as such since its incorporation into Greater New York, for the greater city is gaining the title. There are about fifty denominations of the Christian Church represented between the Battery and Harlem, with the same representation across the East River and in The Bronx. Besides the regular denominations there are many unsectarian missions and schools that are religious in their principles.

In number of church edifices and established missions the Roman Catholic leads with 112 parishes in Manhattan and The Bronx, 87 in Brooklyn, 25 in the Borough of Queens and 12 in the Borough of Richmond. In Manhattan and The Bronx there are 94 Jewish synagogues and religious societies, 19 in Brooklyn, 1 in the Borough of Queens and 1 in the Borough of Richmond.

Of the Protestant Christian denominations the Baptists have 47 church societies in Manhattan and The Bronx, 41 in Brooklyn, 12 in the Borough of Queens and 5 in the Borough of Richmond. Christian Scientists have 5 churches in Manhattan and The Bronx, 3 in Brooklyn and 1 in the Borough of Richmond. Congregationalists (Trinitarian) have 13 church societies in Manhattan and The Bronx, 29 in Brooklyn and 9 in the Borough of Queens.

There are three churches of the Disciples of Christ in Manhattan and The Bronx, but none in Brooklyn, Queens and Richmond. In Manhattan and The Bronx the Evangelical Association has 5 churches and 2 in the Borough of Queens. There are two bodies of Friends, or Quakers, in Manhattan and The Bronx. The strength of the Lutherans, both divisions, is 51 churches in Manhattan and The Bronx, 52 in Brooklyn and 10 in the Borough of Queens. There are 60 churches of the Methodist Episcopal denomination in Manhattan and The Bronx, 58 in Brooklyn, 20 in Queens and 14 in Richmond. The African Methodist Episcopal Church, a separate denomination, has 7 churches in Manhattan and The Bronx, 3 in Brooklyn and 7 in Queens. In Brooklyn there are 3 churches of the Methodist Primitive denomination, 1 of the Methodist Protestant and 4 Pentecostal churches. The Moravians have 1 church in Brooklyn and 4 in the Borough of Richmond.

Fifty-seven Presbyterian churches are located in Manhattan and The Bronx, 42 in Brooklyn, 11 in Queens and 3 in the Borough of Richmond. There are 85 parishes and missions of the Protestant Episcopal Church in Manhattan and The Bronx, 57 in Brooklyn, 27 in Queens and 15 in Richmond. Of the Reformed Church bodies, including the Reformed Church in America, the Reformed Church in the United States and the Reformed Episcopal Church, there are 36 societies in Manhattan and The Bronx, 5 in Brooklyn, 13 in Queens and 5 in Richmond. The churches of the Seventh Day Adventists and the Swedenborgians in Greater New York are 4 of the first denomination and 3 of the second in Brooklyn and 1 each in Manhattan and The Bronx.

There are 5 churches of United Presbyterians in Manhattan and The Bronx and 3 in Brooklyn. The Unitarians have 3 churches in Manhattan and The Bronx, 5 in Brooklyn and 1 in Richmond, and the Universalists have 2 churches in Manhattan and The Bronx and 5 in Brooklyn. Eight churches of miscellaneous denominations are registered in Manhattan and The Bronx, 14 in Brooklyn, 5 in Queens and 4 in Richmond.

Among the churches which are included under miscellaneous may be mentioned the Armenian National Church, the Greek Orthodox and Russian Orthodox churches, a church of the Latter Day Saints (Mormons), Beacon Light Rescue Mission, Broome Street Tabernacle, Gospel Tabernacle, Strangers' churches and People's tabernacles, Catherine Mission, Christian Gospel Mission, Deems Memorial Church, De Witt Memorial, Gospel Tabernacle, Eighth Avenue Mission, House of Lord's Mission, International Union, Mariners' Mission, Mizpah Seamen's Mission, Divine Providence Mission, New York Foreigners' Mission, Olivet Memorial, Unity Congregation, Wood Memorial Chapel, Church of Independent Dominion, Free Baptist Church, Fraternity of the Soul Community, Emanuel Mission, Powers Street (Brooklyn) Gospel Mission, Gospel Mission Church (Queens), Immanuel Union Church (Richmond), Swedish Mission Friends' Association (Richmond).

But few of the churches with buildings are without regular pastors, though in the case of some of the missions parochial work is done by ministers from other parishes. Some of the miscellaneous churches are branches of established church societies and by right should be included with them. The Salvation Army and the Volunteers of America, while being religious in their work, are not included among the denominations, for their work is entirely unsectarian and more of the nature of the "institutional church" work. The church buildings in the city are well distributed and no section is without representatives of several denominations.

Church Attendance in New York.

Below will be found a table of church attendance in New York City from a census made by the Church News Association. On the first three Sundays of November, 1902, an actual count was made by agents of the Church News Association of the attendance at all the churches of the principal religious denominations in the city, and an average was taken. The figures show some interesting facts. The total average church attendance for the first three Sundays in November was 451,731 adults, children not being counted. This means that about one in every three residents of Manhattan attend church on Sunday. About one-third of the number was men. The attendance at the Protestant churches is about the same as that at the Catholic churches, while the proportions in the various Protestant denominations are nearly the same. In only one denomination—the Congregational—did the men exceed the women.

These figures were obtained by actual count, generally without the knowledge of the pastor or congregation. Under morning attendance are included all services held before 12 o'clock noon, and evening attendance includes all held after noon. It is intended to make systematic counts of this nature from year to year, in order that comparative tables may be obtained by means of which some idea of increase or decrease of church attendance may be obtained.

Tied Up by Storm.

An unusually severe storm struck New York, December 11, and played havoc with the street railway and elevated lines, tying up traffic for hours on several lines. Preceded, as it was, by a cold wave, intense and unexpected, the suffering among the poor was almost unprecedented for the time of the year. The high price of coal and the extreme difficulty of obtaining it at any price added to the discomfort, and even those in moderate circumstances were obliged to suffer.

The worst cold of the year came on December 9, the coldest night of December known for years. The lowest for the day was 8 degrees above zero, and the highest was 19 above. A sharp wind from the northeast added to the intensity of the cold and made those who were obliged to be on the street feel its bite through the thickest of ulsters.

Three deaths from freezing were reported, and two men were saved from death by the police and hospital people. A widow and her two-year-old son were found dead in a shabby room at Greenpoint. There was no fuel in the room and the two people, the mother and her child, were lying clasped together on a thin mattress, laid upon the floor. Their positions showed that to the end the mother had shielded the child, at the cost of her own life, for the covering, insufficient for one, had been given him. On the little fellow's face the tears had frozen.

John Stellenweerf, a blacksmith, was overcome with the cold while on his way home from work and was found dead along the roadside near West Brighton, Staten Island. Charles Mathews, an old actor, known as "King Lear," was found freezing on the steps of St. Chrysostom's Church, at the corner of Seventh avenue and Thirty-ninth street, and was taken to the hospital just in time to save his life. An unknown man was overcome on East Eightieth street and was revived with difficulty.

The temperature records as furnished by the Weather Bureau, for December 9, are as follows:

Midnight	15	9 A. M.	8	6 P. M.	10
3 A. M.	13	Noon	14	9 P. M.	16
6 A. M.	12	3 P. M.	19	Midnight	17

The ice storm which followed the cold wave caused the greatest discomfort to a great number of people. The newly installed electric system on the Sixth Avenue Elevated proved unable to meet the conditions imposed by the freezing rain, and on December 10 thousands of people were late at their work. The trains were run but seldom during the entire day and not at all until steam was substituted for electricity as the motive power.

The third rail, from which the power is obtained, became coated with ice as soon as the rain had fallen for half an hour and the stiff brushes with which the cars are equipped proved inadequate to keep the metal clear. The same difficulty was experienced on the Third and Second Avenue lines, though not to so great an extent. In Brooklyn, where the third rail system has been used on the elevated roads for a longer time, the officials knew better how to prevent a tie-up of their trains and Brooklyn people reached their places of business in New York City sooner than those from Harlem, who had to ride on overcrowded surface cars.

On the 13th and 14th a sleet and snow storm of unusual violence affected traffic to some extent, but did not cause so much trouble as the rain that fell and froze two days before. This storm interfered with the surface cars more than with the elevated, and made the streets almost impassable for horses, for the sleet that fell did not melt or become packed, but covered the roadways with a treacherous, shifting, sand-like substance that offered no footing at all.

And with the cold and sleet and snow the price of coal began to creep upward again and the dealers declared it impossible to obtain a supply half sufficient for the demands upon them. On the ninth of December hard coal was quoted at from $7.50 to $14 a ton and was practically unobtainable at any price. Soft coal was offered for sale at $5.75. The American Ice Company made an effort to help the poor who purchase coal by the pailful. They offered to sell coal at 5 cents the pailful at the Harlem branch of the company, and as long as the supply lasted there was a line of men, women and children waiting for their little share of fuel. At the yards of Alfred Barber's Sons and Curtis & Blaisdell coal was also sold by the pailful at low prices, as was done by some other dealers.

Some interesting figures, furnished by the Bureau of Statistics of the Treasury Department, show how the strike of the Summer affected the movement of coal, and give a better idea than words how small the supply is at present. These figures are for the port of Boston and show the coastwise receipts from domestic and foreign ports and by rail. In 1901, for the ten months ending October 31, the total receipts of hard coal at Boston were 1,873,975 tons, and for the same period in 1902 the total receipts were only 765,365 tons, a difference of more than a million tons. For October, 1902, the receipts of hard coal amounted to 166,117 tons less than in 1901.

The storms of December, 1902, do not compare in their effect upon traffic with the blizzard of 1888. In '88 all traffic was tied up for almost twenty-four hours, and it was nearly impossible to move along the streets on foot. The drifting snow was worse than freezing rain or sleet, and all bad Winter weather is marked by reference to the "blizzard of '88."

THE GREATEST CURATIVE FORCE IN THE WORLD

THE THOMAS A.

Edison, Jr., Magno-Electric Vitalizer

THE MAGNO-ELECTRIC VITALIZER, invented by Mr. Thomas A. Edison, Jr., is the result of many years' close scientific study of the actual cause of disease. In his laboratory investigations into the effects of various electric currents upon human nerve, Mr. Edison became impressed with the belief that the living nerves themselves generated electricity, and that the health of the entire human organism was dependant upon the existence of a full, regular and unimpaired supply of this natural electricity to the nerves. He discovered that when disease was present the nerves showed a distinct loss of electricity, which became more marked as the disease progressed.

With the practical foresight which is the chief characteristic of all really great inventors, Mr. Edison saw that in discovering the fact that loss of natural electricity from the nerves was the cause of disease, he had also uncovered the secret of curing such diseased conditions by restoring to the body its lost electrical force, or vital power.

Realizing that it was necessary to invent an instrument which would revitalize worn out nerves, Mr. Edison created the powerful curative device now universally known as the MAGNO-ELECTRIC VITALIZER.

The MAGNO-ELECTRIC VITALIZER is a small appliance, worn upon the spine, which sends its healing, health-giving current THROUGH THE BODY, stirring every muscle, tendon and nerve. Its influence is exerted upon the entire system, and it enters and works upon it. The MAGNO-ELECTRIC VITALIZER strikes boldly at the very fountain and spring of unhappiness, worry, care, weakness and disease. It will recharge the run down system. It will build up the debilitated body. It will bring strength where weakness was. It will kill the germs of disease. It will invigorate, brace and vitalize you. It will give you the vital force necessary to a useful life and a strong manhood.

No discovery in modern times has ever aroused one-half the interest that is now being evinced in the younger Edison's invention. It is pointed out by scientists that the MAGNO-ELECTRIC VITALIZER is the most powerful and remarkable curative force in existence to-day. There seems to be no limit either to its powers or its possibilities.

It is equally adapted to the relief of the most complex disorders of the nerves, such as nervous prostration or paralysis; to the cure of diseases of the blood, such as Rheumatism, Catarrh and Malaria; to lung and respiratory complaints like consumption and asthma; to digestive troubles, such as dyspepsia and malnutrition; to the various organic and intestinal conditions which result in Bright's Disease and appendicitis, as well as to the many circulatory defects that are evidenced by heart disease and failing strength. In fact, the Vitalizer fully merits the name Mr. Edison has bestowed upon it, for it stores up and communicates Vitality.

The MAGNO-ELECTRIC VITALIZER is being placed upon the market by Mr. Edison's own company, the THOMAS A. EDISON, JR. CHEMICAL CO., 14 Stone Street, New York. A booklet containing complete information is sent free on application to those who suffer from Consumption, Bronchitis, Malaria. Rheumatism, Debility. Sleeplessness, Nervous Exhaustion, and to all who may be interested in the cure of disease by electricity.

Are You Ambitious?

The opportunity we offer is not for sluggards or "clock-watchers." It is for men of push and energy—men that are willing to work, but want their work to pay.

Why struggle along in a poor position, at low wages, when you know that your brains and natural abilities can be trained to make you a success? For ten years we have been training ambitious men and women to be specialists—to fill positions and to earn salaries beyond the reach of ordinary workers that lack this special training. We can do this for you, if your ambition is real. Cut out, fill in, and send us the coupon above, and learn all about it.

DO IT NOW!

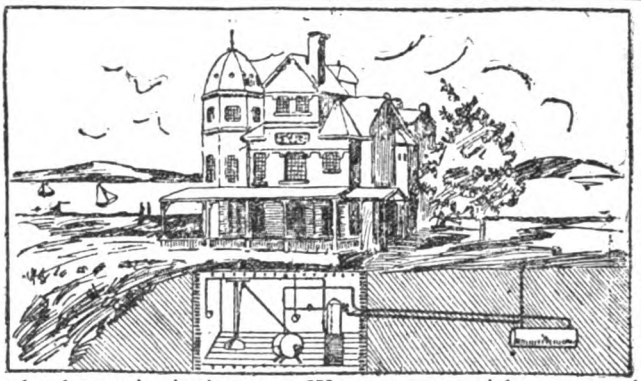
CAN I BECOME AN ELECTRICIAN?

I consider the Electrical Engineer Institute of Correspondence instruction conducted by Messrs Wehrfer and Martin "to be of great value to those who desire an Electrical education"
Thomas A. Edison

Yes, you can. We teach Electrical Engineering at your home by mail at a cost within the reach of any one. No matter where you live, if you can read and write, we guarantee to teach you thoroughly. Our institute is indorsed by Thomas A. Edison and others. We teach also Mechanical Engineering, Steam Engineering, Mechanical Drawing, Telephony, Telegraphy, Electric Lighting, Electric Railways, Electric Motorman's Course, Short Electrical Course, Dynamo Tender's Course, X-Rays, Mathematics, etc., by mail. Thousands are successful and gaining better positions and salaries studying at home by our correspondence system. Write for our Free Illustrated Book, "Can I Become an Electrical Engineer?"

The Electrical Engineer Institute of Correspondence Instruction, Dept. 21, 240-242 West 23d St., New York.



Our remarkable recent inventions enable us to offer the public an intensely brilliant, smokeless gas at much less cost than city gas, better, safer, and cheaper than electricity, and costing but one-fourth as much as acetylene. Most durable and least expensive apparatus to maintain in effective perpetual operation. Gives services of lighting, cooking, and heating, and operating pumping engines. Fullest satisfaction guaranteed, and easy terms. The very apparatus for suburban homes, institutions, etc. We construct special apparatus also for fuel gas for manufacturing, producing gas equivalent to city gas at 50 cents per 1,000 cubic feet, and made to respond to very large demands; also for lighting towns, etc. Cooking by gas rescues a person from the intolerable heat experienced with other stoves. Send for Catalogue.

PATENTS GUARANTEED

PATENTS SECURED OR FEE RETURNED.

HAVE YOU AN INVENTION? IF SO, IT SHOULD BE PROTECTED BY A PATENT.

The man who has ever conceived a meritorious invention and has failed to protect it until some one else has anticipated him has lost the opportunity of a lifetime to win a fortune with the least expenditure of time and labor.

Before an application is made for a patent, the inventor should first ascertain whether his invention is patentable. Anyone sending us a model, photo, or sketch and description of an invention will promptly receive

OUR OPINION FREE

as to patentability. If we report the invention patentable, we will guarantee to secure a patent or return our fee, and furnish the inventor with a signed contract to that effect, in the nature of a Certificate of Patentability.

OBTAINING ASSISTANCE FOR INVENTORS.

This certificate is of great assistance to inventors who require financial aid to obtain patents. It is useless to attempt to interest capital unless positive evidence is furnished that the invention is patentable. Our certificate gives this necessary assurance.

Our Illustrated 80 Page GUIDE BOOK Mailed Free to Any Address.

Send for this book, the finest publication ever issued for free distribution. It gives full information in regard to Patents, Trade-Marks, Caveats, and Copyrights, and is an invaluable book of reference for inventors. Contains 100 mechanical movements illustrated and described. Tells How To Obtain Patents, How and What To Invent For Profit, How To Sell Patents, Law Points for Inventors, etc. We also send free our little book

WHAT TO INVENT

containing a valuable list of Inventions Wanted, and valuable suggestions concerning profitable fields of invention. It also contains full information regarding prizes offered for inventions, among which is a

PRIZE OF $100,000

Offered for one invention, and $10,000 for another.

WE ADVERTISE OUR CLIENTS' INVENTIONS FREE.

All patents secured through us are advertised Free in the PATENT RECORD, of Washington, D. C., a magnificently illustrated and widely circulated Journal devoted to the interests of inventors and consulted by manufacturers and promoters when purchasing patents. Sample Copy Free.

ADVANTAGES OF EMPLOYING A WASHINGTON ATTORNEY.

Our office is near the U. S. Patent Office and we can secure patents in less time and give cases more attention than those remote from Washington. We also have the advantage of personal interviews with the Examiners and do not have to depend on correspondence, or associates.

A Beautiful Rug

These rugs are made up into any size desired. They are extra heavy and will outwear any except the highest priced foreign rugs. We clean all carpets before making into rugs, and when finished they are again cleaned and dusted by compressed air.

Rugs Are More Fashionable,

are more easily cleaned than carpets and we know you will be so pleased with the first one that you will want more of them. They are suitable for every room and every use, and are the proper and ideal sanitary floor covering.

It requires about four and one-half yards of old carpet to make a square yard of rug. All kinds of carpets used except cotton. We cannot use Smyrna rugs.

WRITE FOR ILLUSTRATED BOOKLET ON RUGS.

Whence Comes this Mighty Healing Power

All the Land Wonders at the Remarkable Cures Effected by Professor Adkin

HEALS DISEASES CALLED INCURABLE

Ministers, Doctors and Professional Men tell how he has Cured the Blind, the Lame, the Paralytic and many on the very brink of death.

FREE HELP FOR THE SICK

Professor Adkin offers to help all Sufferers from any disease Absolutely Free of Charge—Professional Men investigate his powers.

PROF. THOMAS F. ADKIN.
President of the Institute of Physicians and Surgeons.

In all parts of the country men and women, doctors and surgeons, clergymen and educators, are wondering at the remarkable cures made by Professor Thomas F. Adkin, discoverer of the Adkin Vitaopathic treatment.

Professor Adkin heals not by drugs, nor by Christian Science, nor by Osteopathy, nor by Hypnotism, nor by Divine Healing, but by a subtle psychic force of nature in combination with certain vital magnetic remedies which contain the very elements of life and health.

A reporter recently talked with Professor Adkin and was asked to invite all readers of this paper who are sick or who are worried by the ills of those dear to them, to write to him for assistance. "Some people have declared," said Professor Adkin, "that my powers are of God; they call me a Divine healer, a man of mysterious powers. This is not so; I cure because I understand nature, because I use the subtle force of nature, to build up the system and restore health. But at the same time I believe that the Creator would not have given me the opportunity to make the discoveries I have made or the ability to develop them, if He had not intended that I should use them for the good of humanity. I therefore feel that it is my duty to give the benefit of the science I practice to all who are suffering. I want you to tell your readers that they can write to me in the strictest confidence if they are troubled with any kind of disease, and I will thoroughly diagnose their cases absolutely free of charge and explain by a simple guaranteed home treatment how a complete cure should be effected. I care not how serious their cases, nor how hopeless they may seem, I want them to write to me and let me make them well. I feel that this is my life work."

So great is the sensation wrought in the medical world by the wonderful cures performed by Professor Adkin that several professional gentlemen were asked to investigate the cures. Among these gentlemen were Dr. L. B. Hawley and Dr. L. G. Doane, both famous physicians and surgeons. After a thorough and painstaking investigation these eminent physicians were so astounded at the far-reaching powers of Professor Adkin, and the wonderful efficacy of Vitaopathy that they volunteered to forsake all other ties in life and all other kinds of treatment and devote themselves to assisting Professor Adkin in his great work for humanity. With the discovery of the Adkin Vitaopathic treatment, eminent physicians are generally agreed that the treatment of disease has at last been reduced to an exact science.

In all some 8,000 men and women have been cured by the powers of Professor Adkin. Some were blind, some were lame, some were deaf, some were paralytics, scarcely able to move, so great was their infirmity. Others were afflicted with Bright's disease, heart disease, consumption, and other so-called incurable diseases. Some were sufferers from kidney trouble, dyspepsia, nervous debility, insomnia, neuralgia, constipation, rheumatism, female troubles, and other similar ills. Some were men and women addicted to drunkenness, morphine, and other evil habits. In all cases Professor Adkin treats he guarantees a cure. Even those on the brink of the grave, with all hope of recovery gone and despaired of by doctors and friends alike, have been restored to perfect health by the force of Vitaopathy and Professor Adkin's marvelous skill And, remarkable as it may seem, distance has made no difference. Those living far away have been cured in the privacy of their own homes, as well as those who have been treated in person. Professor Adkin asserts that he can cure any one at any distance as well as though he stood before them.

Not long ago John Adams, of Blakesbury, Ia., who had been lame for twenty years, was permanently cured by Professor Adkin without an operation of any kind. About the same time the city of Rochester, N. Y., was startled by the cure of one of its oldest residents, Mr. P. A. Wright, who had been partly blind for a long period. John E. Neff, of Millersburgh, Pa., who had suffered for years from a cataract over his left eye, was speedily restored to perfect sight, without an operation From Logansport, Ind., comes the news of the recovery of Mrs. Mary Eicher, who had been practically deaf for a year. While in Warren, Pa., Mr. G. W. Savage, a noted photographer and artist, who had been not only partially blind and deaf, but at death's door from a complication of diseases, was restored to perfect health and strength by Professor Adkin.

Vitaopathy cures not one disease alone, but it cures all diseases when used in combination with the proper remedies. If you are sick, no matter what your disease, nor who says you can not be cured, write to Professor Adkin to-day; tell him the leading symptoms of your complaint, how long you have been suffering, and he will at once diagnose your case, tell you the exact disease from which you are suffering and prescribe the treatment that will positively cure you. This costs you absolutely nothing. Professor Adkin will also send you a copy of his marvelous new book entitled, "How to be cured and How to Cure Others." This book tells you exactly how Professor Adkin will cure you. It fully and completely describes the nature of his wonderful treatment. It also explains to you how you yourself may possess this great healing power and cure the sick around you.

Professor Adkin does not ask one cent for his services in this connection. They will be given to you absolutely free. He has made a wonderful discovery, and he wishes to place it in the hands of every sick person in this country, that he may be restored to perfect health and strength. Mark your letter personal when you write, and no one but Professor Adkin will see it. Address Professor Thomas F. Adkin, Clerk 1, Rochester, N. Y.

USEFUL GUIDES HANDY

ILLUSTRATED—AUTHORITATIVE

VISITORS' GUIDE TO NEW YORK CITY

Pocket Size, 64 or 80 Pages.

It is a guide in every sense of the term, and is revised four times each year—brought up to date. It fits the inside coat pocket. It is profusely illustrated with scenes and objects of interest about the big city that cannot fail to be of benefit to the reader, and it contains a map of the city; also an illustrated hotel directory. This guide is 64 or 80 pages, plainly printed matter, chronologically arranged and interestingly, though tersely told, so that the visitor can, at a glance, tell where he is and what he is looking at. It leads him by the hand, as it were, from one point to another and silently shows him all the sights in New York. If you cannot come to this city, you cannot afford to be without the guide.

Ten cents at the N. Y. American Information Bureaus. By mail, fifteen cents postage to Central Bureau, Broadway, corner 37th st., New York.

ILLUSTRATED MONTHLY REALTY RECORD

Magazine Size, 48 Pages.

The cover is printed in colors on heavy green-tinted Bristol board, each number having the portrait of one of New York's noted real estate men. Several pages are devoted to a review of the month's market, given in detail by sections and upon different subjects, while other pages give chronologically the transactions in both improved and unimproved property, showing both seller and purchaser and a brief description of the property. A complete list of the building plans filed during the month is followed by a series of full-page pictures of the most conspicuous houses, private and business, that figured in the month's transactions.

Ten cents at the N. Y. American Information Bureaus. Subscription, $1 per year. Central Bureau, Broadway, corner 37th st., New York.

NEW JERSEY SEASHORE GUIDE

Pocket Size, 32 Pages.

The author, Charles E. King, who has for a generation been a resident of various sections of the coast, and knows every foot of it, from the surf far inland, tells in a breezy and delightful way everything of interest as he takes you along from place to place. He doesn't omit a single spot that may please you, and as you pass from the Atlantic Highlands, through Seabright, Long Branch, Deal and Allenhurst on to Asbury Park, Ocean Grove, Avon-by-the-Sea and beautiful Belmar, you are kept enraptured until Point Pleasant is left behind, on your way to the delightful waters of Barnegat Bay.

Ten cents at the N. Y. American Information Bureau. By mail, ten cents postage to Central Bureau, Broadway, corner 37th st., New York.

Guide for Trolley Rides and Excursions

Pocket Size, 32 Pages.

Of the thirty-two pages between the covers twenty-five pages are devoted to more than five hundred different trolley routes, embracing nearly all the territory between this city and Philadelphia, and eastward as far as Boston, including scores of delightful side trips between New England towns. Six pages are filled with interesting chronological historical sketches of the various scenes past which the trolleyist is whirled in Westchester, New England, Long Island, Staten Island and New Jersey. You cannot afford to be without the guide if you go trolleying.

Five cents at the N. Y. American Information Bureaus. By mail, six cents postage to Central Bureau, Broadway, corner 37th st., New York.

GUIDE TO THE CATSKILL MOUNTAINS

Pocket Size, 32 Pages.

This little brochure, which is of a handy pocket size of thirty-two pages, was specially written for the New York American by Howard Hendricks, the author of many other similar works, who has for forty years been closely identified with the Catskills, knowing as he does every nook, every brook, every crag and mountain peak, and who is therefore fully competent to deal with this interesting subject. Nothing is lost sight of with the aid of this silent little guide, and lovers of nature will find new beauties, fresh scenes of grandeur by following the mute index finger as it points from one historic or interesting spot to another throughout the long chain of the Catskills.

Ten cents at the N. Y. American Information Bureaus. By mail, ten cents postage to Central Bureau, Broadway, corner 37th st., New York.

SUMMER VACATION AND TOURISTS' GUIDE

Supplement Form, 48 Pages.

"Where to Go" is the title of a Summer Vacation Guide that has recently been issued in supplement form by the New York American's system of Information Bureaus. It has forty-eight pages, all highly interesting reading matter, and is fully illustrated, graphically portraying scenes and incidents in and about nearly every Summer resort in the country. It tells the vacationist where to go, and the angler where to look for fish. In short, there is nothing that the vacationist or tourist would like to know before starting out on his or her outing that is not clearly and delightfully told.

Free at the N. Y. American Information Bureaus. By mail, send postage to Central Bureau, Broadway, corner 37th street, New York.

GUIDE TO APARTMENT HOUSE VACANCIES

Catalogue Form, 24 Pages.

With weekly addenda. While the apartments, details of which as to location, number of rooms, improvements—occasionally the rentals are given—include some of five to twenty rooms, at prices ranging from $40 to $300 per month, are scattered all over the most select section of Manhattan, the catalogue has simplified matters greatly for the convenience of the house-hunter. In addition to giving full particulars and pictures of some of the houses, the city—that portion in which the high-class apartments are located—has been subdivided into sections.

Free at the N. Y. American Information Bureaus. By mail, send postage to Central Bureau, Broadway, corner 37th street, New York.

EDUCATIONAL GUIDE—SEASON 1902-03

Supplement Form, 16 Pages.

Both articles and announcements treat on art, science, literature, music, the professions, medicine, law, drama, languages and business education in all its forms. No branch of learning is omitted. There are advice and educational announcements for old and young, boys and girls, not even the kindergarten, by Mrs. John A. Logan, being forgotten. Other authors include Ella Wheeler Wilcox, Dorothy Dix, Franklin H. Sargent, A. J. Goodrich, C. C. Gaines, Garrett P. Serviss, Henri Pene du Bois, Herwegh von Ende and Professor F. Berger.

Free at the N. Y. American Information Bureaus. By mail, send postage to Central Bureau, Broadway, corner 37th street, New York.

Instant Relief from Catarrh

WE WANT EVERYBODY

—young and old, who is at all troubled with CATARRH, HAY FEVER, TONSILITIS, QUINSY, HEADACHE, DEAFNESS or any CATARRHAL AFFECTIONS of the nose or throat, to try CROWN CATARRH POWDER AT OUR EXPENSE. All you have to do is to send us your name and address on a postal card and we will mail you, prepaid, a sample which will give you immediate relief. This is one plan of making this wonderful remedy known to you—a sufferer.

CROWN CATARRH POWDER

Is an immediate relief and final cure for all symptoms and forms of Catarrh. It is prepared according to the prescription of a well-known Nose and Throat Specialist. It is not a "Patent Medicine" and should not be used indiscriminately, as such. It should be used faithfully, according to directions, just as every prescription should be used. If Crown Catarrh Powder is used in this way, it will cure Chronic Catarrh, even severe cases of long standing, Nasal Discharge, no matter how purulent or foul or profuse, Tonsilitis, and all forms of sore throat, Cold in the Head, Hay Fever, and many cases of Deafness. Your ailment will never better itself—on the contrary, will continue to grow worse.

WE GUARANTEE IT—SO YOU TAKE NO CHANCES

25 cents per package, at all good druggists or by mail, prepaid on receipt of price by the sole manufacturers.

AGENTS will find this a great seller. Sure to make a cure and a friend wherever used. Liberal discounts. Write for exclusive territory.

CROWN PHARMACAL CO.

108 Fulton Street, New York, U. S. A.

Every household should possess a

CROWN THROAT BLOWER

For use in Tonsilitis, Laryngitis, Sore Throat and all throat troubles—a perfect blower with which you blow down your own throat. Saves illness and doctor's bills. We send it safely packed, complete, for 50 cents. Address CROWN PHARMACAL CO., 108 Fulton St., New York

The Whispers of Fancy

Never breathed a more marvelous story than that told in the fascinating free book, "THE PHILOSOPHY OF PERSONAL INFLUENCE." It reveals the secrets of success and explains that intangible, subtle something called "PERSONAL MAGNETISM" that holds the world in bondage and makes one person obedient to the slightest wish of another.

Have you failed to succeed?

Read this book and learn the reason why. Have you hoped and wished and worked in vain while others, seemingly without an effort, have forged ahead in the race of life? Your failure is not blind chance; their success is not an accident. There is a cause—a reason—for every effect. This remarkable book contains the key. It draws the line between success and failure so bold that you cannot help but see it. Read it and learn the secret of Napoleon's success, of Rockefeller's vast accumulation of wealth. You can master this marvelous power at your own home in a few days, and wield an influence that will make you master of your destiny. THE BOOK IS ABSOLUTELY FREE. A postal card will bring it while the present edition lasts. Write to-day. Address,

THE ART PRESERVATIVE

In none of the arts is the advance of the beautiful more pronounced than in that of the art preservative of arts. And it is by a return to the past, idealizing the typography of the Fifteenth Century, that the highest form of the beautiful has been attained. Within ten years the greatest changes for the better have been made. From the inception of printing from movable types, the masters who have handed down the honorable calling have taken pride in their work like all true artists, and it is safe to say that the time will never come when the handicraft of the type-founder will be a lost art. The demand for the artistic in type, as well as in the other finer fancies of the age, is growing, and is being met by "the founders," by which appellation the printers of the entire country designate the American Type Founders' Company, embracing the best-known and the oldest established concerns of a dozen cities.

This Company is the originator of all the leading type designs, and has unequalled facilities for supplying everything required in printing offices. It has lately issued very attractive specimen books, which cover the widest range in type faces in both plain and original designs. Among the new faces are the Jenson Condensed, the Abbott, the Tiffany Text, Engravers' Italic and Arlington Italic.

Additional specimen sheets are constantly being issued from the office, corner of Rose and Duane streets, New York City, showing the new faces as soon as they are brought out for the public verdict.

EYESIGHT RESTORED AND DEAFNESS CURED

By No Means Until "ACTINA" Was Discovered

There is no need for cutting, drugging or probing the eye for any form of disease. There is no risk or experimenting, as thousands of people have been cured of blindness, failing eyesight, cataracts, granulated lids and other afflictions of the eye through this grand discovery, when eminent oculists termed the cases incurable.

Mrs. A. L. Howe, Tully, N. Y., writes: "Actina removed cataracts from both my eyes. I can read well without glasses. Am 65 years old." Robert Baker, 80 Dearborn St., Chicago, Ill., writes: "I should have been blind had I not used 'Actina.'"

DEAFNESS CURED

Ninety-five per cent of all cases of deafness brought to our attention is the result of chronic catarrh of the throat and middle ear. The inner ear cannot be reached by probing or spraying, hence the inability of aurists or physicians to cure. That there is a scientific cure for deafness and catarrh is demonstrated every day by the use of Actina. Actina also cures asthma, bronchitis, sore throat, weak lungs, colds and headache; all of which are directly or indirectly due to catarrh.

Actina is Sent on Trial, Postpaid

Call or write us about your case. We give advice free and positive proof of cures. A valuable book—Prof. Wilson's 100-page Dictionary of Disease, Free. Address New York & London Electric Association, Dept. 262, 929 Walnut St., Kansas City, Mo.

THE DANGERS OF EPILEPSY

The Epileptic, or Those Having Fits or Falling Sickness Are Never Safe When Alone.

A Remedy Has Been Discovered That Quickly and Permanently Cures This Dangerous Disease.

FULL 16oz. BOTTLE FREE

Coming with the suddenness of the lightning's stroke, epilepsy strikes down its victims wherever they may be. The epileptic cannot even go upon the street and feel that he is safe, for he may be stricken down and fall beneath the wheels of a car or wagon. A woman residing in a Missouri town was burned to death the other day while preparing dinner. Being attacked suddenly while standing by the stove, she fell across it and was literally cooked to death, being unable to make

the slightest move or sound. Thousands of accidents in every way as horrible as this have befallen the victims of epilepsy and hundreds have been permanently cured of this dreadful disease by it. Geo. H. Newell, of Burlington, Kas., says in regard to this remarkable remedy: "I was a victim of epilepsy for over twelve years—had three or four fits a week and my mind was giving away. I tried the best physicians, but had given up hope of being cured. I began taking Dr. Grant's treatment and felt better within a week. Continued taking the medicine until cured and have never had even a symptom of epilepsy since—now over ten years ago. I can heartily recommend Dr. Grant's remedy for I know of others beside myself whom he has permanently cured. It is beyond my power to repay the debt of gratitude I owe him and his medicine, as mine was termed a hopeless case. I can say to all who suffer as I did, do not lose courage, for I am sure that you can be permanently cured." To prove to all epileptics that he can cure them Dr. Grant will send a full 16-oz. bottle of his remarkable discovery ABSOLUTELY FREE. If you are a sufferer, simply send your name and address and the medicine will be sent free. Dr. F. E. Grant, C. A., Room 1,000, New Ridge Bldg., Kansas City, Mo.

Any Sick Person Can Be Cured

FREE SAMPLE!

IF YOU ARE SICK the cause of your trouble lies in your stomach, liver, kidney, bladder, bowels, or the mucous membranes lining the various passages and cavities of the body. In **VERNAL SAW PALMETTO BERRY WINE** there is a remedy which acts directly upon these members, and restores them to a healthy normal condition. It increases the bodily excretions and rids the system of all the dead, useless matter. This excreta, if it remains in the body, will ferment and poison the entire system.

VERNAL SAW PALMETTO BERRY WINE not only drives out this sewage, but it also tones up the blood and nervous system so that these troubles can never occur again.

We don't ask you to take our word for this, simply write for a trial bottle of this peerless remedy. We send it, **ABSOLUTELY FREE**, by mail, postage prepaid. A trial treatment will give you a regular internal bath and make you feel as well and hearty as you ever felt in your life. If you are played out, got the blues, or feel sick in any way, don't delay but write at once to the **VERNAL REMEDY CO. 138 Seneca St., Buffalo, N. Y.**, for a free trial of their superb remedy. **Remember, it won't cost a cent.**

DEAFNESS & HEAD NOISES CURED

quickly at home by an invisible device; helps ears as glasses help eyes, after all remedies have failed. Music, conversation, whispers heard. No pain. Self-adjusting. **Used and endorsed by physicians.** Write to F. Hiscox, 229 Lafayette St., Newark, N. J., for 48-page book **FREE**

Save Your Eyes

Without Using the Knife

THE MADISON ABSORPTION TREATMENT

the result of years of scientific study and research, is a system of medication by which I absolutely cure CATARACTS, SPOTS, SCUMS, GRANULAR LIDS, OPTIC NERVE and ALL OTHER EYE DISEASES.

Without any Surgical Operation

You who are afflicted with eye trouble in **ANY FORM** can be permanently cured at your own home. I am especially desirous of communicating with those who have become discouraged through repeated failures of other treatments, all so-called incurable cases. I have spent over a quarter of a century in the study and treatment of eye diseases alone and have cured thousands.

Mr. E. BLACKMAN, Rochelle, Ill., who had been blind from cataracts for a number of years, was cured at home.

I STRAIGHTEN CROSS EYES

by a new method. **NO KNIFE, PAIN or RISK.** I have cured upwards of 10,000 cases and not one failure.

MISS ALICE E. SHOUP, Secor, Ill., writes:—Your treatment without knife or pain was an entire success, as my eyes have remained perfectly straight for the past ten years.

My latest book in colors and my advice will be sent you FREE. Write me a full history of your affliction. Letters in any language promptly answered.

EVERY WOMAN CAN BE BEAUTIFUL

SUPERFLUOUS HAIR DESTROYED FOREVER BY A WONDERFUL ELECTRICAL INVENTION WITHOUT PAIN—WITHOUT INJURY—WITHOUT EXPENSE. A GOD-SEND TO EVERY TORTURED WOMAN FREE OF CHARGE.

Every woman can now have beauty without injury as far as superfluous hair is concerned, for the world has been given a great invention, a never-failing method for the removal of this embarrassing blemish. This great invention is called the **MAHLER ELECTRICAL APPARATUS**, and is manufactured by Daniel J. Mahler, of Providence, R. I., who has been established over twenty years as a specialist in the treatment of superfluous hair, who has found after twenty years of continuous practice that the only way to bring about a quick, permanent, painless, non-injurious cure is by the use of his new electrical device. If you are a woman afflicted with Superfluous Hair, Moles, Warts, Red Veins, or Birthmarks, and want to make the very best impression in society with absolutely nothing to mar it, you need the **MAHLER ELECTRICAL APPARATUS.** It is the least painful, the most thorough, and the very best of any method or process for the removal of Superfluous Hair, to which your attention has been or may be directed. If you are afflicted with Superfluous Hair, Moles, Warts, Red Veins, or Birthmarks, just remember that the perfect remedy, the quickest remedy, the surest remedy, is here offered you free of all expense.

Every other kind of treatment is injurious. Every kind of treatment excepting electricity is injurious, and in time will not only cause the skin to wither, wrinkle, become rough, red, inflamed, unsightly, and sore, but the hair will not be destroyed. It will grow stronger than ever. Mr. Mahler will positively guarantee that nothing except electricity will effect a lifelong cure. He will also guarantee by taking a binding oath, and giving a legal guarantee, that the **MAHLER ELECTRICAL APPARATUS** is a never-failing means to rid one's self of every form of hair blemishes. The **MAHLER ELECTRICAL APPARATUS**—any woman can operate it. In the **MAHLER ELECTRICAL APPARATUS** the generating power and the method of its control is simplicity itself, so that any one may understand it and receive benefit from it. The patient does her own operating in the privacy of her own home; the operation is accomplished with no loss of time and without the least pain, and is complete, quick, and permanent. Write to-day—write quickly, and learn how to secure the valuable apparatus **WITHOUT IT COSTING YOU ONE CENT.**

D. J. MAHLER

Suites 731-752 Mahler Building, ***PROVIDENCE, R. I.***

TO ALL WHO SUFFER FROM

Spinal Deformities

85 per cent cheaper than the old methods. **100 per cent better.** Weighs ounces where others weigh pounds. For men, women and children; none too young, none too old to be relieved. We offer the only Scientific Appliance ever invented for the relief and cure of this unsightly condition; cured the inventor, Mr. P. B. Sheldon, of curvature of the spine of **thirty years'** standing.

Throw away the cumbersome and costly plaster-of-Paris and sole-leather jackets. Our appliance is light in weight, durable and conforms to the body as not to evidence that a support is worn. It is constructed on strictly scientific anatomical principles, and is truly a godsend to all sufferers from spinal troubles, male or female. We also make Scientific Appliances for protruding abdomen, weak back, stooping shoulders. Send for free booklet and letters from physicians, physical instructors, and those who know from experience of our wonderful appliances. **Satisfaction guaranteed.** Write to-day for measurement blank. Don't wait.

I am permanently cured of a weak and deformed spine by the use of the Philo Burt Company's appliance. Previous to procuring the appliance I was unable to stand on my feet; after wearing it for six weeks I could walk with crutches. To-day I can do as much work as any able bodied man. I cannot say too much for your appliances; they are so light and comfortable and can be removed so easily.
GEO. LIST.
Wesleyville, Pa.

Mr. List writes above after six years' experience; the latter two he has worn no support or brace whatever.

CORNELL
I YELL I YELL

The original and superior points of merit combined in the

CORNELL INCUBATORS AND BROODERS

are a step ahead. They are not copies. They are the direct result of a series of experiments, successfully solving the most vital problems—*ventilation, moisture and temperature.* The methods and system employed to regulate and govern, in nature's way, these three vitally important points, is where the CORNELL gets its strongest recommendation. They hatch the healthiest and most vigorous chicks and the largest percentage, ever obtained by artificial incubation.

We have also recently purchased the business, patents, name and good will of the PEEP-O'-DAY BROODERS, permanently consummating a combination that stands without an equal. Our new catalogue is a work of art, as well as a book of value to any person interested in poultry culture. The catalogue contains a finely illustrated, detailed description of the above machines. It is a valuable book, and is mailed free to all interested persons. Ask for it, and mention the American Almanac. Address:

CORNELL INCUBATOR MFG. CO., Ithaca, N. Y.

Sold 130 out of 132 put in brooders.

Dear Sirs: Scotland, Mass.

I have six of your No. 4 Peep-O'-Day Brooders, and they are all you claim for them. I put 132 chicks in two brooders, and sold 130 at seven weeks old. Yours truly,

T. F. LAWTON.

The Manhattan Elevated Railway

In New York City—runs to all railroad stations, ferry landings, steamboat piers and through the heart of the shopping districts. One fare—five cents—will carry you from Bronx Park to South Ferry on 3d Ave. line, or from 155th St. to Battery and South Ferry on 9th Ave. and 6th Ave. lines. Express trains south bound A.M., north bound P.M., 3d and 9th Ave. lines during rush hours. Free transfers from one division to another at South Ferry.

Three cents in addition to regular five cent fare for transfer to all lines of the 3d Ave. surface system.

THE NATURAL BODY BRACE CURES WOMEN

SIMPLE COMFORTABLE ECONOMICAL

10 Years of Demonstrated Success.

It is an **external brace** that does not slip out of position, that supports the whole body and holds all the internal organs in correct position as nature wants them and as nothing else can do—that brings strength to back and loins, lungs and abdomen, cures ailments of the digestive and generative organs. Note the shoulder and back support; you cannot have a natural, complete, effective, Body Brace without them; an abdominal supporter cannot do the work. By the use of the Natural Body Brace women secure

COMFORT—HEALTH—BEAUTY.

It is a complete cure in itself, requiring no medicine, involving no publicity, no tedious delay, no metal springs around the body, nothing objectionable. Adjustable at all points to fit any figure (thin or stout) with absolute comfort and effectiveness. **Invaluable to the Prospective Mother.** Thousands of letters like this come to us yearly:

34 Walnut St., Dayton O., April 19, 1902.

Two years ago I bought a Natural Body Brace which has cured me of general female weakness in its worst forms, including headache, backache, bearing down pains, stomach trouble, menstrual trouble and falling womb. Before wearing the Brace I was almost an invalid, always under the doctor's care. Now I do all my work for a family of six. I cannot find words to praise it as it deserves.

MRS. C. M WILHELM.

FREE TRIAL FOR 30 DAYS to prove that **you** need the Brace. Write to-day for our **Special Trial Offer**, prices and illustrated book, all **mailed free** in plain, sealed envelope. Address

FALLING HAIR AND BALDNESS ABSOLUTELY CURED

There is but one way to tell the reason of baldness and falling hair, and that is by a microscopic examination of the hair itself. The particular disease with which your scalp is afflicted must be known before it can be intelligently treated. The use of dandruff cures and hair tonics, without knowing the specific cause of your disease, is like taking medicine without knowing what you are trying to cure. **Send three fallen hairs** from your combings, to Prof. J. H. Austin, the celebrated Bacteriologist, who will send you **absolutely free a diagnosis** of your case, a booklet on care of the hair and scalp, and a sample box of the remedy which he will prepare specially for you. Enclose 5c postage and write to-day.

PROF J. H. AUSTIN, 812 McVicker's Bldg., Chicago, Ill.

DON'T MARRY, DOCTOR or despair. "DON'T DO A THING" till you see clearly what's best by aid of **FLASHLIGHTS ON HUMAN NATURE**, on health, disease, love, marriage and parentage. Tells what you'd ask a doctor, but don't like to. 240 pages, illustrated, 25 cents; but to introduce it we send one only to any adult for postage, 10 cents. M. HILL PUB. CO., 129 East 28th St., New York.

PLAYS for Home Theatricals. For 10 cents we send 8 Complete Plays, also 100 page Catalog of Theatre Goods, Wigs, etc. **BATES PLAY CO., Dept. 5, BOSTON, MASS.**

IT IS CURING CONSUMPTION EVERY DAY IN THE YEAR

The Medicine that Is Doing More than All Other Agencies to Remove Consumption from the World

Greatest Achievement of All the Years Science Has Been Fighting Disease

Frederick Hammann's case has become famous the world over. It was a SCIENTIFIC TEST by a great New York newspaper and IT SUCCEEDED. Since then, in 1902, Hammann's life was insured by the New York Life Insurance Company. SEVERAL THOUSAND CASES were cured IN AMERICA in 1902 by this medicine, supplied by the American Bureau established for this purpose on Hammann's return from Vienna. He is connected with the Bureau and answers all questions cheerfully. Tens of thousands are being CURED OF CONSUMPTION, in 1903, who must have succumbed except for this discovery of the Viennese physician. Home is the place to take the cure, which is indorsed and prescribed by the best physicians. It is in no sense a patent medicine, but BECAUSE OF DIFFICULTY OF COMPOUNDING, and of substitution, IT WAS DEEMED BEST TO SUPPLY THE REMEDY FROM A CENTRAL DEPOT AT THE LOWEST PRICE which would make the Bureau self-supporting. The success of the authorized medicine has led to the offer of substitutes with similar names, which are either worthless, or dangerous, or both.

On application the Hoff Book, giving full particulars of home treatment, diet, exercise and simple hygienic requirements, will be sent FREE, together with the history of several hundred American cures.

HOW TO GET THE REMEDY. The American Bureau desires the cure to be in the hands of every sufferer. It is humanity's medicine. For $1.00 we will mail a bottle of Professor Hoff's Cure for Consumption, containing one month's treatment, six bottles for $5.00.

Extreme caution must be used that the above Triangular Trade Mark is on every bottle, as no other medicine is authorized by the American Bureau of the Professor Hoff Cure.

American Bureau of the Prof. Hoff Cure,
